

BACHELOR OF SCIENCE PHYSICS *STEMBA*

The general philosophy of the Department is that each student should be able to reason, to collect facts and opinions, to think critically and to make informed decisions concerning his or her physical, social, economic, and political environment. The objective of the Bachelor of Science in Physics program is to prepare students for careers in physics research, engineering, medicine, and other professional fields including physics teaching in high schools. Physics courses prepare students with good mathematical and analytical skills. In every skilled profession, such as engineering, medicine, management, teaching, etc., analytical expertise gained through mathematics and physics courses will provide an added opportunity/tool to choose and succeed in that profession. A thorough study of mechanics, statistical physics, modern physics, electromagnetic theory, and quantum mechanics along with introductory physics courses and introductory math courses enhances students' ability and updates modern technological innovations needed to succeed in alternate career choices.

Alternative careers could also include teaching, medicine, law (especially intellectual property or patent law), science writing, history of science, philosophy of science, science policy, energy policy, government, or management in technical fields.

Students must choose nine (9) hours of physics elective course options from the list below.

	Course Title	Course Name	Credit Hours
Physics Electives	PHY 241	Introduction to Astronomy	3
	PHY 312	Theoretical Mechanic II	3
	PHY 362 (3)	Mathematical Methods of Physics and Chemistry II	3
	PHY 412	Electromagnetic Theory II	3
	PHY 430W	Methods of Exp. Physics II	3
	PHY 449	Special Topics in Physics	3
	PHY 461	Computational Physics	3
