How Has The Career Services Center Helped You?

Career Services Center always keeps me abreast of the most current opportunities for volunteerism, career pathways, and internships.

Advice For Other Students:

The most valuable job search and career advice I can give to other students is to be diverse, dedicated, prepared, and persistent. Don't be afraid of the NOs, because you will receive some. Flip NO around and turn it into game ON! Then with all the passion you can muster, use your NOs to motivate yourself to achieve above and beyond your wildest dreams!

Career Goals:

I aspire to be a great researcher who helps to solve some of the biological and environmental issues of our time. I also love helping and teaching others to appreciate science. My personal acronym for S.C.I.E.N.C.E. is Scientifically, Conscientiously, & Intellectually Evaluating Nature's Creations Experimentally.
