How Has The Career Services Center Helped You?

I have found the career service center to be helpful in researching different job opportunities and well-informed in the path I want to eventually make a career. The center keeps the students up to date with job fairs that have allowed me to meet different employers. These prospects enlighten me of the type of organization I would want to work for in the future.

Advice For Other Students:

The advice I would offer would be do not let anything deter you from going out to get the job you want; no matter how big or small. Do not allow others to contest your agenda with the assumption of their intentions. Utilize the resources that are offered through the Career Service Center and other locations that provide career advice.

Career Goals:

I want to retire from military service and to eventually become a sports agent or scout. The military and my passion for sports have provided me with ability to learn team-work, leadership, and discipline. Being a sports agent would allow me the opportunity to help other athletes surpass their goals.
