Apple iPad

iPad 107: Teaching with the iPad using Apple TV

Course Description
Using AirPlay Mirroring via the Apple TV, instructors can display the content on the iPad—from podcasts and lectures to audio and video—on a HDTV or projector, wirelessly. Instead of having students crowd around one small screen, instructors can fill a classroom with digital learning on a larger screen.

Learning Outcomes

- Ability to connect the Apple TV to a HDTV and projector.
- Ability to use educational apps, website content, documents, presentations and video to teach an entire classroom via a larger screen using an iPad.

Outline

- Overview of AirPlay technology.
- Understanding the Apple TV homescreen.
- Display content of work from an instructor or student’s iPad using Airplay.
- Play audio and video files from an iPad while being mobile in the classroom.
- Demonstrate with apps and websites from mirroring iPad while being mobile in the classroom.
- Use the iPad as a virtual whiteboard.
- Play podcasts, iTunes U content, music and photos all through your iTunes account.
