Directorate in Rome, NY

How Has The Career Services Center Helped You?

The Career Services Center has provided me with many great opportunities to network and gain additional interview experience with visiting recruiters.

Advice For Other Students:

Spend some of your free time brushing up on skills that align with the jobs that you are interested in applying for. Try to maintain good grades and apply for internships. When interviewing, research interview questions and study them ahead of time so you can better anticipate the questions that may be asked in an interview.

Career Goals:

After completing my PhD I will work for a Department of Defense research laboratory.
