

JACKSON STATE UNIVERSITY CAREER SERVICES CENTER

Davell M. Carter

Major: Biology Pre-Medicine

Graduation Date: April 2020

Hometown: Mt. Clemens, MI

Position:

Summer Undergraduate Researcher

Organization Name & Location:

New York University Langone Medical Center
New York City, New York

How Has The Career Services Center Helped You?

Career Services center really aided me in the sense that they have always kept me on the look out for new opportunities and alerted me to the general fact that there are many professional opportunities for students of color.

Advice For Other Students:

Always be on the lookout for summer research opportunities if you want to be in any field of medicine. There are so many out there for young students of color and you never know what kind of professional connections you'll build.

Career Goals:

Upon graduation I plan on pursuing a dual MD/Ph.D. degree, with a Ph.D. in Pharmacology, or Virology. From there I would like to work in academia as a researcher or faculty member.
