

ONLINE GRADUATE CERTIFICATE PROGRAM IN LIST PROGRAM

“DISASTER PREPAREDNESS & COMMUNITY RESILIENCE AMONG VULNERABLE POPULATIONS”

PROGRAM

The post-baccalaureate certificate in Disaster Preparedness & Community Resilience Among Vulnerable Populations will serve as a multi-disciplinary program that will bring together a diverse group of disciplines that account for the Departments of Criminal Justice, Journalism and Media Studies, Psychology, and Civil & Environmental Engineering and Industrial Systems & Technology. This program will cover the basics of disaster preparedness and mitigation, effective risk communication, in addition to the behavioral and social science aspects to assess the mental and emotional impacts before, during, and after a disaster. The program will aim to provide students with the basic knowledge, skills, and motivation to take actions to reduce their vulnerability so that they remain safe. Students will be introduced to topics that include disaster preparedness, building community resilience among vulnerable populations, psychological trauma associated with disasters, risk communication, and be offered hands-on experiences through state-of-the-art simulation exercises. This certificate program is ideal for employees of emergency management agencies at the local, state, and federal levels, law enforcement officers, media/journalists, mental health professionals, health care professionals, community managers, community-based organizations, engineers, educators (k-12), university employees, administrators, and staff, etc. This program is 100% online.

Designated certificate course credits may be transferable to the Technology Education, Journalism and Media Studies, and Criminal Justice (pending further approval by respective program designees).

OBJECTIVES

Upon completion of this program students will be able to:

- Identify all the essential components of disaster management preparedness for vulnerable populations and underserved communities;
- Determine knowledge of the administrative role of the Emergency Manager and safety personnel;
- Define resiliency and individual and community preparedness and recovery initiatives;
- Understand the technology applications used in the functions of Emergency/Disaster Management;
- Understand the psychological impacts of disasters and strategies to aid in resiliency;
- Identify media sources and strategies for concise and correct communication for timely emergency notifications and alerts; and
- Understand the public safety concepts of managing both man-made and natural disasters.
