

JSU Civil Engineering Alumni

There have been more than 350 graduates (BS, MS, and Ph.D.) since our first graduate in 2005. The Civil engineering alumni have been very successful in technical and leadership positions. They often work in consulting firms and government agencies. Several have started their own engineering firms, or serve vs Vice President or CEO of engineering firms. Civil engineers contribute heavily to the economy of the State and the nation by addressing the challenges in infrastructure design, construction, maintenance, and improvement. A partial list of the companies/government agencies that our graduates work is shown below.
