

What are Effects of Drugs on Driving?

Marijuana
Slows reaction time and impairs judgement of time and distance

Methamphetamine or cocaine
Aggressive and reckless behaviors

Many substances can impair driving, including alcohol, some over-the-counter and prescription drugs, and illegal drugs.

Over-the-Counter
Drowsiness, blurred or double vision, dizziness, and other side effects

Opioids
Drowsiness and impaired memory and thinking skills

Funded by the Mississippi Office of Highway Safety

Driving impaired by any substance—alcohol or other drugs, whether legal or illegal—is against the law in all 50 states.

Impaired drivers can't accurately assess their own impairment – which is why no one should drive after using any impairing substances.
Remember: If you feel different, you drive different.

Responsible Behavior

We can all save lives by making smarter choices.

- Plan ahead for a sober driver, if you plan to use an impairing drug.
- Don't let friends get behind the wheel if they're under the influence of drugs.
- If you're hosting a party where alcohol or other substances will be used, it's your job to make sure all guests leave with a sober driver.
