Graduation Date: December 2017

Hometown: Florence, MS

Position:

Systems Engineer

Organization Name & Location:

Raytheon
Aurora, Colorado

How Has The Career Services Center Helped You?

Career services helped me get on front of the right people at these companies. Through career services I was able to land my first internship. That set me up for the job I'm in now.

Advice For Other Students:

The career advice I'd give to other students would be to APPLY!! It doesn't matter the position or if you feel you're not fully qualified. You could still land the job. When it comes to some of these jobs, any related experience is good experience. Also, make yourself known to these recruiters and keep in touch with them. They may not have anything for you in the beginning but that can change overnight.

Career Goals:

In the future, I plan to acquire my Cisco certifications and get into the field of Cybersecurity.
