JACKSON STATE UNIVERSITY
Request for Proposals (RFP) 26-04
Campus-Wide Pest Control and Management Services

Questions and Answers
Addendum #2

1. **Question:** Are you able to provide me with the current pricing for pest control services and/or the most recent bid tabulation?

   Answer: Current contract pricing and any available prior bid tabulations may be obtained through the University's Purchasing Department, subject to applicable public records requirements. Proposers are expected to develop independent, competitive pricing based on the scope of services, service frequencies, and requirements outlined in RFP 26-04.

2. **Question:** Do we need to include the "excluded" areas on our pricing sheet or will services not be provided in these areas at all?

   Answer: Areas identified as "excluded" are not included in the base scope of services and should not be incorporated into the proposed base pricing. However, the University reserves the right to request pest control services for these locations on an as-needed basis. Any such services will be subject to separate authorization and mutually agreed-upon pricing, consistent with the terms of the resulting contract.

3. **Question:** To confirm, are the "Auxiliary" areas twice a month, or every other month?

   Answer: Auxiliary areas are to receive pest control services twice per month (biweekly), not every other month. Proposers should incorporate this frequency into their pricing for all applicable auxiliary facilities identified in the RFP.
