

```
import java.util.*;
class generateRandomNumbers{
    public static void main(String[] args){
        try{
            int num = Integer.parseInt(args[0]);
            Random randGen = new Random(System.currentTimeMillis());
            for (int i = 1; i <= num; i++)
                System.out.println(i+" "+randGen.nextDouble());
        }
        catch(Exception e){e.printStackTrace();}
    }
}
```
