

Spring 2017 Seminar Schedule

Date	Speaker	Title
January		
13	Seminar Students Only	
20	Dr. Fengxiang Han Professor Department of Chemistry and Biochemistry Jackson State University	Workshop on Scientific Writing
27	Dr. Renā A. S. Robinson Assistant Professor Department of Chemistry University of Pittsburgh	Pushing forward multiplexing capabilities to study the Alzheimer's disease proteome
February		
3	Dr. Robert J. Doerksen Associate Professor Department of BioMolecular Sciences School of Pharmacy, University of Mississippi	Computational medicinal chemistry approaches to discovery of novel cannabinoid receptor ligands.
10	Janet E. Macdonald Assistant Professor Department of Chemistry Vanderbilt University	Nanostructures of the Copper and Molybdenum Sulfides: New chemistry from the surface to the core
17	Dr. Derek L. Patton Associate Professor School of Polymers and High Performance Materials University of Southern Mississippi	Thiol-Mediated Photopolymerizations: Routes to Functional Polymeric Networks, Surfaces, and Particles
24	Mississippi Academy of Sciences Meeting	
March		
3	Dr. Karl J. Wallace Associate Professor The Department of Chemistry and Biochemistry The University of Southern Mississippi	TBA
24	Dr. Elizabeth T. Papish Associate Professor Department of Chemistry The University of Alabama	Proton responsive ligands and metal complexes thereof for energy related catalysis and for pH activated anticancer properties
April		
7	Student Research Presentations	
21	Dr. Scott Grayson Joseph H. Boyer Professor of Chemistry Department of Chemistry Tulane University	Exploring the effect of polymer shape on biomedical applications: Cyclic polymers for gene delivery
