

Presenting on Presenting

Clear, Effective Strategies

Craig A. Meyer, PhD
February 3, 2026

What Makes a “Good” Presentation?

The Planning Stage

- **Topic**
- **Audience**
- **Content**
- **Take Away**

The Check Stage

- ✓ Check the Room
- ✓ Check the Tech
- ✓ Checklist
- ✓ Check in

The Presenting Stage

- Nerves
- Water
- Handouts
- ADA Compliance
- Problems
- Clothing

Things to Attend To

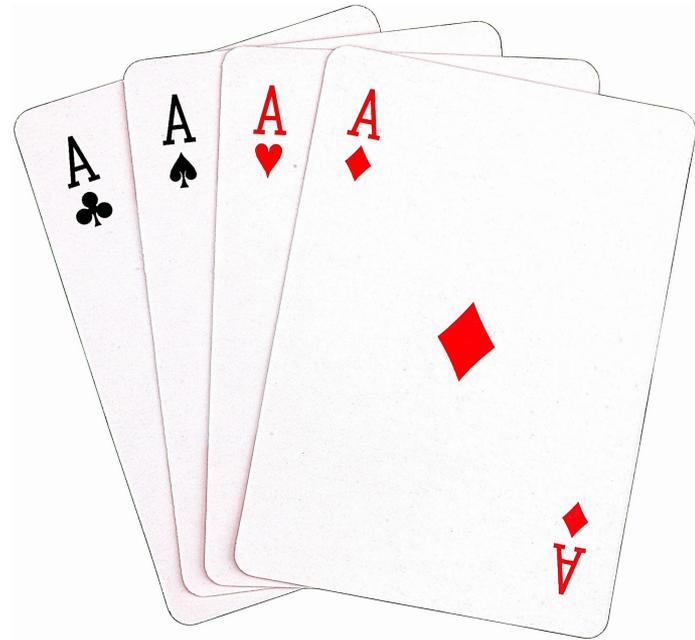

- **Voice**
- **Tone**
- **Pace**
- **Eye Contact**
- **To Read or Not to Read**
- **Movement**
- **Pay Attention**

More to Attend to *(often overlooked)*

- **Hard Copies** *(and Backups)*
- **Microphone**
- **CART** (Communication Access Realtime Translation)
- **Impairments**
- **Copyright**

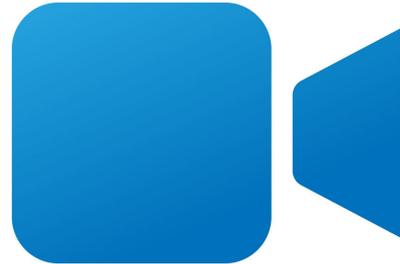

Conference Presentations

- Check the Deck
- Meet and Greet
- Read and Feed
- Q & A
- Stay and Smile

Deck Matters

- **In Person**
- **Zoom**
- **Mix**
- **Balance**

Contents of a portfolio

A portfolio is composed of three main elements:

- Content: this includes the actual work you want to showcase and can be anything from writing samples to photographs or videos
- Design: the design should reflect your personality and style while remaining professional. It should also make it easy to navigate the portfolio
- Summary: a brief summary at the beginning of the portfolio will help provide an introduction to your work and give visitors a better understanding of yourself and what you have created

AI Opportunities for Educators

Time-Saving Automation

Automate grading, lesson planning, and performance analysis to focus on meaningful student interaction.

Personalized Learning

Create customized learning paths that adapt to each student's progress in real-time.

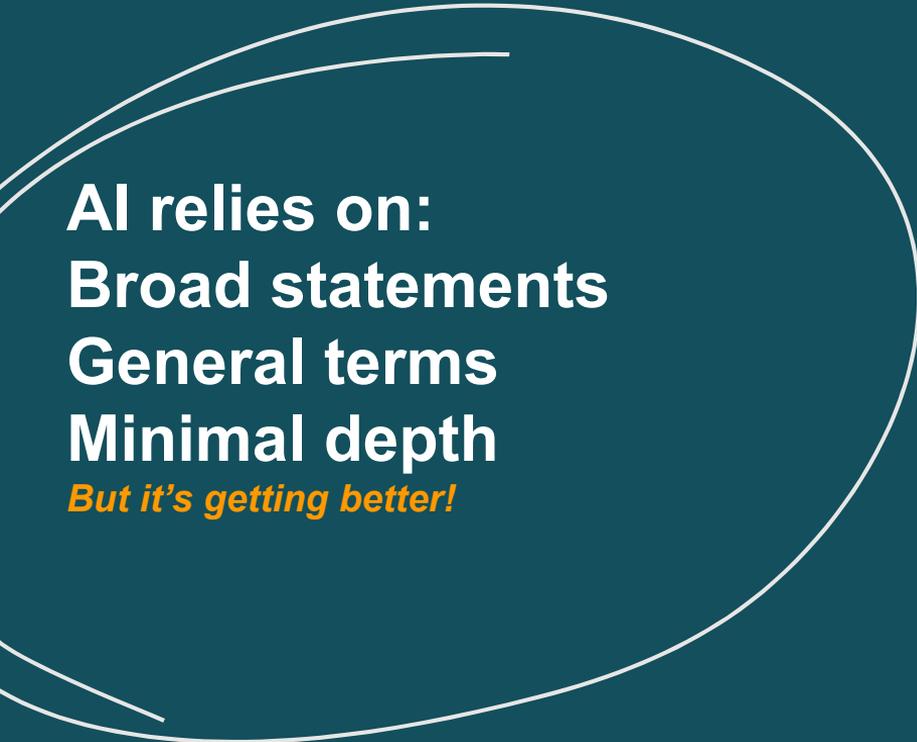

Data-Driven Insights

Rich analytics enable proactive intervention and optimized lesson planning for better outcomes.

Enhanced Content Creation

Generate diverse educational materials including interactive exercises and visual aids.

AI relies on:
Broad statements
General terms
Minimal depth

But it's getting better!

Assignments NEED to:

- **Engage depth**
- **Explore Process thinking**
- **Consider multimodalities**
- **Be unexpected**

Why It Matters

Academic Career Impact

Presentation skills are not just for the classroom. They are critical for defending grants, presenting conference papers, and successfully navigating tenure reviews. Your ability to speak is your ability to persuade.

Public Engagement

Academics are increasingly called upon to explain complex ideas to the public. Clear communication bridges the gap between the ivory tower and society, enhancing the relevance and impact of your research.
