**Major:**

B.S. Biology

MPH Environmental and Occupational  
Health

**Graduation Date:**

July 2018

**Position:** Public Health Advisor

**Organization Name & Location:**

Montgomery Area Wellness Coalition, Montgomery, AL

**How Has The Career Services Center Helped You?**

The Career Services Center at Jackson State University does a great job connecting students to employers in the Metro Jackson Area who are

willing to give recent graduates a head start in their career. Those connections helped me gain an internship with the Mississippi State

Department of Health, which turned into a job for me once I graduated

with my MPH in 2018. Having that experience on my resume is what I

believe contributed to me obtaining this fellowship with the CDC. I am

excited to see what happens next for me after these two years.
