BACHELOR OF SCIENCE CHEMISTRY Pre-Professional (Pre-Med, Pre-Dent, Pre-Pharm)

Our chemistry program provides a quality education in fundamental, applied, and interdisciplinary areas of the chemical sciences. Students will have a broad education necessary to understand the contemporary issues and impact of the chemical sciences in global, economic,

environmental, medicinal, and societal contexts. There are six concentrations in the areas of biomedical science, environmental science, forensic science, and pre professional programs in pre medicine, pre dentistry, and pre pharmacy. There is an American Chemical Society certification option for students interested in pursuing graduate study in chemistry and a chemistry option without a concentration to allow students to personalize their program. College of Science, Engineering, and Technology

| | COURS | SE TYPE DESCRIPTIONS |
|-----------------------------|------------|---|
| General Education Core | GEC | General Education Core (GEC) courses are courses that every student must take in order to obtain a degree from Jackson State University. GEC courses are essential to every undergraduate degree at Jackson State University. Collectively, there are 30 credit hours of GEC course requirements. |
| General Education Pathway | PATH | General Education Pathway (PATH) courses are courses that are connected through interdisciplinary themes and are selected at the student's discretion to fulfill the general education curriculum. Through experiential learning and reflective writing, students will have the opportunity to integrate knowledge across courses, develop their skills and an enhanced sense of civic responsibility. Students select nine (9) hours from the pathway of choice. Each pathway concludes with a related one (1) credit hour a University Required (UR) course. |
| University Required | UR | University Required (UR) courses are courses that are specific to Jackson State University and are designed to integrate students within the Jackson State University community by promoting student success resources, strategies and high impact practices. |
| Degree Program Requirement | DPR | Degree Program Required (DPR) courses are courses that are required for completion of a degree program within the specified major. |
| Electives | DPE or GEL | Electives are courses selected at a student's discretion and provide oppor- tunities for students to pursue their academic interests. There are two types of electives. Degree Program Elective (DPE) courses are elective courses that are partially restricted such that students select courses from a specified group of identified courses (e.g., departmental elective courses) to fulfill a particular requirement. General Elective (GEL) courses are courses that may be selected from any program for which the student has fulfilled the proper prerequisites. |
| Professional Concentrations | PC | Professional Concentration (PC) courses complement Degree Program Required courses and allow students to have a concentrated area of study within the major. |
