

ARM 1

The charts below show the impact of Jackson State University completers on P-12 learning and development in their first three years of teaching as compared to all teachers statewide and all EPP completers. Results show the JSU completers are largely on par with all teachers in the state and EPP completers in terms of the average scale score of completers in state tested content areas. JSU completer's % of students scoring at proficient or advanced levels trail both state and EPP completer % in most grades and state tested content areas. We believe that this can partially be attributed to the population of students that our completers serve. The current data collected only measures overall performance, not student growth. We do, however see a pattern of increased performance year over year (i.e. year 2 & 3 teachers have higher percentages scoring proficient and advanced than year 1 teachers).

**Data for 2022-2023 academic year is currently being collected, and will not be released until late fall 2024 as part of the Mississippi Impact Report Card.*
