Transfer Credit Policy

A rigorous system of evaluating transfer credit has been instituted which ensures that appropriate transfer credit is conferred and that transfer courses meet the program and ABET requirements. The policies for acceptance of transfer students are well defined and enforced.

The initial evaluation of courses completed by transfer students from other colleges and universities is performed by the Admissions office. Once this process is completed, the Department evaluates the transfer credit. The student must meet with his/her adviser during the first semester of residence at JSU to complete the transfer credit procedure. The student must arrange for sending a copy of his/her transcripts, as well as catalog course descriptions, from other institutions, to his/her adviser. The following guidelines will be followed.

- With the exception of surveying and general engineering courses, and some courses from international universities, all civil engineering courses accepted for transfer credit must have been taken in an ABET accredited program.
- Only college courses in which the grade is “C” or higher will be accepted. Jackson State University does not accept transfer courses with “D” grades.
- Catalog course description and, in some cases, course syllabus and student’s notebooks and examinations are required to ensure that course content and objectives are substantially similar to those of JSU courses.
- Students ordinarily receive no transfer credit for courses designed specifically for technical and vocational career programs.
- In some cases, the evaluations of courses other than civil engineering courses are performed by the Department offering the course.
- Existing JSU students, who plan to take courses at other colleges and universities, must obtain approval from the Department prior to enrollment to ensure that their courses are transferable. Please obtain “Request for Prior Transfer Credit Approval” Form from the Department.
- All transfer credit policies mandated by the University, and described in the Undergraduate Catalog, will be followed.
- For additional information, contact the Department.

Request for Prior Transfer Credit Approval Form

The continuing civil engineering students are required to obtain approval for Departmental acceptance of transfer credit prior to enrollment at other colleges to ensure it meets the Departmental transfer policy. In addition, the students must observe all transfer credit policies mandated by the University.
