

Civil Engineering Faculty publishes a new Book.

Dr. Farshad Amini, P.E., Fellow, ASCE, Professor & Chair of the Department of Civil & Environmental Engineering, Industrial Systems and Technology, published a new book titled “Hydraulics of Overtopping Levees”. It is published by CRC Press, Taylor & Francis. The co-authors are Lin Li, Yi Pan, Siyu Yuan, and Bora Cetin. This book is based on Professor Amini’s research in the area of innovative techniques for Strengthening Levees during Hurricane Overtopping Conditions. This research grant was funded by the Department of Homeland Security (DHS), for a total amount of 1.45M.
