Research Productivity

- The amount of externally funded grants for the Department of Civil & Environmental Engineering has been among the highest nationwide.
- The amount of externally funded grants for the Department of Civil & Environmental Engineering during the 2016-2017 Academic Year was 4.9M.
- Approximately 80% of all equipment has been obtained through externally funded grants.
- Faculty and students are very active in publishing in reputable and refereed top engineering journals.
- Two faculty are fellows of the American Society of Civil Engineers (ASCE).
- JSU Civil Engineering has been a leader and nationally recognized in several areas. Some examples are: 1) Full Scale Levee Strengthening; 2) Bio-Mediated Soil Improvements; with numerous publications in top engineering journals.
- The Ph.D. Program has been carefully designed to produce high quality PhD graduates with publications in top journals.
- One faculty member obtained the prestigious National Science Foundation CAREER grant.
Graphical Representations of Comparison between the Equipment Obtained through University Budget and the Externally Funded Grants
