Jackson State University

- ◆ Mission/Purpose Statement
- ◆ History of the University
- ◆ Accreditation/Memberships

Jackson State University, a coeducational institution, is supported by the State of Mississippi. It is controlled by the Board of Trustees of Institutions of Higher Learning, appointed by the governor. The University is supported by legislative appropriations supplemented by student fees and federal and private grants.

Jackson State University is located in Jackson, Mississippi, the capital and largest city of the state. Jackson is the geographic, political, industrial, and cultural center of the state. The metropolitan area consists of a growing population presently estimated at 568,000. The location of the University in the densely populated section of central Mississippi is such that nearly one-half of the students come from within a fifty-mile radius of the institution; however, the population includes students from every county in the state. A significant number of students also come from outside the state and from foreign countries.

The campus is a scenic 175-acre tract situated one mile west of the main business district of the city and is easily accessible from U.S. Highways 80, 49, and 51, and Interstates 20, 220, and 55. A modern airport with direct connections to major cities—north, south, east, and west—is about fifteen minutes away.

VISION STATEMENT

Building on its historic mission of empowering diverse students to become leaders, Jackson State University will become recognized as a challenging, yet nurturing, state-of-the-art technologically-infused intellectual community. Students and faculty will engage in creative research, participate in interdisciplinary and multi-instructional/organizational collaborative learning teams and serve the global community.

MISSION STATEMENT

The University produces technologically-advanced, diverse, ethical, global leaders who think critically, address societal problems, and compete effectively.

PRINCIPLES FOR COLLEGIATE CODE OF CONDUCT

Jackson State University, adopted a Collegiate Code of Conduct which is designed to enhance students' success inside the classroom as well as in their campus life. It is intended also to assist with building characteristics which will serve as guideposts for lifelong success, understanding and appreciating differences among diverse groups of people, and ultimately leading to a more harmonious learning environment which fosters respect for others and one's self.

The tenets for this covenant are:

1. **Integrity**—Respect and embrace the principles of academic honesty.
2. **Philosophy**—Embrace an academic philosophy for positive progress toward competency in goals, critical and logical thinking, and a commitment to excellence.

3. **Class Attendance**—Participate actively in classroom and other learning environments and commit to becoming a lifelong learner.
4. **Diversity**—Celebrate the similarities and differences in our cultures, races, and ethnic origins.
5. **Communication**—Encourage open communication and expression which is guided by respect for others.
6. **Behavior**—Understand that sexual or social harassment will not be tolerated. Always dress for success.
7. **Profanity**—Discourage the use of profanity and offensive actions out of respect for others.
8. **Accountability**—Accept personal responsibility for one's actions and life choices and realize that embracing negative elements of an unhealthy lifestyle will interfere with success.
9. **Service**—Engage in civic opportunities to share knowledge and skills with local, national, and world communities.
10. **Respect**—Embrace and respect tradition by participating in rituals and observances, especially those that contribute to the history and heritage of the University. Respect others by using cell phones and other electronic devices only in appropriate settings.
11. **Assessment**—Conduct periodic assessments of academic, personal, and career progress. Stay focused on your purpose for being at the University.
12. **Safety**—Be alert to threats to safety and security and inform appropriate authorities of such situations.
13. **Freedom**—Respect the freedom of others to express themselves in matters relating to academic and philosophical opinions.

HISTORY OF THE UNIVERSITY

The distinguished history of Jackson State University began on October 23, 1877. The University started as Natchez Seminary, a private school, under the auspices of the American Baptist Home Mission Society of New York for the purpose of educating Mississippi's newly freed slaves. Beginning with only 20 students, the school operated for 63 years as a private church school. In November of 1882, the Society moved the school to Jackson to the site where Millsaps College now stands. A part of this transition was the renaming of the school to Jackson College in recognition of the institution's new, central location in the City of Jackson. Natchez Seminary soon relocated from its site in north Jackson to a tract of land in the southwest section of the city. Construction on the new site began in 1902 and the University remains on this site today. In 1924, the first bachelor degree was awarded. During this period, the major educational activities were directed toward teacher education for in-service teachers. When the American Baptist Home Mission Society withdrew its support from the institution in 1934, it became apparent that state support was needed to sustain the school. The school was transferred from the private control of the church to the state education system and renamed Jackson State College. Initially, the school had been specifically designated by the state to train rural and elementary teachers. In 1942, the Board of Trustees expanded the curriculum to a full four-year teacher education program culminating in the Bachelor of Science Degree in Education. The first four-year graduating class under state support received degrees in May 1944.

A Division of Graduate Studies was organized during the summer of 1953 and the program of Liberal Arts started in the fall of that year. During the late sixties, the entire curriculum

was reorganized and the following schools were established: The Schools of Liberal Studies, Education, Science and Technology, Business and Economics and the Graduate School. Through a legislative act, Jackson State College was designated Jackson State University on March 15, 1974. Jackson State College gained university status in accordance with the expanded breadth and quality of its faculty and academic programs. From 1967-1977, the faculty had tripled in size and the number of faculty members with graduate degrees increased eightfold. In 1979, the University was officially designated the state's Urban University by the Board of Trustees, State Institutions of Higher Learning.

In the late 1980s, the University and its surrounding community were enriched through the expansion of the Universities Center; the establishment of the West Jackson Community Development Corporation to improve blighted housing around the campus; the organization of a Staff Senate; and the creation of a Center for Professional Development and the Center for Technology Transfer. In the 1990s, a Campus Master Plan that projected the growth of the University into the 21st Century was developed. Fifteen new graduate and undergraduate programs evolved. These academic achievements were bolstered by the establishment of the School of Social Work, the formation of the School of Engineering, the fall 1998 opening of the School of Allied Health Sciences, the School of Business received by the Association to Advance Collegiate Schools of Business (AACSB), a \$13.5 million expansion of the H. T. Sampson Library which doubled the capacity of the original structure; and the occupancy of the \$17.2 million School of Liberal Arts building in 2001.

In Fall 2000, the University received doctoral research intensive status with the Carnegie Foundation for the Advancement of Teaching. This prestigious designation was based on the awarding of more than 20 doctoral degrees from the Division of Graduate Studies and the \$40 million in federally funded research contracts secured through the Office of Research and Sponsored Programs. As the University entered the New Millennium and celebrated its 125th Anniversary in 2002, it developed and implemented its strategic plan—Beyond Survival: The Millennium Agenda for Jackson State University. The five-point strategic plan moved Jackson State University to a new level of academic excellence. Thus, Vision 2020 was created to fulfill the first strategy—Remodel the Learning System at JSU. In 2002, the University was reorganized into six colleges: College of Business; College of Education and Human Development; College of Liberal Arts; College of Public Service; College of Science, Engineering and Technology; and the College of Lifelong Learning.

The University has always played a major role in the Jackson community. In keeping with that tradition, the University made substantial contributions to the region, not only in producing effective, competent graduates, but also in furthering the overall economic prosperity of the region. A five-square mile urban laboratory designated e-City has been developed whereby University resources, intellectual and otherwise, are used in a technology based economic, housing, and community development initiative. To further the University's contribution to the City of Jackson, a joint venture with Jackson Public Schools was formed to establish the Mississippi Learning Institute, a pre-K through 16 reading based and math oriented

professional development system. A private/public JSU high-tech partnership, the *Mississippi e-Center*, facilitates access to experientially enhanced, high-tech learning opportunities. In 2004, a \$20 million College of Business was completed. In 2006, a 91,000 square foot student health and wellness center opened. For the first time in the University's history, private bond financing was secured to renovate facilities and to build new facilities such as the new Campbell College Suites which opened in 2007 and the new Campus Union opened in 2008. The campus transformation and wide array of academic programs has enhanced Jackson State's presence.

For the more than 8,500 undergraduate and graduate students enrolled at Jackson State, JSU provides traditional and nontraditional students of diverse backgrounds the academic opportunities to develop knowledge and skills that will empower them to succeed in an increasingly complex and technologically advanced world. JSU has expanded online course offerings, and students are also afforded the opportunity to excel in areas beyond academic disciplines including art, culture, music, and numerous intercollegiate sports and championship competitions. Jackson State's long-term cooperative projects, corporate partnerships, its increasing presence among top universities for the amount of research dollars awarded to the University, and community initiatives strengthen the University's commitment to its students, faculty, staff, and alumni as well as to the West Jackson Community, the city, the state, the nation and several international countries.

ORGANIZATION OF THE INSTRUCTIONAL PROGRAMS

The academic programs of the University are organized into the College of Business; College of Education and Human Development; College of Liberal Arts; College of Lifelong Learning; College of Public Service; College of Science, Engineering and Technology; the Division of Undergraduate Studies; the Division of Graduate Studies; and the Division of International Studies. Details for each graduate academic program are presented in the appropriate section of this catalog.

SUMMER SESSIONS

In breadth of offerings, the work of the Summer Sessions is substantially the same as that of the academic year. The summer programs provide opportunities for students who are interested in advancing their general culture, meeting teaching requirements, accelerating their college work, or pursuing the master's, specialist, or doctoral degree.

To complement its regular work, the University offers a variety of workshops, institutes, and special programs. In general, the teaching staff of the regular year stays in residence for the summer. Visiting professors are brought in when there is a need to supplement the staff or when there is a need for specialized courses.

Each year, a bulletin giving full information on the Summer Sessions is issued. This bulletin is posted on the JSU website.

ACCREDITATIONS

Jackson State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; Telephone number 404-679-4501) to award the bachelor's, master's, education specialist, Doctor of Education, Doctor of Philosophy, and Doctor of Public Health degrees.

The Commission on Colleges of the Southern Association of Colleges and Schools is to be contacted only if there is evidence that appears to support an institution's non-compliance with accreditation requirements or standards.

Graduate studies at Jackson State were authorized by the Board of Trustees in 1953. Instruction was limited to Educational Administration and Supervision, for which the first Master of Science in Education degrees were awarded in 1957. Dr. Augustus C. Blanks was the first Director of Graduate Studies. In 1959, Dr. Charles C. Mosley succeeded Dr. Blanks as director and eventually as Dean of the Graduate Program. He was followed by Dr. Oscar A. Rogers, who became Dean of the Graduate Program in 1969. In 1972, the Graduate Program was elevated to school status, the result of a comprehensive expansion effort. In that year, the Master of Business Administration, the Master of Arts, and the Specialist in Education degrees were offered for the first time, and in 1974, the Master of Science degree was offered. In 1982 the first Doctor of Education Degree was conferred in Early Childhood Education. Dr. Leslie Burl McLemore was appointed Dean of the Graduate School in August, 1984. Dr. Bettye Ward Fletcher was appointed Dean of the Graduate School in August, 1991. The Environmental Science Doctoral Program was implemented in the Fall of 1992 as an interdisciplinary program based upon the integration of natural and applied sciences. The Master of Social Work degree was instituted in August, 1995. In 1996, Dr. Lula S. Collier served as the Interim Dean of the Graduate School. The Doctor of Philosophy in Social Work began in August, 1997. Dr. Dorris R. Robinson-Gardner became Dean of the Graduate School in August, 1997. The University is classified as research university (high research activity) by the Carnegie Foundation.

The Division of Graduate Studies has supervision of all graduate work at the University. The Division of Graduate Studies is composed of the departments which offer graduate instruction leading to masters', educational specialist, and doctoral degrees. The faculty of the Division of Graduate Studies consists of those faculty members in the departments who are qualified to teach and do research on the graduate level. Members of the graduate faculty engage in scholarly pursuits in terms of research, writing, publishing, and participating in professional organizations.

The University is authorized by the Board of Trustees of Institutions of Higher Learning to offer the Doctor of Education Degree in Early Childhood Education, the Doctor of Philosophy Degree in Business Administration, Chemistry, Clinical Psychology, Educational Administration, Environmental Science, Public Administration, Social Work, Urban Higher Education, and Urban and Regional Planning and the Dr.P.H. in Public Health.

The Graduate Council

The Graduate Council is responsible for the development and coordination of general policies and procedures for graduate programs and the maintenance of uniform standards for the admission of students and for the awarding of graduate degrees. It is, therefore, the responsible body to recommend, initiate, develop, and approve graduate programs.

Acting with the Graduate Dean, it may initiate plans for improvement of graduate instruction, set standards for the Graduate Faculty, and, in general, oversee the proper functioning of the Division of Graduate Studies.

The Graduate Council consists of a representative, usually the Department Chair, from each department and program offering graduate degrees. At the Annual University Fall Faculty Seminar, an additional representative from each School is elected for one year by the assembled graduate faculty. The Graduate Dean also appoints for one or two year terms additional members from the faculty at large in order to ensure balanced representation. Two graduate students are appointed by the Dean for one year. These representatives act in an advisory capacity and are charged with the transmittance to their departments of the deliberations of the Graduate Council and are also charged to bring recommendations to the Council.

During the academic year, the Graduate Council meets during the following months: August, October, November, February, March and April. Special meetings of the Council may be called by the Dean or by a majority of the Council members.

The Graduate Faculty

The Graduate Faculty consists of the President, Provost, the academic deans and those members of the general faculty who, by their scholarly attainments in their own fields of specialization have demonstrated their competence to offer graduate instruction.

The purpose and functions of the Graduate Faculty, within limits established by the Board of Trustees, are to offer graduate courses, supervise thesis and dissertation research, and advise the Graduate Council and the Graduate Dean on the establishment of policies relating to graduate education. The major advisory functions of the Graduate Faculty are carried on by committees appointed by the Graduate Dean. Appointment to the Graduate Faculty is made by the Provost.

GRADUATE ADMISSIONS

Admission is granted jointly by the Division of Graduate Studies and the program in which the student plans to study. Each program has its own procedures for evaluating applications. Once all required information is received by the Graduate Admissions Office, an admission packet is sent to the appropriate department for its decision. Once the Division of Graduate Studies receives a recommendation from the graduate faculty of the department and the College Dean or designee, applicants are notified by the Graduate Dean of the decision to admit, conditionally admit, or deny. Admission decisions are valid for 12 months for purposes of initial enrollment.

Application forms are available from the Division of Graduate by e-mail at gadmappl@jsums.edu, or by writing-

Division of Graduate Studies
P.O. Box 17095
1400 J. R. Lynch Street
Jackson, MS 39217-0195.

Forms may also be downloaded from the Division of Graduate Studies web site at <http://www.jsums.edu/~gadmappl>.

It is the applicant's responsibility to ensure that all admission documents are received in the Division of Graduate Studies on or before the application deadline. All credentials submitted on behalf of an applicant become the property of the University and may be maintained for up to one year. Materials from applicants who do not submit all requested material may be shredded and discarded after one year.

All required information **MUST** be received by the following deadlines. Required information includes:

1. Application
2. Official Transcripts from all accredited colleges and universities attended.
3. Proof of immunization for measles, mumps and rubella is required of all students, unless exempt because of (a) actual, suspected or planned pregnancy, (b) medical contraindication, (c) birth prior to 1957, or (d) graduation from a Mississippi public or private secondary school since 1993.
4. Application Fee, if applicable.
5. Departmental/program documentations and test scores.
6. Official TOEFL score and financial support documentation for international applicants.

M.A. in Sociology
M.A. in Criminal Justice

March 15

Fall Enrollment

Ed. D. in Early Childhood Education
Ph.D. in Business Administration

Summer Enrollment

MSW Program - Advanced Standing and Part-time

Applications received after the enrollment deadline for the desired enrollment period will be processed for the next enrollment period. Selected academic programs only admit once a year, refer to the department's section of the catalog.

Note: Each program, department or school may have admission requirements and standards above the general standards listed below. The student should consult the catalog section for the program, department and academic school for additional requirements.

General Admission Requirements for the Master's Level

Applicants interested in pursuing a masters' degree should submit to the Division of Graduate Studies:

1. The Graduate Application for Admission,
2. Two official copies of transcripts from all accredited colleges/universities attended,
3. Out-of State Applicants must submit a \$25.00 application fee using a money order.
4. Proof of immunization for measles, mumps and rubella is required of all students, unless exempt because of (a) actual, suspected or planned pregnancy, (b) medical contraindication, (c) birth prior to 1957, or (d) graduation from a Mississippi public or private secondary school since 1993.

Other requirements, sent directly to the program or department.

1. Three (3) letters of recommendation.
2. Special application forms and materials required by departments, refer to the department's section of the catalog.
3. Standardized test scores, refer to the department's section of the catalog.

International Applicants must also submit the following:

1. A satisfactory TOEFL (Test of English as a Foreign Language) Score or IELTS submitted or successful completion of ESLI.
2. A \$25.00 application fee using a money order.
3. Two certified, translated copies of all transcripts, mark sheets, and diplomas direct from the university/college(s) to the Graduate School. A minimum GPA of 3.00 (B average) at the undergraduate level for regular admission. A cumulative GPA of at least 2.50 at the undergraduate level (4.0 scale) is required for conditional status.
4. Certified Declaration of Financial Support on file in the Office of International Programs.

Once all required information is received by the Graduate Admissions Office a transmittal packet is sent to the appropriate department for its decision. The Division of Graduate Studies receives a recommendation from the department and the College Dean or designee, applicants are notified by the Graduate Dean of the decision to admit, conditionally admit, or deny. An admission decision is valid for 12 months. Thereafter, the applicant should contact Graduate Admissions for readmission.

The Division of Graduate Studies considers for admissions to degree programs only those students who have earned degrees (bachelor's, master's, specialist) from regionally accredited colleges or universities. Students admitted to the Division of Graduate Studies are classified as:

1. Regularly admitted status,
2. Qualifying Status,
3. Conditionally admitted status,
4. Non-degree Status.

Regular status is awarded to students who have a minimum GPA of 3.00 (on a 4.00 Scale) at the undergraduate level and are admitted to a degree program.

Qualifying Status is awarded to students who have a minimum GPA of 3.00 (on a 4.00 Scale) at the undergraduate level but require the completion of prerequisites prior to admission to a degree program. The prerequisites are specified by the degree program, refer to the department's section of the catalog.

Conditional status may be assigned to students who possess a cumulative GPA of at least 2.50 - 2.99 at the undergraduate level (on 4.0 scale) and are admitted to a degree program. Students must earn regular status in the first semester of full-time enrollment, or in the first 12 hours of part-time enrollment by acquiring a GPA of 3.00 in the first 12 hours of graduate work.

Non-Degree Status at the Masters- level

Students may be granted special admission to earn certification, update professional skills, earn transfer credit, or to attend a workshop. *Only selected graduate courses are available.* Applicants for non-degree status file only:

1. Application for Admission and Non-degree Enrollment Forms.
2. Transcript(s) direct from college(s) to the Graduate Admission Office with a cumulative GPA of at least 2.50 at the undergraduate level (on 4.0 scale).

Non-degree students who may wish to earn a degree at a later date must meet all admissions (regular or conditional) criteria as listed above and have a 3.00 average for any graduate courses completed as a non-degree seeking student.

Students previously registered as non-degree students in the Division of Graduate Studies should note that work taken in this category is treated as transfer credit if the student is later admitted to a degree program. A maximum of twelve (12) semester hours may be transferred to a graduate degree program from non-degree status subject to approval by the department chairperson and the Dean of the Graduate School.

**General Admission Requirements
for Specialist Degrees**

Applicants interested in pursuing a Specialist in Education (Ed.S.) degree should submit to the Division of Graduate Studies **by the deadline of January 15:**

1. The Graduate School Application for Admission,
2. A masters' degree with the departmental required minimum GPA .
3. Two official copies of transcripts from all accredited colleges/universities attended,
4. Out-of State Applicants must submit a \$25.00 application fee using a money order.
5. Proof of immunization for measles, mumps and rubella is required of all students, unless exempt because of (a) actual, suspected or planned pregnancy, (b) medical contraindication, (c) birth prior to 1957, or (d) graduation from a Mississippi public or private secondary school since 1993.

Other requirements, sent directly to the program or department.

1. Three (3) letters of recommendation.
2. Special application forms and materials required by departments, refer to the department's section of the catalog.
3. Standardized test scores, refer to the department's section of the catalog.

International Applicants must also submit the following:

1. A satisfactory TOEFL (Test of English as a Foreign Language) Score or IELTS submitted or successful completion of ESLI.
2. A \$25.00 application fee using a money order.
3. Two certified, translated copies of all transcripts, mark sheets, and diplomas direct from the university/college(s) to the Graduate School.
4. Certified Declaration of Financial Support on file in the Office of International Programs.

Non-Degree Status for the Specialist Level

Students may be granted special admission to earn certification, update professional skills, earn transfer credit, or to attend a workshop. *Only selected graduate courses are available.* Applicants for non-degree status file only:

1. Application for Admission and Non-degree Enrollment form to the Graduate Admission Office.
2. Transcript(s) direct from college(s) to the Graduate Admission Office indicating a masters' degree and the department required minimum GPA .

Non-degree students who may wish to earn a degree at a later date must meet all admissions (regular or conditional) criteria as listed above and have a 3.00 average for any graduate courses completed as a non-degree seeking student.

Students previously registered as non-degree students in the Division of Graduate Studies should note that work taken in this category is treated as transfer credit if the student is later admitted to a degree program. A maximum of twelve (12) semester hours may be transferred to a graduate degree program from non-degree status subject to approval by the department chairperson and the Dean of the Graduate School.

General Admission Requirements for Doctoral Degrees

Applicants interested in pursuing a doctoral degree (Ph.D., Dr.P.H., or Ed.D.) should submit to the Division of Graduate Studies:

1. The Graduate Application for Admission,
2. Two official copies of transcripts from all colleges/universities attended,
 - a. A Master's degree or a baccalaureate degree (Chemistry and Clinical Psychology) from an accredited college or university depending on specific program requirements,
 - b. A minimum GPA of 3.00 (on a 4.00 Scale) and the program/department required minimum GPA on the highest degree earned,
3. Out-of State Applicants must submit a \$25.00 application fee using a money order.
4. Proof of immunization for measles, mumps and rubella is required of all students, unless exempt because of (a) actual, suspected or planned pregnancy, (b) medical contraindication, (c) birth prior to 1957, or (d) graduation from a Mississippi public or private secondary school since 1993.

Other requirements, sent directly to the program or department.

1. Three (3) letters of recommendation.
2. Special application forms and materials required by departments, refer to the department's section of the catalog.
3. Standardized test scores, refer to the department's section of the catalog.
4. A written statement of purpose.

International Applicants must also submit the following:

1. A satisfactory TOEFL (Test of English as a Foreign Language) or IELTS Score submitted or successful completion of ESLI.
2. A \$25.00 application fee using a money order.
3. Two certified, translated copies of all transcripts, mark sheets, and diplomas direct from the university/college(s) to the Graduate School.
4. Certified Declaration of Financial Support on file in the Office of International Programs.

Admission of Faculty and Staff Members

Jackson State University faculty and staff members may be admitted to the Graduate School through established procedures and meet all admission criteria.

Readmission

Readmission is NOT automatic. Readmission requires approval by the major department, the Academic College Dean or designee, and the Division of Graduate Studies.

The student must file a Readmission Application at least three weeks before the beginning of the semester. The student should consult with the major department or academic school before starting this process.

Readmission After a Leave of Absence

To register following a leave of absence, the student must file a Readmission Application at least three weeks before the beginning of the semester. The student should consult with the major department or academic college before starting this process.

Inactive Students

Students with "inactive" status must apply for readmission. An inactive student is one who in the last twelve month period has NOT:

1. Registered for at least three credit hours, or
2. Registered for continuous registration, or
3. Registered for thesis/dissertation, or
4. Received a leave of absence.

If the student wants to be readmitted to graduate study, the student has to file for readmission before being permitted to register.

An application for readmission is not required under the following circumstances:

1. If the student has registered during the Spring Semester and returns in the subsequent Fall semester.
2. If the student attended the preceding summer session but does not register during any semester of the intervening academic year.

Transfer of Credit at Time of Admission

Graduate credit may be transferred from graduate schools of regionally accredited institutions. Transfer credit is not automatic and is made upon the recommendation of the chairperson of the major department, the academic college dean or designee and approval of the Dean of the Division of Graduate Studies. Credits are usually transferred during or at the end of the student's first semester of enrollment. Students should not assume that all graduate credits earned at other institutions will be transferred.

Only those hours in which the student has achieved a grade of "B" will be considered for transfer.. These credits must be in an area that is the same as, or closely related to, the major field of concentration. Students should consult with the specific degree program for regulations pertaining to the program. Time limits apply to transfer credit. All master's and specialist students must complete their programs within eight years of starting coursework at Jackson State or elsewhere.

A maximum of 15 semester hours of transfer may be applied toward the doctoral degree. Students should consult with the specific degree program for regulations pertaining to the program. Time limits apply to transfer credit.

A student who has previously registered as non-degree students in the Division of Graduate Studies should note that work taken in this category is treated as transfer credit if the student is later admitted to a degree program. A maximum of 12 semester hours may be transferred to a graduate degree program from non-degree status subject to approval by the department chairperson and the Dean of the Division of Graduate Studies.

Courses taken while a student is registered in other schools of the University are treated as transfer credit if applied later to graduate degrees. Such courses may not be used to meet residency requirements.

INTERNATIONAL STUDENT ADMISSION

A prospective student who is not a US citizen applying for admission to Jackson State University as a graduate student must apply for admission by March 1, for Fall enrollment; October 1, for Spring enrollment; and March 15, for Summer enrollment. Applicants must submit the following required documents.

1. Application for Admission with \$25.00 admission fee using a money order.
2. Three letters of recommendation from former college professors sent directly to the department or program.
3. Master's applicants: A minimum GPA of 3.00 (B average) at the undergraduate level or possess a cumulative GPA of at least 2.50 at the undergraduate level (4.0 scale) for conditional status.
Specialist applicants: must hold a masters' degree and the department required minimum GPA.
Doctoral applicants: a minimum GPA of 3.00 (on a 4.00 Scale) and the program or department required minimum GPA on the highest degree earned
4. A satisfactory TOEFL (Test of English as a Foreign Language) or IELTS Score must be submitted or successful completion of ESLI.
5. Certified, translated copies of all transcripts, mark sheets, and diplomas direct from the college(s) to the Division of Graduate Studies.
6. Special application forms and materials required by a department or academic college, if required.
7. Certified Declaration of Financial Support on file in the Division of International Studies.
8. Immunization Record showing proof of immunization compliance for measles and rubella, if born after Dec. 1957.

English Language Proficiency Requirements for International Students

All applicants to Jackson State University must show proof of English Language proficiency. For international students, this is most commonly demonstrated through the Test of English as a Foreign Language (TOEFL). However, JSU accepts additional methods of determining English Proficiency.

Conditional admission to Jackson State University may be granted to international students with a stipulation of successfully completing all levels of English study at the English as a Second Language Institute (ESLI) of the Division of International Studies. This qualifies students to be admitted to all undergraduate and graduate programs provided they fulfill all other academic requirements needed in their respective majors except English Literature which requires TOEFL score of 233 for the Master of Arts degree.

If Conditional Admission to JSU is received:

1. The student will receive an I-20 document from JSU to apply for a student visa from their country of origin.
2. The I-20 document will state that the student is admitted to JSU to study an academic degree program and major. It will also state that the student will study English at JSU before beginning study in the academic major and degree program.

International Student Advisor

A student from outside the United States attending Jackson State University on a non-immigrant (F-1 or J-1) student visa is advised through the Office of International Programs. Upon arrival on campus, all international students must report to the International Student Advisor, located at the central office, 1330 John R. Lynch Street. Advisement is offered under the guidelines of the Immigration and Naturalization Service (INS) in the following areas: (1) maintaining student visa status; (2) proper transfer to other school(s); (3) off-campus work authorization; (4) social security card information; (5) health insurance; (6) travel outside the United States; (7) change of visa status; and (8) reinstatement to student status.

The International Student Advisor will issue an I-20 form to new international students who are accepted to attend a full course of study at Jackson State University. Financial documentation must be forwarded to the Office of International Programs prior to an I-20 form being released for the student visa. International students must inform the International Student Advisor of matters such as enrollment status, change of an address, change of major, legal name change, and/or any disciplinary action taken by the university as a result of the student being convicted of a crime. For more information, contact the International Student Advisor at (601) 979-3794.

Changing Departments or Programs

To transfer from one major department to another during a term in which a student is registered, the student is required to submit a new application.

To transfer from one program to another program located in the same department, the student is required to submit a "Program Transfer form" and submit it to the current major department, requesting transfer. If the department approves, the approval is noted, a current degree evaluation is attached to the form, and forwarded to the Graduate Dean for final action.

GRADUATE STUDENT SUPPORT

Students who wish to apply for graduate student support must be admitted to the Division of Graduate Studies as a degree seeking student and must complete the required application form. Address requests for applications to Graduate Coordinator of Student Services, Jackson State University, Jackson, Mississippi 39217.

Certain departments and academic schools have departmental support for graduate students; interested students should contact the department chair or the dean of the college for further information.

Graduate Assistantships

The Division of Graduate Studies awards assistantships each year with a monthly stipend plus tuition for one academic year—Fall and Spring. To qualify for an assistantship the applicant must have at least a 3.00 average on a 4.00 scale, be able to carry at least 9 semester hours of course work each semester and be able to contribute 12 hours for master-level student or 15 hours for a

doctoral level student of useful service weekly to a department or academic college. Applications may be obtained from the Division of Graduate Studies. Students should apply directly to the department chair or academic dean of the desired major field. The deadline for submitting applications is March 1.

Graduate Tuition-waivers

The Division of Graduate Studies through the departments offering graduate studies, administers a number of tuition waivers. These scholarships provide tuition expense only and may vary in amount from partial to full tuition waiver. Application procedure is the same as outlined under Graduate Assistantships. Tuition-waivers are awarded per academic year. The deadline for submitting applications is March 1.

Diversity Scholarships

Students who wish to apply for a diversity scholarship must be admitted to the Division of Graduate Studies as a degree seeking student and must complete the University's Application for a Diversity Scholarship. Preference is given to Mississippi residents. Applications are available from department chairs and academic deans or designee. Students should apply directly to the department chair and academic dean or designee of the desired major field. Scholarships are awarded per academic year. The deadline for submitting applications is March 1.

Staff Tuition Waivers

Full-time staff of Jackson State University who qualify for admission may, with the approval of the immediate supervisor, have tuition and general fees remitted for two courses (including accompanying laboratory) per semester or per summer session. Supervisors are authorized to allow employees to take course work during their lunch hour, whenever possible (provided the course does not exceed the one hour allotted for lunch, which should be taken between the hours of 11:00 a.m. – 2:00 p.m.).

FEDERAL FINANCIAL AID

The Office of Financial Aid at Jackson State University coordinates all financial assistance offered to students. The fundamental purpose of the financial aid program is to make it possible for students to attend school who would normally be deprived of a post-secondary education. Financial Aid is economic assistance available to help a student meet the difference between what he/she can afford to pay and what it will actually cost to attend Jackson State University. This economic assistance may be in the form of grants, loans, employment, scholarships or a combination of any of these programs.

Students seeking federal financial assistance are required to complete the Free Application for Federal Student Aid (FAFSA). The priority deadline date for Jackson State University is April 15 of each year.

FREE APPLICATION FOR FEDERAL STUDENT AID (FAFSA) – www.fafsa.ed.gov

All aid is contingent upon admission; therefore, a student must apply for admission to the University. Federal Financial Aid Programs fall into one of three categories: grants, loans and work-study. Grants are financial aid that students do not have to pay back unless, the student withdraws from school and owes a refund.

LOANS

Loans are borrowed money that must be repaid with interest. The types of loans available are:

1. Federal Perkins Loans
2. Federal Stafford Loans
3. Federal Plus Loans

FEDERAL PERKINS LOAN The **Federal Perkins Loan** is a low-interest (5%) loan obtained through the University to help finance a student's college education. These loans are for both undergraduate and graduate students with exceptional financial need. A student may borrow up to \$5,500 for each year of undergraduate study and \$8,000 each year for graduate or professional study. A student must sign a promissory note agreeing to repay the loan before the school will either pay him/her directly or credit the student's account. The student will receive the loan within at least two payments during the academic year. A student has a period of time before repayment of the loan begins, called a "grace period." Half-time students have a grace period of nine months after he/she graduates, leaves school, or drops below half-time. At the end of the grace period, the student must begin repaying the loan. He/she may be allowed up to 10 years to repay it.

Federal Direct Stafford Loans (Subsidized and Unsubsidized) are low interest loans made by the U. S. Department of Education to students enrolled at least half-time. For loans first disbursed on or after July 1, 2009, the interest rate is 6.8 percent for subsidized loans for undergraduates, and 6.8 percent for unsubsidized loans for undergraduates and graduates. The Federal Stafford "Subsidized" Loan is based on financial need, but the Federal Stafford "Unsubsidized" Loan is not. The Subsidized and Unsubsidized Federal Stafford Loans combined cannot exceed loan maximums set by the Department of Education per academic year.

Eligible loan amounts are determined by the Cost of Attendance minus Expected Family Contribution, minus any other assistance the student may receive. After the student graduates, leaves school, or drops below halftime, he/she has six months before beginning repayment. This is called a "grace period" if it is a Subsidized Stafford Loan; he/she will not have to pay any principal or interest during that period. If the student has an Unsubsidized Stafford Loan, he/she will be responsible for the interest from the time the loan is disbursed until the loan is paid in full. Student Loan Entrance and Exit Interviews are required for all loan borrowers. Students may contact the Financial Aid Office for more information.

The **Federal Direct PLUS Loan** is a loan for the parent of a dependent child who is enrolled at least half-time. In addition, graduate or professional degree students may obtain PLUS Loans to help pay for their own education. This loan is made through the U. S. Department of Education. Credit checks are required. The yearly loan limit is the cost of attendance minus any estimated financial aid for which the student is eligible. The Direct PLUS loan interest rate is 7.90%. Repayment begins on the date of the last disbursement for the period in which the loan was disbursed.

The **Federal Work Study Programs** provides part-time jobs for students who have financial need, allowing them to earn money to help pay education expenses. The program encourages community service work. At Jackson State University, students work in various offices and departments with their work schedule built around their

academic class schedule. The amount of the FWS award depends on the student's financial need and the amount of money the school has been allocated for the program. In arranging a job and assigning a work schedule, the work study coordinator will take into account the student's class schedule, health and the skills needed to perform the assigned duties. The salary received will be based on the current minimum wage. The student will be allowed to work up to 15 hours per week unless otherwise indicated. Under no circumstances can a student earn as much FWS money as he/she wants. The total amount of aid awarded from Federal and Non-Federal sources cannot exceed the student's financial need. The student is paid once per month.

The **University Work Aid** is a non-need program that provides jobs for students who are unable to qualify for the Federal Work Study Program. These funds are available for students who possess a needed skill or talent. Students are employed in a variety of University offices and departments. these programs are, the student:

- demonstrates financial need, except for some loan programs;
- has a high school diploma or a General Education Development (GED) certificate;
- is enrolled as a regular student seeking a degree or certificate in an eligible program;
- is a U.S. citizen or eligible non-citizen;
- has a Social Security Number;
- is making satisfactory academic progress;
- has certification that federal aid will be used only for educational expenses;
- certify not in default on federal loan and do not owe money on a federal grant;
- is registered with Selective Service, if required.

VERIFICATION POLICIES AND PROCEDURES

The Office of Financial Aid conducts verification on all applicants selected for verification by the Department of Education edit checks. Applicants selected for verification must submit the following documents to the Financial Aid Office:

1. Signed copy of the Federal Income Tax Returns (or other acceptable tax documents) of the applicant and or spouse, or parent(s), if applicable;
2. A completed Verification Worksheet (dependent or independent) listing household size, number in college, and other untaxed income and benefits. The information submitted on the FAFSA is compared with the information contained in the official documents submitted to complete verification (tax returns or other acceptable documents and verification worksheets). The verification process can takes four to six weeks from the time all required documents are received.

NOTE: Verification documents requested by the Financial Aid Office must be submitted within sixty (60) days of the request. If the requested information is not received within the sixty (60) days, the application for financial assistance will not be processed until verification is completed.

CORRECTION PROCESS

Once all documents are received, corrections, if any are needed, will be made electronically. If the verification process results in a change in the expected family contribution (EFC), the student will receive an acknowledgment letter from the U.S. Department of Education with the corrected data. The student will also receive notification from the Financial Aid Office via his/her JSU web

account. The electronic correction process takes 7 to 10 ,working days. Once the correction is received, the student will be awarded and notified.

CONFLICTING INFORMATION

Conflicting information must be resolved prior to disbursing federal student aid to students. If conflicting information is discovered after disbursing federal student aid, the discrepancies must still be resolved and the appropriate action must be taken based on specific program requirements. Conflicting information is separate and distinct from verification and must be resolved whether or not the student is selected for verification.

REFERRALS TO THE OFFICE OF THE INSPECTOR GENERAL OF THE DEPARTMENT OF EDUCATION

The Office of Financial Aid will refer to the Inspector General of the Department of Education any credible information indicating that an applicant for Title IV Program assistance may have engaged in fraud or other criminal misconduct in connection with his or her application. Examples of this information are:

1. False claims of independent student status;
2. False claims of citizenship;
3. Use of false identities;
4. Forgery of signatures or certification;
5. False statements of income; and
6. Other illegal conduct involving the administration of Title IV Programs.

RECOVERY OF FUNDS (OVERPAYMENTS)

Jackson State University will make every effort to avoid overpayment of Federal funds to financial aid recipients. If a financial aid recipient receives an overpayment as a result of the verification process, the Office of Financial Aid will eliminate the overpayment. The overpayment will be eliminated by adjusting subsequent financial aid payments during the award year or reimbursing the Federal Program account within sixty (60) days of the recipient's last day of attendance or the last day of the award year, which ever is earlier. **APPLICANTS WHO OWE A REPAYMENT OF FEDERAL FUNDS ARE NOT ELIGIBLE TO RECEIVE FEDERAL AID UNTIL THE OVERPAYMENT IS PAID IN FULL.**

STANDARDS FOR SATISFACTORY ACADEMIC PROGRESS

Section 484 of the Higher Education Act (HEA), as amended, requires that a student maintain satisfactory progress in the course of study he or she is pursuing according to the standards and practices of the institution in which he or she is enrolled in order to receive aid under the student financial assistance programs authorized by Title IV of the HEA. These programs include the Federal Pell Grant, Federal Supplemental Education Opportunity Grant (SEOG), Academic Competitiveness Grant (ACG), National Science and Mathematics Access to Retain Talent Grant (SMART), Leveraging Education Assistance Partnership Program (LEAP), Federal Work-Study, Federal Perkins Loan, and the Federal Family Educational Loan Program.

Standards for Academic Progress

Graduate students must meet the Satisfactory Academic Progress Standard as set by the Graduate School (adequate progress toward completion of degree requirements and cumulative GPA of 3.0 and above). Graduate students must complete a minimum percentage of hours attempted (grades of "F", "W" and "I" are counted as attempted; however, not as completed). Students have a two semester probationary period including the current semester

enrolled. Failure to bring the cumulative GPA into compliance and or complete the required hours renders the student ineligible for financial aid and the student is denied Title IV assistance.

MAXIMUM TIME FRAME

Financial aid eligibility is subject to the maximum time frame limits noted below:

Quantitative Standards

Students are expected to complete the requirements for degree within a reasonable time frame. Students must pass a minimum percentage of JSU courses attempted. For this standard students must pass 67% of hours attempted.

Grades

Grades of “F”, “W” (withdrawn), and “I” (incomplete) do not count toward credits completed; however, they are counted as attempted hours. Also, all repeated hours are counted as attempted hours.

Satisfactory academic progress is measured annually at the end of the spring semester.

Probation

Failure to complete the required hours and maintain the appropriate cumulative GPA will result in a two semester probationary period including the current semester enrolled. Failure to bring the cumulative GPA into compliance and or complete the required hours, at this point, will be considered as not maintaining satisfactory academic progress and therefore renders the student ineligible for Title IV assistance.

Appeal Procedures

Students who fail to maintain satisfactory progress or have not met degree requirements may appeal the denial by explaining the mitigating circumstances in writing to the Chairperson of the Financial Aid Appeals Committee by the last published date to complete registration. Appeals received after this date will be considered for the next semester.

Reinstatement

The Financial Aid Appeals Committee will review the appeal for reinstatement of aid. The decision will be based on the strength of the appeal, the documentation submitted, and the academic record. Financial aid will be reinstated for students who reestablish eligibility by maintaining the standards of satisfactory academic progress.

Mitigating Circumstances

Mitigating circumstances are special or unusual circumstances or conditions that has affected the student's ability to progress according to specified standards. These circumstances may include, but not limited to, bereavement, illness, emotional or personal difficulties, disability, eviction and undue hardship based on traumatic occurrences. These circumstances must be explained in detail when appealing a financial aid denial. The Financial Aid Office at Jackson State University does not discriminate against students on the basis of sex, handicap, race, color, religion or national origin, pursuant to the requirements of Title IX of the Educational Amendments of 1972, the Rehabilitation Act of 1973, and other applicable statutes.

TUITION and FEES

Fees are subject to change upon approval of the Board of Trustees of State Institutions of Higher Learning.

Full-Time Students - State resident students who register for 9.0-13.0 semester hours will pay a flat rate per semester. State resident

students that register for more than 13.0 semester hours will pay the flat rate plus a prorated amount for each hour over 13.0 hours. In addition to regular fees assessed graduate students, out-of-state graduate students will pay an out-of-state fee.

Part-Time Students - A graduate student carrying fewer than 9 hours is considered part time. Part-time students are assessed tuition on a prorated amount per semester hour. Out-of-state students must pay, in addition, the prorated amount per semester hour.

Auditing Students - A person may audit a course at the University without being officially enrolled as a degree seeking student. The student must, however, be eligible for admission to the University. A fee is charged per semester hour for each course, and no refund is made if the course is canceled at any time after registration.

Examinations Charges

Entering students are assessed a testing fee for the Graduate English Competency Examination.

Thesis and Dissertation Fees

Masters and Specialist students completing a thesis are assessed a thesis fee. Doctoral students are assessed a dissertation fee.

Tuition Policy Adjustment

Tuition adjustments are based on the date that classes begin and the date a course is dropped or on the date of withdrawal. Students withdrawing from the University before the close of a semester must complete and “Application for Withdrawal” form. This form can be picked up in the Office of the Vice President for Student Affairs, located in the Student Affairs Building.

Withdrawals and Refunds

The Higher Education Amendments of 1998 (HEA98) represent a major shift in the Return of Title IV Federal Financial Aid when a student withdraws from the University.. The policy governs all federal grant and loan programs but does not include the Federal Work Study program. In general, it is assumed that a student “earns” approved/verified federal financial aid awards in proportion to the number of days in the term prior to the student's complete withdrawal. If a student completely withdraws from the University during a term, the University must calculate, according to a specific formula, the portion of the total financial assistance that the student has earned and is entitled to retain, until the time that the student withdrew.

ACADEMIC REGULATIONS

HONOR CODE

I will be honest in all of my academic coursework and will not indulge in or tolerate the academic dishonesty of my counterparts or peers. I will not partake in any type of misconduct, misrepresentation, or immoral behavior that will harm, damage, or endanger any person, property or myself or reflect negatively against me or hinder my academic continuance. I will strive to achieve excellence and to complete degree requirements without hesitation. I am a valuable part of the Jackson State University family, and proud of it.

Student Responsibility for Meeting Graduate Requirements

Each student should thoroughly study the **Graduate Catalog** and become completely familiar with the organization, policies, and regulations of the university. Failure to do this may result in serious mistakes for which the student shall be held fully responsible. Only the general academic regulations and

requirements governing graduate programs are presented in CyberOrientation. Specific requirements pertaining to individual programs are outlined within the departmental section of the catalog. It is the graduate student's responsibility to keep current on information which may affect their matriculation in graduate school. Whenever a problem occurs, the student should contact their major advisor and/or the Graduate Dean's office. Advisors endeavor to provide such assistance in a timely and accurate manner, **but meeting requirements for graduation is the responsibility of the student.**

A graduate student may be classified as:

1. In Good Standing,
2. On Probation, or
3. Subject to Dismissal.

1. Good Standing. A graduate student is judged to be in good standing when making adequate progress toward completion of degree requirements, has a cumulative GPA of 3.00 and is not on probation or subject to dismissal.

2. Probation. Failure to complete the required hours and maintain the above grade point average will result in a one semester probationary period. Probation is intended to provide a student whose performance is less than fully satisfactory a period of time to bring his/her performance up to a level consistent with the minimum standards enforced by the Graduate School and/or the program in which enrolled.

A student may not remain in probationary status for longer than two semesters. When a student is placed on probation, he/she will be notified of the fact in writing and will have one semester to correct the deficiencies that led to this action. If, at the end of this period, all deficiencies have been removed, and no other circumstances warranting probation have developed in the interim, the student will be returned to good standing. If the deficiencies have not been corrected by the end of this period, the student may become subject to dismissal.

Probation may be initiated by the Graduate Dean or by the recommendation of the Graduate Advisor in the student's major department, school, college or graduate group. A student may be placed on probation for one or more of the following reasons:

- ◆ Failure to maintain an adequate level of performance (as measured by GPA) in courses central to the student's program of study.
- ◆ Failure on the departmental preliminary examinations or failure to stand for such exams in a timely manner.
- ◆ Failure to proceed to the comprehensive or qualifying exams within a reasonable period of time.
- ◆ Failure to make adequate progress in meeting other stated program requirements for example: submission of an acceptable dissertation prospectus, passage of required language examinations, etc.)
- ◆ Failure to make adequate progress in thesis or dissertation research or writing, or in the independent study project.

Students on probationary status may not be admitted to examinations (Master's Comprehensive or Doctoral Qualifying), nor advanced to Candidacy, nor hold an academic appointment, nor receive a graduate fellowship, nor defend a dissertation, thesis or project, nor be eligible to receive a graduate degree.

3. Unsatisfactory Work and Dismissal from a Department or Program.

A graduate student whose course work is unsatisfactory may be requested to leave the program. The recommendation for dismissal must be made in writing by the adviser, stating specific examples of unsatisfactory work, and must follow a conference held between the student and the adviser. Academic school procedures for dismissal including notification of the Dean of the Graduate School must be followed.

Reinstatement

A former student must submit an Application for Readmission. Official transcripts from all institutions attended since a student was last enrolled at Jackson State University must be mailed to the Office of Graduate Admissions. Unofficial transcripts will not be accepted. Dismissed students who are approved for readmission will be readmitted on probation and must follow the requirements outlined and included with the student's letter from the Office of the Graduate School which must be received before the student is permitted to register.

STUDENTS ACADEMIC GRIEVANCE PROCEDURE

The objective of the Grievance Procedure is to create and sustain an academic environment that permits students to freely express concerns or reveal complaints about their education and the educational process and to have their concerns and complaints addressed swiftly and forthrightly. Students enrolled at Jackson State University may register a concern or complaint about any academic regulation, the instructional program, delivery of the program, grades received, the academic advisement system, or any other matter related to academic affairs, without any adverse action for expressing the concern or filing the complaint. Concerns and complaints will be received, explored or investigated, and responded to in a fair and timely fashion, though students should understand that the final response by the University may not always be the response that they prefer.

Procedures

Classroom Concerns or Complaints (e.g., grades received; improper dismissals; unprofessional behavior):

- Student discusses concern or complaint with the instructor.
- Instructor provides a response (allowing up to five days if investigation is required).
- Complaints unresolved by the instructor or for which the response is unacceptable must be described in writing by the student and submitted to the department chair.
- The chair properly logs and investigates the matter and provides a written response to the student within ten days.
- Issues that are still unresolved must be submitted by the student to the college dean.
- The dean provides the final written response within ten days, which may be done with committee input and/or in consultation with higher-level administrators.

Other Academic Concerns or Complaints (e.g., academic advisement or academic regulations):

- Student discusses the concern or complaint with the academic advisor.
- The advisor provides a response (allow up to five days if an investigation is needed), or refers it to the appropriate official/body, e.g., department chair or Academic Standards Committee, for response within 20 days. The appropriate official/body returns the response to the advisor and the advisor returns it to the student.

- Unresolved concerns or complaints must be submitted in writing by the student to the college dean.
- The college dean provides a written response within ten days, which may be done with committee input and/or in consultation with the Vice President and Associate Vice President for Academic Affairs.
- If the complaint remains, the student will submit it to the Associate Vice President for Academic Affairs for a final response.

NOTE: Academic complaints dating back more than a semester generally will not be investigated.

The Grading System

The student's proficiency in the work of graduate courses is rated in terms of letter grades. One semester of graduate credit represents one hour per week of class contact time for sixteen weeks. Grade point average (GPA) is determined on a 4.0 scale. The following are letters used to designate a student's standing in a course.

A- Excellent	4 quality points per credit
B-Good	3 quality points per credit
C-Fair	2 quality points per credit
D-Poor	1 quality point per credit
F-Failure	0 quality point per credit
IP-In progress	0 quality points
I-Incomplete	0 quality points

No more than two "C" grades are allowed. A GPA of 3.00 must be maintained both overall and in the student's major area of concentration at the Master's level. Doctoral students should consult the department chair and academic college dean for specific requirements.

Use of the IP Grade - The "IP" grade is to be assigned for Project, Thesis, Dissertation courses or independent study. The grade(s) for these courses should be assigned upon the successful defense of the Project, Thesis or Dissertation or completion of the independent study.

Repeating Courses

Students in graduate degree programs are permitted to repeat one (1) course upon the recommendation of the departmental graduate advisor. Only one such repeat is allowed in a graduate program. Both grades will show on the transcript, and the highest grade will be used in computing the grade point average (GPA).

Incompletes

When circumstances beyond a student's control prevent the completion of a course satisfactorily, the student has two options. One is to withdraw, if the 'drop' deadline has passed. The other is to request a grade of incomplete, "I", which allows a time extension. Such a request must be made before the semester ends and before the final exam, and the granting of this privilege is entirely at the professor's discretion.

If the student is in residence, the deficiency must be made up and the grade changed by the instructor within the first six weeks of the following semester. If the student is not in residence, the deficiency must be made up within one calendar year for the date the "I" was given.

The professor is required to indicate on the grade sheet the grade the student should receive if the incomplete is not removed within the prescribed time period. If the student fails to complete the

course within the specific time, the grade so indicated will be recorded as the grade of record. When enrolled for thesis, research, or independent study, the "I/P" grade may be applied. No more than two "I's" are allowed at any time unless otherwise granted by the Graduate Dean.

Graduate Academic Second Chance Policy Statement

Graduate students, previously enrolled at the university, may be eligible for matriculation under the Graduate Academic Second Chance Policy.

The Academic Second Chance option must be requested during the re-admission process and students are required to meet all degree requirements for re-admission. This option may be approved as a one-time opportunity for re-entering graduate school. No student is entitled to readmission under this policy and the University reserves the right to exercise its discretion to deny readmission for academic or non-academic reasons, including financial, conduct-related, probability of success, or other legally permissible reason.

Requirements

1. Student must have been separated from the University for at least three years.
2. All academic credit hours and grades earned during previous enrollment at Jackson State will remain on the student's academic history transcript.
 - a. Previously earned academic credit hours with grades of "B" and above, within time limits, may be used to meet degree requirements if approved by the department chair.
 - b. Previously earned academic credit hours with grades of less than "B" will not be used in the computation of the student's grade point average.
 - c. Graduate English Competency Examination requirements must be completed, if applicable.
3. Student must meet all new departmental requirements for the existing program.

Student Responsibilities

1. Complete the Graduate Academic Second Chance application obtained from the Division of Graduate Studies. Obtain an official notification of potential readmission from the academic department.
2. Develop and submit an academic enhancement plan in consultation with an academic advisor. Obtain approval of the academic enhancement plan from the department chair in major area and the college dean.
3. Submit a completed application and an approved academic enhancement plan, with appropriate signatures from advisor, chairperson and college dean to the Division of Graduate Studies.

*Approved by the Graduate Council
October 13, 2009*

Course Loads

The minimum course load for a full-time graduate student is nine (9) semester hours and the maximum is thirteen (13) semester hours. The Master of Social Work degree is an exception, requiring fifteen (15) semester hours.

Concurrent External Credit

Students enrolled at Jackson State University who wish to receive credit for courses taken at another institution must obtain written permission from the major department and the Graduate Dean PRIOR to enrolling in external courses. Students are advised to check if these courses will apply towards degree requirements.

Approved external transfer credit will be processed upon completion of the course.

Concurrent or Second Master's Degrees

Students are not prohibited from earning two degrees; however, giving credit for one course in two degree programs is permitted only in programs under the College of Education and Human Development. It is considered preferable for an ambitious student to progress from one degree to a higher degree. In this case the earlier degree serves as a prerequisite or is automatically credited as part of the later degree.

Graduate courses which have been taken by undergraduate seniors and which have been applied toward the baccalaureate degree may not be used for filling requirements of a graduate degree.

Time Limits

All master's and specialist students must complete their programs within eight years of starting coursework at Jackson State or elsewhere. Doctoral students must complete all degree requirements within ten years from the time of admission into a program. Specific programs may have different time limits.

Residency

For Master's and Specialist students the residency is one semester; for doctoral students it is one year.

Academic Honesty

All students at Jackson State University are expected to conduct their academic studies in an honest and responsible manner. Any student found guilty of dishonesty in academic work shall be subject to disciplinary actions as defined in the Student Handbook.

Cheating includes:

- Submitting material that is not yours as part of your course performance, such as copying from another student's exam, allowing a student to copy from your exam;
- Using information or devices that are not allowed by the faculty; such as using formulas or data from a home computer program, or using unauthorized materials for a take-home exam;
- Obtaining and using unauthorized material, such as a copy of an examination before it is given;
- Fabricating information, such as the data for a lab report;
- Violating procedures prescribed to protect the integrity of an assignment, test, or other evaluation;
- Collaborating with others on assignments without the faculty's consent;
- Cooperating with or helping another student to cheat;
- Participating in or performing other forms of dishonest behavior, such as having another person take an examination in your place; or altering exam answers and requesting the exam be re-graded, or communicating with any person during an exam, other than the proctor or faculty.

Plagiarism includes:

- Directly quoting the words of others without using quotation marks or indented format to identify them;
- Using sources of information (published or unpublished) without identifying them;
- Paraphrasing material or ideas of others without identifying the sources;
- Dissertations, theses, projects, proposals or other research papers that are not the work of the student submitting them;

- When direct quotations are used, they must be indicated and when the ideas of another are incorporated in papers they must be appropriately acknowledged;
- When a student is unsure about something that he/she wants to do or the proper use of materials, a faculty member should be consulted for clarification.

Unauthorized/ Illegal Web Use

Jackson State University allows and encourages the use of University owned computer resources. This use is a granted privilege, not a right. Student use must be in accordance with all applicable laws, policies, and standards regarding acceptable use. Areas of concern include but are not limited to:

- Discriminating or libelous statements.
- Copyright infringements ("illegal downloading").
- Obscene, offensive or threatening materials.
- Usage primarily for financial gain or compensation not related to JSU's mission.

Failure to comply with this policy may result in charges being brought within the University's judicial system and in the civil or criminal court system.

Withdrawal from the University

Formal withdrawal from the University is processed through the Office of the Vice President for Student Life. No withdrawal from the University is official until the student has processed the appropriate forms. The effective date of withdrawal is the date the formal application is filed in the Office of the Vice President for Student Life. A student who leaves the University without filing a statement of formal withdrawal is given the grade which the record warrants in all courses in which he/she is enrolled. A student may withdraw from a course within the first 25 days following registration. Grades will be recorded in accordance with the schedule listed in this section. Registration dates are printed in the Official Course Schedule Booklet, also available online.

Neglecting attendance in classes or merely giving notice to instructors will not be considered as official notice of withdrawal. An unofficial withdrawal may result in failure in the course. Class changes which place a student below full-time status will unfavorably affect veteran subsistence, financial aid, and eligibility for other academic recognition.

Continuous Enrollment

Minimum registration for a graduate student to meet the continuous enrollment requirement is **one (1)** graduate credit a term. It is the student's responsibility to register for the appropriate number of credits **each semester** to meet departmental requirements.

Leaves of Absence

Under special circumstances such as illness, family hardship or military service a student who is a degree candidate may be given a leave of absence. In order to be considered for a leave of absence the student must **NOT**:

- ◆ Have registered for any course.
- ◆ Have been previously registered for thesis or dissertation credits.
- ◆ Have an "I" on his/her record.
- ◆ Be scheduled to take any examination (such as language, comprehensive, etc.)

Leaves of absence will be granted for one semester, or longer, as circumstances warrant. No leave is granted for more than one calendar year. To obtain a leave of absence:

1. The student writes a letter outlining in detail the reasons for requesting a leave. This letter should be addressed to the Chairperson of the student's major department.
2. The Chairperson will determine the appropriateness of giving the leave, adding his/her recommendation to the letter and forward it to the Graduate Dean.
3. After action by the Dean, the Division of Graduate Studies will notify the student, the department, and the Registrar (the latter only if the leave is granted) of the decision.

Advising of Students

Each graduate student pursuing a degree is assigned an advisor or mentor within the area in which the student is concentrating. This adviser will be appointed by the department chair in consultation with the student. If the student in a degree program chooses to write a thesis or a project, a committee of at least three graduate faculty members will be appointed to help direct the thesis. Students writing a dissertation will be guided by a committee, chaired by the major advisor.

Enrollment of Seniors in Graduate Courses

A graduating senior who has an overall 3.00 or better grade point average and who lacks no more than nine semester credit hours for the completion of the baccalaureate degree may, with the approval of the Dean of the Graduate School, register for a maximum of six (6) semester credit hours on the graduate level during the final undergraduate semester. No student may receive graduate credit for any course taken when he has not formally applied for, and received, admission to the Division of Graduate Studies.

Courses Carrying Undergraduate and Graduate Credits

A maximum of twelve (12) hours of courses carrying undergraduate and graduate credits may be accepted as graduate credit under the following conditions:

1. Such courses may be listed in the Bulletin as offering both undergraduate and graduate credit
2. A minimum grade of "B" must be received in each course presented for graduate credit,
3. These courses must not also be used to fulfill undergraduate requirements;
4. The student must be enrolled in a graduate program when such courses are taken; and
5. Additional course requirements must be included for graduate students.
6. Graduate courses which have been taken by undergraduate seniors and which have been applied toward the baccalaureate degree may not be used for filling requirements of a graduate degree.

IACUC Approval of Research

The Jackson State University Institutional Animal Care and Use Committee (IACUC) in accordance with federal, state and institutional policies oversees the university's animal programs, facilities and procedures involving the appropriate care, use and humane treatments of animals being used for research, testing and education. All animal users at JSU must abide by the regulatory requirements pertaining to the acquisition and use of animals for research, testing or teaching as outlined in the USDA Animal Welfare Act, NIH Requirements, and The Guide for the Care and Use of Animals. Contact the IACUC Office if you have any

questions regarding protocol application submission and approval at (601) 979-2589. Students must have IACUC approval when they form their committee.

IRB Approval of Research

All student and faculty research involving human subjects MUST be approved by the University's Institutional Review Board (IRB) prior to the conduct of the research. A copy of the IRB application is available in the department, online at the JSU website and the Graduate Office. Contact the IRB Office if you have any questions regarding protocol application submission and approval at (601) 979-4197. Students must have IRB approval when they form their committee.

Institutional Biosafety Committee (IBC)

The Jackson State University Institutional Biosafety Committee (IBC) has the charge of reviewing and approving recombinant DNA research and biohazard projects. All recombinant DNA research at JSU, regardless of funding source, must be conducted in accordance with the NIH Guidelines for Research Involving Recombinant DNA Molecules and the use of infectious micro-organisms in research, teaching and the handling of infectious waste disposal. The Biosafety website serves as a helpful reference and guide to facilitate compliance with Biosafety related practices, institutional policies, and governmental regulations. All questions pertaining to Biosafety at JSU may contact Research Compliance for additional information at (601) 979-2859.

CANDIDACY AND GRADUATION

REQUIREMENTS

**Students should consult with department chairs or academic dean for specific departmental, school and college requirements.*

Master's Degree

ADMISSION TO CANDIDACY

When approximately 12-15 semester hours have been completed the student should make application for advancement to candidacy. Please note that students cannot be advanced to candidacy until:

1. All admission requirements have been met.
2. Notification of the program option the student is electing, or that is required.
3. All incompletes ("I" grades) have been removed.
4. The Graduate English Competency Examination was passed, , or in the event of failure, passed ENG 500 with a grade of B or better.
5. Earned a 3.00 cumulative G. P. A.
6. Filed the Application for Graduate Degree Candidacy with the approval of the Candidacy Committee in his major department.

Examinations

Each graduate student who intends to earn a master's degree at Jackson State University must successfully pass qualifying, comprehensive or final examinations or a combination of these. The content and methods of conducting these examinations are the responsibility of the college, school or department.

GRADUATE ENGLISH COMPETENCY EXAMINATION, (GECE)

This test is taken prior to registration or during the first term when the student begins work beyond the undergraduate level at Jackson

State University. It is designed to show the strengths and weaknesses of each student in the areas of grammar and usage, logic, organization and content. Students unsuccessful on the English Examination must pass English 500-Advanced Laboratory Writing. The examination can be taken only once. It is expected that students who must take English 500 will do so no later than their second semester of enrollment. A final grade of "B" or higher is considered passing in English 500. ENG 500 does not earn credit in graduate degree programs. Information on specific dates can be obtained from the Division of Graduate Studies, the Graduate website and academic departments.

Exemptions

1. Students in selected degree programs may meet this requirement by obtaining appropriate scores on the following examinations: GRE, GMAT and PRAXIS.
2. JSU undergraduate students may meet this requirement by entering the Division Graduate Studies **immediately** after graduation.

Please contact your department chair or graduate program advisor for eligibility. The Division of Graduate Studies must receive notification of students meeting the requirement via exemptions.

GRADUATE RECORD EXAMINATION, (GRE)

Candidates for degrees at Jackson State University may be required to take the Aptitude Test and may be required to take the Advanced Test in their field of specialization. Information with regard to dates and fees may be secured from the Psychometry Center or by writing to Educational Testing Service, 20 Nassau Street, Princeton, New Jersey 08540. Students should consult with department chair for specific departmental requirements.

GRADUATE AREA COMPREHENSIVE EXAMINATION, (GACE)

Each graduate student who intends to become a candidate for the master's degree at Jackson State University should take a written comprehensive examination in the student area of specialization after completing 24 semester hours of graduate credit with a cumulative average of "B" or better in courses completed.

No student may appear for the comprehensive examination until after he/she has been declared eligible for the examination by the Dean of the Division of Graduate Studies.. The student must be registered for at least one credit hour in the semester in which the examination will be taken. An audited course will not meet this requirement.

The Graduate Area Comprehensive Examination may be given three times a year, once in each semester. The date will be set by the Dean of the Division of Graduate Studies. A student may be permitted to take the Comprehensive Examination twice: if the student fails the second time, the student must petition the Academic College Dean or designee for permission to take the examination the third time. The student should register with the assigned adviser or department chair to take this examination in the last semester or summer session of course work.

FINAL ORAL EXAMINATION.

The Final Oral Examination is administered by a committee of at least three graduate faculty to students who write theses. This examination is based chiefly on the candidate's thesis and its relationship to the general field of education. No student is admitted to the oral examination unless he/ she has satisfied all previous requirements. This examination can be taken only after

the thesis is in final form ready for final approval, and no earlier than the final term or semester of the candidate's program. Students who fail their oral examination may petition the Academic College Dean or designee for a second examination after an interval of six months has elapsed.

FOREIGN LANGUAGE READING EXAMINATION.

A passing grade on the Graduate Foreign Language Reading Examination can be required of candidates for the Master of Arts degree. The test consists of an examination testing the student's ability to translate from the foreign language into English. The examination is offered in French, Spanish, and German. and is given three times per year at the end of each semester and graduate summer session. In lieu of the examination, a graduate student may take the first-year sequence of a foreign language (101-102) and must make a "B" or better both semesters. To review for the examination, a graduate student may take French, German, or Spanish 500 (the Reading Knowledge course). This 500 course will in no way substitute for taking the examination itself. Application forms for the examination may be picked up at the main office of the Department of English and Modern Foreign Languages.

SPECIAL DEPARTMENTAL EXAMINATIONS. Students should consult with department chair or academic college dean or designee.

GRADUATION REQUIREMENTS

The following are the minimum requirements for all master's degree students:

1. Notification of the program option the student is electing, or that is required.
2. Completed the required semester hours of coursework with a "B" average.
3. Completion of all departmental requirements.
4. Completion of clearance process.

PROGRAM OPTIONS

Degree programs vary in requiring a thesis, project, or additional coursework. It is the responsibility of the student to be knowledgeable of all departmental requirements. Students are strongly encouraged to consult with their departmental graduate adviser.

Thesis — (6 hours) The candidate electing to write a thesis will select a problem area of interest within his major field. The thesis will be directed by the student's major adviser with the approval of the student's thesis committee. There is a two (2) year limit on completing the thesis, calculated from the date the student passed the Graduate Comprehensive Examination. From the time the Graduate Comprehensive Examination is taken a student is required to be in continuous enrollment until the degree is earned within the two year limitation.

Project— (3 hours) The term "Project" is broadly conceived: it may be an experiment, a review of research, an analysis and evaluation of some psychological, educational or vocational problem related to the student's work or some other type of independent study. The specific nature, procedure and requirements of the project are to be arranged by the candidate and his adviser with the approval of appropriate departmental faculty members or chairs. A minimum of 33 semester hours is required for this option. The results of the Project are to be reported in written form according to an acceptable stylistic form.

Additional Coursework—The student, in consultation with his/her adviser will select at least two additional courses to extend, expand or supplement his area of specialization.

Specialist in Education

The Specialist in Education Degree is offered in some of the teaching fields in which Master's degrees are offered

ADMISSION TO CANDIDACY

When approximately 12-15 semester hours have been completed the student should make application for advancement to candidacy. Please note that student cannot be advanced to candidacy until:

1. Supervisory committee formed and proposal approved.
2. Earned a 3.00 cumulative G. P. A.
3. All incompletes ("I" grades) have been removed.
4. Completion of all departmental requirements.
5. Filed the Application for Graduate Degree Candidacy with the approval of the Candidacy Committee in his major department.

Program Options

It is the responsibility of the student to be knowledgeable of all departmental requirements.

Thesis

All candidates submitting a thesis must defend it in a formal, public forum. The specific nature, procedure and requirements of the thesis are to be arranged by the candidate and his adviser with the approval of appropriate departmental faculty members or chairs. Policies and standards for establishing a committee and for preparation and submission are outlined in documents from the Division of Graduate Studies and individual departments. All procedures must be followed.

Examinations

Each graduate student who intends to earn a specialist degree at Jackson State University must successfully pass qualifying, comprehensive or final examinations or a combination of these. The content and methods of conducting these examinations are the responsibility of the college, school or department.

GRADUATE RECORD EXAMINATION, (GRE) and MILLER ANALOGIES TEST (MAT).

Candidates for degrees at Jackson State University may be required to take the Aptitude Test and may be required to take the Advanced Test in their field of specialization. Information with regard to dates and fees may be secured from the Psychometry Center or by writing to Educational Testing Service, 20 Nassau Street, Princeton, New Jersey 08540. Students should consult with department chair for specific departmental requirements.

GRADUATE AREA COMPREHENSIVE EXAMINATION, (GACE).

Each graduate student who intends to become a candidate for the specialist degree at Jackson State University should take a written comprehensive examination in the student area of specialization after completing the requirements the graduate program with a cumulative average of "B" or better in courses completed.

No student may appear for the comprehensive examination until after he/she has been declared eligible for the examination by the Dean of the Division of Graduate Studies. The student must be registered for at least one credit hour in the semester in which the examination will be taken. An audited course will not meet this requirement.

The Graduate Comprehensive Examination may be given three times a year, once in each semester. The date will be set by the Dean of the Division of Graduate Studies. A student may be

permitted to take the Comprehensive Examination twice: if the student fails the second time, the student must petition the Academic College Dean or designee for permission to take the examination the third time. The student should register with the assigned adviser or department chair to take this examination in the last semester or summer session of course work.

FINAL ORAL EXAMINATION.

The Final Oral Examination is administered by a committee of graduate faculty to students who write thesis or projects. This examination is based chiefly on the candidate's research and its relationship to the general field of education. No student is admitted to the oral examination unless he/ she has satisfied all previous requirements. This examination can be taken only after the thesis is in final form ready for final approval, and no earlier than the final term or semester of the candidate's program. Students who fail their oral examination may petition the Academic College Dean or designee for a second examination after an interval of six months has elapsed.

GRADUATION REQUIREMENTS

These are the basic requirements for the specialist degree:

1. Completion of the required course work with the required departmental cumulative GPA.
2. Comprehensive Examination, if required.
3. Defense of thesis or project.
4. Completion of clearance process.

Doctoral Degree

ADMISSION TO CANDIDACY

When eligibility has been established according to program requirements, the student should make application for advancement to candidacy. A student is eligible for candidacy when he has:

1. Achieved regular status
2. Earned a cumulative 3.00 GPA and the required departmental cumulative GPA.
3. All incompletes ("I" grades) have been removed.
4. Completion of all departmental requirements.
5. Filed the Application for Graduate Degree Candidacy with the approval of the Candidacy Committee in the major department.

Dissertations

All candidates must submit a dissertation based on independent and original research and must defend it in a formal, public forum. Policies and standards for establishing a dissertation committee and for preparation and submission are outlined in "Guidelines for Preparing the Doctoral Dissertation" and are supplemented by documents from the Graduate School and individual departments. All procedures must be followed.

Doctoral Examinations

Every student must pass a group of comprehensive examinations (oral, written, or both) that covers the primary areas of the student's program. After passing these examinations, the student may advance to candidacy.

Examinations

Each graduate student who intends to earn a doctoral degree at Jackson State University must successfully pass qualifying, comprehensive or final examinations or a combination of these. The content and methods of conducting these examinations are the responsibility of the college, school, or department.

GRADUATE RECORD EXAMINATION, (GRE) and MILLER ANALOGIES TEST (MAT).

Candidates for degrees at Jackson State University may be required to take the Aptitude Test and may be required to take the Advanced Test in their field of specialization. Information with regard to dates and fees may be secured from the Psychometry Center or by writing to Educational Testing Service, 20 Nassau Street, Princeton, New Jersey 08540. Students should consult with department chair for specific departmental requirements.

GRADUATE AREA COMPREHENSIVE EXAMINATION, (GACE).

Each graduate student who intends to become a candidate for the doctoral degree at Jackson State University should take a written comprehensive examination in the student area of specialization after completing 80% of the graduate program with a cumulative average of "B" or better in courses completed.

No student may appear for the comprehensive examination until after he/she has been declared eligible for the examination by the Dean of the Division of Graduate Studies. The student must be registered for at least one credit hour in the semester in which the examination will be taken. An audited course will not meet this requirement.

The Graduate Comprehensive Examination may be given three times a year, once in each semester. The date will be set by the Dean of the Graduate School. A student may be permitted to take the Comprehensive Examination twice; if the student fails the second time, the student must petition the Academic School Dean or designee for permission to take the examination the third time. The student should register with the assigned adviser or department chair to take this examination in the last semester or summer session of course work.

FINAL ORAL EXAMINATION.

The Final Oral Examination is administered by a committee of graduate faculty to students who write dissertations. This examination is based chiefly on the candidate's dissertation and its relationship to the general field of education. No student is admitted to the oral examination unless he/ she has satisfied all previous requirements. This examination can be taken only after the thesis is in final form ready for final approval, and no earlier than the final term or semester of the candidate's program. Students who fail their oral examination may petition the Academic College Dean or designee for a second examination after an interval of six months has elapsed.

GRADUATION REQUIREMENTS

These are the basic requirements for the doctoral degree:

1. A minimum of 60 semester hours of course work with the required departmental cumulative grade point average.
2. Notification of Degree Plan.
3. Internship if required.
4. Comprehensive Examination
5. Defense of Dissertation
6. Completion of clearance process.

Chronological Summary of Steps Leading to the Doctoral Degree

1. Admission and Continuous Enrollment
2. Completion of coursework with the required GPA.
3. Meet residency requirement
4. Internship (if required by program)

5. Comprehensive Examinations
6. Appointment of dissertation committee.
7. Register, complete and defend dissertation
8. Apply for graduation
9. Dissertation publication, arranged through the Graduate School.
10. Granting of degree. Diploma, with commencement of date, issued by Registrar.

Required Forms for Matriculation

The University uses several forms to assist in the advising process for graduate degree candidates. These forms may be obtained from department advisers. The forms properly executed provide general directions for matriculation at the University. Each form must be completed under the direction of the student's adviser.

Degree Plan (Degree Audit). It contains principal program requirements, thereby serving as a checklist for the candidate.

Application for Graduate Degree Candidacy. Complete this form after earning 12 semester hours (Masters and Specialist Degree) and GECE requirement (Master) or 80% of required coursework (Doctoral) and only when all admission and departmental requirements have been met. The student also forms the committee for the dissertation, thesis or project at this time.

Committee Report of Defense Results. The "Committee Report of Defense Results" is completed upon the successful defense of the dissertation, thesis, or project before the student's committee. This form must be submitted prior to final "Clearance for Graduation".

Online Graduation Clearance. This process is to be completed prior to Commencement. See <http://www.jsu.edu>.

Specific Degree Requirements

The specific requirements (admission, candidacy and graduate) for each degree are listed in the appropriate section of the catalog for the program, department, or school. The student should consult the major department or academic school for additional requirements.

GENERAL STATEMENTS

GENERAL PHILOSOPHY ON ACADEMIC RECORDS

Jackson State University maintains a permanent academic record for each student enrolled. The Permanent Academic Record contains those grades received from course work completed at Jackson State University along with any transfer of courses and credits from any other accredited institution of higher learning that is used by JSU to fulfill the degree requirements. All records are confidential. Academic records are considered property of the University. Opportunities are provided for students to inspect and to control the release of information contained in their records in accordance with the Family Education Rights and Privacy Act (FERPA) of 1974. The purpose of FERPA is to afford certain rights to students concerning their education records. The primary rights afforded are the right to inspect and review the education records, the right to seek to have the records amended, and the right to have some control over the disclosure of information from those records. The Act applies to all education records maintained by JSU which are directly related to a student. Records containing a student's name, social security number or other personally identifiable information are covered by FERPA.

The Retention and Disposal of Student Records: The Office of the Registrar and Records currently maintains academic records for students previously and currently enrolled. Academic records are stored on the mainframe computer located in the Office of Information Management with systems backup conducted nightly. Academic records that are not retrievable through computer access are stored on microfilm as well as a CD-ROM document imaging system located in the Registrar's Office. An additional copy of the microfilm, and CD-ROM disks are maintained at an off-site location, with duplicate copies of microfiche being stored in a steel vault located in the Office of Information Management. Once the information contained in the academic record has been electronically reproduced, the hardcopy document may be destroyed. However, the contents of those records can be reproduced at such time that the student requests personal examination or disclosure of the academic record be forwarded to another institution of higher learning, a potential or present employer, or any person or persons so designated by the student. The student must make a written request to have the academic record released. The academic record is generated and printed on transcript security paper which prevents duplicating or printing an official copy outside the Office of the Registrar and Records.

To file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA should be done with:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Ave., SW
Washington, DC 20202-4605.

TRANSCRIPTS

Transcript requests are made in writing and directed to the Office of the Registrar and Records. Transcripts may also be requested online at www.jsums.edu. The transcript is a student's complete and permanent academic record. It shows all undergraduate and/or graduate work completed, results, and degrees awarded at JSU. In addition, a summary of transfer credit is listed and detailed course work may be included. After the last enrollment period, transcript totals are shown. The Office of the Registrar and Records will not release transcripts received from other schools and colleges.

The current cost for each transcript is \$7.50. Checks or money orders should be made payable to Jackson State University. Transcripts can only be released for students having no outstanding financial obligations to the University. Transcripts are also held if the student has incomplete admissions files. Fees are not refunded under any circumstance.

Name and Address Change

A student who has had a change in name after his/her last registration must provide the University with the appropriate documentation which substantiates the legal name change. This must be submitted to the Office of the Registrar and Records prior to the student's next registration. Registration under a name different from that used in the student's last enrollment cannot be accomplished without appropriate documentation, which becomes a part of the student's permanent file. All grade reports and transcripts are issued under the student's legal name as recorded in the Office of the Registrar and Records.

A student who has had a change of address after his/her last registration must provide the University the new address by completing the appropriate form. This form may be secured from

the Office of the Registrar and Records. All transcripts will be mailed to the location of the new address.

Student Participation in Institutional Governance

As constituents of the university community, students are free, individually and collectively, to express their own position on institutional policies and on matters of general interest and on matters of general interest to the student body. The Graduate Student Association (GSA) is the primary forum for graduate student representation and provides a channel for communication among graduate students at Jackson State University. The organization serves as a vehicle for students to participate in the formulation of university policies directly affecting them. Students also may participate in the decision-making process through active membership on *ad hoc* and standing committees as specified in the University's policies on committee structure.

Contact the Office of the Division of Graduate Studies for membership information or additional information on the Graduate Student Association, by phone, (601) 979-4322, or by e-mail, gadmappl@jsums.edu.

Veteran Affairs Office

The Veteran Affairs Office (VA) assists students who are veterans and dependents of veterans who are eligible for benefits through the Veterans Administration. The office is located on the second level of B. F. Roberts Hall and was established to act as a liaison between the eligible students and the various Jackson State University offices to help resolve entitlement problems. It can be reached at (601) 979-1755. The office hours are: 8:00 a.m. to 5:00 p.m.Monday - Friday

The mailing address is:
Coordinator of Veterans Affairs
P.O. Box 17125
Jackson State University
Jackson, MS 39217

Office of Support Services for Students and Employees

The Office of Support Services for Students and Employees with Disabilities is committed to coordinating reasonable services and accommodations to JSU students and staff as well as other external constituents with disabilities. Special emphasis is given to accessibility and inclusion when meeting the needs of all of our students, employees and visitors. Any student, employee, or campus visitor who has been diagnosed with a disability is eligible for accommodations at JSU. The student, employee, or visitor must make the University aware of his/her disability by presenting documentation applicably showing the disability and need for academic adjustment, auxiliary aids, accommodations, and services.

For additional information, please contact the Office of Support Services for Students and Employees with Disabilities at (601) 979-3704. The Office is located on the first floor of Jacob L. Reddix Hall.

Identification Cards (I.D.)

It is the policy of Jackson State University that all students, faculty, and staff must obtain and carry an official JSU identification card (I.D.). The identification card provides students, faculty, and staff access to dining facilities, athletic events, residence halls, and the library. Cardholders who participate in the declining balance program for students and inclining payroll

deductible program for faculty and staff may make purchases in Student Dining, the Convenience Store, the Deli, Subway, Cash Dining, Bookstore, Health Center, Laundry rooms, Publications, and Vending machines. The identification card is the property of Jackson State University; it is intended for current JSU students, faculty, staff and guests only and must be returned upon request. This card is non-transferable. No fee will be charged for the original issuance of an I.D. Card. However, replacement of a lost, stolen or damaged card is the cardholder's responsibility. The cardholder is also responsible for safeguarding his/her I.D. card. The I.D. Center is located in the Laundry Facilities Building directly behind Jacob L. Reddix Hall. Office hours are from 8:00 a.m. to 5:00 p.m. weekdays.

DRUG-FREE SCHOOLS/CAMPUSES

Jackson State University acknowledges and adheres to the laws of the state of Mississippi. The University also complies with the Drug-Free Schools and Communities Act Amendments of 1989. In compliance with federal and state laws, at Jackson State University the following will apply:

Drugs

- A. The possession of any drug controlled by federal or state laws on or off campus is prohibited.
- B. In compliance with state and federal law, it is illegal to possess, consume, use, or distribute (or intend to distribute or use) any drug controlled by federal or state laws on the campus of Jackson State University or at event sponsored or supervised by the University.
- C. The manufacture, intent to manufacture, furnishes, intent to furnish drugs controlled by federal or state law is prohibited.
- D. The sale, intent to sell, purchase, and intent to purchase, deliver, and intent to deliver drugs controlled by federal or state law is prohibited.
- E. Possession or use of any drug related paraphernalia is also prohibited. The University reserves the right to initiate judicial action if drug violations occur on or off-campus. Students found to be in violation of the drug policy will be subject to disciplinary action, which may result in suspension or expulsion.

Failure to Comply

- A. Failure to respond or properly identify oneself pursuant to a request by properly identified officials of the University while in the performance of their duties.
- B. Failure to report to the office of a University official for a conference, meeting, or appointment by the official.
- C. Failure to appear as a witness in a disciplinary case when properly notified.
- D. Failure to comply with any disciplinary condition imposed on a person by any judicial body or administrator.

Participation in such acts is subject to University disciplinary action

HARASSMENT

- A. No person shall engage in any act of intimidation or harassment, physical force or violence that is directed against any person or group of persons because of their ethnicity, race, national origin, religion, gender, sexual orientation or preference, disability or political beliefs.
- B. No person shall use the telephone or electronic mail to harass another. From the reasons listed above.

Participation in such acts is subject to University disciplinary action and punishable by law.

SEXUAL HARASSMENT

No person shall engage in unwelcome sexual advances, requests for sexual favors and/or other physical conduct, and expressive behavior of a sexual nature where submission to such conduct is made explicitly, or implicitly, a term or condition of an individual's employment or education; or where submission to, or rejection of such conduct by an individual is used as a basis for academic or employment decisions affecting that individual.

Instances where such conduct has the purpose of substantially interfering with an individual's academic or professional performance or creating an intimidating, hostile, or demeaning employment or educational environment is strictly prohibited.

RESIDENCE REQUIREMENTS

Jackson State University applies the definitions and conditions as required by the State of Mississippi in the classification of students as residents or non-residents for the assessment of fees. Initial residency classification of an applicant for admission is determined at the time of admission. The University holds the student responsible for knowing and registering under their correct residential status. A student who willfully registers their status incorrectly will be subject to disciplinary action or dismissal and required to pay the fees they would have otherwise been required to pay. The following classifications will apply:

A MINOR- The residence of a person less than 21 years of age is that of the father. After the death of the father, the residence of the minor is that of the mother. If the parents are divorced, the residence of the minor is that of the parent who was granted custody by the court; or, if custody was not granted, the residence continues to be that of the father. If both parents are dead, the residence of the minor is that of the last surviving parent at the time of that parent's death, unless the minor lives with a legal guardian of their person duly appointed by a proper court of Mississippi, in which case his/her residence becomes that of the guardian.

AN ADULT- The residence of an adult is that place where they are domiciled, that is, the place where they physically reside with the intention of remaining indefinitely or of returning permanently when temporarily absent.

REMOVAL OF PARENTS FROM MISSISSIPPI- If the parents of a minor who is enrolled as a student in an institution of higher learning move their legal residence from the State of Mississippi, the minor is immediately classified as a nonresident student.

TWELVE MONTHS OF RESIDENCE REQUIRED- No student may be admitted to the University as a resident of Mississippi unless their residence, as defined here in above, has been the State of Mississippi for a continuous period of at least 12 months immediately preceding their admission.

RESIDENCY PETITIONS- Nonresidents may petition the institution for a change of residency classification. A person who enters the State of Mississippi from another state and enters a system institution is considered a nonresident. Provided, however, that any person who has attained 21 years of age and has thereafter established residency and resided within the State of Mississippi for 12 consecutive months after attaining 21 years of age upon sworn affidavit and other representation, may petition the particular institution for a change of residency classification for the purposes of fees and tuition assessment. The institution may make reasonable inquiry into the validity of the petitioner's claim. Such

petition of change of residency must be made on or before the last day a student may register at a particular institution without penalty.

RESIDENCE STATUS OF A MARRIED STUDENT- A married student may claim the residence of the spouse, or may claim independent resident status under the same regulation, set forth above, as any other adult.

CHILDREN OF PARENTS WHO ARE EMPLOYED BY THE UNIVERSITY- Children of parents who are members of the faculty or staff may be classified as residents without regard to the residence requirement of 12 months.

MILITARY PERSONNEL ASSIGNED ON ACTIVE DUTY STATIONED IN MISSISSIPPI- Members of the U. S. armed forces on extended active duty and stationed within the State of Mississippi may be classified as residents, without regard to the residence requirement of 12 months, for the purpose of attendance at the University. Resident status of such military personnel who are not legal residents of Mississippi (as defined in Section 37-103-12 of House Bill 409, passed during the 1988 Session of the Mississippi Legislature) shall terminate upon their reassignment for duty in the continental United States outside of Mississippi.

CHILDREN OF MILITARY PERSONNEL- Resident status of children of members of the armed forces on extended active duty shall be that of the military parent for the purpose of attending the University during the time that their military parent are stationed within the State of Mississippi and shall be continued through the time that military parents are stationed in an overseas area with last duty assignment within the State of Mississippi. Resident status of minor children shall terminate upon reassignment under permanent change of station orders of their military parents for duty in the continental United States outside of the State of Mississippi excepting temporary training assignments en route from Mississippi.

CERTIFICATION OF RESIDENCE OF MILITARY PERSONNEL- A military person on active duty stationed in Mississippi who wishes to avail her/himself or their dependents of the provisions of the paragraph titled "MILITARY PERSONNEL ASSIGNED ON ACTIVE DUTY STATIONED IN MISSISSIPPI" must submit a certificate from the military organization showing the name of the military member, the name of the dependent, if for a dependent, the name of the organization of assignment and its address (may be in the letterhead), that the military member will be on active duty stationed in Mississippi on the date of registration in the University; that the military member is not on transfer orders; and the signature of the commanding officer, the adjutant, or the personnel officer of the unit of assignment with the signers' rank and title. A military certificate must be presented to the Registrar each semester within 10 days prior to registration for the provisions of the paragraph "MILITARY PERSONNEL ASSIGNED ON ACTIVE DUTY STATIONED IN MISSISSIPPI", to be effective.

FAMILIES OF STUDENT- The spouse and children of a nonresident student who pays or receives a waiver of the NONRESIDENT fee may enroll at the University upon payment of the appropriate fees charged to a resident. Nonresident fees for spouses and children of part-time resident students will be prorated.

ALIENS- All aliens are classified as non-residents except those aliens lawfully admitted for permanent residence in the United States, and who reside in the State of Mississippi. An alien who

petitions to be declared a resident of the State of Mississippi must prove that they have been accorded permanent residence by the United States Immigration and Naturalization Service. The alien petitioner must also prove their intent to remain in the State of Mississippi.

Recommendations for Computers for Graduate Student Use

The Office of Information Technology recommends each graduate student have a computer with these minimum specifications:

Processor: AMD, Celeron, Intel P4 - 1.6 MHz
Base RAM: 256 MB Base Video: 32 MB
Hard Drive: 20 GB Optical Drive: CD ROM
NIC: 10/100 Base T Monitor: 17" Color
Sound Card and Speakers

As technology changes these specifications will also change. Contact the Office of Information Management for the latest recommendation.

GRADUATE PROGRAMS IN WHICH DEGREES ARE OFFERED

Program	Degree(s)
Accounting	M.P.A.
Biology	M.S., M.S.T.
Business Administration	M.B.A., Ph.D.
Chemistry	M.S., Ph.D.
Clinical Psychology	Ph.D.
Communicative Disorders	M.S.
Computer Science	M.S.
Criminology & Justice Services	M.A.
Early Childhood	M.S.Ed., Ed.D.
Education	Ed.S.
Educational Administration	Ph.D.
Educational Administration and Supervision	M.S.,
Elementary Education	M.S.Ed.

RESEARCH ORGANIZATIONS, ACADEMIC AND COMMUNITY SERVICES

Division of Library and Information Resources

The Division of Library and Information Resources enhances the research and teaching endeavors of the university community through the acquisition and dissemination of information. It is comprised of the Henry T. Sampson Library, and four branch libraries. Occupying a central location on the JSU campus, the Henry T. Sampson Library is a facility of over 150,000 square feet and houses in excess of one million resource items. Included among the collections in the Sampson Library are the following:

- African-American Collection - a major collection of resources by or about African-Americans and Africa.
- Special Collections - a non-circulating collection of documents with major concentrations of resources detailing the history of Jackson State and African Americans.
- Periodicals - the library currently subscribes to more than 1,500 print journals with an additional number in electronic format.
- Government Documents - the library is presently a selective depository for federal documents.
- Media Resources - a number of audiovisual resources are available to enhance classroom instruction.

Library Services - The Division is a client oriented agency, and offers some of the following services:

- Information Literacy (IL) Instruction - a major initiative that provides instruction in locating, evaluating, and using resources. IL is provided through formal classroom lectures, as well as through individualized instruction. Electronic and printed guides, handbooks, pathfinders and bibliographies made available to patrons, also contribute to the IL initiative.
- Reference Assistance - librarians are available at all times to help patrons locate, select and interpret the appropriate information and resources.
- Interlibrary Loan - resources not held by the library are made available through this service. Some nominal fees may be incurred.

Facilities - The library is furnished to meet the comfort and needs of library users and is fully handicapped accessible, with most of the library collections housed in open access areas. Additionally, the library also provides these specialized facilities:

- Computer Lab - a 100 workstation computer facility is located on the first floor.
- Auditorium - with seating for approximately 120, the auditorium is located on the second floor and is used for campus based activities.
- Group Study Rooms - rooms located on the second and third floors are provided for groups engaged in study.

Library Technology - Electronic library resources are available from campus as well as from remote locations and

may be accessed from the library website at - <http://sampson.jsu.edu>. In addition to the online public access catalog (OPAC), other electronic resources include, indices, abstracts, full text articles and journals, and online books. These resources are made available through the *MAGNOLIA* consortia as well as through subscriptions to *LexisNexis*, *ProQuest*, *Silver Platter*, *OCLC FirstSearch* and *netLibrary*.

Branch Libraries - The branch libraries listed below support the academic program(s) indicated:

- Allied Health Sciences Library - located in the Jackson Medical Mall, this library supports the College of Public Service as well as some of the special programs located in the Medical Mall.
- Cleopatra D. Thompson Curriculum Center Library - housed in the College of Education and Human Development, main campus, this library provides general support in the education curriculum and the Early Childhood Center.
- Information Services Library - located at the Universities Center on Ridgewood Road, this library offers basic support for the master and doctorate programs in Public Policy Administration, Business Administration, Social Work and the master programs in Communicative Disorders and Urban and Regional Planning.
- Jake Ayers Research Library - housed at the e-Center, the Ayers Library supports the Executive Ph.D. program.

The general public is invited to use any of the Jackson State libraries. Borrowing privileges, however, are reserved for university students, staff, and faculty. Regulations concerning the use of the facility are on the library website as well as in library handbooks and guides.

Division of International Studies

The Office of International Programs

The Office of International Programs is located in Suite 9, Faculty Apartments. Established in September 1993, the Office of International Programs engages in a variety of activities. With the overall aim of internationalizing Jackson State University, specific goals include internationalizing the curriculum; expanding the foreign language program; enhancing student involvement in international exchanges, work abroad programs and internships; increasing faculty participation in international exchanges, research, and internships; establishing language houses; increasing international student enrollment; establishment of an international village; increasing global awareness of the larger community; enhancing programs for international students; establishment of an international business center; instituting an intensive English language training program; increasing faculty involvement in technical assistance and training projects; and participation in the Diplomat-in-Residence Program. The Office is also

responsible for facilitating the local programming of the International Visitors Center and coordinating the activities of the Mississippi Consortium for International Development.

In an effort to prepare Jackson State University students for the new millennium, a major priority of the Office of International Programs is to provide students with the opportunity to participate in education abroad experiences. Countries in which students can enhance their ability to compete in a global society include Costa Rica, Nicaragua, Mexico, Honduras, South Africa, Russia, Lesotho, Ghana, Japan and other countries throughout the world.

English as a Second Language Institute (ESLI)

Individuals from around the world come to Jackson State University to study English as a second language. The English as a Second Language Institute (ESLI), accredited by the American Association of Intensive English Programs (AAIEP), provides a curriculum that has been developed within the context of the national standards for foreign language learning as well as AAIEP standards. Non-credit courses offered by the ESLI program are periodically updated to be compatible with the goals of the program and to reflect the best current knowledge in the field. The ESLI program is an integrated, multi-skill program that links grammar, listening, reading, communicative functions, and topics and provides training in four categories:

- ◆ for entering internationals who plan to enroll in long term academic programs;
- ◆ regular English as a second language classes for international students who require additional ESL training;
- ◆ survival English training for internationals; and
- ◆ TOEFL (Test of English as a Foreign Language) preparation.

The ESLI offers five levels of ESL training: Beginning, High Beginning, Low Intermediate, High Intermediate, and Advanced with an average instructor-student ratio of 1:4. Four classes are held daily, Monday through Friday, for a total of 25 classroom hours per week. After classes, students are required to visit the multi-media language lab where audio/video equipment and computers with Internet access are at their disposal. For more information about the ESLI, call (601) 979-3793 or e-mail oksana.chernousova@jsums.edu

International Visitors Center of Jackson

As a member of the National Council of International Visitors, the International Visitors Center of Jackson (IVCJ) is a part of a network of organizations with the expertise to host international visitors traveling under the auspices of the U.S. Department of State's Bureau of Educational and Cultural Affairs. The IVCJ arranges for international visitors to meet with JSU administrators, faculty and students in order to provide a total perspective of the university. Additionally, IVCJ has been instrumental in developing potential economic linkages between international entities and the state of Mississippi. In conjunction with the Office of International Programs, IVCJ cooperates in the sponsorship of an annual International Festival that provides a week of symposia, essay

competitions, displays of traditional dress, art, song and dance, and a scholarship banquet whose proceeds benefit international students matriculating at Jackson State University. Participants include the JSU Family, elementary and secondary school students throughout the area, and business and professional representatives. The event calls attention to the efforts of OIP and IVCJ in promoting cross-cultural awareness and understanding. For more information, call (601) 979-2043.

The Study Abroad Program

The Study Abroad Program at Jackson State University was established in 1993. It provides the opportunity for JSU students and faculty to experience other cultures, develop friendships and make international professional contacts through the unique perspective of academic coursework. Within its broad mission of internationalizing JSU, the Study Abroad Program allows students and faculty to develop a global awareness by broadening intellectual and cultural horizons through educational opportunities at foreign universities. Interested students and faculty should visit the Office of International Programs to inquire about a summer, a semester, or even a year of study opportunities in the country they have always dreamed of visiting. For more information, call (601) 979-3795.

Information Technology

The Information Technology Group, within the Office of Information Management, is headquartered at the JSU e-Center. Its mission is to support and enhance the academic and administrative activities of Jackson State University. Academic information technology (IT) resources include electronic and distance learning classrooms, modern and well equipped student computer labs, and high-performance computers for research. Many courses are web-enabled, providing online access to class information, materials, assignments, etc. Administrative and business processes are supported by a state-of-the-art computer cluster/SAN environment, which ensures business continuity and facilitates fast disaster recovery. The University uses the Sungardhe Banner product as its ERP system. It includes modules for managing student, finance, employee, and alumni/development records and transactions. To tie it all together, JSU currently operates a state-of-the-art metropolitan area network (MAN) that connects every building in which the University does business. The University's network consists of a fiber-optic based, gigabit Ethernet main campus backbone, with direct fiber links to three satellite campuses: the Universities Center complex, Jackson Medical Mall, and the JSU e-Center. Within all buildings, including residence halls, all functional areas (offices, classrooms, labs, dormitory rooms, etc.) are connected to the network using structured wiring and/or wireless technologies. Internet access is provided by a 100 mbps connection to the commodity Internet and a 10 gbps connection to the nation-wide high speed academic networks: Internet2 and National Lambda Rail (NLR).

Office of Research Development, Support and Federal Relations

The Office of Research Development, Support and Federal Relations at Jackson State University is the conduit for the university's interaction with the world. It shares with the world the achievements of the University family and the expertise of University scholars. It also creates, promotes and supports a research and development environment at the University by providing faculty and staff with assistance and support in identifying, securing externally funded grants, contracts, and cooperative agreements. The Office coordinates all research compliance issues and federal relations activities.

Office of Sponsored Programs

The Office of Sponsored Programs (OSP) is the centralized unit charged to coordinate research and sponsored program activities campus-wide. The Office strives to maintain a supportive environment for research and scholarly endeavors, and encourages faculty and staff to seek external funding to support the mission of the University and to explore alternative means to advance their professional interests. OSP seeks to ensure that the most up-to-date funding information is available. To that end, the following services are offered: (1) identifying funding opportunities, (2) coordinating proposal and budget development and, (3) assisting with project implementation and management.

Mississippi Urban Research Center

The Mississippi Urban Research Center (MURC) seeks to improve the quality of urban life through the conduct of basic and applied research. The Center collects, analyzes, evaluates and disseminates data on critical urban issues to policy makers, service providers, urban planners, educators and community leaders. Additionally, the MURC conducts instructional and training programs for persons working in or expected to pursue careers in urban public service.

Institute for Multimodal Transportation

The Institute for Multimodal Transportation, or IMTrans, is a federally designated University Transportation Center. The mission of the Center is to advance U.S. technology and expertise in the management of metropolitan mobility through mechanisms of education, research and technology transfer activities that combine the multiple modes of transportation into a comprehensive, integrated transportation system.

Jackson Heart Study Coordinating Center

The Jackson Heart Study is the first large-scale study of cardiovascular disease in African-Americans. Jackson State University is responsible for developing a data coordinating center and mobilization of the community. The primary mission of the coordinating center is to assure the validity of the research findings and provide comprehensive statistical needs, and provide administrative support.

National Center for Biodefense Communications

The National Center for Biodefense Communications for Rural America (the Center) is a strategic initiative to bring to bear Internet-based technologies for early detection of significant human and animal health events through basic and applied research, and to issue authorized, secure, non-public,

bioterror alerts and notification to authorized and appropriate policymaker, healthcare and first-responder recipients. The Center is particularly focused on bioterror surveillance and event detection and response as to events originating in urban and rural America.

School of Health Sciences

Institute of Epidemiology and Health Services Research

The Institute of Epidemiology and Health Services Research was established in 2001 with a grant for the U.S. Center for Disease Prevention. The goal for the Institute is to understand and eliminate the pervasive inequalities affecting the health and health care of racial and ethnic minorities and other underserved populations. These disparities, ranging from acute to chronic diseases to injury and violence, they include both access to health services, affect people of all ages, and cause unnecessary suffering, disability and premature death. Using innovative approaches and multidisciplinary research concepts and methods, the Institute is dedicated to improving the health and quality of care of minorities.

Center of Excellence in Minority Health

The mission of the Center is to address and eliminate the health inequalities affecting minorities through innovative programs in: community outreach and information sharing, research on the causes of health disparities, education, and career development training.

The goals of the Center are to: strengthen university and community relations, enhance the understanding of community needs, enhance the dissemination and application of research, expand and improve minority health, and support JSU's commitment to understanding and eliminating disparities.

School of Business

Center for Business Development and Economic Research

The purpose of the Center for Business Development and Economic Research is to coordinate research and service functions of the School of Business. The CBDER is composed of three units which highlight the School's central mission - research, service and teaching: the Bureau of Development Center, and the Financial Assistance Services and Training Project.

School of Education

NASA/JSU Educator Resource Center

The major goal of the NASA/JSU Educator Resource Center is to strengthen all teacher education programs and graduates at Jackson State University. The Center serves as a catalyst in teaching, learning, research and clinical practice. The Center augments the Curriculum Laboratory, Statistical Laboratories and Microcomputer Laboratory where students receive assistance in research design, applied use of technology and other course related activities.

School of Liberal Arts

Interdisciplinary Alcohol/Drug Studies Center

This Center is an interdisciplinary unit which provides graduate education, research and service delivery in substance abuse. The Center has five program components: education, research, training, prevention and intervention.

Margaret Walker Alexander Research Center

There is no archival research center focusing on the Twentieth Century African American. The Margaret Walker Alexander National Research Center fills this void. Nationally, it provides a contrasting focus to the broad, generalized approach of more than 13 African American archival research collections or centers.

The Center addresses two major themes: African American life in the segregation period and African American life in the Civil Rights Movement era. Other topics include African American migration, Head Start programs, education, health care, business, rural life, home ownership, churches, night life, the legal profession, military life, and music- blues, jazz, gospel, spiritual and classical.

Technology Transfer Center

The main purpose of the Technology Transfer Center when initially established was to provide technical assistance, training programs, and management services to governmental jurisdictions and agencies primarily involved in roads, bridges, maintenance and related transportation functions. The scope of the Center has expanded to include a comprehensive array of transportation related services including technical assistance to governmental jurisdictions and agencies in rural, small urban, and regional areas.

Specific program objectives are: to stimulate governmental communication and agreements; to serve as a clearinghouse for the dissemination of information relative to transportation among agencies and individuals; and to provide professional technical assistance to governmental units and agencies, on a consultant and contractual basis, that will transfer transportation expertise and enable clients to better accomplish service needs.

School of Science and Technology

Trent Lott Center for Geo-Spatial Research and Visualization

The Trent Lott Geospatial and Visualization Research Center (GVRC) was established to bond existing capabilities and talents in the areas of Geographic Information Systems (GIS), Remote Sensing (RS) and Scientific Visualization (Sci-Viz) and co-locate them in a centralized facility. This created an infrastructure of technology, data, people and institutional linkages that enables the discovery, evaluation and application of geospatial and visual data for adding value to research across various areas and disciplines.

The GIS/RS laboratories support the development, enhancement and transfer of GIS/RS applications, make geospatial data available and accessible, and promote research and development innovation among users. The Sci-Viz laboratory supports the need of scientists and researchers relative to modeling, program application development and production of high quality advanced visualizations for all fields or disciplines. The GVRC addresses human resource development to ensure a skilled workforce which is vital for sustenance of any high level technology activity.

The goal of the GVRC is to provide a consistent and reliable means to produce and share geospatial and visualized data among all users which would lead to enhanced management

and use of data as well as expanded research results. The key objectives are: to improve planning, analysis and decision-making through wide availability of geospatial visualized data and applications; to ensure that end users are able to acquire reliable data sets and detailed visualizations; to increase the number of qualified professionals in GIS, RS, Scientific Visualization and related fields.

There are adequate facilities, equipment and software for implementing existing programs and activities as well as other services and research-support desired by end users in GIS, RS, training and visualization.

Center for Environmental Health

This Center was established with a focus on research and development in the area of environmental health. The research center evolved as a "Center of Excellence" in the integration and application of environmental science concepts, methods, and strategies for conducting interdisciplinary environmental health research. The research focuses on the understanding of the basic mechanisms by which toxic substances compromise health. The long-term goal is to produce well-prepared graduates and state-of-the-art research in health and biomedical sciences which would allow the design of prevention and intervention strategies to investigate effects of human and animal exposure to environmental contaminants.

Center for Defense Integrated Data

The objectives of this center are to research, experiment, develop, test and demonstrate (1) fused sensor data technology that provide for near real time simultaneous processing of significantly increased number of target sets, (2) key data features and models for missile defense sensors, (3) neural networks, intelligent agents, and fractal analysis for prediction, classification, data association and data filtering, (4) autonomous updating methodology facilitating immediate access to databases that a continually current, (5) conflation hardware-in-the-loop Test Bed that enables current and developing sensor/sensor suites to be optimized for warfighter utility, and (6) data delivery networks that are fine-tuned and reliable for conflation employment, with emphasis on wireless and backbone networks.

Northrop Grumman Center for High Performance Computing of Ship Systems Engineering

The primary mission of the Center is to conduct computational fluid dynamic (CFD) study, i.e. research and development of accurate, efficient and robust numerical solvers for fluid flows of all speeds ranging from incompressible flows to hypersonic flows. Primary applications include: (1) aerodynamic simulations of airflows around aircraft or ground vehicles, (2) hydrodynamic simulations of surface ships or submerged objects, and (3) heat and mass transfer in fluid media. The goal of these simulations is to provide accurate prediction of the forces exerted on a given geometry, reducing cost and time in designing and improving aircraft and watercraft.

University Press of Mississippi

The University Press of Mississippi was founded in 1970 to encourage research and the publication of scholarly work.

Functioning as the scholarly publishing arm of the state-supported universities in Mississippi, the University Press is governed by a Board of Directors made up of one representative from each of the eight state universities, one representative from the Board of Trustees of Institutions of Higher Learning, and the director of the Press.

Health Center

The Health Center staff is organized for treating the usual minor illnesses and injuries. The University physician's hours are 9:00-10:00 a. m. Monday through Saturday, with the exception of Thursday morning, and 1:00-2:00 p.m. Monday through Friday. Family planning services are available by appointment only.

Students requiring emergency treatment should report to the Health Center. Transportation will be provided to an emergency room of a local hospital, if deemed necessary. Students who are suffering from chronic or prolonged illnesses or severe injuries may receive emergency treatment in the clinic but the staff will assist the student and his/her family in arranging for the continuation of medical care outside of the University Health Center.

Every full-time student, graduate and undergraduate, is enrolled in a student insurance program. A description of insurance benefits may be found in a brochure available from the Health Center or the Office of Student Life. A student should present his/her validated I. D. card when requesting services in the Health Center. There is a nominal charge for some special drugs prescribed and filled in the Health Center.

Bookstore

The Bookstore, located on the first floor of the Jackson State University Student Center, is operated as an educational facility coordinated with the academic program. The Bookstore is the campus center for the ordering and selling of textbooks and supplementary reading materials. The Bookstore also carries school supplies and a limited quantity of office supplies. It sells University jewelry (including class rings and pins), pennants, stickers and other insignia items. Commencement caps and gowns are ordered through the Bookstore.

Post Office

The Jackson State University Post Office, a contract station of the United States Postal Service located on the first floor of Jacob L. Reddix Hall, provides all of the mail services which can be obtained at larger post offices. Basic services include selling of stamps, stamped envelopes and postal money orders, sending and receiving of registered, certified, insured and express mail, and rental of postal boxes. Stamp vending is provided for after hours convenience.

Campus and interdepartmental mail may be routed through the Campus Post Office without postage. Pick-up and delivery services are provided for administrative offices. The zip code for the University is 39217.

Telephone service

Telephone service is provided through the University's Alcatel OmniPCX 4400 private communications exchange switch. JSU's telephone system is state-of-the-art Internet telephony, fully implementing voice over Internet Protocol (VOIP). Calling features available on JSU telephone lines include:

1. Call Waiting
2. 3-way Calling
3. Speed Dialing
4. Caller ID
5. Voice Mail

Students, faculty, and staff have several options for long distance telephone service:

1. Direct dial long distance service
2. University-issued calling cards
3. Pre-paid calling cards—This is a safe option that allows predictable budgeting and protection against fraudulent use of your account.
4. Person credit cards
5. Operator-assisted calls

Development Foundation, Inc.

The Jackson State University Development Foundation, Incorporated, a non-profit organization, was established and incorporated under laws of the State of Mississippi in 1968. Its express purpose is to promote the development of Jackson State University. It is governed by a Board of Directors composed of eminent community leaders in business, industry and education. The Director of Development serves as the Executive Secretary of the Foundation. Contributions, gifts, and bequests are solicited by the Foundation for the advancement of Jackson State University as an institution of excellence. The accrued interest of funds deposited in the Foundation is expended to provide scholarships for deserving students. Contributions to the Foundation, a tax-exempt organization, are deductible.

National Alumni Association, Inc.

The Jackson State University National Alumni Association, Incorporated, is the official body of graduates and former students of the University organized into local chapters and coordinated by a national board. The major purposes of the Association are to perpetuate the memories of University life and to provide a medium through which the interests of the University may be promoted. Active membership in the Association is open to all graduates and former students of the University upon payment of national dues.

The Association is responsible for the promotion of a spirit of fellowship and cooperation among graduates and former students for the welfare and benefit of the University. Some of its activities are special projects designed to enhance interest and support, such as presentation of the Alumnus of the Year Award and the Outstanding Educator Award; the publication of the Alumni Newsletter; and fund-raising programs. The Office of Alumni Affairs cooperates with the Alumni Association in implementing the Association's policies and programs.

Institutional Advancement and University Communications

The primary functions of Institutional Advancement and University Communications Offices are to: (1) assist the administration in developing and maintaining good relationships with community organizations and individuals; (2) continue to upgrade the procedures for disseminating information on and off campus in an orderly pattern; (3) assist in the accurate targeting of all efforts so that financial and human resources of the University can be better utilized; (4) develop a precise definition of how Jackson State University is perceived by its various publics, how this image is transmitted and how it can be improved; (5) work with the administration, faculty, and external groups to develop programs that have both clearly defined, realistic objectives, and apparent potential benefit for the University in moving toward the fulfillment of its mission. Institutional Advancement and University Communications Offices include the Offices of Alumni Affairs; Development; Public Information; Publications; Sports Information; Radio Station WJSU-FM; and Low Power Television Station W23BC.

Office of Alumni Affairs

The Office of Alumni Affairs serves as the liaison between Jackson State University and its alumni. It seeks to (1) ascertain and compile up-to-date information on all former students and graduates; (2) communicate with all alumni through newsletters, brochures, and leaflets; (3) organize alumni chapters wherever Jacksonians are located; (4) sponsor programs that will encourage alumni to support and promote the mission of the University; (5) promote the activities of the Jackson State University National Alumni Association, Incorporated; (6) assist the President of the Alumni Association; and (7) promote the welfare of the University and its alumni.

The Office of Alumni Affairs administers the Association's programs such as membership, reunions, and other campus sponsored events involving alumni.

OFFICE OF DEVELOPMENT

The Office of Development is the fund-raising component of the University. The Office coordinates and promotes most outside fund-raising activities, and coordinates the activities of the JSU Development Foundation, Incorporated. Through its research of and communication with private foundations and other organizations, Development works with faculty, staff, and administrators to identify potential funding agencies, and offers technical assistance in developing proposals for projects and innovative programs that may be funded by these agencies. It also solicits gifts and donations from alumni and friends of the University. The Office of Development is responsible for keeping an accurate and updated listing of all contributions made to the University.

Office of University Communications

The mission of the Office of University Communications is to maintain effective internal and external communications via print and electronic media with emphasis on providing accurate and timely information to the public and to news media organizations. This is done by communicating the

University's mission, goals, accomplishments, activities and programs to a diverse audience: students, faculty, staff, parents, alumni, friends, the media, state legislators, the University community and the general public.

Objectives:

- To communicate timely, accurate information about JSU locally and nationally
- To promote special events on campus
- To promote the accomplishments of JSU faculty, staff and students
- To assist the campus community with media relations
- To assist the University's Capital Campaign

OFFICE OF PUBLIC RELATIONS

The Office of Public Relations, under the direct supervision of the Director of University Communications, provides a systematic personalities of Jackson State University to its many internal and external publics through the use of print and electronic media. The Office of Public Relations serves as the official contact point for news media personnel seeking information about the University, its faculty, administration and students.

WJSU-FM

Jackson State University operates the FM non-commercial radio station, WJSU on an assigned frequency of 88.5 MHZ. A unit within the Office of University Communications, WJSU's mission is to provide programming services specifically targeted, but not limited to the minority audience in the Jackson Metropolitan community. These programming services seek to challenge, provoke, educate, and entertain the audience. WJSU also serves to enhance Jackson State University through communications with its many constituencies. WJSU, through its facilities serves to develop means by which students may become adept in the radio broadcast profession. WJSU-FM is a daily 24-hour station and is a leading provider of jazz, news and information, and is a member of National Public Radio and the African American Public Radio Consortium. Studios are located on the second floor of the Willie Dobbs Blackburn Language Arts Building. Office telephone number is 601-601-979-2140; WEBSITE is WJSU.ORG.

W23BC (TV-23) LPTV

W23BC TV-23, under the direction of the Director of University Communications, serves the metropolitan area of Jackson, Mississippi, within a ten-mile radius and through the Time Warner Cable system. The station provides excellent hands-on training for Mass Communications students in every facet of television broadcasting. Students may obtain production, directing, reporting, and videography skills on the latest broadcast technology. The station also provides excellent educational opportunities for public relations, advertising, and marketing majors.

Beyond educational value to JSU students, the community at large receives programming that is otherwise not aired by other local commercial and educational stations. Students and staff produce issue-oriented talk shows, news and weather updates, music video shows and other special projects.

Recording Studio

The Recording Studio/Production Training Center, located on the second floor of Blackburn Language Arts Building WJSU-FM, is a forty-track studio with a console adaptable to sixty-four inputs and a training lab featuring six production cubicles. The studio is equipped fully with analog tape and disk based digital recording and serves as a production facility for WJSU as well as a laboratory in audio engineering for interested students. The training center is equipped with radio production/editing gear and serves as a training area for Broadcast majors and students from the Department of Mass Communications.

Office of Financial Services

The Office of Financial Services (Business Office) is located on the second level of the B. F. Roberts Building. The primary function of the Business Office is to provide financial services to students, faculty, staff, and other members of the JSU family. The staff strives to provide courteous, accurate, and timely service to the public in all financial areas. The Business Office is organized to include the areas of Student Accounts, Cashiering, Payroll, Requisitioning, Accounts Payable, Student Loans, Grants/Contracts, and Accounting Services.

Public Safety (Campus Police)

The Chief of Public Safety is directly responsible to the Office of the President. The Chief assumes command of assignment of all police staff members; directs the work of police personnel; observes the efficiency of the police officers, and instructs them in the performance of patrolmen duties; takes personal command of the patrolman organization in times of emergencies; supervises investigations; and coordinates the work of the Police Force members on their assignments.

The Public Safety Department was organized under legislative authority granted by Senate Bill No. 1408 and approved April 12, 1954. Officers of the force are vested with the powers and authority to take such action as is necessary to enforce University rules and regulations, including the arrest of violators. The Public Safety Department is responsible for the general welfare, protection, and security of the students and faculty of the University. In this respect, it is particularly concerned with the following responsibilities: (1) the enforcement of campus regulations governing the parking of automobiles and traffic violations; (2) the maintenance of sound security measures of properties belonging to the University; and (3) the enforcement of rules governing standards of conduct.

Student Housing/Residence Halls

The Director of Residence Life/Housing is responsible for the general supervision of on-campus residence halls. Information regarding off-campus housing is provided in a guide to metropolitan area apartment complexes. The guide is available upon request.

On-campus housing is provided in single-sex residence halls. All rooms are double occupancy. Students with special health needs are expected to report their specific housing requirements to the Director of Residence Life/Housing in a

timely manner via the housing application. Each student living in University housing must have a completed housing application and a signed Residence Hall Agreement on file in the Department of Residence Life/Housing. Application for student housing may be obtained from the Office of Undergraduate Admissions or the Department of Residence Life/Housing, Post Office Box 17540, Jackson State University, Jackson, Mississippi 39217. Requests for application may also be made by calling (601) 979-2326 or (601) 979-3305. Completed applications must be accompanied by the required application fee and returned to the Department of Housing before a student is assigned housing. The application fee must be paid to the Housing Department. Filing an application for housing and paying the fee does not guarantee admission to the University or assignment to a residence hall. The Housing Department reserves the right to refuse any housing application; to change or cancel assignment to a hall or room, or to terminate a resident's occupancy for justifiable cause. Students may be housed one or two per room depending on the availability of space. A one-time, non-refundable application processing fee of \$75.00 and student admission to the University are required before the new student is given a room assignment. Continuing students are required to request housing each academic year. Procedures and deadlines for requesting housing are communicated to continuing students. Applications for summer housing must be filed before *April 15th*. For fall semester housing, applications should be filed before *June 30th*. If the application is filed and the new student decides not to enroll at JSU or live on campus, the student is expected to provide a written request for cancellation of the application. The application processing fee is non-refundable. Room assignments will be made on a first-come, first-served basis until all available rooms are assigned. A waiting list for housing is maintained by the Residence Life/Housing Director, when the demand for housing exceeds the available space.

Food Services

The primary purpose of the Department of Food Services, an auxiliary agency of the University, is to enhance campus life through services, superior food quality and efficient dining service management.

The main dining area is located on the first floor of the JSU Student Center. Parents, friends, students, faculty and University guests may purchase meals at a flat rate in student dining or choose to eat in The Legacy Dining at a cost per item. Subway Restaurant is located on the first floor of the JSU Student Center, and offer meals as well as other items at an economical rate. These locations remain open after the Main Dining Hall closes for those persons desiring an evening meal or snack.

Center for Social and Clinical Counseling

The Jackson State University Student Life Counseling Services assist students in becoming aware and accepting of one's feelings, complete tasks independently, and cope with problems in school and in the community. The counseling services provides counseling, crisis intervention, anger management, conflict resolution, assessment, and referral services for students individually and in groups.

Health Services

Health services are provided to Jackson State University students, faculty and staff at the University Health Center. A nurse/practitioner is available during office hours. A nightly and weekend on-call schedule addresses "after hour" emergencies. Information about student health insurance may be obtained from the University Health Center. In case of emergencies, students are required to report to the Student Health Center first before going to any hospital and/or private physician for any illness or injury to be covered by the University Health Plan. Otherwise, the student will be responsible for all encumbered expenses. If a student becomes ill or injured after clinic hours, he or she must immediately contact residence hall personnel or Campus Police (601-979-2580).

TESTING AND ASSESSMENT

A wide range of tests is available at Jackson State University. Presently, the testing services administer several national testing programs, a special University testing program and others. The national testing program includes:

- ◆ *The Graduate Record Examination (GRE).* The Graduate Record Examination is administered to graduating seniors and is used to evaluate the students' aptitudes and levels of achievement in various fields of concentration. The test is often used as a selective device for graduate school because of the validity of its descriptive and predictive data. The General Test is computerized-based and it is given in Jackson, MS at the Sylvan Learning Center. The Subject-Test is a paper-pencil test and administered on campus.
- ◆ *PRAXIS.* The Praxis Examination is taken by students who plan to enter the teaching profession. The test is used to meet entry level licensure for employment by many states.
- ◆ *The Graduate English Competency Examination (GECE).* Every entering graduate student at Jackson State University must have evidence of the ability to express himself/herself in writing before becoming a candidate for a degree. The GECE is required of all first-time students enrolled in the Division of Graduate Studies. It is to be taken by new students at the scheduled time prior to or immediately after enrollment. The GECE is given during both the Fall and Spring semesters and during the summer term.
- ◆ *The Graduate Management Admission Test (GMAT).* The Graduate Management Admission Test is required for business administration majors. It is a computer-adaptive test that is available in Jackson, MS at the Sylvan Learning Center.
- ◆ *The Miller Analogies Test (MAT).* The MAT is required for several programs. This exam is administered on campus on the second Wednesday of each month. Application deadline is one week prior.

**The student should consult the major department and the academic school for specific required examinations.*

Oak Ridge Associated Universities

Since 1994, students and faculty of Jackson State University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *ORISE* Catalog of Education and Training Programs, which is available at <http://www.oraugov/orise/educ.htm>, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Dr. Felix A. Okojie
Provost and Vice President for Research Development and
Support and Federal Relations
ORAU Councilor for Jackson State University

Monnie E. Champion
ORAU Corporate Secretary (865-576-3306);

Visit the ORAU Home Page (<http://www.oraugov>)

The Academic Common Market

Jackson State University participates in the Academic Common Market (ACM), which is a tuition-savings program for college students in the 16 Southern Regional Education Board (SREB) member states who want to pursue degrees that are not offered by their in-state institutions. Students can enroll in out-of-state institutions that offer their degree program and pay the institution's in-state tuition rates.

Hundreds of undergraduate and graduate programs are available for residents of SREB states. The ACM eliminates unnecessary duplication of academic programs among participating states, recognizing that it is impractical for any institution or single state to develop or maintain degree programs in every field of knowledge.

The ACM program is not competitive or merit-based, but applicants must meet state residency and college program requirements. Some institutions and states may impose additional acceptance requirements, such as full-time enrollment status or GPA requirements.

The following states participate in the ACM: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Oklahoma, South Carolina, Tennessee, Virginia and West Virginia; Florida, North Carolina and Texas participate only at the graduate level.

For more information about the Academic Common Market, please visit:

http://www.sreb.org/page/1395/academic_common_market_faqs.html

or

contact the JSU Office of Academic Affairs.

TOURS

Visitors are always welcome at Jackson State University. Campus tours are routinely scheduled at 10:00 a.m. and 2:00 p.m. daily with prior notice Monday thru Friday. Tours are approximately two hours in length. Individuals and groups interested in touring the campus should contact the Office of Undergraduate Recruitment approximately three weeks prior to their proposed tour. All tour requests must be submitted in writing before a tour can be confirmed. Complete information on campus tours may be obtained from the Office of Undergraduate Recruitment.

Departments

- ◆ Accounting
- ◆ Economics, Finance, and General Business
- ◆ Management and Marketing

The School of Business was authorized on July 1, 1972, through the merger of the Division of Business and the Department of Economics. Subsequently, the School was departmentalized and today it includes the departments of Accounting; Economics, Finance and General Business; Management and Marketing; and Business Education and Administrative Services. In addition, the School has an office of Business Graduate Programs, a Center for Professional Development, and a Center for Business Development and Economic Research. The College is accredited by the Association to Advance Collegiate Schools of Business (AACSB) and shares the various accreditations of the University. On July 1, 2003, the School of Business evolved to the College of Business.

Mission

The mission of the College of Business is teaching, research and service. Teaching and research are afforded equal priorities. Relative emphasis is on undergraduate programs. All instructional programs seek to cover subject matter that is generally included in collegiate management education programs designed to prepare students to be effective collaborators in the twenty-first century. Many of the research and service activities of the College focus on problems or subjects of interest to businesses and other organizations in the State of Mississippi. As a major historically black university located in an urban area, the primary objectives of research are to contribute to the solution of business and economic problems, particularly issues affecting the urban community and a diverse population; to improve the practice and performance of business and economic organizations; and to improve instruction in business and economic disciplines. The service component of the mission emphasizes support to local businesses, professions, government, and other institutions whose work emphasizes business, economic and urban issues. The College is committed to providing broad access to all of its programs and services without sacrificing access of historically disadvantaged populations.

The College of Business offers, through the departments of Accounting; Economics, Finance and General Business; and Management and Marketing, the Master of Business Administration (M.B.A.), Master of Professional

Accountancy (M.P.A.), and Doctor of Philosophy (Ph.D.) degrees. The College of Business strives to achieve several goals in each of its programs.

BUSINESS GRADUATE PROGRAMS

**Goals of the
Master of Professional Accountancy Program**

The M.P.A. degree as structured is viewed as a terminal degree necessary for entry into professional accounting positions in public accounting, industry, government and health and social institutions.

The goals of the M.P.A. program are:

- ◆ To instill in students a broad perspective of the accounting environment;
- ◆ To equip students with specific skills thereby enabling them to function productively;
- ◆ To provide students with a basic core of knowledge in business and management.

**Goals of the
Master of Business Administration Program**

The design and intent of the M.B.A. degree program are:

- ◆ To prepare our students for entry level, professional and mid-level management positions in an environment where the labor force is becoming more diversified and internationalization of business and industry are essential for remaining competitive.
- ◆ To develop each of our students in all of the functional areas of Business and Economics from an applications standpoint; and,
- ◆ To train all of our students in research methodology as it pertains to Business research.

Admission Requirements

Students seeking admission to the MBA or MPA program must submit the following to the Office of Business Programs:

1. Application to the Division of Graduate Studies.
2. Undergraduate transcripts from all colleges and universities attended.
3. Scores from the Graduate Management Admission Test (GMAT). GMAT scores older than five years are not acceptable;
4. Three letters of recommendation;
5. Evidence of professional and/or managerial experience.

Regular Admissions

To be considered for regular admission into the MBA or the MPA program, an applicant must satisfy the following minimum composite score (s):

a. $\text{GMAT score} + (200 \times \text{undergraduate GPA}^* (\text{bachelor's level})) = 950$

*Scale of 4.00.

b. $\text{GMAT score} + (200 \times \text{upper level undergraduate GPA}^* (\text{bachelor level})) = 1000$

*Scale of 4.00.

Conditional Admissions

The College of Business grants a limited number of Conditional Admissions to applicants with a composite score in the range of 850 to 949, and/or a minimum upper division composite score of 949. Applications for students whose composite scores are between 850 and 949 are forwarded to the Business Graduate Advisory Council for an admission recommendation. The number of students admitted in this category will not exceed 20% of the total number of students granted Regular Admission for the semester of application. Additionally, applicants must satisfy the Division of Graduate Studies' minimum GPA requirement of 2.50 (on a 4.00 scale) to be considered for admission eligibility.

Scholastic Requirements

1. The College of Business requires all MBA and MPA students to maintain a minimum cumulative 3.00 grade point average.
2. A student who falls below 3.00 cumulative average (GPA) is placed on academic probation and will be requested to appear for counseling.
3. A student who falls below a 3.00 average for two consecutive semesters will be expelled from the program.
4. The Graduate English Competency Examination must be taken during the first semester of graduate studies. If a student fails the examination, they must register for ENG 500- Advanced Lab Writing, the second semester of graduate studies. This course cannot be used as an elective for the M.B.A. or the M.P.A. degree.
5. No credit will be granted for any course with an assigned grade below "C" as applicable toward meeting the requirements for the M.B.A. or M.P.A. degree.
6. Any course to be taken outside the College of Business to be applied toward the degree requirements must receive prior approval in writing from the Director of Business Graduate Programs. Courses

taken outside the College of Business to meet the degree requirements are strongly discouraged.

7. A minimum GPA of 3.00 is required overall and in required MBA and MPA courses for graduation.

MASTER OF PROFESSIONAL ACCOUNTANCY

Program Information

The MPA Program is open to anyone who has a baccalaureate degree from an accredited institution. The program consists of 30 semester hours of graduate course work. Generally, students with an undergraduate degree with a major in accounting will only have to take 30 semester hours of graduate work.

Students with an undergraduate degree with a major in a business discipline other than accounting must complete the undergraduate accounting prerequisite hours listed below before enrolling in graduate accounting courses.

Students with an undergraduate degree other than business or accounting must complete the undergraduate accounting and general business prerequisite hours listed below before enrolling in graduate courses.

Undergraduate Prerequisite Courses

Accounting

Course	Title	Semester Hours
ACC 211	Principles of Financial Accounting	3
ACC 212	Principles of Managerial Accounting	3
ACC 314	Intermediate Accounting I	3
ACC 315	Intermediate Accounting II	3
ACC 423	Income Tax Accounting	3
ACC 455	Auditing	3
	<i>Total hours</i>	18

General Business

GB 201	Intro to Legal Aspects of Business	3
ECO 359	Business Statistics	3
ECO 211	Principles of Macroeconomics	3
ECO 212	Principles of Microeconomics	3
MNGT 330	Management to Organizations	3
MKT 351	Marketing Management	3
	<i>Total hours</i>	18

Graduate MPA Courses

Accounting Course	Title	Semester Hours
ACC 540	Advanced Managerial Accounting	3
ACC 541	Advanced Accounting Theory	3
ACC 557	Seminar in Attestation	3
ACC 565	Seminar in Gov. & NFP Accounting	3
ACC 575	Research in Taxation	3

Electives: Accounting Courses (Select Two)

ACC 536	Advanced and International Accounting	3
ACC 573	Advanced Income Tax Accounting	3
ACC 592	Accounting Information Systems	3
ACC 545	Financial Statement Analysis	3
ACC 561	CPA Review	3

*Business Courses

MNGT 520	Productions & Operations Management	3
MNGT 516	Statistics for Business Decisions	3
FNGB 515	Managerial Finance	3

*Business Courses

MPA students must complete 9 hours of graduate non-accounting business elective FNGB 515, Managerial Finance; Statistics for Business Decisions; and MNGT 520, Productions & Operations Management are required for students who have not recently completed similar courses in their undergraduate studies. Students who have recently completed similar undergraduate courses (e.g., production management or quantitative business analysis; six hours of statistics) may select other business electives, subject to the approval of the MPA advisor.

Selection of Accounting Electives is Subject to the Following Constraints

1. Most accounting electives are split-level course offered to an individual student for either undergraduate or graduate credit but not both.
2. ACC 536 Advanced and International Accounting is required for MPA students who did not complete an equivalent undergraduate course.
3. ACC 592 Accounting Information Systems is required for MPA students who did not complete an undergraduate accounting information systems course.

MASTER OF BUSINESS ADMINISTRATION

Admission to the MBA Program is open to all students who have satisfactorily completed a baccalaureate degree from an accredited four-year institution. Students with a baccalaureate degree in business generally have met the undergraduate prerequisites necessary prior to enrollment in the MBA curriculum. Students with undergraduate degree outside the business discipline must satisfy the 30 credit-hours of prerequisites listed below, before enrolling in the MBA curriculum.

The MBA curriculum consists of a total of 30 credit-hours of graduate business courses in the areas of accounting, economics, finance, management, marketing and statistics. Of the 30 credit- hours, 24 hours constitute the program core requirements and must be completed by all MBA students. The remaining 6 hours are restricted business electives.

To encourage timely completion of program requirements and to avoid course scheduling conflict, students are advised to the Business Graduate Programs Office for information about sequential course offering and additional scheduling details.

Undergraduate Prerequisites for the MBA

Course	Title	Semester Hours
ACC 211	Principles of Financial Accounting	3
ACC 212	Principles of Managerial Accounting	3
ECO 211 & 212	Principles of Economics I & II	6

FNGB 320	Business Finance	3

Recommendations for a Second Degree

◆ **MBA: First Degree; MPA Second Degree**

After completing the MBA, a student wishing to complete the MPA must submit:

1. An Application to the Division of Graduate Studies for the MPA program.
2. An official MBA transcript to the Division of Graduate Studies
3. Three letters of recommendation from MBA professors to the Office of Graduate Business Programs.

If admitted for the second degree, the student must complete all undergraduate accounting prerequisite before completing the following 18 graduate credits hours in Accounting.

ACC 541	Advanced Accounting Theory
ACC 565	Seminar in Government & Non-Profit Accounting
ACC 567	Research in Taxation
ACC xxx	Elective
ACC xxx	Elective

◆ **MPA: First Degree; MBA Second Degree**

After completing the MPA, a student wishing to complete the MBA must submit:

1. An Application to the Division of Graduate Studies for the MBA program.
2. An official MPA transcript to the Division of Graduate Studies

3. Three letters of recommendation from MPA professors to the Office of Graduate Business Programs.

If admitted for the second degree, the student must complete all undergraduate accounting prerequisite before completing the following 18 graduate credit hours.

MNGT 502	Human Resources and Organizational Behavior
MNGT 560	Business Policy
MKT 530	Managerial Marketing
ECO 530	Managerial Economics
MBA Elective	ENTR, MKT, ECO, MNGT or FNGB
MBA Elective	ENTR, MKT, ECO, MNGT or FNGB

NOTE: Students wishing to pursue the second degree must contact the MBA academic advisor, the MPA academic advisor, or the graduate program director to develop the appropriate plan of study to ensure timely completion of requirements.

Master of Business Administration Online Program

The JSU online MBA initiative is designed to enable working adults to obtain a JSU quality education while still maintaining their commitments to family and work. The flexibility associated with online learning is paramount in the in the opportunity it bring to the national population.

Admission Requirements

The Graduate Application and all required documents must be submitted prior to admission. Students will not be processed for enrollment without official program admission.

The required admission documents are the following:

1. Graduate Application for Admission
2. Two (2) official copies of transcripts from all institutions attended. International applicants or those with degrees from international institutions must have their transcripts translated, if needed, and evaluated from a reputable international transcript evaluation agency;
3. A bachelor's degree in Business from an accredited college or university;
4. Official copy of GMAT or GRE scores (Only scores of tests completed within the last 5 years are acceptable)
5. Official TOEFL scores (for international applicants only)
6. Evidence of professional experience (submit a copy of an updated resume) or a personal statement describing the applicant's analytical skills and the reasons for pursuing the MBA.

To be eligible for regular graduate admission into the MBA program, applicants must have a composite score of 950 and must have at least a 2.5 GPA on a 4.0 point scale. The composite score is computed as follows: Undergraduate GPA X 200 + GMAT = at least 950. For applicants submitting the GRE scores a GRE-GMAT conversion will be utilized to compute the composite score.

Online Curriculum

Students with a baccalaureate degree in business generally have met the undergraduate pre-requisites necessary prior to enrollment in the MBA curriculum. The MBA on-line

curriculum consists of a total of 30 credit-hours of graduate business courses in the areas of accounting, economics, finance, management, marketing and statistics. The 30-hour curriculum will be delivered over 5 eight-week terms during a period of 12 calendar months. Students are expected to complete two courses or six credit hours during each eight week term. The course sequence will be delivered as follows:

Term 1

MNGT 502 Human Relations and Organizational Behavior
ACC 545 Financial Statement Analysis

Term 2

MKT 530 Managerial Marketing
ACC 540 Managerial Accounting

Term 3

FIN 547 Investments
FIN 515 Managerial Finance

Term 4

ECO 530 Managerial Economics
MNGT 516 Statistics for Business Decisions

Term 5

MNGT 520 Advanced Production and Operations Management
MNGT 560 Seminar in Business Policy

Scholastic Requirements

1. The College of Business requires all MBA Online students to maintain a minimum cumulative 3.00 grade point average.
2. A student who falls below 3.00 cumulative average (GPA) is placed on academic probation and will be requested to appear for counseling.
3. A student who falls below a 3.00 average for two consecutive semesters will be expelled from the program.
4. The Graduate English Competency Examination must be taken during the first semester of graduate studies. If a student fails the examination, he/she must register for ENG 500-Advanced Lab Writing, the second semester of graduate studies. This course will be completed in addition to the 30-hour MBA curriculum.
5. No credit will be granted for any course with an assigned grade below "C" as applicable toward meeting the requirements for the MBA degree.
6. A minimum GPA of 3.00 is required overall and in required MBA courses for graduation.

DESCRIPTION OF COURSES

Accounting

ACC 536 Advanced and International Accounting (3 Hours) Prerequisites: ACC 314, 315. A study of advanced accounting issues concerning partnerships, consolidations, international operations, and International Financial Reporting Standards. Not open to those who completed ACC 436 at the undergraduate level.

ACC 540 Advanced Managerial Accounting (3 Hours) Prerequisites: ACC 211, 212. Study of managerial uses of

accounting information and trends in internal accounting functions.

ACC 541 Advanced Accounting Theory (3 Hours) Prerequisite: ACC 314. A brief historical development of accounting thought followed by an intensive investigation of the theoretical framework on which accounting principles and procedures rest.

ACC 545 Financial Statement Analysis (3 Hours) Prerequisites: ACC 211, 212. This course offers a study of the tools and techniques utilized to analyze financial positions, results of operations, and cash flows as reported in corporate annual reports.

ACC 557 Seminar in Attestation (3 Hours) Prerequisites: ACC 211, 212. Study and refinement of generally accepted auditing standards, procedures and extension of auditing procedures; study of special investigations and audit reports; review of recent auditing trends, research, and pronouncements.

ACC 561 CPA Review I (3 Hours) Prerequisite: ACC 314. A review of selected topics as tested on the Uniform CPA Examination.

ACC 565 Seminar in Governmental and Not-for-Profit Accounting (3 Hours) Prerequisites: ACC 211, 212. A study of generally accepted accounting principles of state and local governments and selected nonprofit entities with an emphasis on current developments in these areas.

ACC 573 Advanced Income Tax Accounting (3 Hours) Prerequisite: ACC 423. A study of federal and state income tax laws for fiduciaries, partnerships, and corporations utilizing modern research technology. Not open to those who completed ACC 473 at the undergraduate level.

ACC 575 Research in Taxation (3 Hours) Prerequisite: ACC 423. A study of selected tax issues and the application of tax research methodology. Topics include the tax research environment, primary and secondary sources of federal tax law, and implementing tax research tools.

ACC 581 Special Topics (3 Hours) Prerequisites: ACC 211, 212 and consent of the Instructor. Directed study of contemporary topics in accounting practice.

ACC 583 Seminar in International Accountancy (3 Hours) Prerequisite: ACC 211, 212. This course offers a study of GAAP, GAAS and professional accountancy in a global context. Topics include diversity in reporting practices, International Financial Reporting Standards, and emerging issues.

ACC 592 Accounting Information Systems (3 Hours) Prerequisite: ACC 314. A study of theory and practice as applied to accounting information systems. The course examines the process for purchasing or designing accounting systems and a variety of topics dealing with the role of technology in building, implementing, controlling, and auditing accounting information systems. A secondary goal of the course is to help students become more comfortable using computer-based tools including e-mail, accounting software and the World Wide Web. Not open to those who completed ACC 492 at the undergraduate level.

Economics

ECO 500 Environmental Economics. (3 Hours) This course is concerned with a theoretical frame work for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The

policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environmental species. It also explores the effects of economic growth on the environment to include the interrelationships between the economics activity and the environment. Cost benefit analysis, and the application of the economic theory of external economies and diseconomies and welfare economics is applied to problems of the physical and socioeconomic environment.

***ECO 511 Macroeconomic Theory.** (3 Hours) Macroeconomic concepts relating to the theory of income and employment. Analysis of changes in the level of economic activity, economic growth and inflation.

***ECO 512 Microeconomic Theory.** (3 Hours) Detailed analysis of traditional microeconomic theory, including consumer behavior theories, theories of production, cost curves, market structure and factor price determination.

ECO 514 Manpower Problems. (3 Hours) The development of the economic conditions which prevent different groups of people from acquiring marketable skills. The impact of the unemployables on the free enterprise system and a survey of federal legislation designed to eliminate the economic conditions which prevent these groups of people from entering the labor markets.

ECO 516 History of Economic Thought. (3 Hours) Development of the analytical tools and concepts which comprise economic theory with special emphasis on the contributions of the classical economists, Marginalists, Neo-classicists, Institutionalist and Keynes.

ECO 530 Managerial Economics. (3 Hours) Economic tools of analysis in the operation of a business; applied microeconomic, to solve selected business problems and to aid decision making in business firms and other organizations.

ECO 540 Monetary Theory. (3 Hours) An examination of monetary theories. A discussion of the quantity theory, the demand for money, the velocity of money, interest rate theory, and the flow of money among the various sectors of the economy.

ECO 541 Monetary Policy. (3 Hours) A detailed analysis of neoclassical theories of central banking, debt management, and financial intermediaries and their impact on the level of employment, prices and economic growth. The development of appropriate monetary policy over the course of the business cycles. A discussion of current issues concerning monetary policy.

ECO 544 Public Finance. (3 Hours) An economic analysis of government expenditures and receipts; the pricing of government services to the public. The economic impact of government expenditures and taxation on the level of income, employment, economic growth and the allocation of scarce resources.

ECO 546 International Economics. (3 Hours) A development of the classical, neoclassical and modern theories of international trade and the economic benefits derived. The impact of international trade on the economics of the world and the formulation of the appropriate international trade policy.

ECO 555 Economic Development of Blacks. (3 Hours) A survey of the basic economic conditions of Blacks and the development of strategies designed to improve their economic development. A detailed analysis of federal legislation to improve the economic conditions of Blacks. A discussion of

the impact of Black Capitalism on the economic development of Blacks. A discussion of the different theories and ideologies of the government, labor unions, big business, civil rights organizations as to how Blacks can best achieve economic development.

ECO 556 Urban Economics. (3 Hours) A detailed economic analysis of the major economic problems facing the government of our central cities, such as, transportation, the flight to the suburbs by high income groups, education, housing, and taxation. A survey of the different theories and ideologies on the part of economists, government officials, business leaders, and politicians as to how the problems of our cities can best be solved.

ECO 558 Statistics. (3 Hours) Classical statistics and regression analysis; descriptive statistics, probability, point and interval estimation, decision theory, variance analysis, linear regression, and least square estimates.

ECO 570 Economics Seminar. (3 Hours) Guided individual research in current economic problems, including research methodology.

ECO 599 Thesis Research. (3 Hours) Preparation of thesis required of all students writing master's thesis in economics.

Finance

FNGB 503 Environmental Concepts in Business Administrations (3 Hours) Prerequisites: FNGB 201, 302, MNGT 330 or equivalent. An analysis of environmental factors relating to the business organization including labor, government, public ethics, and international forces.

FNGB 504 Legal Environment of Business. (3 Hours) Prerequisites: FNGB 201 and/ or 302 or equivalent. The operation of the business organization in studies relative to the legal aspects of its operational environment.

FNGB 515 Managerial Finance. (3 Hours) Prerequisites: FNGB 320 or equivalent. A study of capital budgeting techniques, methods of determining a firm's cost of capital, valuing stocks and bonds, and international finance.

***FNGB 561 Seminar in Business Administration and Research Project.** (3 Hours) Prerequisite: 24 hours of MBA course work. Requirement: Supervised individual research relative to the student's research project required for completion of the degree program.

Marketing

***MKT 530 Managerial Marketing.** (3 Hours) Prerequisites: MKT 351, ECO 357, 358, ACC 211, and 212, and ECO 211, 212 or equivalent. Integration of the concepts of marketing with decision-making relative to marketing management situations.

MKT 531 Special Problems in Marketing. (3 Hours) Prerequisite: MKT 530 or equivalent. Advanced study of marketing theories with emphasis upon quantitative techniques applied to marketing problems.

MKT 532 Advertising. (3 Hours) Prerequisite: MKT 530. Is an advanced advertising course in the Field of Marketing. This course is designed to introduce the student to the advertising decision areas: Advertising Objectives, Advertising Copy and Design, Advertising Media, Media Vehicles and Schedules, Advertising Budget and Advertising Campaigns.

MKT 538 Marketing Research. (3 Hours) Prerequisite: MKT 530. Study of Scientific Methodology and major

techniques used to design, collect and analyze research data pertaining to marketing problems. Students are responsible for designing a marketing research project, developing a questionnaire, collecting data, computer analyzing the data, via cross tabulation and other univariate and multivariate techniques, and preparation of a final report. Students will also be responsible for evaluating and assessing current published marketing research projects.

MKT 540 Consumer Behavior. (3 Hours) Prerequisite: MKT 530. This course is designed to introduce the student to "The State of the Art" in buyer research and theory. Contemporary issues such as Consumerism (E.G. Consumer Behavior, Regulation and Consumer Liabilities, redress, etc.); Black Buyer Behavior; Regulation and Consumer Behavior; and Consumer Thought Processes (e.g. perceptions, attitudes, cognitions, conations, opinions, interest, intentions and pre and post purchase behaviors) will be the major focal areas for this course.

MKT 566 International Marketing. (3 Hours) Prerequisite: MKT 530. Study of the similarities and differences between domestic marketing and international marketing, an examination of strategic international marketing for developing a complete marketing plan for a product and a country of their choice.

Management

***MNGT 502 Human Relations and Organizational Behavior.** (3 Hours) Prerequisite: MNGT 330 or equivalent. A study of organizational theory, group behavior, motivation, and systems applications to organizational management.

MNGT 510 Mathematical Analysis for Management. (3 Hours) Prerequisite: MATH 111. To be taken if the student has not had college level calculus. Concepts of analysis: sets, relations, functions, limits differentiation, sequences, integration, and matrix algebra. Applications to business problems are emphasized. This course cannot be used as an elective.

MNGT 511 Computer Applications in Management. (3 Hours) A survey of the use of the computer as a tool for decision making, communication, and research. This course will include the use of the computer as a support for all business activities: word processing, database, spreadsheet, graphics, electronic mail, Internet, World Wide Web, and Internet.

***MNGT 516 Statistics for Business Decisions.** (3 Hours) Prerequisites: MATH 231 and/or MNGT 510, ECO 357, 358 or equivalent. A study of data collection, presentation, and analysis including interval estimation, hypothesis testing, Bayesian analysis, regression, and correction techniques.

MNGT 520 Advanced Production Management. (3 Hours) Planning, organizing, and controlling production with emphasis upon contemporary quantitative techniques and their applications.

MNGT 555 Business and Ethics. (3 Hours) The task of business ethics is the systematic study of ethical values that ought to guide human conduct; the study of what constitutes the obligations and responsibilities of agents and institutions; the examination of predictable outcomes in human costs and benefits; the study of character traits or dispositions-all in the interests of promoting human welfare.

***MNGT 560 Business Policy.** (3 Hours) Requirement: This course is to be taken after the student has completed at least

27 hours in the MBA Program. Business policy is an interdisciplinary capstone course which focuses on all aspects of business.

***Required MBA courses**

Doctoral Program in Business

Dr. Jean-Claude Assad, Director

P. O. Box 17760

Jackson, MS 39217

Telephone: (601)979-4326

Fax: (601)979-1205

E-mail: jean-claude.assad@jsums.edu

Program Objectives

The Doctor of Philosophy in Business program is designed to add to the theoretical knowledge base and other skills acquired at the master's level and to develop outstanding scholars in their respective fields of study.

The specific objectives of the program are:

1. To provide the students with advanced theoretical, analytical and research training in their given fields of study. At the onset, training leading to the doctor of philosophy degree will be provided in the areas of accounting, economics and management;
2. To expose the students to the classical as well as the most current methodologies in their fields;
3. To develop academic scholars who will use their knowledge and skills to investigate issues and problems facing their communities and to develop appropriate solutions to those problems; and
4. To prepare students for careers in university teaching and research.

Admissions

Jackson State University offers admission to the doctoral program in the College of Business to students who have the potential to become excellent teachers and researchers, and who will provide service to the business community and the general population. The criteria for admission are:

- ◆ Master's degree from an accredited college or university;
- ◆ Satisfactory Graduate Management Admission Test (GMAT) score(s). Only scores on tests taken within the last five (5) years will be accepted. Scores should be sent directly from the Educational Testing Service (ETS);
- ◆ Satisfactory TOEFL score (international students only);
- ◆ Three (3) completed recommendation forms;
- ◆ Satisfactory previous academic record. Please submit an official transcript from every college and university attended;
- ◆ Statement of career plan and objective.

Admission to the doctoral program in the College of Business is during the fall semester only. The deadline for submitting the application package is March 15 of each academic year. Applicants will receive a written admission decision by April 15. Completed admission applications, transcripts, letters of recommendation, financial aid forms, statement of purpose, and other requested information should be submitted to:

Director of Doctoral Program
College of Business
Jackson State University
P.O. Box 17760
Jackson, MS 39217

Transfer of Credit

Graduate courses taken at another institution accredited by the American Assembly of Collegiate Schools of Business (AACSB) may be accepted toward satisfying degree requirements at Jackson State University provided a grade of at least "B" was earned in the course. All transfer courses must be evaluated by the Department Chair of the respective major, the Director of the Doctoral Program, and the Dean of the College of Business during the initial semester of enrollment.

Advising

Each doctoral student in the College of Business will be assigned an academic advisor by the chair of the student's major during the first semester of enrollment. The advisor will provide guidance to the student in course selection and other academic matters pertaining to the program of study. After satisfactory completion of the required coursework, the comprehensive examinations, and the selection of the Dissertation Committee, the chair of the Dissertation Committee will serve as the student's primary academic advisor.

Areas of Concentration

The Doctor of Philosophy in Business will be offered in three areas: Accounting, Economics, and Management.

Residence Requirement

The doctoral degree in business is a full-time day program. Students entering the program should be able to meet all requirements for the Ph. D. degree within a four-year period. Therefore, students should take an average of nine (9) credit hours per semester during the four-year period.

Time Limit for Degree

A student has seven (7) years from the initial semester of enrollment to complete all requirements for the Ph.D. degree. Failure to satisfy all requirements during this time period may result in academic suspension. A suspended student may file an appeal for readmission to the Dean of the College of Business within one semester from the suspension decision. The appeal may be granted only under well-documented and extenuating circumstances.

Graduation Requirements

To graduate with a Ph.D. degree in the College of Business, the student must satisfy all requirements listed below:

1. A grade point average of at least 3.0 in all courses taken at the doctoral level at Jackson State;
2. A passing score on all written and oral comprehensive examinations;
3. Successful completion and defense of a dissertation approved by the Dissertation Committee; and
4. Submission of three (3) copies of the final draft of the dissertation to the Office of the Doctoral Program Director.

Language Requirement

Jackson State University does not require doctoral students of the College of Business to satisfy a language requirement. Students are strongly encouraged to acquire a level of proficiency in a foreign language. Also, students are expected to have a level of proficiency with the use of computers.

Academic Responsibility of the Student

Students are required to observe all university guidelines and regulations contained in the University Graduate Catalog. Those regulations apply to the doctoral program and all doctoral students. The academic record of each student enrolled in the doctoral program will be reviewed at the end of each semester by the Department Chair and the Director of the Doctoral Program. Students must maintain a cumulative 3.0 average to remain in the program in good standing. Students with a cumulative grade point average below 3.0 will be given two semesters to remove the deficiencies. Failure to do so may result in dismissal from the program. No doctoral level course with a grade less than "B" will be accepted toward satisfying the requirements for graduation.

Program Requirements

The curriculum leading to a Ph.D. in Business is developed under the assumption that the typical student has already completed a master's degree in business administration or a related field. Typically, a doctoral student, who has satisfied the necessary prerequisites (undergraduate prerequisites and the graduate business core), will complete twelve (12) credit hours of a research core, eighteen (18) to twenty-four (24) credit hours of coursework in the major field, six (6) to nine (9) credit hours in a supporting field, and twenty-one (21) hours of dissertation research to meet the requirements for the Ph.D. degree in Business.

Following admission into the doctoral program, all students must complete four phases of study which include:

- ◆ Phase I: Development and approval of an individual program of study with the assistance of the faculty advisor and completion and/or satisfaction of the graduate business core and all curriculum;
- ◆ Phase II: Doctoral level coursework;
- ◆ Phase III: Satisfactory completion of relevant field examinations;
- ◆ Phase IV: Satisfactory completion of the dissertation process

Phase I: The Plan of Study and the Graduate Business Core.

Each student will be assigned a faculty advisor when admitted to the doctoral program. The faculty advisor will assist the

student in the development of a plan of study to be followed throughout the completion of the program. The plan of study, co-signed by the student, the faculty advisor, the department chair and the director of the doctoral program, will be part of the student's permanent record.

Graduate Business Core

Prior to engaging in the pursuit and completion of the actual doctoral curriculum, the student must show evidence of having satisfactorily completed the graduate business core composed of 27 hours of coursework in accounting, economics, finance, management, and marketing. Satisfactory completion requires that the student earns at least a "B" in every course included in the core. The majority of those courses are usually included in a typical MBA curriculum.

To the extent that some of those courses were not completed prior to admission, the student will be advised to complete the coursework before matriculating in the doctoral curriculum.

The following courses constitute the graduate business core:

Course	Title	Semester Hours
ACC 540	Advanced Managerial Accounting	3
ACC 545	Financial Statement Analysis	3
ECO 511	Macroeconomic Theory	3
ECO 512	Microeconomic Theory	3
FNGB 515	Managerial Finance	3
MNGT 516	Statistics for Business Decisions	3
MNGT 560	Business Policy	3
MKT 530	Managerial Marketing	3
MNGT 520	Advanced Production Management	3

Phase II: Doctoral Coursework Requirements.

Phase II constitutes the actual doctoral level coursework. It consists of forty-two (42) credit hours of coursework organized under four basic categories: the research core, a course in teaching methodologies, the courses in the major concentration, and the courses in a supporting field:

1. The "research core" contains 12 credit hours of courses in statistics and research methodologies;
2. A course (three credit hours) in teaching methodologies;
3. The "major concentration" component contains 18 to 24 credit hours in the student field of interest. As part of the 18 to 24 credit hours in the field of specialization, the student will complete at least six hours of seminar-type courses aimed at exploring and analyzing the classical and current theoretical and empirical issues in the field; and
4. The "supporting field" component contains six (6) to nine (9) credit hours in the student's minor field.

Research Core

All students, except those majoring in Economics, must satisfactorily complete the following 12 hours, that constitute the research core:

Course	Title	Semester Hours
MNGT 710	Advanced Statistical Methods I	3

MNGT 711	Advanced Statistical Methods II	3
MNGT 712	Applied Multivariate Analysis	3
MNGT 714	Research Methods	3

Students majoring in Economics will complete two courses in Econometrics in lieu of MNGT 711 and MNGT 712. For those students, the research core will include the following:

Semester	Course Title	Hours
MNGT 710	Advanced Statistical Methods I	3
ECO 760	Econometrics	3
ECO 762	Advanced Econometrics	3
MNGT 714	Research Methods	3

Teaching Methodology Requirement

As teaching remains an important component of the school's and the university's mission, and a specific goal of the program is the development of outstanding scholars with the potential to become college professors, all doctoral students will be required to complete a course in teaching methodologies and will be assigned at some point some degree of classroom instruction.

Course	Course Title	Semester Hours
BEAS 790	Teaching Methods in Business	3

Courses in Major Field: Accounting

The 21 semester hours of accounting courses listed below are required of all accounting majors. The 500-level accounting courses may be transferred into the program if there is evidence they or their equivalents have been completed satisfactorily. The 700-level courses may not be transferred into the Ph.D. program.

The specific courses assigned to an individual student will be determined by the student's faculty advisor at the beginning of the first semester of enrollment. Students will be awarded the Ph.D. degree after successful completion of the doctoral curriculum and all other university requirements. Additionally, students with a non-business-related master's degree must follow the special note for applicants without an MBA.

Course	Title	Semester Hours
ACC 536	Advanced Accounting Problems	3
ACC 541	Advanced Accounting Theory	3
ACC 565	Seminar in Governmental and Nonprofit Accounting	3
ACC 575	Research in Taxation	3
ACC 790	Seminar in Accounting Education and Regulation	3
ACC 791	Seminar in Accounting Research Methodology I	3
ACC 792	Seminar in Accounting Research Methodology II	3

Dissertation Requirement

ACC-799	Ph.D. Dissertation Research in Accounting	3
---------	---	---

(Course may be repeated; a minimum of 21 credit hours is required)

Note-The following courses are considered prerequisites for Ph.D. level accounting courses. Most must be completed prior to enrollment in 500-level graduate courses and all must be completed prior to enrollment in 700-level Ph.D. seminar courses. Consult your faculty advisor for additional details.

Course	Title
ACC 314	Intermediate Accounting I
ACC 315	Intermediate Accounting II
ACC 423	Income Tax Accounting
ACC 455	Auditing
ACC 457/557	Advanced Auditing
ACC 473/573	Advanced Income tax Accounting
ACC 492/592	Accounting Information Systems

Courses in Major Field: Management

The courses listed below are required of all management majors. Students with a master's degree in a business-related area, but not an MBA degree, must successfully complete the graduate business core or its equivalent before starting the doctoral curriculum. The number and name of the courses to be completed will be determined by the student's faculty advisor during the first semester of enrollment. Students will be awarded the Ph.D. degree after successful completion of the doctoral curriculum and all other University requirements. Additionally, students with a non-business-related master's degree must follow the special note for applicants without an MBA.

Course	Course Title	Semester Hours
MNGT 721	Advanced Organizational Behavior	3
MNGT 722	Seminar in Decision Support Systems	3
MNGT 723	Seminar in Strategic Management	3
MNGT 724	Advanced International Management Strategy	3
MNGT 725	Seminar in Organizational Change	3
MNGT 726	Seminar in Organizational Strategy and Decision Making	3
MNGT 727	Seminar in Special Topics	3

Dissertation Requirement

MNGT 799	Ph.D. Dissertation Research in Management	3
----------	---	---

(Course may be repeated; a minimum of 21 credit hours is required)

Note- The following courses are considered prerequisites for Ph.D. level management courses. Most must be completed prior to enrollment in 500-level graduate courses and all must be completed prior to enrollment in 700-level Ph.D. courses. Consult your faculty advisor for additional details.

Course	Course Title
MNGT 330	Management to Organizations
MNGT 333	Quantitative Business Analysis
MNGT 416	Organizational Behavior
MNGT 460	Management Information Systems
MNGT 462	International Business

MNGT 502	Human Resource and Organizational Behavior
----------	--

Courses in Major Field: Economics

The courses listed below are required of all economics majors. Students with a master's degree in a business-related subject, but not an MBA degree, must successfully complete the graduate business core or its equivalent before starting the doctoral curriculum. The number and name of the courses to be completed will be determined by the student's advisor during the first semester of enrollment. Students will be awarded the Ph.D. degree after successful completion of the doctoral curriculum and all other University requirements. Additionally, students with a non-business-related master's degree must follow the special note for applicants without an MBA.

Course	Course Title	Semester Hours
ECO 711	Advanced Macroeconomic Theory	3
ECO 712	Advanced Microeconomic Theory	3
ECO 716	History of Economic Thought	3
ECO 730	Managerial Economics	3
ECO 746	Seminar in International Trade and Finance	3
ECO 725	Methods of Urban and Regional Analysis and Planning	3
ECO 735	Seminar in Economics of Housing and Urban Transportation	3
ECO 713	Monetary and Fiscal Policy Analysis	3

Dissertation Requirement

ECO 799	Ph.D. Dissertation Research in Economics	3
---------	--	---

(Course may be repeated; a minimum of 21 credit hours is required)

Note-The following courses are considered prerequisites for Ph.D. level economics courses. Most must be completed prior to enrollment in 500-level graduate courses and all must be completed prior to enrollment in 700-level courses. Consult your faculty advisor for additional details.

Course Number	Course Title
ECO 211	Principles of Macroeconomics
ECO 212	Principles of Microeconomics
ECO 311	Intermediate Macroeconomics
ECO 312	Intermediate Microeconomics
ECO 357	Business Statistics I
ECO 358	Business Statistics II
ECO 442	Money and Banking
ECO 416	History of Economic Thought

Supporting Field Requirement

All students are required to select a supporting area, preferably in the School of Business, and complete six (6) to nine (9) "doctoral-level" credit hours in that area. The selection and the design of the supporting curriculum must be done in consultation with the faculty advisor, as part of the development of the student's comprehensive plan of study.

A Special Note to Applicants Without an MBA

Doctoral applicants with a master's degree other than the MBA must complete the graduate business core courses listed earlier and earn an average grade of at least "B". Students whose master's degree and undergraduate degree are in a non-business related area must satisfy a list of undergraduate prerequisites following consultation with the academic advisor. A grade of at least "B" must be earned in those undergraduate prerequisites to meet the admission requirements of the program. Students with an undergraduate degree in business but with a non-business related graduate degree will be required to complete the graduate business core and show evidence of having satisfied the undergraduate prerequisites.

Suggested Undergraduate Prerequisites

Course Title	Hours
Principles of Financial Accounting	3
Principles of Macroeconomics	3
Principles of Microeconomics	3
Business Finance	3
Management to Organizations	3
Business Statistics I	3
Business Statistics II	3
Marketing Management	3
Business Calculus	3

After satisfactorily completing all prerequisite requirements and the graduate business core, students without the MBA will follow the actual doctoral program of study.

Suggested Curriculum Sequence

Major Concentration: Accounting

Course	Title	Semester	Hours
First Year			
ACC XXX	Accounting or Bus. Elective	Fall	3
ACC XXX	Accounting or Bus. Elective	Fall	3
MNGT 710	Advanced Statistical Methods I	Fall	3
ACC 583	International Accounting	Spring	3
MNGT 711	Advanced Statistical Methods II	Spring	3
Elective	Supporting Field Elective	Spring	3
BEAS 790	Teaching Methods in Business	Spring	3
Second Year			
ACC 790	Seminar in Accounting Education	Fall	3
ACC 791	Seminar in Accounting Research	Fall	3
MNGT 712	Applied Multivariate Analysis	Fall	3
ACC 792	Seminar in Accounting Research Methods II	Spring	3
Elective	Supporting Field Elective	Spring	3
MNGT 714	Research Methods	Spring	3

After satisfactory completion of the aforementioned coursework and the required doctoral comprehensive examinations, the student is required to complete twenty-one (21) hours of dissertation research (ACC-799).

Major Concentration: Management

Course	Title	Semester	Hours
First Year			
MNGT 721	Advanced Organizational Behavior	Fall	3
MNGT 722	Seminar in Decision Support Systems	Fall	3
MNGT 710	Advanced Statistical Methods I	Fall	3
MNGT 711	Advanced Statistical Methods II	Spring	3
MNGT 723	Seminar in Strategic Management	Spring	3
MNGT 724	Advanced International Management	Spring	3
BEAS 790	Teaching Methods in Business	Spring	3
Second Year			
MNGT 712	Applied Multivariate Analysis	Fall	3
MNGT 725	Seminar in Organizational Change	Fall	3
Elective	Supporting Field Elective	Fall	3
MNGT 726	Seminar in Organizational Strategy and Decision Making	Spring	3
Elective	Supporting Field Service	Spring	3
MNGT 714	Research Methods	Spring	3
MNGT 727	Seminar in Special Topics	Spring	3

After satisfactory completion of the aforementioned coursework and the required doctoral comprehensive examinations, the student is required to complete twenty-one (21) hours of dissertation research (MNGT-799).

Major Concentration: Economics

Course	Title	Semester	Hours
First Year			
ECO 716	History of Economic Thought	Fall	3
ECO 712	Advanced Microeconomic Theory	Fall	3
MNGT 710	Advanced Statistical Methods I	Fall	3
	Minor Elective	Fall	3
ECO 760	Econometrics	Spring	3
ECO 711	Advanced Macroeconomic Theory	Spring	3
BEAS 790	Teaching Methods in Business	Spring	3
Elective	Supporting Field Elective	Spring	3
Second Year			
ECO 762	Advanced Econometrics	Fall	3
ECO 725	Methods of Urban and Regional Analysis and		

	Planning	Fall	3
ECO 730	Managerial Economics	Fall	3
Elective	Supporting Field Elective	Fall	3
ECO 735	Seminar in Economics of Housing & Urban Transp	Spring	3
ECO-746	Seminar in International Trade and Finance	Spring	3
MNGT-714	Research Methods	Spring	3
ECO 713	Advanced Monetary and Fiscal Analysis	Spring	3

After satisfactory completion of the aforementioned coursework and the required doctoral comprehensive examinations, the student is required to complete twenty-one (21) hours of dissertation research (ECO-799).

Phase III: Comprehensive Examinations

Each doctoral student is required to take written comprehensive examinations in the major field. The exams will be given to test the student's competency in the field of interest. A student who wishes to sit for the comprehensive examinations must complete the necessary application by the application deadline with the office of the program director. The application must be submitted to the Graduate Dean for approval. Once the application is approved, the student is expected to report on the date of the examination. A student who wishes to withdraw from the examination must submit a formal petition of withdrawal one week prior to the first exam day. Failure to report for the examinations, or any part thereof, without A documented excuse, will constitute a forfeit of the examination and will result in a failing grade.

Student Eligibility

A student must be enrolled, and in good standing, at the time of application for the examinations, and during the semester in which the exams are taken. The examinations will be given after the student completes all coursework in the major. Specifically, to be eligible for the examinations, a student must earn a cumulative grade point average of 3.0 on a four-point scale, and must earn at least a "B" in every doctoral course completed. In addition, students with outstanding incomplete ("I") grades will not be eligible to take the examinations.

Schedule of the Examinations and Role of the Faculty

The examinations will be scheduled in the fall, spring semester, and in the summer (if departmental resources permit). The specific examination dates will be published by the office of the director of the Ph.D. program in Business. The exams will be prepared, administered, and graded by members of the graduate faculty from the student's major. The examinations will be graded using the pass-fail method. Students will be notified of the results, in writing, within three weeks of the last examination day.

Student's Right to Repeat the Examinations

In case of failure, a student is given one additional opportunity to sit for the examinations. The second attempt must take place within a year of the first examination. Students who do not attempt to repeat the examinations, or any failed part, within one year will forfeit their opportunity. Students who fail the comprehensive examination, or any

portion thereof, two times normally will be dismissed from the program.

Student's Right to Petition for a Third Examination

After two failures of the entire examination, or any part thereof, a student may petition in writing for a third attempt. The third attempt will be extended at the discretion of the graduate faculty of the student's area of specialization and the Dean of the College of Business. That is, the appeal must be first approved by the exam committee of the student's department. Following the approval of the departmental committee, an appeal will be presented to the dean on behalf of the student. If granted an approval, the student will be extended the privilege of a third examination. Students failing the comprehensive examinations, or any portion thereof, three times will be dismissed from the program.

Candidacy Status

Students will be certified by the Dean of the College of Business for admission to candidacy for the Ph. D. degree upon the recommendation of the Director of the Doctoral Program after satisfactory completion of the following:

1. All course requirements in major and supporting areas;
2. Earning a passing score on written and oral examinations;
3. Approval of a dissertation proposal by the Dissertation Committee.

Phase IV: The Dissertation Process

An important requirement of the Ph.D. degree is the successful completion of the doctoral dissertation. The dissertation research component requires the completion of 21 credit hours aimed at implementing the skills and knowledge base acquired during the completion of the research core and the courses in the field of specialization. The dissertation, must be a definite scholarly contribution related to the field of business, and must demonstrate the candidate's ability to conduct effective independent research. Students are expected to demonstrate extensive skills in model building, collecting and analyzing data, and developing a quality manuscript as required for the degree. The number of dissertation hours taken each semester is determined by the student in consultation with the dissertation advisor. After successful defense of the dissertation, a final grade will be assigned for the dissertation hours.

The dissertation process includes the following steps:

1. Selection of a dissertation topic;
2. Selection of a dissertation committee;
3. Development and defense of the dissertation proposal;
4. Certification of the proposal; and
5. Development and defense of the completed dissertation.

After completion of steps 1, 2 and 3 above, a student is eligible for admission to candidacy.

Dissertation Committee

After satisfactory completion of the comprehensive examinations, the doctoral student must immediately initiate the process of forming a dissertation committee to advise him/her during the process of conducting the dissertation research and developing the dissertation manuscript. The student is advised to select a faculty member from his/her area of concentration to serve as mentor or chair of the committee. With the assistance of the committee chair and in coordination with the department chair, the committee will be formed. The committee should be in place within sixty (60) days of the announcement of the results of the comprehensive examinations.

The Committee shall consist of five members:

- ◆ Three members from the student's department, one of which will serve as committee chair,
- ◆ One member with a proven quantitative background,
- ◆ One at-large member to be selected by the student in consultation with the chair of the committee.

The primary role of the committee is to advise the student through the dissertation process and to evaluate the proposal and the actual dissertation for quality assurance. Upon satisfactory completion of the dissertation requirement, the committee chair will assign the final grades for the dissertation credit hours.

Note: All faculty members with membership on the Graduate Faculty are eligible to serve on dissertation committees. The names of those individuals are usually listed in the university's graduate catalogue.

Development and Defense of the Dissertation Proposal

After completion of the required coursework in the major and supporting areas, the student must select a dissertation topic and develop a dissertation proposal with the assistance of the Dissertation Committee. The proposal must be presented to the Dissertation Committee and defended through an oral examination, open to the faculty and to other graduate students. The student must successfully defend the dissertation proposal within one year after completing the comprehensive examinations.

Certification of the Dissertation Proposal

Following a successful defense of the dissertation proposal, doctoral degree candidates must submit, within sixty (60) days, a corrected copy of the proposal to the Dissertation Committee for final approval of the project. The proposal will be submitted to the department chair, the director of the doctoral program, and the Dean. The proposal also must be approved by the University's Institutional Review Board (IRB) whenever human subjects are proposed to be used in the dissertation research.

Defense of the Completed Dissertation

Each student is required to take an oral defense of the completed dissertation. The examination is administered by the Dissertation Committee led by the student's dissertation advisor. The dissertation defense must be held by the first

Monday in March for prospective May graduates and by the first Monday in June for prospective summer graduates. The examination will be graded using the pass-fail method.

A candidate who fails the oral defense of the dissertation will be given an opportunity to make the necessary corrections and reschedule the defense during the next academic semester. Candidates who fail the dissertation defense two times normally will be dismissed from the program. After two failures, a candidate may petition in writing for a third attempt. The third attempt will be at the discretion of the graduate faculty of the student's area of specialization. Candidates failing the defense of the dissertation three times will be dismissed from the program.

Awarding a Masters' Degree (MBA or MPA) to Doctoral Candidates

Periodically, the program admits students with a masters' degree outside of the field of business. Those students, upon matriculation, must complete the graduate business core requirements before enrolling in the typical doctoral curriculum. An option is hereby extended to those students to apply for an MBA following the completion of an additional six credit hours beyond the graduate business core (24 credit hours). The transcripts of the students must be evaluated by the MBA advisor to ensure completion of the typical MBA requirements. During the semester of application for the MBA degree, the student must enroll as a Master student to be processed for the MBA degree. Following completion and award of the MBA, the student will be permitted to re-enlist in the doctoral program to complete the requirements for the Ph.D. degree. Doctoral students who wish to apply for an MPA must satisfy the MPA core in addition to the graduate business core.

Second Doctoral Concentration

Students may exercise the option of pursuing a second concentration after completion of the original plan of study. A student who wishes to pursue a second concentration must satisfy the following:

- ◆ Submit an application for admissions to the Division of Graduate Studies and Business Doctoral Program for the second concentration;
- ◆ Submit three letters of recommendation from program professors to the Business Doctoral Program;
- ◆ Submit a personal statement explaining the added value of the second concentration to his/her professional and intellectual development.

If admitted, the student shall be permitted to transfer all relevant courses completed during the first concentration. Additionally, the student must successfully:

- ◆ Complete the research core requirements for the second concentration, if applicable;
- ◆ Complete all relevant departmental coursework in the second concentration;
- ◆ Complete the comprehensive examinations and the dissertation requirement of the second concentration (21 hours).

DESCRIPTION OF COURSES

Research Core

Prerequisites: Students must show evidence of having satisfactorily completed a course in Calculus and Matrix Algebra prior to starting Statistics courses in the Research Core.

MNGT 710 Advanced Statistical Methods I. (3 hours)

Prerequisite: MNGT 516 or equivalent. This course offers a thorough coverage of univariate statistical inference. Topics include simple regression, analysis of variance, multiple regression and correlation, and moving average time-series models.

MNGT 711 Advanced Statistical Methods II. (3 hours)

Prerequisite: MNGT 710 or equivalent. This course offers a continuation of MNGT-710. Topics to be covered include concepts and techniques of non-parametric statistics, advanced topics in regression, time series analysis, autocorrelation, auto-regressive moving average models, identification, fitting and forecasting.

MNGT 712 Applied Multivariate Analysis. (3 hours)

Prerequisite: MNGT 710 or equivalent. This course offers the doctoral students a thorough analysis of the theory and applications of multivariate methods. Topics to be covered include matrix algebra, factor analysis, canonical correlation, discriminant analysis and multivariate analysis of variance.

MNGT 714 Research Methods. (3 hours) This course focuses on social and behavioral research methods to explore business and organizational problems. The course provides the student with theory, research, and techniques associated with the investigation of specific research problems in functional areas of business.

Management

MNGT 721 Advanced Organizational Behavior. (3 hours)

This course offers alternative theoretical approaches useful for analyzing organizational environment and intra-organizational relations. The course emphasizes understanding of macro-organizational behavior concepts and empirical research related to design, structure, and functioning of organizations.

MNGT 722 Advanced Decision Support Systems. (3 hours)

This course offers an analysis of techniques involved in the development of computer-based systems designed to help managers in decision making and problem solving processes. Topics include assessment of technology available, discussion of the design and implementation of such systems.

MNGT 723 Seminar in Strategic Management. (3 hours)

This course offers special topics dealing with important issues in strategic management. The course emphasizes global and technological perspectives of strategic management issues.

MNGT 724 Advanced International Management. (3 hours)

This course offers an in-depth study of problems of operating across multiple political and cultural boundaries. Topics include theory and practice of the international business, global competition, organizing for global operations, market entry, innovations, and comparative management.

MNGT 725 Seminar in Organizational Change. (3 hours)

This course focuses on the human aspects of problems arising in technical, social, and organizational arenas faced with the need to change. The course includes detailed analyses of

organizations as systems, organizational leadership and change.

MNGT 726 Seminar in Organizational Strategy and Decision Making. (3 hours) This course offers an overview of the theory and research in strategic management with a scholarly research orientation on issues of both strategic content and process. The empirical study of these issues is emphasized.

MNGT 727 Seminar in Special Topics. (3 hours) This course offers discussions of special topics dealing with important issues pertaining to efficient management of organizations. Issues dealing with production and inventory management, and the development of leadership skills are to be addressed. Specific topics are to be selected by the instructor and may vary each semester.

MNGT 799 Ph.D. Dissertation Research in Management.

Students will complete doctoral level research which must culminate in the successful development and defense of the dissertation in the field of Management. Students may register for more than one section in a given semester. A minimum of 21 credit hours of Ph.D. Dissertation is required. Prerequisite: Consent of the chair of the Dissertation Committee.

Economics

ECO 700 Environmental Economics. (3 Hours) This course is concerned with a theoretical framework for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environmental species. It also explores the effects of economic growth on the environment to include the interrelationships between the economics activity and the environment. Cost benefit analysis, and the application of the economic theory of external economies and diseconomies and welfare economics is applied to Problems of the physical and socioeconomic environment.

ECO 711 Advanced Macroeconomic Theory. (3 hours)

This course offers an analysis of static and dynamic theories of income, employment, and the price level. Other topics include analysis of real and monetary influences on economic growth, theories of investment and consumption, money demand, and stabilization theory and policy.

ECO 712 Advanced Microeconomic Theory. (3 hours)

This course offers an advanced analysis of microeconomic theory. Topics include consumer and producer behavior and determination of market prices, resource markets analysis, analysis of game theory, theories of uncertainty, general equilibrium, and welfare economics.

ECO 713 Advanced Monetary and Fiscal Policy Analysis.

(3 hours) This course offers a comprehensive study of various aspects of monetary theory and fiscal economics, as well as the development and implementation of monetary and fiscal policies and their implications for economic growth and stability.

ECO 716 History of Economic Thought. (3 hours)

This course offers a review and analysis of major theories and current economic philosophy. Topics of coverage include the study of the contributions of the classical school, the marginalists, the neo-classicists, the institutionalist, the

keynesians, the neo-keynesians, the modern school, and the new classical school.

ECO 725 Methods of Urban and Regional Analysis and Planning. (3 hours) This course offers an analysis of the theory of urban and regional development and growth; economic analysis of urban problems and their solutions, analysis of land use, transportation, industrial development and urban planning models.

ECO 730 Managerial Economics. (3 hours) This course offers an analysis of microeconomic theory as it applies to business operations. Topics include demand theory and estimation; production and cost theories and estimations, capital budgeting theory and analysis, pricing policies, and production under uncertainty.

ECO 735 Seminar in Economics of Housing and Urban Transportation. (3 hours) This course offers an analysis of selected problems of contemporary cities in housing, transportation and industrial development. Topics include analysis of costs and benefits of housing programs, distribution and use of transportation facilities and services, and analysis of economic implication of public policy initiatives pertaining to urban transportation.

ECO 746 Seminar in International Trade and Finance. (3 hours) This course offers an analysis of theory and practice of international trade and finance. Topics of discussion include advantages and disadvantages

of foreign trade, analysis of effects of tariffs and other restrictions on the flow of trade, and analysis of international commercial and monetary policies between countries.

ECO 760 Econometrics. (3 hours) This course offers exposure to the fundamental elements of economic modeling, construction, estimation and testing. It will cover; simple and multiple regression analysis, use of dummy variables, testing for multicollinearity, autocorrelation, heteroscedasticity, etc... Extensive use of statistical software is required

ECO 762 Advanced Econometrics. (3 hours) This course offers a continuation of Econometrics (ECO 760). Topics of discussion include multicollinearity, autoregressive and distributive lag models, autocorrelation problems and their correction, measurement errors problems, simultaneous equations models, identification problems, etc.. Extensive use of statistical software is required.

ECO 799 Ph.D. Dissertation Research in Economics. Students will complete doctoral level research which must culminate in the successful development and defense of the dissertation in the field of Economics. Students may register for more than one section in a given semester. A minimum of 21 credit hours of Ph.D. Dissertation is required. Prerequisite: Consent of the chair of the Dissertation Committee.

Teaching Methodology Course

BEAS 790 Teaching Methods in Business. (3 hours) This course offers the student an introduction to the principles and philosophy of teaching. Selected topics include concepts and techniques relating to various instructional strategies used by colleges and university teachers, and the development of media-based courses for web courses and distance learning instruction.

Accounting

ACC 790 Seminar in Accounting Education. (3 hours) This course introduces the students to contemporary issues in accounting education and accounting education research.

ACC 791 Seminar in Accounting Research Methodology I. (3 hours) This course offers a study of the application of contemporary research methodology to selected subject areas in accounting including financial accounting and managerial accounting.

ACC 792 Seminar in Accounting Research Methodology II. (3 hours) This course offers a continuation of ACC 791 with a focus of the application of contemporary research methodology to auditing and other accounting areas not covered in ACC-791.

ACC 799 Ph.D. Dissertation Research in Accounting. Students will complete doctoral level research which must culminate in the successful development and defense of the dissertation in the field of Management. Students may register for more than one section in a given semester. A minimum of 21 credit hours of Ph.D. Dissertation is required. Prerequisite: Consent of the chair of the Dissertation Committee.

School of Administrative Leadership

- ◆ Educational Leadership
- ◆ School, Community and Rehabilitation Counseling

School of Instructional Leadership

- ◆ Elementary and Early Childhood Education
- ◆ Health, Physical Education, and Recreation
- ◆ Social and Cultural Studies
- ◆ Special Education

The College of Education and Human Development has as its primary purpose and responsibility the development, administration, supervision and evaluation of programs in teacher education and other related human services which support the teaching profession and the mission of the University. It offers programs of professional training in non-teaching areas such as counseling, rehabilitative services and recreation leadership. More specifically, the College of Education and Human Development is responsible for developing and administering quality, comprehensive, career-oriented programs which attract culturally and economically diverse students into the fields of early childhood education, elementary education, secondary education health and physical education, recreation, special education, educational administration and supervision and guidance and counseling. Further, the College of Education and Human Development: (1) emphasizes inquiry, research, and publication; (2) promotes faculty, staff, and student development programs; (3) provides ongoing programs for the education community, and promotes cooperation and collaboration between the College of Education and Human Development and other education/human service agencies at the local, state, national and international levels; and (4) searches for outside assistance to aid in the support of its program offerings.

Mission

The Mission of the College of Education and Human Development at Jackson State University is to provide academic and professional training in the areas of teacher preparation, health/recreation-physical education, counseling/psychometry, Pre-K to 12 leadership and higher education. We accomplish this through the utilization of research, problem-solving and collaboration in the internal and external environments of the university community.

Vision

The College of Education and Human Development at Jackson State University aspires to be one of the top five educational programs in the country. As responsive educators with adaptive expertise, the college will provide exceptional leadership in research and professional practice that will have a global impact on the lives of diverse students from Pre to post graduate education.

Conceptual Framework: The Responsive Educator

The College of Education and Human Development (COEHD) provides learning opportunities designed to produce the “Responsive Educator,” a completer who demonstrates excellence in learning and leadership. To this end, the COEHD is guided by the Responsive Educator Framework (REF), a conceptual framework that embodies four outcomes that are applicable to all of its faculty, candidates (students), schools, departments, and programs. With reference to its candidates and completers, a “Responsive Educator” is one who provides and embodies

- ◆ A Committed Response
- ◆ A Knowledgeable Response
- ◆ A Skillful Response
- ◆ A Professional Response

The **Knowledgeable Response** means demonstrating well-informed, discerning acquaintance with the critically important information and understanding of the teaching profession, field(s) of study, and pedagogy that is necessary to act with decisive and effective purposefulness in the best interests of all students.

The **Skillful Response** means demonstrating the teaching-related abilities, pedagogical and diversity proficiencies that are required to support positive outcomes for all students in educational settings.

The **Committed Response** means being ethically and professionally obligated, pledged and disposed to uphold both a professional and personal affirmation of equity pedagogy - the belief in fairness as fundamental to the educational enterprise, and the conviction that all students can learn.

The **Professional Response** means showing oneself to be a skilled education practitioner who is knowledgeable about schooling and education, well-versed in the standards, ethics, policies, and responsibilities incumbent upon the teaching profession, and both skilled and committed to advocacy that strengthens both the profession and the learning environment it serves.

The overall educational goal of the COEHD is to ensure that its candidates and completers are eminently qualified to:

- ◆ *Demonstrate leadership*
- ◆ *Foster learning*
- ◆ *Facilitate collaboration*
- ◆ *Nurture diversity*
- ◆ *Integrate technology*
- ◆ *Implement accountability systems*
- ◆ *Develop instruction*
- ◆ *Advocate wellness*

Organization

The College of Education and Human Development consists of the following departments and units: School, Community and Rehabilitation Counseling; Elementary and Early Childhood Education; Educational Leadership; Health, Physical Education and Recreation; Special Education; and the Office of Professional and Field-Based Services.

Accreditation

The College of Education and Human Development is NCATE (National Council for Accreditation of Teacher Education) accredited. All professional education programs are approved by the Mississippi State Department of Education. The College also holds membership in the American Association of Colleges for Teacher Education. The professional education curriculum reflects the requirements of the Mississippi Commission on Educational Licensure.

Professional Education Council

The professional education programs at Jackson State University are organized, unified, and coordinated by the Professional Education Council which consists of graduate and undergraduate student representatives, university faculty both within and external to the School of Education, representatives from the University's Graduate Council, Curriculum Committee and University College, practicing professionals, the

Director of Professional and Field Services, and the Dean of the School of Education. The Professional Education Council forms the governance system for the unit. Its major functions are to: (1) define the professional education program consistent with the overall mission of the University; (2) establish and approve policies governing the design, development, implementation, and evaluation of initial and advanced programs in professional education; (3) approve the admission process for students applying to professional education programs; (4) identify and recommend instructional and laboratory experiences in relationship to the teacher-preparation model, state licensure standards, and the recommendations of specialized professional associations; and (5) serve as a monitoring unit for the quality of program activities, operations, and student outcomes. The Dean and Associate Dean of the School of Education serve as Chairperson and Co-Chairperson, respectively. As an instructional committee, the Professional Education Council reports to the Vice President for Academic Affairs.

Student Support Services Center

In addition to the assignment of program advisors, the College of Education and Human Development students are provided a general advising center where initial or temporary advisement is provided, problem-solving and counseling assistance is available as well as information regarding academic activities. The Center manages the student appeals process for those who feel aggrieved in their relationship with the School, its policies, practices, procedures or its faculty and staff.

Lottie W. Thornton Early Childhood Laboratory Center

The Early Childhood Laboratory Center provides childcare services for faculty, students, and the general community and serves a multipurpose in the area of teacher education. It offers diversified clinical experiences for graduate and undergraduate students in cognitive, psychomotor and the social development of young children. It supports the curriculum and research efforts of university students and faculty.

Professional Test Preparation Clinic

The Professional Test Preparation Clinic, a computerized facility, is designed to facilitate the School of Education's efforts to improve the performance of undergraduate and graduate students on standardized tests. General testing strategies, thinking, reading and listening skills are emphasized.

Cleopatra D. Thompson Curriculum Center

The Center provides a variety of multimedia resources to support the objectives of the School of Education and houses the Professional Educators Production Center that also aids graduates during their induction year as well as a wealth of professional and instructional materials and related equipment for faculty and students. The Center serves the objectives

of programs in the School by locating, collecting, organizing, promoting, and distributing learning resources for use by faculty and students as individuals and groups. It provides leadership in the utilization, experimentation, and evaluation of the best possible arrangements of materials for teaching and learning; makes facilities, services, and equipment necessary for the selection and utilization of learning resources available; and provides facilities for assistance in the production of instructional materials, displays and demonstrations.

J. H. Jackson Endowed Chair in Education

The Joseph H. Jackson Endowed Chair in Education was established in 1987 by a \$200,000 gift from Dr. Jackson toward the \$500,000 chair. This is the first endowed chair to be established in the history of the University, and it is named for one of the University's most distinguished alumni. The interest funds generated from the endowment will enable JSU to attract outstanding faculty members in the area of education and will provide them with the resources to pursue quality teaching and research.

THE OFFICE OF PROFESSIONAL AND FIELD STUDIES

Dr. Lennie Little
Director of Professional Field Based Experiences
Telephone: (601) 979-2335

The Office of Professional and Field Services provides supportive services in teacher education. The program is a structured, real-world praxis in the delivery of required clinical and field-based experiences at both the initial and advanced levels. Thus, all internships, field, clinical and student teaching experiences are under the auspices of this office.

The office is also responsible for the evaluation of transcripts of applicants seeking educator licensure. Supervised student teaching is required for teacher certification by the state of Mississippi and most other states. Requirements for licensure may be obtained through this office.

SECONDARY EDUCATION

Master of Science in Education with a Secondary Education Concentration

The Master of Education Degree is offered in selected areas of certification at the secondary level. This program is operated under the Office of Professional and Field Studies

Admission Requirements

To be considered for admission, an applicant must hold a bachelor's degree from a regionally accredited college or university and meet the requirements for admission to the Graduate School. Applicants must hold a Non-Provisional Class A teaching certificate. Admission and completion of the program does not guarantee certification of persons desiring certification in a particular area of certification, they must consult the certification officer of the university.

Degree Requirements

A comprehensive examination and completion of a thesis or project is required of all masters' degree candidates.

Core Courses

Course	Title	Semester Hours
EDFL 511	History and Philosophy of Education	3
EDFL 568	Curriculum Methods	3

Specialization

Eighteen hours of electives are to be taken in the area of concentration in consultation with the student's advisor. 18

Research Requirements

EDFL 514	Elementary Statistics	3
EDFL 515	Methods of Research	3
EDFL 534	Computers in Education	3

Total Hours 36

Specialist Degree in Education Secondary Education Concentration (Math, English, History, and Science)

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admissions is January 15th

E-mail: william.a.brown@jsums.edu

Program Objective

Mississippi is facing a severe problem because of the limited number of highly qualified classroom teachers. The alternate route program provides a mechanism for persons holding bachelor level non-education degrees from an accredited institution to become highly qualified teachers in grades 4-8 and secondary education. A license through the MAT Program may be secured through two methods.

Admission Requirements

1. Complete a Division of Graduate Studies Application packet.
2. Complete MAT program application packet.
3. Applicants must provide proof of State required scores for Praxis I and II.
4. Applicants must have at least a GPA of 2.50
5. Applicants will successfully respond to writing and oral exercises administered by the Faculty Screening Committee.

Program Requirements

Method I

1. Complete the pre-teaching required courses (6 hours-SPED 507 or EDCI 556 and EDFL 581)
2. After successfully completing the pre-teaching required courses, students must apply through the office of Professional and Field Base Experiences for a **Provisional Class "A"** three year license. Requirements for obtaining this **Class "A" License** are the submission of an official transcript and original PRAXIS I and PRAXIS II scores.
3. Secure approved employment as a teacher in a state accredited school district and enrolls in the Teaching Internships, which is two semesters (EDCI 500 and EDCI 599) for a total of 6 hours. The professor of the internship courses must approve employment site for purposes of supervision.
4. After successfully completing the internship required courses, students must apply through the

office of Professional and Field Base Experiences for a **Standard Class A** five year license. Requirements to obtain this **Class "A" License** are the submission of an official transcript.

Note: Students must successfully complete the pre-teaching courses before enrolling in EDCI 500 or EDCI 599.

Method II

1. Successfully completing requirement for Method I.
2. Complete the additional course work (see below) required for MAT degree. Once the degree is conferred, the student may apply for a **Standard Class "AA"** license through the Office of Professional and Field Based Experience. Requirements to obtain this **Class "AA"** license are submission of an official transcript indicating degree conferred.

Specialization

Two courses in the designated content area based on Praxis II	6
Total Hours	36

This Program requires thirty-six (36) graduate hours. Prior to enrollment in classes for the degree, please receive appropriate advisement from an advisor in the Office of Master of Arts in Teaching.

DESCRIPTION OF COURSES

EDSE 500 Introduction to Secondary Education Teaching Internship Secondary Education (6 hours)

This course is an exploration of the teaching professional which includes historical perspectives, current issues and practices, influences of legislation, and future projections. Through the field-based mentorship component of the course, students will have the opportunity to test theories of teaching and learning, to plan and guide learning experiences for secondary learners, and to analyze functions of schools.

EDSE 591 Project Writing. (3 Hours) Candidates for the Master Degree will present a project embodying the results of the individual's research. The candidate chooses the problem but approval by the advisor and committee is required.

EDSE 619 Evaluation of Secondary School Programs(3 Hours) Appraisal of secondary schools on the basis of evaluative criteria with special attention to work of the National Study of Secondary Evaluation.

EDSE 622 Problems and Issues in Secondary Education (3 Hours) Prerequisite: Advisor's consent. Current trends, problems and program developments, in secondary education, intensive study of problems in secondary education, criteria analysis of recent literature and research, group and individual work on problems of interest. Opportunities for candidates for advanced degrees to appraise critically thesis problems and research in secondary school.

EDSE 625 Seminar in Secondary Curriculum Modern Trends Seminar in Secondary Curriculum Modern Trends. (3 Hours) Prerequisite: Advisor's consent. Current trends, problems and program developments, in secondary education, intensive study of problems in secondary education, criteria analysis of recent literature and research, group and individual work on problems of interest. Opportunities for candidates for advanced degrees to appraise critically thesis problems and research in secondary school.

EDSE 628 Methods of Instruction (3 Hours) Prerequisite: Advisor's consent. Sources of curriculum materials, principles of organization, techniques of instructional standards of evaluation, practical problems in the development of units of curriculum content.

EDFL 691 Project (1-6 Hours) Candidates for the Specialist degree may choose to present a project embodying the results of the individual's research. The candidate chooses the problem but approval by the advisor and committee is required.

Department Objectives

The mission of the Department of Educational Leadership to support and to be involved in the implementation of the mission of both the University, the College of Education and Human Development and the School of Administrative Leadership by striving for excellence as responsive educators in the teaching and learning process, research, service, and all phases of university life. More specifically, the department is responsible for preparing personnel for leadership roles in traditional and non-traditional settings including the P-16 schools, P-16 administrator leaders, corporate sector, governmental and social agencies. A major emphasis is the preparation of leaders capable of managing and motivating people toward solving broad-based urban and metropolitan problems, especially those which emerge in response to the dynamics social order. The department is responsible for programs in foundations (research, statistics, social, cultural, historical, and philosophical); in higher education, administration, in teaching and

learning assistance and varied areas in urban life. Guided by the motto "Involvement is the Cornerstone of Excellence," the department and its programs exist to prepare professional instructional personnel at levels appropriate to the degrees offered and to meet certification requirements at the AA, AAA, and AAAA levels for the State of Mississippi in the various fields. The program may also prepare faculty and mid/entry level executive personnel in higher education to serve as "Catalysts for Change".

The department's objectives are to prepare candidates who can:

1. locate, interpret and apply research pertinent to educational problems;
2. exhibit competency in doing independent original research;
3. derive the greatest benefits from classroom experiences as prepared prospective teachers skilled in the techniques of instruction;
4. develop competencies and professional leadership skills through the advancement of knowledge and research that enables him/her to assume major leadership roles in diverse communities;
5. develop understanding of the basic logical processes and resources useful in information retrieval;
6. provide the student an opportunity to pursue advanced study in the Gestalt of education with emphasis in specialty areas, thus increasing skills and competencies to broaden his/her teaching and administrative efficiency;
7. foster the acquisition of advanced knowledge through mastery of research techniques and a desire for inquiry;
8. demonstrate through multidisciplinary and interdisciplinary comprehensive examinations a knowledge of new findings and trends in urban education;
9. demonstrate knowledge of how to utilize knowledge of the Social Sciences and Social Studies in planning and implementing effective leadership.

Independent Study: Process and Procedures

A student may enroll in independent study for 1-6 semester hours. The study will be supervised by a graduate faculty member with expertise in the student's area of interest. At the beginning of the semester in which a student enrolls for an independent study, he/ she must confer with the instructor of record to develop a study plan. The plan shall include goals and objectives, activities required for achieving the objectives, a timetable for reporting progress and the criteria to be used in evaluating the course. Once the plan is fully developed, it becomes a contract and is signed by the student and the professor. The professor serves as a facilitator of learning, but also as a resource to the student. Please see College of Education and Human Development academic regulations for additional information.

Program in Responsive Education with Clinical Experiences and Professional Training (PRECEPT)

In keeping with the Responsive Educator Model (REM), the Professional Education Program includes a systematic five- stage strategy for the delivery of

required, clinical, and field- based experiences. At Jackson State the PRECEPT Program is sequenced to begin in the first or second semester of freshman studies and extend through doctoral level studies. Initially, at the basic level, campus-based classroom and clinical activities are most dominant, but over time clinical and field-based activities increase with an equivalent reduction in academic, seminar-type activities.

PRECEPT III Masters Degree Level
PRECEPT IV Specialist Degree Level
PRECEPT V Doctoral Degree Level

The level of difficulty of the sequential experiences moves from the simple to the complex. In essence, PRECEPT stages are both inter and intra dependent while at the same time they are self-contained units of preparation. PRECEPT courses are identified in course syllable.

Master of Science in Educational Administration and Supervision

The Master of Science in Educational Administration and Supervision is a 39 hour degree program designed for students seeking careers in administration and supervision. A Bachelor of Science degree in Education is recommended for the student pursuing graduate study leading for this degree.

Admission Requirements

Students applying for admission to the Master of Science program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the Master of Science program. Applications are accepted prior to January 15th of each year for summer admission.

Admission requirements for the program:

1. A bachelor's degree from an accredited college or university.
2. An overall GPA of 3.0 or above (on a 4.0 scale) on the bachelor's degree.
3. A completed Master of Science program application.
4. Recommendations from three persons, one of whom must be the applicant's supervising principal or school district superintendent or assistant superintendent.
5. Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee.
6. A successful interview with the program screening committee.
7. A recommendation for admission by the screening committee.

Note: All students seeking Mississippi Class AA certificates must obtain the Mississippi minimum score on the School Leaders Licensure Exam (SLLA) in order to be recommended for certification.

Specialist in Education: Educational Administration Concentration

Admission Requirements

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements for the Specialist program:

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee/
- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admissions is January 15th

Retention Requirements

A minimum grade point average of 3.00 (on a 4.00 scale) on all graduate work earned in the Specialist in Education degree program.

Program Requirements

Core Course	Title	Semester Hours
*EDFL 601	Advanced Research and Statistics	3
EDFL 610	School and Community Relations	3

Concentration Courses

EDAD 603	Leadership in the Management of Human Resources	3
EDAD 604	Planning for Effective Professional Development	3
EDAD 609	Administration of School Finances	3
EDAD 610	Seminar in Research and Curriculum	3
EDAD 611	Theories of Administration	3
EDAD 613	Internship in Educational Administration	9
EDAD 615	Legal Issues in Educational Administration	3
EDAD 626	School Superintendency	3
EDAD 690	Thesis	6
<i>or</i>		
EDAD 691	Specialist Project	3
<i>Total Hours</i>		39 or 36

Note: *EDFL 601 has required prerequisites (EDFL 514 and 515), the candidate's program total may increase to 30 or 42 hours for candidates who have not had these courses or their approved equivalents.

Candidates *who do not hold a Masters* degree in Educational Administration **must complete 18 hours of additional prerequisite work.**

Required Prerequisites

	Hours
EDAD 553	Human Resource Leadership 3
EDAD 554	Legal, Ethical and Policy Influences 3
EDAD 560	Fiscal and Economic Leadership 3
EDAD 556	School and Community Relations in Urban Settings 3
EDAD 559	Challenges Facing Urban School Organizations 3
EDAD 569	Approaches to Teaching and Learning in Urban Environments 3

Graduation Requirements

Students will be required to take and successfully pass the written comprehensive examination and obtain approval of the thesis/project by a major advisor and two faculty members. See departmental handbook for additional policies.

Other Requirements

Candidates who do not hold the Mississippi Class AA certificate in Educational Administration and Supervision must earn the Mississippi minimum score of the School Leaders Licensure Examination (SLLA) in order to be recommended for certification. Please contact the Department of Educational Leadership for the current required score.

Specialist in Education Higher Education Administration

The certificate program in higher education administration is designed for individuals who are planning a career in the area of higher education. This certificate will provide the candidate with the appropriate knowledge, skills, and attitudes of higher education administration in the administrative process of higher education institutions. Additionally, this program will give those individuals who are employed at the university the opportunity to enhance their skills, knowledge, and attitudes toward the environment in which they work. With the consolidation of programs at four-year institutions and the growing student population in community colleges, this certificate program will prepare them for a future in teaching and/or administrative position in higher education.

Purpose

The purpose of this specialist program with concentration in higher education administration is to provide college administrators and staff the opportunity to study the history, culture, and organizations of higher education through a graduate program that will analyze the specific areas of higher education, and to prepare future higher education administrators for community colleges and four-year institutions.

Enrollment

Enrollment will be limited. Degrees will be awarded upon the candidate successfully completing all of the program requirements. Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- A minimum of 6 years of successful employment in a community college or a four year institution
- Deadline for applications for summer/fall admission is January 15th

Requirements

A specialist with concentration in higher education administration requires the completion of 18 credit hours, 9 hours of core courses and 9 credit hours of electives. All candidates must receive a grade of B or above in each course to receive this degree. Candidates receiving a grade below B will have to retake the course before credits will be awarded. All courses are 3 credit hours and are generally offered once each semester depending upon the availability of the faculty. A total of thirty-six graduate credit hours are required to earn a specialist with a concentration in Higher Education Administration.

The Doctor of Philosophy in Educational Administration

Program Objectives

The Ph.D. degree has as its goal the training of executive type leaders capable of managing and motivating people toward solving broad-based educational problems, especially those which emerge in response to the dynamic social order of urban communities. This goal is supported by the following program objectives:

1. To provide a terminal degree which will prepare individuals for the highest level of leadership, educational practice, and research
2. To provide an increased number of qualified leaders who can give leadership to traditional and nontraditional educational programs
3. To strengthen the capacity of leaders to conduct educational research and evaluation and translate findings into creative solutions for urban and rural problems

4. To promote research and development activities which enhance the body of professional knowledge in the field of urban education management for the 21st century and beyond
5. To support the educational reform goal of improved educational administration.

This advanced program of scholarly study and training experiences will prepare graduates to assume leadership responsibilities in the areas of: school and general management and administration, curriculum and instructional development, research and evaluation, staff development and training, student affairs, educational media and technology or combination thereof.

Program Admission

Students applying for admission to the Ph.D. program must first obtain general admission to the Division of Graduate Studies; however, this admission does not mean automatic admission to the Ph.D. Program. Applications are accepted year round for admission each fall. **Applications must be submitted prior to January 15.** All students seeking admission to the Ph.D. Program must meet the following criteria:

1. A Master's degree from an accredited university.
2. A completed Ph.D. program application.
3. An overall GPA of 3.5 or above (on a 4.0 scale) on the highest earned degree.
4. Transcripts for all post secondary work attempted prior to submitting a program application.
5. A satisfactory score on the GRE or on the Miller Analogies Test (MAT).
6. Recommendations from three (3) persons knowledgeable of the applicant's professional academic ability, job experiences, and leadership potential such as previous professors, supervisors, and others
7. Acceptable evidence of a student's writing ability as determined by a writing sample completed under the supervision of the screening committee member.
8. A successful interview with the program screening committee.
9. Recommendation for admission by the screening committee.
10. Three years of classroom teaching documentation.

Conditional Program Admission

Conditional admission may be granted to individuals who have obtained general admission to the Division of Graduate Studies but who do not meet regular program admission requirements. All students admitted via the conditional program admission will be required to take a common core of nine (9) semester hours of regular graduate courses during their first semester of enrollment. During this specified period, conditional students must earn a minimum 3.0 GPA on the program of study taken at Jackson State University (transfer hours will not apply) in order to achieve regular status. Once the nine hours are completed, conditionally admitted students will be interviewed a second time by the program screening committee before they are allowed to continue to matriculate in the Ph.D. program. The department screening committee will notify the chair of the department of the results of the second interview. The

chair of the department will notify the student by certified mail and a conference with the student will occur before further enrollment. All conditionally admitted students will follow the "Time Limits" policy as stated in this Catalog. If a 3.0 GPA is not attained in the first nine (9) hours attempted, the student will be discontinued from the program. Conditional route admission is based on the following criteria:

1. A Master's degree from an accredited university
2. A completed program application
3. Results of the GRE or MAT examination within a five year period.
4. A cumulative grade point average of 3.0 or above on all graduate work (4.0 scale)
5. Outstanding compensating strengths measured by the following criteria:
 - a. Earned Master's degree from an accredited institution.
 - b. Earned GPA on all graduate courses completed.
 - c. Writing ability
 - d. Success in current employment
 - e. Administrative experience and/or potential for administrative experience.
 - f. Teaching/work experience
 - g. Communication skills.
6. Transcripts of all post secondary work attempted prior to program application
7. Recommendations from three (3) persons knowledgeable of applicant's professional academic ability, job experiences and leadership potential such as previous college professors and supervisors
8. Acceptable evidence of student's writing ability as determined by writing a sample under the supervision of the screening committee member.
9. A successful interview with the program screening committee.
10. Three years of classroom teaching documentation.
11. Recommendations for admission by the screening committee

Curriculum and Program of Study

The initiative in planning the program of study must be assumed by the student. After notification of acceptance, the student should prepare a definition of his or her professional goals and the rationale for desiring the doctoral degree. The statement will be used by the doctoral committee in assisting with the planning of the student's program of study.

The student and major professor, using the statement of professional goals, transcripts of previous graduate work, results of preliminary exam (if taken), and minimum course requirements, will prepare a tentative program of study which sets forth proposed coursework, independent studies, practicum, and other experiences deemed important. The student's proposed program of study should then be presented to the full committee for review and approval or revision, if necessary.

Since a program of study is individualized based upon a student's needs, career goals, academic background, and present level of competence, the planned program of study is always subject to future additions, deletions and substitutions depending upon the needs of the

student. These changes may be prescribed throughout the student's program of study by the student's doctoral committee. Proposed changes must be agreed upon the doctoral committee and approved by the Department Chair, and the Dean of the College of Education and Human Development.

Degree Requirements

All programs of study must include a minimum of 60 semester hours of coursework beyond the master's degree, excluding the dissertation. At least one-half of this coursework must be at the 600 and 700 levels of study. At least 45 semester hours of coursework and the dissertation, must be completed at Jackson State. Subjects covered comprehensively in the student's previous education and in which the student maintains an acceptable level of competence need not be repeated. The typical student may expect to devote three years of full- time graduate study to earning the Ph.D. degree.

The doctoral program consists of five areas of study. These areas and the minimum semester hours required are:

Educational Administration Core	18
Professional Specialization	18
Evaluation, Research and Statistics	15
Cognate	9
Dissertation	12-15

Students with a master's or specialist degree in educational administration or leadership, who have been admitted to the Ph.D. program; AND, who have completed prerequisite requirements are expected to complete at a minimum the program specified below as well as other courses the doctoral committee may prescribe:

Candidates who do not have a Masters' Degree in Educational Administration and Supervision must complete the following prerequisite courses (18 hours).

EDAD 553	Human Resources Leadership
EDAD 554	Legal, Ethical and Policy Influences
EDAD 556	School and Community Relations in Urban Setting
EDAD 559	Challenges Facing Urban School Organizations
EDAD 560	Fiscal and Economic Leadership
EDAD 569	Approaches to Teaching and Leadership

*Certain courses are restricted in this program.

Course	Title	Semester Hours
I. Educational Administration Core		
*EDAD 700	Writing for Educational Leaders	3
*EDAD 701	Contemporary Contexts of Educational Programs and Services	3
*EDAD 702	Educational Leadership in Cross-Cultural Environments	3
*EDAD 703	Educational Policy Analysis and Research in Urban Education	3
*EDAD 704	Educational Futures Planning and Development	3
*EDAD 705	Educational, Government and Corporate Relationships	3
II. Professional Specialization		

*EDAD 720	Organizing and Managing Staff Development	3
*EDAD 721	Management of Organizational Change and Human Relations	3
*EDAD 798	Internship/Mentorship Experience Approved Electives	3 9

All students must demonstrate competence in using the computer or complete at least one computer course beyond the minimum electives requirement.

III. Evaluation, Research and Statistics

EDAD 710	Advanced Statistical Concepts and Computer Analysis	3
EDAD 711	Studies and Practicum in Educational Assessments and Evaluation	3
*EDAD 712	Qualitative Research Designs and Methods in Education	3
EDAD 713	Information Management Systems for Educational Leaders	3
*EDAD 714	Experimental Designs in Education	3
*Required of all students		

IV. Cognate (Minimum of 9 semester hours)

The cognate should represent a cohesive plan of courses related to and supportive of the student's specialization. These courses are normally taken outside of the Department of Educational Leadership. Although the cognate must show unity, it can be Interdisciplinary in nature and consist of courses offered by several different departments.

V. Dissertation

EDAD 799	Dissertation	12-15

DESCRIPTION OF COURSES

Educational Administration and Supervision

EDAD 553 Human Resource Leadership (3 Hours)

This course provides the foundations for working with people within educational organizations and programs in an urban setting. Emphasis is placed on individuals within context, management theory, adult development and learning, communications in organizations, personnel issues, and professional development. Other foci are performance appraisal, effective oral and written communication (both within and external to the organization), group facilitation skills, and team building. The student will examine attitudes and an understanding that their own attitudes toward ethical and moral behaviors are critical in working with people in organizations. They will move toward a realization that human growth and development are lifelong pursuits, and toward an acceptance that effective administrators respect the attitudes and values of the people with whom they work. Students will exit this course with an understanding of group dynamics, how research relates to good management practices, how the contextual factors of an organization can affect people interacting both as colleagues and supervisors, identify and analyze the moral and ethical issues that arise in working with individuals in organizations, elements of effective work groups, staff meetings, committees, communication networks, processes of recruiting, hiring, developing, directing, and supervising staff within educational organizations, and explore how change processes relate to developing staff in educational organizations.

EDAD 554 Legal, Ethical, and Policy Influences (3 Hours) This course will help the student develop an understanding of the philosophical bases underlying the American system of law and develop an understanding of the legal framework as it relates to education. Students will develop a knowledge of important legal terms and their application in school law and familiarity with and competence in the use of legal resources and tools. It will examine school law as it affects the organization, administration, and school policies and practices in American education with special emphasis on school law of Mississippi and other policies that govern Mississippi school such as Bulletin 171. External influences on educational policies and operations will be investigated in the context of ethical considerations.

EDAD 555 Educational Administration Internship II (1-3 Hours) This course provides students with the opportunity to engage in field-based experiential learning activities related to school administration. This is a "hands-on" course that gives the opportunity for students to practice administrative and leadership skills under the guidance of a practicing administrator (mentor). Seminar activities will complement the ongoing field-based tasks by allowing students to reflect on their field experiences, to document administrative and leadership activities, and to assess the usefulness of the internship experiences on their personal development as educational leaders. Students will gain support, guidance, and wisdom from the cohort administrative interns. This course will provide opportunities to examine their own administrative and leadership behaviors, gain insight about different leadership styles, understand the contextual factors that can influence administrative actions, and, finally, be able to discuss how different administrative actions affect various aspects of the educational environment. A total of 9 semester hours is required.

EDAD 556 School and Community Relations in Urban Settings (3 Hours) This course will examine the changing politics and administration of school-community relations. It will address topics in the areas of consensus building, marketing, use of marketing research, diversity, communication (internal and external), crisis management, the local politics of education, managing school-community relations, implementing site-based management, strategies of parental involvement, collaboration with the business community, and school outreach efforts in the community. The student will exit the course with positive and proactive strategies to engender collaboration among the school's internal and external stakeholders. The course offers the theoretical perspectives on school and community and the administrative insights to be gained. New administrative frontiers in the implementation of children's services and outreach programs will be included in these perspectives.

EDAD 557 Leadership Refinement (3 Hours) This course is designed to provide culminating experiences in a leadership preparation program. It will address in seminar form, various topics that are specific to the daily tasks of an educational administrator. Topics included will be decision making, time management, self assessment, program evaluation, teacher evaluation, scheduling, facilities, safety and security, trends and issues, office management, school and personal image, and the sharing of a system of values that promotes student success. Additional topics that

may arise as a result of the program evaluation component may be added.

EDAD 558 Educational Leadership Internship III (1-3 Hours) This course provides students with the opportunity to engage in field-based experiential learning activities related to school administration. This is a "hands-on" course that gives the opportunity for students to practice administrative and leadership skills under the guidance of a practicing administrator (mentor). Seminar activities will complement the ongoing field-based tasks by allowing students to reflect on their field experiences, to document administrative and leadership activities, and to assess the usefulness of the internship experiences on their personal development as educational leaders. Students will gain support, guidance, and wisdom from the cohort administrative interns. This course will provide opportunities to examine their own administrative and leadership behaviors, gain insight about different leadership styles, understand the contextual factors that can influence administrative actions, and, finally, be able to discuss how different administrative actions affect various aspects of the educational environment. A total of 9 semester hours is required.

EDAD 559 Challenges Facing Urban School Organizations (3 Hours) In this course students examine various styles of leadership for managing the organization from both a theoretical and application perspective. Primary topics to be explored include organizational development, the nature of leadership within organizations, the nature of managerial tasks, transformational and cultural leadership, organizational behavior, the application of research methods on organizations, structures of organizations, and the role and importance of strategic planning. Learning experiences in this course will contribute to the students understanding that human growth and development are lifelong pursuits that organizations are artifacts of a larger society, and that leaders can affect positive change in individuals and in the organizations served.

EDAD 560 Fiscal and Economic Leadership (3 Hours) The course will cover the dynamic development of school finance theory and practice from the early period in history of complete local school funding to present day educational practices that seek to promote equity and equality as linked to academic performance. It will examine the funding of schools from the national, state, and local levels. Within those funding structures, political influences and mandates will be covered. In addition the course will address emerging partnerships with business and industry and private sector contributions, ways to develop and implement local school budgets, the expanding role of the school business manager, and the depth and breath of the responsibilities that are part of that position. Students will learn about the implementation of budgets and the importance of the evaluation of the budget and its effects on the organization.

EDAD 561 Educational Leadership Internship I (1-3 Hours) This course provides students with the opportunity to engage in field-based experiential learning activities related to school administration. This is a "hands-on" course that gives the opportunity for students to practice administrative and leadership skills under the guidance of a practicing administrator (mentor). Seminar activities will complement the ongoing field-based tasks by allowing students to

reflect on their field experiences, to document administrative and leadership activities, and to assess the usefulness of the internship experiences on their personal development as educational leaders. Students will gain support, guidance, and wisdom from the cohort administrative interns. This course will provide opportunities to examine their own administrative and leadership behaviors, gain insight about different leadership styles, understand the contextual factors that can influence administrative actions, and, finally, be able to discuss how different administrative actions affect various aspects of the educational environment. A total of 9 semester hours is required.

EDAD 587 Research and Independent Study in Education. (1-3 Hours) Opportunity for students to undertake independent study and research under the direction of a faculty member. At the close of the period of study, the student will submit a written report.

EDAD 603 Leadership in the Management of Human Resources. (3 hours) The course examines the management of human resources in educational organizations. Specific attention is given to personnel supervision and administrative responsibilities including human resource planning, recruitment and selection, implementation and evaluation of professional development.

EDAD 604 Planning for Effective Professional Development (3 hours) This course examines effective steps in designing professional development for all stakeholders in educational organizations. Candidates will examine research based practices proven successful in planning, implementing and evaluating professional development for educators.

EDAD 607 School Business Management. (3 Hours) Development and Administration of the school budget; purchasing procedures; financial accounting and reporting; protecting property and persons; school plant operation and management.

EDAD 608 Planning Educational Facilities. (3 Hours) A study of problems involved in planning, programming, financing and construction, care and maintenance, problems with equipment.

EDAD 609 Administration of School Finance. (3 Hours) An examination of school finance theory and its application in P-16 schools. Prerequisite: EDAD 560.

EDAD 610 Seminar In Research In Curriculum and Supervision. (3 Hours) A critical analysis is made of the methods and results of current and recent research in curriculum and in supervision.

EDAD 611 Theories of Administration. (3 Hours) Topics include: Nature of theory, theory building, and current theories of administration.

EDAD 612 Seminar In Educational Administration. (3 Hours) Consideration of problems and issues in educational administration or case studies in educational administration as announced for a given semester.

EDAD 613 Internship In Educational Administration. (9 Hours) Cooperatively guided administrative experience in selected school, school systems, and educational agencies for advanced students.

EDAD 615 Legal Issues in Educational Administration (3 Hours) An examination of the statutory, regulatory and case law as related to the provision of educational programs in P-20 school districts. Prerequisite: EDAD 554.

EDAD 625 Organization and Administration of Higher Education Institutions. (3 Hours)

The purpose of this course is to study the problems in the organization and administration of institutions of higher learning. The focus will include administrative functions of planning, organizing, staffing, budgeting, evaluation, school accountability, accounting and auditing procedures, maintenance and operation of plant, and auxiliary services.

EDAD 626 School Superintendency. (3 Hours) Organization and management of the total school district.

EDAD 630 College Teaching (3 Hours) This course is designed to provide students with an overview of the various instructional strategies that are utilized by teachers on the college level.

EDAD 634 Computers In Education. (3 Hours) This course is designed to cover theory, techniques, and practices of using computers and computer-assisted instruction (CAI) in education. No previous background in computers and programming is assumed.

EDAD 638 The Community/Junior College (3 Hours) This course is designed to provide the graduate student with a comprehensive overview of the community/junior college. Emphasis will be placed on the development, function, curriculum, and issues, regarding the community/junior college.

EDAD 668 Finance In Higher Education (3 Hours) This course is designed to give students a comprehensive overview of finance in higher education. Emphasis will be placed upon sources of revenues, allocating, expenditures, and funding.

EDAD 686 Special Topics In School Administration. (1- 3 Hours) The study of current educational Issues in terms of curricula, personnel, finance, facilities, services, operation, transportation, management and law. Content will be developed around assessed needs, interests, goals or objectives of the group(s) involved.

EDAD 687 Research and Independent Study In Education. (1-3 Hours) Opportunity for students to undertake independent study and research under the direction of a faculty member. At the close of the period of study, the student will submit a written report.

EDAD 690 Thesis. (1-6 Hours) A candidate for the Specialist in Education degree may choose to present a Thesis embodying the results of the individual's research. The candidate chooses his problem but approval by his adviser and committee is required.

EDAD 698 Law and Higher Education (3 Hours) Will deal with the constitution and the case law that has developed in applying the constitution to the public policy issues involved in the Higher Education institutions.

EDAD 700 Writing for Educational Leaders (3 Hours) Prerequisite: Official admission to the Ph.D. program in Educational Administration. An advanced course in writing which examines the written communication skills required of educational leaders. Extensive exercises in writing clearly and persuasively in technical and specialized forms to include abstracts, formal reports, memoranda, performance evaluations.

EDAD 701 Contemporary Contexts of Educational Programs and Services (3 Hours) Prerequisite: Official admission to the Ph.D. program in Educational Administration. Comparative studies of traditional and nontraditional educational programs

and services Field based observations in traditional and nontraditional agencies and institutions with emphasis on organizational structure, operations, clientele, and resources required.

EDAD 702 Educational Leadership in Cross-Cultural Environments (3 Hours)

Prerequisite: Official admission to the Ph.D. program in Educational Administration. Designed to provide educational leaders insights and background into the lifestyles, values, and aspirations of culturally different Americans as related to the administration process. Emphasis upon the culturally different in urban environments and their educational and human resource needs as well as responsive program models.

EDAD 703 Educational Policy Analysis and Research in Urban Education (3 Hours)

Prerequisite: Official admission to the Ph.D. program in Educational Administration. Analysis of readings and research on problems related to urban education, learners, environments, institutions educational leadership.

EDAD 704 Educational Futures: Planning and Development (3 Hours) Prerequisite: Official admission to the Ph.D. program in Educational Administration.

Concepts and skills to prepare educational leaders to anticipate and manage the future. Includes systems theory, futures methodology, planning models, scenario writing and designing educational programs and services for the 21st century.

EDAD 705 Educational, Governmental, and Corporate Relationships (3 Hours) Prerequisite: Official admission to the Ph.D. program in Educational Administration.

Analyzes urban institutions as policy systems and the educational role of leaders. Discusses relationship of the institutions to state policy processes, the constraints imposed by Federal law and court decisions. Evaluates the implications of federal and state systems for local control program coordination and resource allocation. Examines the effects of community expectations and participation on policy-making in urban institutions.

EDAD 710 Advanced Statistical Concepts and Computer Analysis (3 Hours) Prerequisite: EDAD 534 or EDAD 634 and EDFL 515 and EDFL 514 or their equivalent.

Official admission to a doctoral level program. A study of advanced statistical procedures: analysis of variance; randomized block, factorial, and repeated measurement designs; analysis of covariance; non-parametric tests: simple, multiple, and curvilinear regression; introduction to path analysis canonical correlation, discriminate, and factor analyses; emphasis on educational research problems.

EDAD 711 Studies and Practicum in Educational Assessment and Evaluation (3 Hours) Prerequisite: Official admission to a doctoral level program.

Current models and issues in educational assessment and evaluation as a professional practice are explored. Students must design, develop, and implement comprehensive needs assessment and evaluation plans which include specification of a theoretical framework, problem identification, data collection/analysis procedures, report writing format, and dissemination plans. Students are assigned to institutions, offices or agencies engaged in educational research.

EDAD 712 Qualitative Research Designs and Methods in Education (3 Hours) Prerequisites: EDAD 534 or EDAD 634 and EDFL 515 and EDFL

514 and EDAD 710 or their equivalent. Official admission to the doctoral level program. Exploration of qualitative research designs and methods, the analysis of qualitative data and the uses of qualitative research in education. Field research techniques will be reviewed and utilized in projects by students.

EDAD 713 Information Management Systems for Educational Leaders (3 Hours) Prerequisite: EDAD 534 or EDAD 634 or equivalent demonstration of computer competency or one computer course.

Official admission to a doctoral level program. Theory, design, and analysis of computer systems for the management of educational information systems. Survey of information requirements, construction and evaluation of systems, and operation of statistical packages necessary for developing educational management information systems.

EDAD 714 Experimental Designs in Education (3 Hours) Prerequisites: EDAD 534 or EDAD 634 and EDFL 515 and EDFL 514 and EDAD 710 or their equivalent.

Official admission to a doctoral level program In-depth, advanced study of statistical techniques and experimental designs most appropriate for solving specific problems in the work place; emphasis on applied multivariate analysis, multiple regressions and factor analysis.

EDAD 720 Organizing and Managing Staff Development (3 Hours) Prerequisite: Official admission to a doctoral program.

Explores the processes, structures and procedures which facilitate in-service performance improvement. Examines the utilization of needs assessment data, the design of experiences, the selection of consultants, scheduling and other related issues for consideration by administrators.

EDAD 721 Management of Organizational Change and Human Relations (3 Hours) Prerequisite: Official admission to a doctoral level program.

Emphasizes relationships among individual and group behaviors; role of administrators; on-site analysis or organizations and change principles; enhances understanding of organizational theory and the appropriate techniques in decision making, communication and human relations required by the educational leader.

EDAD 787 Research and Independent Study in Educational Administration (Varied 1-6 Hours) The purpose of this course is to provide the opportunity for students to undertake independent study research under the direction of a faculty member and focused toward the student's goal.

EDAD 796 Special Topics in School Administration (Varied 1-6 Hours) The purpose of this course is to study the current educational issues in terms of curricula, personnel, finance, facilities, services, operation, transportation, management and law

Content will be developed around assessed needs, interests, goals or objectives of each individual's doctoral program of study.

EDAD 798 Internship/Mentorship Experience (3 Hours) Prerequisite: Consent of Program Coordinator.

A well planned exercise of at least a 360 clock hour, semester long, supervised, administrative internship of uninterrupted and concentrated work in the area of specialization. Students who lack significant administrative experience prior to entering may be required to spend up to one full year on internship at the discretion of the doctoral committee. Locations for internships may include elementary, middle or

secondary school settings, central offices or other educational settings. A written report and an evaluation of the internship are required at the end of the field experience.

EDAD 799 Dissertation (12-15 Hours) Prerequisite: Consent of Major Professor. A dissertation showing power of independent research and skill in organization and presentation must be prepared on some topic in the major field. It must comprise a definite contribution to knowledge. Satisfactory completion of the dissertation requirement includes the passing of an oral examination on the dissertation.

Educational Leadership

EDFL 511 History and Philosophy of Education. (3 Hours) This course is concerned primarily with the review of dominating ideals and institutions that have affected the course of educational development in the western world. Special emphasis is placed on the review of the leading philosophies of education and their implications for modern education.

EDFL 512 The Evolution of American Education (3 Hours) This course is concerned primarily with the review of dominating ideas and institutions that have affected the course of educational development in urban settings. Special emphasis is placed on the views or leading philosophies of education and the implications of these philosophies for modern education practices. The student will gain an understanding of relationships between major historical, political, and sociological, and philosophical shifts and the way we "do" schooling and education. The students will compare and contrast teaching practices that are influenced by these historical and political forces. At the conclusion of this course the student will understand and be able to analyze, discuss, and evaluate the implications of a personal set of beliefs on teaching and learning.

EDFL 513 Elementary Statistics for Urban Settings (3 Hours) The purpose of this course is to give the educational leader skills in methods of collecting, tabulating, analyzing, and recording data. It will provide the educational leader with an understanding of the essential statistical concepts in order to read and understand current research and create new research in the field of educational leadership that focuses on problem solution.

EDFL 514 Elementary Statistics (3 Hours) This course is designed to enable students to determine appropriate statistical procedures for data analysis, to utilize the computer, and to have sufficient confidence in their understanding and not be intimidated by statistical experts.

EDFL 515 Methods of Educational Research. (3 Hours) Prerequisite: EDFL 514, PSY 531 or its equivalent; Elementary Statistics or its equivalent. An introductory course which will consider the nature of problems in the field of educational research and the various techniques used in the solution of these problems. Emphasis will be placed on selecting appropriate statistical treatments in experimental and descriptive research. The applicability of the computer to educational research will be introduced.

EDFL 516 Becoming Skillful Consumers for Educational Research (3 Hours) The emphasis in this course will be placed on identifying problems and on selecting the appropriate methodologies used for the various research investigations. The student will produce and develop research proposals which will aid

in the solution to present day problems within the American school system. The student will exit the course as consumers of research and critical readers of research related to education and with the tools to make sound judgments on the appropriateness of transporting the research into practice.

EDFL 534 Computers in Education (3 Hours) This course is designed to cover theory, techniques, and practices of using computers and computer-assisted instruction (CAI) in education. No previous background in computers and programming is assumed.

EDFL 566 Teaching In the Multi-Cultural Classroom. (3 Hours) This course will provide training in interaction analyses. Communication skills, discipline in the classroom, behavior modification and competency based education. The participants will be introduced to concepts through role playing, confrontations and simulation exercises and through the use of outside consultants.

EDFL 568 Curriculum Methods. (3 Hours) This course is designed to provide "educators" with a comprehensive understanding of Curriculum Methods. Special emphasis will be placed on the philosophical and historical antecedents of the various curricula in practice at the present time and possible future curriculum developments as related to specific disciplines.

EDFL 568A Special Projects: Planning the Curriculum for Secondary Schools. (3 Hours) This course is designed primarily for in-service personnel in education desiring enrichment activities in Secondary Education. Students taking this course will be engaged in activities directed toward planning, developing, and evaluating curricular materials that may be used for teaching K-12 grades.

EDFL 569 Approaches to Teaching and Learning in Urban Settings. (3 Hours) This course is designed to provide educational leaders with a comprehensive understanding of curriculum methods their design, implementation, assessment, improvement, and evaluation in urban settings. It will provide practical approaches to curriculum development and curriculum management. Special emphasis will be placed on the historical and philosophical influences on curriculum from the early stages to the present. It is also an assumption that students in this course are familiar with Mississippi State Curriculum Structures in the various disciplines and the curriculum standards from the different academic disciplines and can apply them. The student will become familiar with and skilled in the process of curriculum alignment-which is the correlation of the curriculum with state and national standards, state and national assessment programs and resources.

EDFL 581 Principles of Measurement. (3 Hours) A study of theoretical principles of measurement which are applicable to both teaching and research. Part of the course will be devoted to current issues in measurement and to practical applications of these theoretical principles.

EDFL 587 Research and Independent Study in Secondary Education. (Credit Varies 1-6 Hours) Prerequisite: Graduate standing. Research work in any area of secondary education. Approval of adviser is required.

EDFL 590 Thesis. (3 Hours) An independent investigative work in secondary education. Candidate

chooses his problem but approval by the department is required.

EDFL 592 Seminar in Supervision of Student Teaching. (3 Hours) Prerequisite: Approval of instructor. Designed to assist supervising teachers in guidance of student teachers. In addition to rationale, and dominant ideas in the literature of supervision, the following topics will be studied: trends in teacher education, orientation of student teachers to student teaching, responsibilities of the supervising teacher and college personnel conference with student teachers and evaluation of student teaching.

EDFL 593 Advanced Seminar in Supervision of Student Teaching. (3 Hours) A practicum for in-service teachers who are preparing to be master teachers, interns, beginning teachers, or a teaching team.

EDFL 596 Special Topics in Education. (1-6 Hours) This course is designed to meet the needs of teachers, students, administrators, community leaders and other personnel who have special needs and interests in selected areas of education. Content will be developed around assessed needs, interests, and goals or objectives of the group(s) involved. This course will deal with special topics which may be treated more effectively as a mini-course, institute seminar or as a workshop instead of as a regular course.

EDFL 597 Diagnostic and Prescriptive Teaching of Mathematics. (3 Hours) This course is designed for persons who teach students mathematical ideas in both the elementary and secondary schools. It will assist in identifying the disabled learner, developing curriculum for the disabled learner, and specifying activities for the disabled learner.

EDFL 598 The Pupil and the Law. (3 Hours) The Pupil and the Law will deal with the constitution and the case law that has developed in applying the constitution to the broad public policy issues involved in public school education. We will deal with topics such as the legal foundations of American Public education, student's rights and responsibilities, the power of public school authorities, discrimination in public education, and the rights and responsibilities of public school teachers.

EDFL 599 Urban Education. (3 Hours) This course is concerned with factors that have contributed to the present crisis in urban life and the status of urban schools. Attention is given to public school support, school organizational patterns, teaching personnel and staff, students, curriculum design, discipline, instructional and physical facilities.

EDFL 601 Advanced Research and Statistics. (3 Hours) Prerequisites: EDFL 514, EDFL 515 or their equivalent. This course is designed to promote understanding of research designs, the spirit of research, and the relationship that research bears to statistical trends and techniques. The computer is used extensively in the solution of statistical problems.

EDFL 602 Comparative Education. (3 Hours) A study of the historical and philosophical developments of the world's different educational systems. Major emphasis is placed on the role of these systems in the development and continuation of the social and governmental structure and their effect upon the educational process within different countries.

EDFL 610 School and Community Relation. (3 Hours) A study of the relationships of school administration to the community. The community school concept, public opinion, community analysis,

public relations practiced, community characteristics affecting the quality of education, and public participation in educational planning.

EDFL 621 Problems of Teaching in Secondary Schools. (3 Hours) Prerequisites: Advisor's consent. A study of the philosophy, purposes and organization of the secondary school in our modern social order. Special attention is given to the history of the modern secondary school.

EDFL 627 Seminar in the Supervision of Instruction. (3 Hours) The interpretation of research reports, the design of research plans, the development of instrumentation appropriate to the development of instructional programs.

EDFL 630 Trends and Issues in Community College Curriculum and Instruction. (3 Hours) Major issues in curriculum and instruction in the community/junior college with an analysis of recent trends. Exploration of historical and current alternative curriculum and instruction organization strategies.

EDFL 631 Statistical Regression. (3 Hours) Prerequisite: EDFL 514; EDFL 515 or their equivalent. Linear and multiple regression, nonlinear regression, analysis of variance, random fixed, mixed methods, expected mean square, pooling multiple comparisons, analysis of co-variance.

EDFL 634 Computers in Education (3 Hours) This course is designed to cover theory, techniques, and practices in using computers and computer-assisted instruction (CAI) in education. No previous background in computers and programming is assumed.

EDFL 686A Special Projects: Planning the Curriculum for Secondary Schools. (3 Hours) This course is designed primarily for in-service personnel in education desiring enrichment activities in Secondary Education. Students taking this course will be engaged in activities directed toward planning, developing, and evaluating curricular materials that may be used for teaching P-20 grades.

EDFL 687 Research and Independent Study (Credit Varies). (1-3 Hours) Opportunity for students to undertake study and research under the direction of a faculty member. At the close of the period of study, the student will submit a written report.

EDFL 690 Thesis (1-6 Hours) Candidate for the Master of Science degree may choose to present a thesis embodying the results of the individual's research. The candidate chooses his problem but approval by his advisor and committee is required.

EDFL 696 Special Topics in Education. (3 Hours) This course is designed to meet the needs of teachers, students, administrators, community leaders and other personnel who have special needs and interests in selected areas of education. Content will be developed around assessed needs, interests, and goals or objectives of the group(s) involved. This course will deal with special topics which may be treated more effectively as a mini-course, institute seminar or as a workshop instead of as a regular scheduled course.

EDFL 732 Nonparametric Methods In Statistics. (3 Hours) Prerequisite: EDFL 514; EDFL 515 and 601 or their equivalent. Confidence intervals and tests of hypothesis when no functional form is postulated for the population Sign, spread tests, tolerance limits, tests of independence, rank correlation, non-normal analysis of variance, consistency and power of various tests.

EDFL 797 Research Design (3 Hours) Prerequisites: EDFL 514; EDFL 515 and 601 or their equivalent. Theory and research in education, potentials and limitations of research, research design, tools and approaches used in inquiry, methods of research regarding educational decision making, Introduction to automated data processing, critical analysis of research studies in education.

**Executive Ph.D. Program
in
URBAN HIGHER EDUCATION**

Mission

The Executive Ph. D. Program (EPHD) in Urban Higher Education is intended to prepare executives, middle/senior managers and other institutional leaders in higher education and related human services agencies to respond effectively to the challenges posed by urban and metropolitan communities in a pluralistic society undergoing sustained social, economic and political change. It will do so by providing its leaders/students with a doctoral experience that is: (1) multi-disciplinary in format; (2) cohort-based, (3) problem-centered, (4) time-bound, (5) fully engaged and immersed and (6) integrative in nature.

The thematic term "urban" venue is unique to this particular program. The definition by Clarence N. Stone in "Changing Urban Education" is applied in this regard as "jurisdictions that are large and old enough to include socially and economically diverse populations. Typically these are central cities and mature suburbs. Within the broad category of urban communities, recent trends show a greater concentration of poverty and people of color."

The Program utilizes the newly-created Jake Ayers Institute for Research in Urban Higher Education as a setting within which management competencies and research skills can be applied to address complex urban and metropolitan problems that are both well-documented and longstanding in nature. The Jake Ayers Institute for Research in Urban Higher

Education will support and serve as the program's research arm.

The EPhD Degree aims to:

1. Offer the doctorate in an executive format that will enable institutional leaders and managers to complete their degrees without significant career interruption.
2. Provide a trans-disciplinary curriculum and related studies focused on advanced topics in higher education leadership, business, public policy and administration, and urban and regional planning.
3. Focus attention on core management competencies and applied research methodologies that address existing urban and metropolitan community concerns.
4. Require students to conceptualize and develop dissertation strategies at the onset of their doctoral careers, thereby enabling them to complete their doctoral studies in 24 months.
5. Create an intellectual context within ongoing professional development, research and service to assume a normative dimension in the lives of educational leaders in our urban and metropolitan communities.

The EPhD Cohort Model

This program is designed on the cohort model which requires all admitted students to complete the same courses from beginning to end or a 24-month period. Although culminating dissertation development is finalized in the latter stages of doctoral studies, the preparation, planning and refining of the dissertation is interwoven throughout the 24 months. Students will be required to develop a two-year plan which identifies a balance between their coursework and professional work duties at their home/host institution or agency. It is imperative that this plan is developed to facilitate high performance and sustainable productivity in the student's life during enrollment in this program.

The EPhD cohort model represents a cadre of committed colleagues who enroll in, and graduate from, an accelerated research-based doctoral program collectively-- matriculating in a rigorously planned and intensely prescribed academic program of study according to a signed agreement and a related pledge agreed upon by each student in the cohort.

The EPhD cohort model requires students to carefully and diligently plan ahead. The model promotes collegiality, interdependence, networking and camaraderie among students for a lifetime. The Cohort model has a "transdisciplinary" curriculum, allowing students to apply theories and practices in daily workplace situations in urban higher education settings. The model provides a setting in which faculty in the fields of higher education public policy and administration, business and urban and regional planning are brought together as colleagues and experts from the field. The Cohort model is designed for adult learners who are working professionals and can persevere as well as endure the rigors of the program toward personal and professional growth.

The EPhD cohort model informs students of expected outcomes and the academic program of study in

advance and upon enrollment. Students receive personalized guidance from faculty to ensure completion of the academic program on time and on task. Toward this end, students will have access to the support of faculty resource coaches who are designated to help with dissertation preparation, comprehensive examination preparation, written and oral communication and other areas related to personal and professional guidance. Students learn academic theories as well as real world experiences from each other and the faculty who are either trained academicians, practitioners in the field or visiting scholars and leaders. The cohort model encourages extensive group work that follows a framework with: (a) a moderator/convenor (b) a recorder/reporter and (c) an observer/evaluator.

It is imperative that EPhD applicants recognize that this program requires dedication, commitment, focus and discipline; as well as recognize the common tenets in the program such as complexity theory, exchange analysis and generative learning.

Program Objectives

1. To provide students with the knowledge, skills and dispositions required to lead higher education institutions and human services agencies in urban and metropolitan communities.
2. To enable students to master the theoretical, conceptual and research perspectives necessary to improve the quality of life in urban and metropolitan settings.
3. To support the development and implementation of clearly defined and focused action-research initiatives designed to address existing and pressing urban and metropolitan challenges, such as: (a) P-16 education, (b) human service delivery systems, (c) economic development, (d) urban and metropolitan renewal, (e) regional planning and (f) individual, group and community empowerment.
4. To create a culture of ongoing intellectual inquiry that supports professional development and lifelong learning.

Accreditation

The EPhD program is offered in the College of Education and Human Development which is accredited by the National Council of Accreditation Teacher Education (NCATE). Both the College of Education and Human Development, and Jackson State University are accredited by the Southern Association for Schools and Colleges (SACS). To date, there is no agency or organization for accrediting programs in higher education at the doctoral level. Students who successfully complete the EPhD program will meet the standards and requirements set by NCATE and SACS.

Program Admission

Students applying for admission to the EPhD Program must first obtain general admission to the Division of Graduate Studies; however, this admission does not mean automatic admission to the Program. Applications are accepted year round for admission each fall. **Applications must be submitted prior to January 15.** Admission will be limited to a cohort of

typically 15-25 participants from higher education faculty and mid/entry level executive personnel in higher education and other related sectors. Admission to the EPhD Program will be guided by the following criteria:

1. A Master's degree from an accredited university.
2. A completed EPhD program application.
3. Transcripts for all post secondary work attempted prior to submitting a program application.
4. A satisfactory score on the GMAT, GRE or MAT.
5. Recommendations from three (3) professional persons who are knowledgeable of the applicant's professional academic ability, job experiences, leadership potential and availability to participate in the program. A letter of reference from the President or Chief Executive Officer will strengthen the application.
6. Acceptable evidence of a student's writing ability as determined by an on-site writing sample completed under the supervision of the screening committee member.
7. Clear statement on how previous graduate work relates to urban higher education and the proposed dissertation topic.
8. A successful interview with the program screening committee.
9. Recommendation for admission by the screening committee. Note: Students accepted in this program will transfer twelve (12) hours from previous graduate work to complement the core areas. Approval is required by the program faculty, before being admitted formally and officially to the program.

Dissertation Pre-Planning

As part of the admissions process for the EPhD program, students are required to complete a dissertation framework for their anticipated research which covers the following:

1. The proposed research topic and problem statement
2. The preliminary results from a review of related literature
3. The proposed research design and methodology

Time Limits

No student admitted to the Executive PhD program will be granted the doctoral degree unless all program and academic requirements are completed within the required 24 month (2 year program), from the time of admission to graduation from the program, with two consecutive calendar years.

Financial Aid

Students admitted to the Executive PhD program are strongly encouraged to seek financial support from their home institution/agency. This is also reinforced in the Executive PhD degree agreement signed by the admitted student and his/her supervisor. Under special circumstances, and provided resources are available, graduate research and teaching assistantships or fellowships may be available and awarded on a competitive basis to highly qualified admitted students. Students admitted to the program are eligible to apply for the Stafford Loan.

Retention

Students admitted to the EPhD program will be required to successfully complete all academic classes, program requirements and evidence toward dissertation to demonstrate student points of progress concerning enrollment to retention, and retention to graduation.

Residence Requirements

Students admitted to the Executive PhD program will be required to spend approximately one week- end a month, defined as Thursday morning through Sunday morning, to actively participate in all required program classes, activities, modules, and other related field work. Wednesday is considered a travel transition day in preparation for this required residence. Lodging and food expenses are incorporated in the tuition and participatory fees for this program.

Candidacy Requirements

To be successfully admitted to doctoral candidacy in the Executive PhD program, all students must successfully prepare for the qualifying/ comprehensive examinations, complete the comprehensive examinations, and present evidence of successful progress toward the development of the dissertation. In this regard, students must :

1. Successfully complete formal coursework and all instructionally related activities with a GPA of 3.0 or better following the completion of at least 2 semesters.
2. Successfully pass the qualifying/comprehensive examination.
3. Appropriately, and in a timely manner file with the Dean of the Division of Graduate Studies, the dissertation proposal approved by the student's advisor, Department Chair, EPHD Executive Director, and College Dean.

Cognate Component (12 Hours).

Students accepted in the EPhD must be able to transfer 12 hours of approved previous graduate work before admission is granted to enhance the cognate area of interest and to complement the cores.

Degree Requirements

This executive program requires approximately 24 months or two years of coursework and related activities, resulting in a minimum of 72 hours, including a minimum of 12 hours toward dissertation. Additional requirements of this program include: (1) completion of the EPhD agreement, (2) satisfactory performance and completion of the qualifying/comprehensive examinations, following the completion of required course work and (3) successful preparation and defense of the dissertation.

The final basis for granting this degree shall be the candidate's evidence of gained knowledge, skills, and dispositions from the collective course work, mastery of theoretical, conceptual and research perspectives and completion of the dissertation.

Course Requirements

The Program offers courses on a cohort basis.

DESCRIPTIONS OF COURSES

EDHE 800 Philosophy and History of Urban Higher Education (3 Hours). This course is designed to meet the needs of administrators, community leaders, directors and other students to review, and analyze the philosophical and historical events and occurrences that have contributed to challenges in urban and metropolitan communities.

EDHE 802 Higher Education Administration and Theory in Cross-Cultural Environments (3 Hours) Provide higher education doctoral students with background and theory in administration of four-year public and private institutions. Emphasis is placed on administrative issues in diverse university and college environments.

EDHE 804 Higher Education Futures: Strategic Planning and Development (3 Hours) Provide higher education doctoral students with concepts, theories and skills to develop strategies to address future issues in public and private institutions for the 21st century.

EDHE 805 Educational, Governmental, and Corporate Relationships (3 Hours). Analyzes urban institutions as policy systems and the educational role of leaders. Discusses relationship of the institutions to state policy processes, and the constraints imposed by federal law and court decisions. Evaluates the implications of federal and state systems for local control program coordination and resource allocation. Examines the effects of community expectations and participation on policy-making in urban institutions.

EDHE 812 Quantitative Research Methods (3 Hours). This course provides an exploration of current models and issues in educational assessment and evaluation as a professional practice. Students must design, develop and implement comprehensive needs assessment and evaluation plans which include specification of a theoretical framework, problem identification, data collection/analysis procedures, report writing format and dissemination plans. Students will research, summarize and present current multivariate journal publications about issues, practices, and innovations in higher education related assessment and evaluation.

EDHE 813 Qualitative Research Methods (3 Hours). Exploration of qualitative research designs and methods, the analysis of qualitative data and the uses of qualitative research in higher education. Field research techniques will be reviewed and utilized in projects by students.

EDHE 814 Ethics in Planning, Change and Leadership (3 Hours). In this course students will examine the theory and practice of professional ethics. The principles of ethical thinking and behavior in the planning profession are covered extensively. The human aspect of problem arising in technical, social and organizational areas will be explored as change occurs and thorough analysis of organizations as systems.

EDHE 820 Advanced Statistical Methods (3 Hours). A study of advanced statistical procedures: analysis of variance; randomized block, factorial, and repeated measurement designs; analysis of covariance; non-parametric tests: simple, multiple, and curvilinear regression; introduction to path analysis, canonical correlation, discriminate, and factor analyses; emphasis on higher educational research problems.

EDHE 825 Methods of Urban and Regional Analysis and Planning (3 Hours). This course analyzes microeconomic theory as it applies to business operations. Topics include demand theory and estimation; production and cost theories and estimations; capital budgeting theory and analysis; pricing policies, and productions under uncertainty.

EDHE 829 Legal Aspects of Higher Education (3 Hours). The course focuses on the role of law in the governance and management of American higher education institutions. It will use universities and colleges as a lens to better understand non-profit organizations more generally, what constitutes the law, how litigation works, the roles of counsel, employment relationship between organizations and individuals, particularly the relationship between faculty and higher education institutions with a concentration on higher education, the students in academic and social settings.

EDHE 830 Research Seminar: Intellectual Capital and Human Resources (3 Hours). By reviewing theoretical and practical grounds for knowledge

management, this seminar will help students understand emerging issues, provide present and prospective leaders with elements for leveraging intellectual capital as a human resource.

EDHE 833 Research-Based Teaching Methods (3 Hours). This course is an introduction to the principles and philosophy of teaching. Selected topics include concepts and techniques relating to various instructional strategies used by colleges and university teachers, and the development of media-based courses for web courses and distance instruction.

EDHE 842 Theoretical Perspectives in Planning and Building Community Groups (3 Hours). Study of the advanced theoretical concepts in urban planning and the relationship between planning theory and social science precepts. Comparative analysis of theories that stimulate planning thought and philosophy.

EDHE 865 Higher Education Finance (3 Hours). The function of this course in higher education finance is to combine the theory with application and issues facing the financial management of higher education institutions. The perspective is taken from those holding mid-level to senior-level positions in the administrative and academic areas of public/private four-year institutions.

EDHE 877 Public Policy Formulation (3 Hours). This course focuses on problems of policy formulation, implementation, and evaluation. The participants will be exposed to policy issues, thinking through goals and objectives, policy adoption, problems of implementation (including perceptive and real gaps between congressional intent and bureaucratic interpretations of congressional intent), and evaluation.

EDHE 882 Seminar in Program Development, Implementation, and Evaluation (3 Hours). This course is to teach class participants the principles of program development and provide an understanding of how evaluators can help make government more effective by producing timely information on the promise and performance of existing programs.

EDHE 899 Dissertation (12 Hours). Students in the EPhD Program in Urban Higher Education will begin to define and develop a quantitative and/or qualitative dissertation upon entrance into the program. Credit per academic session allowable is 1 hour. The dissertation will address issues of substantive concern in the students "home" institution, agency and/or community. The completed dissertation will offer evidence of significant independent research ability, and will contribute to knowledge in the chosen area. Satisfactory completion of the dissertation requirement includes passing an oral examination in defense of the dissertation.

**DEPARTMENT OF
SCHOOL, COMMUNITY AND
REHABILITATION COUNSELING**

Dr. Jean Farish, Professor and Chair
P. O. Box 17122
Telephone: (601) 979-2361
Fax: (601) 979-3368
E-mail: jean.m.farish@jsums.edu

Dr. R. Arnold, Assistant Professor
Dr. G. Dansby-Giles, Professor
Dr. R. Fults-McMurtery, Associate Professor
Dr. F. Giles, Professor
Dr. L. Johnson, Assistant Professor
Dr. R. Lewis, Associate Professor
Dr. D. Porter, Associate Professor
Dr. N. Yazdani, Assistant Professor

Accreditation

School, community and rehabilitation counseling programs are housed within the College of Education and Human Development, School of Administrative Leadership, which is accredited by the National Council for Accreditation of Teacher Education (NCATE). The Rehabilitation Counseling program is accredited by the Council on Rehabilitation Education (CORE). The Community and School Counseling Programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Program Objectives

In support of its mission, the department prepares masters and specialist level students for careers in professional counseling. The specific objectives of the department are to prepare students to:

1. Acquire the professional skills necessary to become professional counselors,
2. Obtain certification in school counseling or school psychometry, and
3. Upgrade their certification and/or skill level in counseling.

**Counseling
Master of Science and
Master of Science in Education**

Admission Requirements

Applicants must be admitted to both the Division of Graduate Studies and the Counseling Program. The Counseling Program has the following admission requirements in addition to the Division of Graduate Studies requirements.

1. A minimum cumulative GPA of 3.00 for regular admission and 2.80 for conditional admission, at the undergraduate level.
2. A score on the GRE within the last five years, sent directly to the department.
3. Interview and a writing sample.
4. Three letters of recommendation sent directly to the department.
5. **Applications will only be accepted for Fall enrollment.** The application deadline is March 1 for fall admission.

6. Successful applicants for the M.S. Ed. program must be certified at the 'A' level or above in a teaching discipline.

Degree Requirements

To qualify for a Masters' degree in the department, a student must complete 51 to 60 semester hours with a cumulative GPA of 3.00 or above and obtain a passing score on the Graduate Comprehensive Examination.

**Specialist in Education
Counseling Concentration**

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admissions is January 15th

Degree Requirements

Students are required to complete 42 semester hours, write a thesis, and obtain a passing score on the Graduate Comprehensive Examination. Students are encouraged to enroll in COUN 687: Advanced Research and Independent Study.

**Specialist Degree in Education
Psychometry Concentration**

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- Student must hold a valid teaching license

- Deadline for applications for summer/fall admissions is January 15th

Degree Requirements

Students are required to complete 36 credit hours beyond the master's degree write a thesis, and obtain a passing score on the Graduate Comprehensive Examination.

The Specialist in Education Program in Psychometry graduate will be eligible to earn the License for Psychometry from the Mississippi Department of Education.

Master of Science Rehabilitation Counseling Concentration

The Rehabilitation Counseling Degree is a masters level program designed to prepare rehabilitation counselors. Rehabilitation counselors assist individuals with disabilities to adjust to their life circumstances. People with disabilities, regardless of their type, duration, or severity, may experience significant difficulties in social, psychological, vocational and familial aspects of their lives. Employment opportunities for program graduates include rehabilitation facilities, mental health agencies and human service agencies. The program works closely with the Mississippi Department of Rehabilitation Services in providing field based experiences. Typically, federally funded RSA traineeships are available to full time students.

Accreditation

The program is accredited by the Council on Rehabilitation Education, Inc. (CORE).

Admission Requirements

Applicants are required to have a minimum GPA of 3.00 (based on a 4.00 scale) at the undergraduate level. Applicants with a GPA of 2.80 to 2.99 may be admitted on a conditional basis. A GRE score is not required. Applications for admission are considered for the fall session. Applicants should submit an application along with two copies of official transcripts to the Division of Graduate Studies and program application, three letters of recommendation and a writing sample submitted directly to the department. Successful candidates for admission must be interviewed by the rehabilitation faculty.

Degree Requirements

The Rehabilitation Counseling Degree is 57 semester hour program. Students seeking a masters' degree in Rehabilitation Counseling must:

1. Complete the 57 hour program.
2. Complete Field based experiences.
3. Pass the Graduate Area Comprehensive Examination.

DESCRIPTION OF COURSES

Counseling and Psychometry

COUN 504 Counseling in Community Settings (3 Hours) This course is a survey of theoretical and

applied information for counselors working in community settings. Course content include history and philosophy, roles of workers, organizational and delivery systems, program development and consultation, specific populations, interviewing, prevention and intervention strategies and current issues related to agency counseling.

COUN 506 Introduction to Professional Counseling (3 Hours) Includes goals and objectives of professional organizations, codes of ethics, legal considerations, standards of preparation, certification, licensing, role identity of counselors and other personnel services specialists, and overview of services.

COUN 510 Organization and Administration of Guidance (3 Hours) An orientation to guidance and counseling services; the setting in which they are offered and the needs of special populations. Introduction to history, philosophy, legal and ethical issues of guidance and counseling.

COUN 514 Analysis of the Individual. (3 Hours) A study of the means by which information is gathered about a student and the most productive methods of interpreting the materials. Types of cumulative records are examined. The uses of tests, reports of interviews, anecdotal records, school grades, and autobiographies are studied.

COUN 517 Life Styles and Career Development. (3 Hours) Includes such areas as vocational choice theory, relationship between career choice and lifestyle, sources of occupational and educational information, approaches to career decision-making processes and career development exploration techniques.

COUN 520 Principles and Techniques of Counseling. (3 Hours) Introduction to the underlying principles, dominant theories and application of techniques of counseling with individuals and selected groups.

COUN 522 Counseling Children (3 Hours) This course is designed to provide specialized instruction and knowledge related to the topic of counseling children. This course is a fundamental course for aspiring school counselors and other professionals interested in counseling children. This course offers didactic instruction and discussion of counseling techniques useful in various settings, with an emphasis of working with children in school settings.

COUN 524 Spirituality in Counseling. (3 Hours) This course provides specialized instruction and knowledge related to the topic of spirituality and its relationship to counseling.

COUN 526 Dynamics of Group Processes. (3 Hours) Includes theory and types of groups, as well as descriptions of group practice, methods, dynamics, and facilitative skills. This also includes supervised practice.

COUN 527 Individual Testing I. (3 Hours) Study of the Wechsler Scales including history, standardization, and usage. Supervised practice in administration, scoring, interpretation and report writing.

COUN 528 Counseling Gifted (3 hours) Counseling the gifted and creative individuals is a three hours graduate level course for mental health professionals in school, community, and private sector settings. This course provides an advanced knowledge and necessary skills required to provide guidance and counseling services for children, adolescence and adults. Additionally, this course reviews different theories in

creativity and giftedness to facilitate the therapeutic approach and academic management.

COUN 561 Psychological Aspects of Human Development. (3 Hours) Presents a broad understanding of the nature and needs of individuals at all developmental levels. Emphasis is placed on biological, cognitive, and socioemotional approaches. Also, included are such areas as human behavior (normal and abnormal), personality theory, and learning theory.

COUN 571 Supervised Laboratory in Counseling. (3 Hours) Supervised practical experiences in using counseling techniques.

COUN 578 Internship in Counseling (9 Hours) The student is placed at an agency/institution under the supervision of a university coordinator and an approved onsite practitioner. A minimum of 600 clock hours with 10 hours for small group activities are required for 9 hours of credit. (Prerequisites: COUN 504, 506, 514, 517, 520, 526, 561, 611, 631, 658, 671 and 691).

COUN 585 Research in Counseling. (3 Hours) Systematic investigation of factors and procedures relevant to research in counseling.

COUN 589 Grief Counseling (3 Hours) This course is designed to familiarize students, teachers, counselors and other professionals with the reactions of individuals to death and dying. This course also focuses on developing a personal perspective of the grief process associated with death and dying.

COUN 606 Behavioral Assessment (3 hrs) Overview of behavioral assessment including critical appraisal for educational practices and counseling interviews.

COUN 611 Psychodiagnosis and Treatment (3 Hours) This course will introduce students to psychodiagnostics using the Diagnostic and Statistical Manual of Mental Disorders. Emphasis will be placed on consultation and developing a working knowledge of the organizational structure and the professional terminology used in the manual and subsequent treatment plan development including an introduction to psychopharmacology. (Prerequisites: COUN 514, 520).

COUN 627 Individual Testing II. (3 hrs) Study of Stanford-Bine and achievement tests including history, standardization and usage, supervised practice in administration, scoring, interpretation and report writing. Recommend COUN 527 be taken before this course.

COUN 631 Social and Cultural Foundations in Counseling. (3 Hours) Includes studies of change, ethnic groups, subcultures, changing roles of women, sexism, urban and rural societies, population patterns, cultural mores, use of leisure time and differing life patterns. Such disciplines as the behavioral sciences, economics and political science are involved.

COUN 658 Marriage and Family Counseling (3 Hours) This course will identify individual and family life cycles, describe healthy and dysfunctional characteristics of families; steps and stages in family therapy; identifying strategies for working with single-parent families, blended families, culturally diverse families; substance-related disorders, domestic violence and child abuse; and legal, ethical and professional issues in family therapy.

COUN 671 Practicum in Supervised Experience and Consultation. (3 Hours) Prerequisite: COUN 527). Strategies and processes in counseling and consultation will be presented. 100 clock hours of

experience required and one hour individual supervision per week.

COUN 673 Practicum in School Psychometry (3 Hours). Prerequisites: COUN 672 and consent of instructor. Field experience of 20 hours a week for one term in a school setting under the supervision of a school psychologist.

COUN 678 Internship in Counseling. (6 Hours) The student is placed at a school under the supervision of a university coordinator and an approved onsite practitioner. A minimum of 600 clock hours are required for 6 hours of credit. (Prerequisites: COUN 506, 510, 514, 517, 520, 526, 571, 671, and 561 or 631).

COUN 687 Advanced Research and Independent Study. (3 Hours) Topic chosen by the specialist student and his or her thesis committee. The course may be repeated two or more times until 6 hours have been accumulated.

COUN 691 Seminar in Legal and Ethical Issues. (3 Hours) An analysis of current topics, ethical issues, consultation, programs, literature and research in professional counseling.

Rehabilitation Counseling

RHAB 509 Introduction to Rehabilitation Counseling. (3 Hours) Reviews the foundations of rehabilitation counseling, role and function of the rehabilitation counselor and the vocational rehabilitation process.

RHAB 516 Medical Information in Rehabilitation. (3 Hours) A survey of physical malfunctions and medical information needed for effective rehabilitation counseling.

RHAB 519 Community Resources in Rehabilitation. (3 Hours) An exploration of locating and utilizing community resources in helping the rehabilitation client.

RHAB 523 Vocational Appraisal in Rehabilitation. (3 Hours) To prepare rehabilitation counselors to understand the results of psychological evaluations and to use the information to assist the client in vocational planning. The course covers measurement principles, instruments frequently employed by rehabilitation counselors, and application of test results for persons with disabilities.

RHAB 524 Vocational Evaluation in Rehabilitation. (3 Hours) Course covers history, scope and purposes of vocational evaluation. Enables students to use evaluation techniques, vocational systems in order to develop and implement a vocational plan for rehabilitation clients.

RHAB 531 Case Management in Rehabilitation. (3 Hours) Basic procedures in providing and individual needs and the basics of recording and reporting such services.

RHAB 532 Vocational Placement, Analysis and Adjustment in Rehabilitation. (3 Hours) Job development, analysis, job modifications and accommodations for persons with disabilities.

RHAB 533 Placement Laboratory. (3 Hours) This course is designed to provide supervised experiences for students that will enhance independent living and successful job placement for persons with disabilities. Students will assist persons with disabilities by coordinating and finding suitable employment.

RHAB 535 Techniques of Counseling in Rehabilitation. (3 Hours) Theories and techniques of

counseling applied to individuals and groups in rehabilitation services.

RHAB 560 Psychosocial Aspects of Disability. (3 Hours) A survey dealing with psychological problems caused by disabilities.

RHAB 576 Practicum in Placement. (3 Hours) This course is designed to introduce the student to principles of behavior modification and to apply these skills in a variety of settings with rehabilitation clients. The intention is to modify behaviors that interfere with job placement and job retention.

RHAB 577 Practicum in Rehabilitation Counseling I. (3 Hours) Supervised experiences in human services or rehabilitation settings. Three hundred (300) clock hours are required. Related class work emphasizes interpersonal communication and skills.

RHAB 579 Internship in Rehabilitation Counseling. (6 Hours) Prerequisites: RHAB 577 and RHAB 578. Supervised internship in counseling and caseload management in rehabilitation services. A 600 hour field placement for one full semester.

RHAB 587 Independent Research With Rehabilitation. (3 Hours) Involves independent study in rehabilitation. Requires approval of instruction prior to enrollment.

RHAB 594 Seminar in Rehabilitation Counseling. (3 Hours) Multicultural counseling, legislative issues, ethical issues and current topical issues.

RHAB 691 Seminar: Rehabilitation Substance Abuse. (3 Hours) Focus on issues research, techniques, applications, and readings in the rehabilitations of persons who are substance abusers.

The Department of Elementary and Early Childhood Education offers graduate programs leading to the Master of Science in Education Degree in Early Childhood Education, Reading and Elementary Education; the Master of Arts in Teaching (Alternate Route Degree); the Specialist in Education Degree in Elementary Education; and the Doctor of Education Degree in Early Childhood Education.

Departmental Objectives

The department and its programs exist to prepare professional instructional personnel at levels appropriate to the degrees offered, and to meet certification requirements at AA, AAA, and AAAA levels for the State of Mississippi in the various fields. The department's intention is to prepare candidates who:

1. Demonstrate sensitivity to the emerging knowledge bases and understand how they impact education and the need for change;
2. Adjust methods, curriculum and service approaches to meet the needs of diverse learners;
3. Demonstrate a repertoire of educational related strategies and skills which enable them to share knowledge effectively;
4. Demonstrate critical thinking competence and effective communication skills in various forms and media;

5. Ensure that established standards for successful learner outcomes are met;
6. Possess the ability to work successfully with learners, teachers, college faculty, and others;
7. Demonstrate knowledge of and skill in applying basic principles undergirding the selection and utilization of methods, techniques and devices which facilitate effective program development using various educational models;
8. Can locate, interpret and apply research pertinent to educational problems;
9. Exhibit competency in doing independent, original research;
10. Are able to identify, interpret and promote the functions of education in a democracy;
11. Are skilled in the techniques of instruction and ensure that pupils will derive the greatest benefits from classroom experiences;
12. Serve as facilitators for the total process of growth and learning;
13. Develop competencies and professional leadership skills through the advancement of knowledge and research that will enable them to assume major leadership roles in diverse communities.

Early Childhood and Elementary Education Objectives

The major objectives are to produce educators who:

1. Are competent teachers in the fields of Early Childhood Education and Elementary Education;
2. Are prepared for careers in preschools, kindergartens, and elementary schools;
3. View the profession of education as being influential in the advancement of humankind;
4. Are compassionate and understanding and have as their primary goal to help children and youth develop into citizens who will promote human advancement.

Master of Science Program Objectives

The master level programs in Elementary and Early Childhood Education, and Reading allow students to develop a mastery of structure, skills, concepts, ideas, values, facts, and methods of inquiry in their field of specialization. Based upon the guidelines and standards of specialized professional association, the specialty studies objectives chart the courses and experiences that include academic, methodological, and clinical knowledge necessary for professional competence in the field. Through the program, the student will develop competencies in the following:

1. Research the literature on child development from birth to early adolescence with emphasis upon the implications of the reading and learning processes for these ages.
2. Research the literature on the psychological and sociological concepts and generalizations dealing with the development of self-concept, group responsibility and relationships and reading ability.
3. Conduct action research projects designed to develop skills in observing, recording, and assessing children's behavior in order to plan an appropriate instructional program and learning environment.
4. Design, implement, and evaluate curricula in the disciplines which provide content knowledge

- needed to teach listening, speaking, writing, and reading with an emphasis on language development.
5. Design, implement, and evaluate curricula in the disciplines which provide content knowledge needed to teach mathematics.
 6. Design, implement, and evaluate curricula in the disciplines which provide content knowledge needed to teach physical sciences and health.
 7. Design, implement, and evaluate curricula in disciplines which provide content knowledge needed to teach social studies areas.
 8. Design, implement, and evaluate curricula in the disciplines which provide content knowledge needed to teach fine arts.
 9. Evaluate instructional methodologies for organizing, planning, and implementing physical education activities and safety practices.
 10. Research and evaluate current instructional approaches for enabling children to express themselves creatively in a variety of ways including the Arts and communication skills.
 11. Research and evaluate current instructional approaches for enhancing the critical thinking/reading ability of the learning in any content area.
 12. Research and evaluate current instructional approaches for developing competence in facilitating independent learning and decision-making skills in young children and early adolescence.
 13. Conduct ethnological studies to examine characteristics of different learning environments appropriate for children from infancy through early adolescence.
 14. Demonstrate skills in the use of state and local resources and appropriate referral strategies.
 15. Design, implement, and evaluate appropriate curricula experiences working with parents and other adults in the home, school and community.
 16. Develop and evaluate administrative plans for the organization and administration of the pre-kindergarten program.
 17. Conduct diagnostic-prescriptive teaching.

Master's Degree in Elementary Education

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited college or university.

Degree Requirements

In addition to the specific degree requirements of the Division of Graduate Studies; the student must successfully complete a minimum of 36 semester hours.

Note: A student may transfer up to twelve (12) quarter or nine (9) semester hours earned at an accredited college or university.

Core Requirements

Course	Title	Semester Hours
EDFL 511	History and Philosophy of Education	3
EDFL 515	Methods of Educational Research Elementary	3

Master of Science in Reading Education

Program Objectives:

- To develop candidates who understand the research bases for implementing evidence-based practices in literacy instruction
- To prepare candidates to utilize diagnostic-prescriptive strategies of intervention for struggling readers and writers
- To instruct candidates to disseminate research and information concerning reading to guide their research endeavors
- To guide candidates as they integrate Internet technologies into classroom lessons to insure students will be prepared for the technology and literacy futures they deserve
- To instruct candidates in how to use literacy to celebrate the diverse cultures that increasingly defines our population
- To equip candidates with leadership in literacy skills

Admission Requirements:

Each candidate must also complete an admission packet from the Department of Elementary and Early Childhood Education. The admission packet includes, but is not limited to the following requirements:

- Proof of a Baccalaureate degree of Education from an accredited university or college with a minimum undergraduate cumulative GPA of 2.5 for conditional admission.
- Proof from ETS showing passing scores on both parts of PRAXIS II (Curriculum and Instruction and also the PLT)
- Proof that the candidate holds a current class 'A' Educator's License or is seeking renewal of the license through attaining college credit hours as deemed necessary by the Mississippi State Department of Education (Copy of class 'A' Educator's License)
- Complete an acceptable writing sample and interview process with departmental faculty

Degree Requirements:

The Master of Reading Education course work includes the following requirements:

- Nine (9) semester hours of core coursework in statistics and curriculum methods
- Twenty-four (24) semester hours of specialized content
- Six (6) hours of clinical and practical experiences
- Coursework must be attempted in the required sequence of prerequisites
- Throughout the course of study, eight (8) major assessments must be successfully completed according to the International Reading Association's established criteria.

Specialist Degree in Elementary Education

Program Objectives

The program illustrates advanced knowledge about pedagogical skills and earning theory, educational goals and objectives, cultural influences on learning, curriculum planning and design, instructional techniques, design and use of evaluation and measurement methods, classroom and behavior management, instructional strategies for exceptionalities, classroom and schools as social systems, school law, instructional technology and collaborative and consultative skills. Program objectives embrace experiences which incorporate multicultural and global perspectives that help education students understand and apply appropriate strategies for individual learning needs, especially for culturally diverse and exceptional populations.

Outcomes

Through the program, students will develop competencies that will enable them to:

1. Demonstrate knowledge of and skill in applying basic principles undergirding the selections and utilization of methods, techniques and devices which facilitate effective program development in various educational models;
2. Locate, interpret and apply research pertinent to education problems;
3. Conduct independent, original research;

4. Become skilled in techniques that ensure pupils will derive the greatest benefits from classroom experiences;
5. Serve as facilitators for the total process of growth and learning;
6. Provide professional leadership to advance knowledge and research in ways that enable them to assume major leadership roles in diverse communities;
7. Become competent teachers in the field of Elementary Education.

Admission Requirements

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admissions is January 15th

Degree Requirements

In addition to the specific degree requirements by the Division of Graduate Studies, students must successfully complete:

1. A minimum of 30 semester hours and a thesis or a minimum of 33 semester hours and a scholarly research project.
2. Required core courses, EDFL 601, EDFL 602, or EDFL 610, as prerequisites for specialization requirements and/or equivalent courses.
3. Elective courses selected in consultation with their advisors

Note: A student may transfer up to 12 quarter or 9 semester hours earned at an accredited college or university.

Doctorate in Early Childhood Education

Accreditation

The required concentration curriculum is based on the NASDTEC (National Association of State Directors of Teacher Education and Certification) standards and professional accreditation recommendations of the National Council for Accreditation of Teacher Education (NCATE), Southern Accreditation Colleges and Schools (SACS), the National Association for Education Of Young Children (NAEYC), and Association For Childhood Education International (ACEI).

Students complete the following course of study in consultation with their faculty advisors.

Program Objectives

The focus of the doctoral program is on the study of early childhood education and its practice, including aspects of child development, pedagogy, curriculum, policy analysis, history and philosophy, and basic and applied research. The primary outcome for the doctoral candidate is to become a leader for the field who influences the practice of early childhood education through the generation of knowledge; the education of early childhood professionals; the conduct of research on young children's development and learning; the development implementation, and evaluation of curriculum; administration of early childhood programs and services at the local, state, and national levels; and the analysis and generation of public policy related to early childhood education.

Doctoral candidates are expected to demonstrate the following competencies:

1. Knowledge and understanding of the dominant theories of human and sociocultural development and learning through the life span; knowledge of research on social, emotional, cognitive, language, aesthetic, motor, and perceptual development and learning in children from birth through age eight (8) including children with special developmental and learning needs and their families; and an understanding of the child in the family and cultural context.

2. Knowledge and understanding of theories and content of curriculum and instruction and alternative models and methodologies.
3. Knowledge of the alternative perspectives regarding central issues in the field (for example, child development, programs for young children and their families, research priorities, or implications for teacher education and staff development).
4. Knowledge and ability to use and develop a variety of procedures for assessment of child development and learning, child care and early education environments, and early childhood education curricula; and understanding of types, purposes and appropriateness of various assessment procedures and instruments.
5. Knowledge of developing and evaluating programs for children from a variety of diverse cultural and language backgrounds, as well as children of different age and developmental levels, including children with disabilities, children with developmental delays, children who are at risk for developmental delays, and children with special abilities.
6. Apply interdisciplinary knowledge from such fields as sociology, psychology, health services, special education, history, philosophy, and to practice in early childhood.
7. Knowledge in reflective inquiry and demonstrate professional self-knowledge, for example by collecting data about one's own practice and articulating a personal code of professional ethics.
8. Knowledge of the ability to work collaboratively as a member of a team with colleagues and other professionals to achieve goals for children and families.
9. Knowledge and skills required to serve as a mentor to others and a model of professional behavior for volunteers and other staff members.
10. Knowledge of understanding the socio-cultural, historical, and political forces that influence the diverse delivery systems through which programs are offered for young children and their families (for example, social service agencies, public schools, private enterprise).
11. Collection of and interpretation of research, translate research findings into practice, demonstrate personal research skills, and implement applied research.
12. Knowledge of deeper understanding of a particular area of specialization related to an intended career role (for example, administration and supervision of early childhood programs; family support programs; primary grade teaching or administration; early childhood special education/early intervention; or infant/toddler programming).
13. Knowledge of applying theoretical and research knowledge to practice in early childhood settings (their own classroom or other field assignments). For example, applications of theory to practice may be demonstrated during field study projects, action research, curriculum projects, or observed clinical practice.
14. Knowledge to enable reflective professionals to take leadership roles in schools or programs, mentor novice teachers, and act as advocates for children at local, state, and national levels.
15. Knowledge of the diversity of delivery systems through which programs are offered for young children and their families (for example, social service agencies, public schools, private enterprise) and become advocates for providing families with coordinated, quality services that are accessible and affordable. Doctoral candidates demonstrate understanding of the implications of contrasting missions, mores, resources, constraints and potential of each system for preparing personnel to work in those settings.
16. Knowledge of research methods and findings, and the ability to translate research findings into practice, demonstrate personal research skills and the ability to develop and implement applied research, and the disposition to create and disseminate new knowledge.
17. Deeper knowledge and exemplary practice in at least one area of specialization (for example, Teacher education, assessment and evaluation, early childhood special education/early intervention literacy, bilingual education, or curriculum theory and development).
18. Experience in several types of leadership roles depending on their prior presentation and experience and career objectives. Leadership capabilities may be demonstrated in the areas of: observation and supervision of student teachers and interns; teaching of undergraduate college students; administration of early childhood programs; advocacy and public policy activity; and/or basic or applied research in early childhood education.
19. Theoretical knowledge in education and allied disciplines.
20. Knowledge to interpret and expand the knowledge base by completing a dissertation that involves basic or applied research and study.

The Urban Interdisciplinary Education Curriculum Program for the Doctorate In Early Childhood Education

Admission Requirements

Applicants to the Urban Interdisciplinary Education Curriculum Program must meet the following criteria:

1. Admitted to or eligible for admission to the Division of Graduate Studies.
2. A Master's degree from an accredited University.
3. A completed program application.
4. A cumulative GPA of 3.0 or above (on a 4.0 scale) on the last earned degree.
5. Provide transcripts for all post secondary work attempted prior to submitting a program application.
6. Acceptable evidence of a student's writing ability as determined by a writing sample completed under the supervision of a designated member(s) of the Screening Committee
7. Letters of recommendations from three persons knowledgeable of the applicant's professional and academic ability, job experiences and/or leadership potential such as previous professors, principal; supervisors, or superintendent.
8. An official copy of the Graduate Record Examination Score or Miller Analogies Test taken within the last 5 years.

9. A portfolio documenting compensating strengths such as teaching, publication, professional presentations, educational awards and community service.
10. A successful interview with the Program Screening Committee.
11. A vita (resume) to include Education, Work Experience, Honors, and Affiliations with Organizations.

*The admission criteria for this program are based on minimum standards and a recommendation by the Screening Committee, but satisfying minimum criteria does not guarantee admission in the program.

Core Courses*		Semester
Course	Title	Hours
EDCI 703	Seminar I: Urban Studies in Early Childhood Education	3
EDCI 712	Models of Curriculum Development in Early Childhood Education	3
EDCI 713	Instructional Theories and Design in Early Childhood Education	3

	<i>Total**</i>	Minimum of 66

*Prerequisite: Admission to The Urban Interdisciplinary Education Curriculum Program for the Doctorate in Early Childhood Education.

**Excluding Prerequisite courses for Non Early Childhood Education applicants.

DESCRIPTION OF COURSES

EDCI 500 Introduction to Teaching Internship. (6 Hours) An exploration of the teaching profession to include historical perspectives, current issues and practices, influences of legislation and future projections. Through the field-based mentorship component of the course, students will have the

opportunity to test theories of teaching and learning, to plan and guide learning experiences for elementary and secondary learners, and to analyze functions of different levels of schools.

EDCI 501 Parenting Roles in Early Childhood Education. (3 Hours) An investigation of the theories concerning parent-teacher-child intrapersonal and interpersonal relationships to give a broader understanding of diverse families from different socioeconomic levels, nationalities, and ethnic backgrounds. Requires 10 hours of field-based experiences.

EDCI 502 Literacy Development and the Young Child (3 hours) An investigation of the techniques used to help young children use language skillfully, to listen, speak, read, and write. Requires 10 hours of field based experiences.

EDCI 503 Principles of Child Development in the Early Years. (3 Hours) An investigation of the methods and research in child growth in social, emotional, psychological and physiological development of children from birth through eight years of age. Requires ten (10) hours of clinical and field-based experiences.

EDCI 504 Methods and Materials In Early Childhood Education. (3 Hours) A critical analysis of methods and materials for teachers working with children in nursery schools, day-care centers, kindergarten and primary grades. Requires fifteen (15) hours of clinical and field-based experiences.

EDCI 505 Assessing the Young Child. (3 Hours) An investigation of the theories and developmentally appropriate practices relative to group and individual evaluation procedures for early childhood education. Requires ten (10) hours of clinical and field-based experiences.

EDCI 506 The Role of Play in the Education of Young Children. (3 Hours) An investigation of the theories and research related to the role of play in early childhood education with emphasis on creative thinking and its relationship to physical, emotional, social and intellectual growth. Requires 10 hours of field-based experiences.

EDCI 507 Organization and Administration of Early Childhood Programs. (3 Hours) An investigation of the theories and developmentally appropriate practice for the organization, supervision, and program management of programs for young children from infant through eight years of age. Requires ten (10) hours of clinical and field-based experiences.

EDCI 508 Literature for Children and Young Adults. (3 Hours) This course is designed to provide a comprehensive study of children's literary selected from the preschool level through junior high school level, with emphasis on book selection, historical perspectives, types of literature, and creative ways to use books with children.

EDCI 509 Practicum in Early Childhood Education (3 hours) An investigation of early childhood philosophy, practice, and theory through research and hands-on experience in childcare settings. Requires 30 hours of field-based experiences.

EDCI 551 Career Education. (3 Hours) A survey of career education models and educational models in educational and vocational settings with a view toward designing career education programs for specific

situations. Requires fifteen (15) hours of clinical and field-based experiences.

EDCI 556 Special Topics In Early Childhood/Elementary Education. (1-6 Hours) This course deals with topics which may be treated more effectively as a mini-course, institute, or as a workshop instead of as a regular scheduled course.

EDCI 557 Problems and Issues in Social Studies Instruction in the Elementary School. (3 Hours) This course emphasizes methods and materials utilized in teaching social studies in the elementary grades. Special attention is given to the importance of multicultural education, citizen action, valuing, the spiral curriculum and Bloom's Taxonomy of Educational Objectives. Requires ten (10) hours of clinical and field-based experiences.

EDCI 563 Problems and Issues In Science. (3 Hours) Content in elementary science; aims and methods of instruction; newer curricular developments; the identification of and planning for solutions to science problems in the elementary school. Materials and media for instruction, and evaluating pupil progress will be studied. Requires ten hours of clinical and field-based experiences.

EDCI 564 Current Trends In Elementary School Mathematics. (3 Hours) This course will address relevant research, contemporary mathematics curriculum content and methodology, relationship between mathematics and other subject areas, improvement of skills and concepts, and the major historical, philosophical, and psychological antecedents of today's elementary school mathematics curriculum. Requires ten hours of clinical and field-based experiences.

EDCI 565 Integrative Studies for the Elementary School. (3 Hours) An examination of psychological and other principles underlying the teaching of reading and the application of these principles in planning, conducting, and assessing reading experiences for different aged learners in content areas.

EDCI 568 Seminar In Elementary Curriculum: Modern Trends and Research. (3 Hours) Intensive analysis of the research on educational content and methodology of the elementary school curriculum: Consideration given to factors influencing curriculum development.

EDCI 569 The Developmentally Appropriate Early Childhood Curriculum (3 hours) An investigation of developmental theories designed to help present and future kinds of curriculum Experiences that are appropriate for bridging and making transitions from one stage into another. Requires 10 hours of field-based experiences.

EDCI 587 Research and Independent Study In Education. (3 Hours) Opportunity for students to undertake independent study and research under the direction of a faculty member; the student will submit a written report and may be asked to stand a comprehensive examination on his work. Requires twenty-five hours of clinical and field-based experiences.

EDCI 588 Education for Developing Areas. (3 Hours) Prerequisite: Consent of instructor. Research seminar of case studies of educational innovations in technically underdeveloped areas of the world.

EDCI 589 Teacher Education Programs and Technology. (3 Hours) Current development in college programs for the preparation of teachers for elementary and secondary schools; analysis of

technological developments in teacher education - simulation situations, video tapes and film feedback, models of teaching, interaction analysis and micro-teaching systems in teacher education.

EDCI 590 Thesis. (3 Hours) Candidates for the Master of Science Degree in Education may choose to present a thesis embodying the results of their research; approval of the candidate's problem by his adviser is required.

EDCI 591 Observation and Supervised Field Work In Early Childhood Education. (9 Hours) Students who have not had 402E or the equivalent will be required to have actual teaching experience under supervision in off-campus kindergarten, nursery or elementary schools, or in the Jackson State University Early Childhood Center. Concurrent conferences will be scheduled as needed. (Required for students who have not had Education 402 EC or 402E-Directed Teaching.)

EDCI 592 Seminar In Supervision of Student Teaching. (3 Hours) Prerequisite: Approval of instructor. Designed to assist supervising teachers in guidance of student teachers. In addition to rationale, and dominant ideas in the literature of supervision. The following topics will be studied: trends in teacher education, orientation of student teachers to student teaching, responsibilities of the supervising teacher and college personnel conference with student teachers and evaluation of student teaching.

EDCI 600 History and Development of Early Childhood Education. (3 Hours) Explores the historical development, theory, and contemporary influences upon early childhood education.

EDCI 601 Methods of Child Study. (3 Hours) Students will be introduced to diagnostic prescriptive concepts through the utilization of a variety of educational diagnostic instruments in the assessment of children's learning. Requires ten (10) hours of clinical and field-based experiences.

EDCI 602 Advanced Seminar and Research In Early Childhood Education. (3 Hours) This course is designed to provide a penetrating view of the early and contemporary scientific and ecological research currently shaping behaviors among children, parents, teachers and administrators during the early childhood years. Notable researchers and theorists are studied through primary sources and computer searches. Requires ten (10) hours of clinical and field-based experiences.

EDCI 603 Education for Parenting. (3 Hours) Provides a comprehensive examination of the theory and research in the parenting process. Requires fifteen (15) hours of clinical and field-based experiences.

EDCI 604 Advanced Developmental Psychology. (3 Hours) This course is specifically designed to address the broad areas of social and cognitive development of normal children. This focus will necessarily explore the interrelationships of cognitive and affective development. The course is thus composed of two components with five modules each. These modules include (1) early experiences, (2) the evolving self, (3) global theoretical perspectives on development, (4) early socialization outcomes, and (5) cross-cultural perspectives.

EDCI 621 Advanced Seminar In Elementary Education. (3 Hours) To assist students and in-service teachers in solving classroom problems. Requires ten (10) hours of clinical and field-based experiences.

EDCI 668 Practicum In Early Childhood Education. (3 Hours) This course of study is concerned with specific practices and research investigations relative to curriculum planning, administration, and supervision within early childhood laboratories. Observations and participation within the existing campus kindergarten program, including pupil contact and limited research activities, are required.

EDCI 687 Advanced Research and Independent Study. (1-4 Hours) Supervised exploration of special topics. Requires forty-five (45) hours of clinical and field-based experiences.

EDCI 689 Behavioral Management in the Elementary School. (3 Hours) This course is designed to provide a comprehensive study of classroom management with emphasis on behavioral modification tactics, classroom arrangement tactics and curriculum designs that enhance the learning environment. Requires ten (10) hours of clinical and field-based experiences.

EDCI 703 Seminar I. Urban Studies in Early Childhood Education. (3 Hours) This course is an introductory course in the Urban Education Curriculum Development Program for the Doctoral Degree in Early Childhood Education. The course content consists of five introduction, modules: (1) Urban studies in Early Childhood Education, (2) Early Childhood Education, (3) Natural Science/Computer Sciences for Early Childhood Education, (4) Special Education for Early Childhood Education, and Global/international Studies for Early Childhood Education. Requires ten (10) hours of clinical and field-based experiences.

EDCI 712 Models of Curriculum Development in Early Childhood. (3 Hours) Emphasis is placed on trends in the various subject matter areas of early childhood curriculum. Contemporary, social issues of potential impact on the early childhood curriculum are included. Models of curriculum development, implementation, and evaluation are studied. Requires ten (10) hours of clinical and field-based experiences.

EDCI 713 Instructional Theory and Design. (3 Hours) Study of alternative models of teaching including cooperative learning, inductive thinking, concept development, cognitive growth, nondirective teaching, contingency management, inquiry training, and whole-class instruction. The student is involved in the development, execution, and evaluation of instruction. Works of theorists who have provided the impetus for the development of instructional systems are reviewed. Requires thirty (30) hours of clinical and field-based experiences.

EDCI 714 Organization and Administration of Early Childhood Education Programs. (3 Hours) This course is designed mainly for directors, administrators, and supervisors of programs for young children (nursery-kindergarten through grades 3). Requires ten (10) hours of clinical and field-based experiences.

EDCI 715 Seminar II. Urban Studies in Early Childhood Education. (3 Hours) Survey of research comparison and evaluation of programs, design and development of projects in current issues through individual study. Intensive examination of a particular area of urban/global studies in early childhood education. In-depth study of research problem in education. Student must be able to demonstrate critical and analytical skills in dealing with a problem in early childhood education. Introductory examination of

issues, trends, topics and activities in urban/global studies in early childhood. Requires ten (10) hours of clinical and field-based experiences.

EDCI 716 Learning Theories and Styles in Early Childhood Education. (3 Hours) Study of contemporary, learning theories and individual learning styles in the context of early childhood curriculum, planning and implementation. Requires ten (10) hours of clinical and field-based experiences.

EDCI 717 Psychology of Young Children in Urban Environment. (3 Hours) Designed to prepare graduate students to teach young children who come from urban and/or culturally different backgrounds. Through use of multimedia source materials, students gain knowledge of background and culture of culturally different learner, determine role of teacher, explore techniques of discipline and classroom management, Survey motivational and instructional techniques and examine, prepare and adapt a variety of instructional materials for individual, small group and large group instruction. Requires ten (10) hours of clinical and field-based experiences.

EDCI 718 Seminar III: Urban Studies in Early Childhood Education. (3 Hours) Opportunity for students to investigate problems and issues related to Early Childhood Education and to develop ability to clarify research problems, review and analyze secondary data. Students select an interest area and complete activities that culminate in a major paper as foundation for their dissertation. (Prerequisite: Admission into the 1994 ECED Pilot Project) Requires ten (10) hours of clinical and field-based experiences.

EDCI 720 Research Applications in (Science, Mathematics, or Special Education) for Early Childhood Education. (3 Hours) In-depth, advanced study of the application of theoretical knowledge and principles in science, mathematics, or special education to the development of a theoretical framework, problem identification, data collection/analysis procedures in early childhood education.

EDCI 788 Teaching Education Programs and Technology. (3 Hours) Current development in college programs for the preparation of teachers for elementary and secondary school; analysis of technological development in teacher education-simulation situations, video tapes and film feedback, models of teaching, interaction analysis and microteaching systems in teacher education. Requires ten (10) hours of clinical and field-based experiences.

EDCI 798 Internship and Field Studies Doctoral. (5 Hours) Prerequisites: Permission of advisor and director of field experience. Intensive job-related experience pertinent to students' needs. Student must be able to demonstrate skills and leadership abilities in an on-the-job situation. A topic of current interest and need will be emphasized. The student will develop extended competence with contemporary measurement and evaluation techniques which will be generated into a research study. Requires a minimum of three hundred sixty (360) hours of clinical and field-based experiences.

EDCI 799. Doctoral Dissertation. (Variable Credit)

Reading

RE 501 Basic Speed Reading. (1 Hour). An individualized course designed for students who desired to increase their speed of reading.

RE 502 Workshop: Current Problems and Issues in Reading Instruction. (3 Hours). Designed to

meet the needs of teachers, students, administrators, and community leaders who have special interests in selected areas of reading. Content developed around need of specific groups.

RE 503 Theory and Research in Reading Instruction (3 hours) Designed for candidates to identify controversies in the field of reading and become knowledgeable of research literature and theoretical bases for the issues.

RE 504 Pre-Reading Skills for Preschoolers and Early Primary Grades. (3 Hours) Students will participate in situations involving reading readiness skills, oral language, concept development, early experiences with children's literature-creative storytelling and the study of management systems.

RE 505 Problems of Reading Instruction in the Multi-Cultural Classroom. (3 Hours) A thorough investigation of the techniques, materials, and approaches for teaching culturally different students in a multi-cultural environment.

RE 507 Basic Skills in Reading. (3 Hours) Designed as an in-depth study of the major reading skills. It focuses on the techniques and activities essential in the teaching of these skills.

RE 509 Introduction to Reading. (3 Hours) This course is designed to introduce factors related to word attack, word recognition, vocabulary development, comprehension skill, study skills and reading speed. Emphasis is placed on terminology that is basic to the understanding of the reading process.

RE 510 Teaching Reading to Content Areas. (3 Hours) A thorough study of techniques for promoting reading growth through teaching content materials.

RE 511 The Reading and Writing Connection. (3 Hours) A study of the principles, strategies and current literature that demonstrates the interrelatedness of reading and writing in all content areas and throughout the learner's development. Students will enhance their knowledge of the relationship between reading and writing through practicum experiences.

RE 512 Using Literature to Teach Reading Skills. (3 Hours) A thorough study of integrating the teaching of reading skills through literary selections. Special emphasis will be placed on vocabulary and comprehension skills and concepts that are applicable to the teaching and learning of literary content.

RE 550 Psychology of Reading Instruction. (3 Hours) A thorough study of psychological principles underlying the teaching of reading.

RE 551 Methods and Materials for Primary Reading Instruction. (3 Hours) An in-depth study of materials and techniques for the teaching of reading at the primary level.

RE 552 Methods and Materials for Teaching Elementary Reading. (3 Hours) A study of the methods, materials, media, and current approaches for elementary reading instruction.

RE 553 Phonics for the Reading Teacher. (3 Hours) A thorough study of phonics knowledge needed by teachers for the effective teaching of word perception.

RE 554 Teaching Reading to the Gifted. (3 Hours) The identification of the gifted and creative. Techniques and materials for meeting the needs of these learners will be emphasized. (F, Sum)

RE 555 Methods and Materials for Secondary Reading Instruction. (3 Hours) A study of goals, materials, media techniques, and approaches for secondary reading instruction.

RE 556 Supervised Practicum In Reading I. (3 Hours) Procedures for diagnosing and correcting learning problems in reading.

RE 557 Supervised Practicum in Reading II(3 Hours) Provides students the opportunity to apply their knowledge of the reading process by designing and implementing appropriate instructional plans to correct reading difficulties of diverse learners.

RE 558 Teaching Reading in an Integrated Language Arts Program. (3 Hours) A thorough study of materials and techniques for teaching in an integrated manner.

RE 587 Action Research in Literacy Instruction. (3 Hours) This course provides for intensive analysis of research in the area of reading as relates to theories, practices, and special topics in teaching and learning.

RE 588 Technology and Literacy Instruction(3 hours) An in-depth study of current and emergent technologies in reading instruction and issues related to literacy and technology instruction across the curriculum.

RE 590 Thesis. (3-6 Hours) Prerequisite: Completion of required courses. Research to be completed under the direction of major professor.

RE 591 Internships: Observation and Supervised Field Work in Reading. (2-9 Hours) Designed for students who have not taken EDCI 401S, Practicum: Principles and Problems of Teaching in the Secondary or Elementary Schools; EDCI 401E, Practicum: Principles and Problems of Teaching in Secondary or Elementary Schools; EDCI 401EC, Practicum: Supervised teaching experience in an off-campus elementary or secondary school setting.

RE 600 Diagnosis and Correction of Reading Difficulties I. (3 Hours) Theory, demonstration, and practice in group diagnosis, and procedures for interpreting results.

RE 601 Diagnosis and Correction of Reading Difficulties II. (3 Hours) Prerequisite: RE 600. Actual experience in diagnosing reading difficulties, prescribing remedial procedures, and carrying through with prescription.

RE 602 Teaching Reading to Disadvantaged Youth. (3 Hours) A thorough study of characteristics of disadvantaged youth, and techniques for meeting their reading needs.

RE 603 Advanced Research in Reading. (3 Hours) Prerequisites: RE 600, 601. The actual conducting of research and presentation of findings.

RE 606 Administration and Supervision of Reading Programs. (3 Hours) A thorough study of components of a balanced reading program, how to organize these components, and techniques of supervision.

RE 607 Instructional Strategies for Teaching Children with Specific Exceptionalities. (3 Hours) Designed as an overview of the exceptionalities children display. It is intended to address the procedures and techniques to be used in teaching reading to children who display these exceptionalities as they are mainstreamed in the regular classroom.

RE 608 Curriculum Design and Instructional Planning in Reading. (3 Hours) A study of theory, methods, and approaches to curriculum planning and improvement in providing for individual needs of learners. (S, Sum)

RE 690 Advanced Thesis Writing. (3-6 Hours)

DEPARTMENT OF HEALTH, PHYSICAL EDUCATION AND RECREATION

Dr. Tamika Bradley, Assistant Professor and
Interim Chair

P. O. Box 18840

Telephone: (601) 979-2373

Fax: (601) 979-2766

E-mail: tamika.r.bradley@jsums.edu

Faculty

Dr. H. Williams, Associate Professor

Dr. A. Simmons, Associate Professor

Dr. A. Simon, Professor

The Department of Physical Education offers the
Master of Science in Education and Master of Science
in Sport Science.

Master of Science in Education Physical Education

Accreditation

The graduate program, accredited by the National
Council for Accreditation of Teacher Education, is
designed for students who have demonstrated the
capacity to do scholarly graduate work and the
willingness to devote the time and effort necessary to
succeed in the program.

Program Objectives

The program provides students with specialization or
diversification in the areas of health, physical
education, dance, physiology of exercise, athletic
administration, adapted physical education, and
administration of physical education in secondary
schools, community colleges, and other agencies such
as boys and girls clubs, Y.M.C.A.'s and Y.W.C.A.'s.

Admission Requirements

Applicants must be admitted to the Division of
Graduate Studies and the Department of Health,
Physical Education and Recreation (HPER). The
HPER Department has the following admission
requirements in addition to the Division of Graduate
Studies requirements.

1. A minimum cumulative G.P.A. of 3.00 for
regular admission and 2.50 for conditional
admission, at the undergraduate level.
2. An applicant must hold a bachelor's degree from
an accredited college or university.
3. A completed program application.
4. Interview and writing sample.
5. Three letters of recommendation sent directly to
the department.
6. A portfolio documenting compensating strengths
such as teaching, professional presentations,
community service, professional memberships
and/or coaching.

Degree Requirements

To qualify for the master's degree the student must
complete 36 semester hours of graduate work.

Course	Title	Semester Hours
EDFL 514	Elementary Statistics	3
EDFL 515	Methods of Educational Research	3
EDFL 568	Curriculum Methods	3
PE 522	Motor Learning and Human Performance	3
PE 540	Organization and Administration of Physical Education in Two and Four Year Colleges	3
PE 550	Research in Physical Education	3
PE 552	Biomechanics	3
PE 553	Advanced Exercise Physiology	3
	<i>Hours</i>	24

Electives

Other coursework is selected in consultation
with an academic advisor to complete specific
areas of concentration.

Total Hours 12

36

Master of Science Sport Science

Accreditation

The Sport Science curriculum design is strictly set to
meet National Accrediting and Recognition bodies
within the areas of Sport Management (North
American Society for Sport Management/NASSM)
and Strength and Conditioning (National Strength and
Conditioning Association/NSCA).

Program Objectives

The Sport Science program provides a variety of
interrelated reasons behind the accelerated and
sustained growth in the sport science professional
preparation program:

- an effort to meet a real, recognizable need for
professionally trained administrators in the broad
area of sport;
- a natural outgrowth of the study of sport,
combined with the view that physical education
is a broad-based academic discipline;
- fewer students seeking to become physical
education teachers, an overabundance of would-
be physical education teachers already seeking
jobs, the reduction in requirements for daily
physical education in many school systems;
- a conscious effort by professionals within higher
education to save jobs of physical education
professors (as fewer students pursue traditional
physical education as a major), by providing an
alternative academic career path; and
- emerging areas of local community, state,
regional, national and International arenas
jumping on the "sport science bandwagon" once
they realized that such programs benefit from
these highly trained individuals.

Existing programs at Jackson State University will
benefit due to the added graduate emphasis areas that
make undergraduate degrees more marketable or
attractive to potential employers. Therefore, retention
of JSU's undergraduates benefits both existing
programs as well as the new Sport Science Program.

The phenomenal growth associated with sport science
has not been without controversies, challenges, and

problems. The purpose of programs remains essentially the same: to prepare future sport professionals, other than teachers and coaches, for careers in the world of sport. An estimate was made in 2001 that there existed approximately 8 million sports jobs at all levels in the United States. These were in marketing, entrepreneurship, administration, representation, and other sports-related areas. Although there is seemingly a wealth of job opportunities in sport, the competition for these positions has been and will remain severe. Other potential career paths in sport science include athletic team management, finance, sports medicine/athletic training, journalism, broadcasting, public relations, development and fund raising, sports information, facility management, cardiovascular fitness and wellness administration, aquatics management, among others.

Sport is big business today and will remain so in the future. In fact, sports revenues are exceeding the \$100 billion mark in the United States. As a result, there is an ever increasing need for professionals trained in the managerial, administrative, and business aspects of sport science.

Admissions Requirements

Applicants for the master's degree must hold an undergraduate degree from a regionally accredited college or university. Applicants must submit an official copy of the Graduate Record Examination Score taken within the last 5 years.

Degree Requirements

To qualify for the master's degree the student must complete 36 semester hours of graduate work for the Sport Management emphasis and 37 semester hours for the Strength & Conditioning emphasis.

DESCRIPTION OF COURSES

Health

HE 500 Drug Abuse Education. (3 Hours) A comprehensive study of the history of drug and alcohol abuse, drug addiction and drug therapy. The course covers the economic and social impact of drug abuse on the country and the world. Consultants from various fields such as medicine, law enforcement, social agencies and education are utilized in an attempt to relate to participants all facets of the drug problem including possible solutions. The course is open primarily to graduate students, in-service teachers, counselors, guidance directors, and school and other institutional administrators.

HE 501 Foundations of Health Education (3 Hours)

This course is designed to be used as an introduction to students in health education. This course outlines the historical development of health education as a profession and examines critical issues facing health educators today. The philosophy of health education and health promotion serve as a common cornerstone to subsequent coursework. Competencies of health educators will be examined. This course explores the foundation of health education in school, community, clinic and worksite settings.

HE 503 Organization and Administration of School and Community Health. (3 Hours)

This course explores the school health education community health programs with emphasis on organization and administration of school, public health, voluntary, and private health programs.

HE 550 Research in Health (3 Hours) This course deals with the process of arriving at dependable solutions to problems through the planned and systematic collection, analysis and interpretation of data related to the field of health. Students will also study the scholarly application of the scientific method to the solving of health problems.

HE 600 Public and Community Health (3 Hours)

This course is designed to communicate an understanding in the area of public and community health. It traces the beginning of public health and community health and studies the relationship between public and community health.

Physical Education

PE 505 Practicum in Lifetime Sport. (3 Hours) Designed to study lifetime sports such as tennis, archery, golf, swimming, badminton, and many others in which one may participate throughout life.

PE 509 Principles and Problems of Coaching. (3 Hours)

This course is designed to deal with the recognition, discussion, and systematic analysis of controversial issues and problems in coaching and athletics. Topics studied are: psychological-sociological implications of athletics, crowd control, profiles of coaches, women and athletics, financial crisis in athletics, personality traits and anatomical structure of athletes, interscholastic athletic competition below high school level, recruitment of minority athletes and financial aid.

PE 510 Theory and Practice of Coaching Basketball. (2 Hours) Designed to give the student experiences in dealing with the basketball program from a scientific standpoint. The student will be exposed to experiences relative to the application of mechanical, physiological, and kinesiological laws to the basketball program. The student will explore the psychology of coaching as well as review some of the problems that are specifically related to the basketball program such as recruiting, theories of the game, organizing practice, sideline coaching, and the rules and regulations of various governing bodies.

PE 511 Theory and Practice of Coaching Football. (2 Hours) Designed to give the student experiences in dealing with the football program from a scientific standpoint. The student will be exposed to experiences relative to the application of mechanical, physiological, and kinesiological laws to the football program. The student will explore the psychology of coaching as well as review some of the problems that are specifically related to football programs such as recruiting, theories of the game, organized practice, sideline coaching, and the rules and regulations of various governing bodies.

PE 512 Theory and Practice of Coaching Baseball. (2 Hours) Designed to give the student experiences in dealing with the baseball program from a scientific standpoint. The student will be exposed to experiences relative to the application of mechanical, physiological, and kinesiological laws to the baseball program. The student will explore the psychology of coaching as well as review some of the problems that are specifically related to the baseball program such as recruiting, theories of the game, organizing practice, sideline coaching, and the rules and regulations of various governing bodies.

PE 513 Theory and Practice of Coaching Track and Field. (2 Hours) Designed to give the student experiences in dealing with the track program from a scientific point of view. The student will be exposed to experiences relative to the application of mechanical, physiological, and kinesiological laws to the track program. The student will explore the psychology of coaching track as well as review some of the problems that are specifically related to the track program such as recruiting, organizing practice and the rules of governing bodies.

PE 540 Organization and Administration of Physical Education In Two and Four Year Colleges. (3 Hours) Study of the organizational structure of physical education in two and four year colleges. The course will cover theory, professional preparation and practices and administration. The course will show how administrative theories are developed. It will dwell on the broad process of administration that might be designed as decision making, communicating, activating, planning and evaluating.

PE 543 Organization and Administration of Sport. (3 Hours) A study of the various organizations and administration patterns of athletics in schools, colleges, universities, and professional athletics.

PE 550 Research in Physical Education. (3 Hours) Study and application of research techniques to selected problems in health, physical education, and recreation.

PE 552 Biomechanics. (3 Hours) In-depth study of the application of mechanical principles to athletic performance. The study will make application of laws

of balance, motion, force, work and energy, to track and field, baseball, football, swimming, diving, gymnastics, basketball, golf, and tennis.

PE 553 Advanced Exercise Physiology. (3 Hours) Prerequisite: Human Physiology and/or Introductory Course in Exercise Physiology. Lectures, discussions and experiments dealing with the structure, function and metabolism of skeletal and cardiac muscles. Emphasis on correlating muscle function with metabolic events. The biochemical basis of adaptation of muscle function is considered.

PE 560 Sociology of Sport. (3 Hours) The course will include the study of processes and patterns of individual and group interaction, the forms of organization of social groups the relationships among them, and group influences on individual behavior within a sport context will be discussed.

PE 587 Independent Study. (1 Hour) Implementation of individual student research project under the guidance of an advisor.

PE 589 Independent Study. (2 Hours) Opportunity for students to undertake independent study and research under the direction of a faculty member. The student will submit a written report and may be asked to stand a comprehensive examination of his work.

PE 590 Thesis Writing and Research In Physical Education. (1-6 Hours) An independent investigative work in physical education. The candidate chooses a problem, but approval by his chairman is required. Credit is granted only after thesis is completed and approved by the department.

Sport Science

SC 501 Strength & Conditioning (3 hours) This course will enable the student to develop knowledge and expertise in the areas of strength training, cardiovascular endurance, flexibility, reaction time, speed, and agility in traditional and non-traditional sports. Emphasis will be placed on implementation and measurement of the above programs in conjunction with athletic development.

SC 501L Strength & Conditioning Lab (1 hour) This lab will enable the student to develop practical knowledge and expertise in the areas of strength training, cardiovascular endurance, flexibility, reaction time, speed, and agility in traditional and non-traditional sports. Emphasis will be placed on hands-on implementation and measurement of the above areas in conjunction with athletic development.

SC 545 Sport Psychology and Sociology (3 hours) This course provides a comprehensive analysis of the field of social psychology and the theories that apply to the world of sport and physical activity. This course will focus upon and provide an overview of the major social factors and theories that affect those involved in sport. In-depth discussion of the interactions between the athlete, team, coach and spectators will occur.

SC 550 Internship (3/6 hours) The internship is the capstone experience for the Graduate Sport Science student. The internship allows the student to work and learn outside of the classroom at an approved site selected by the student. This internship is designed to be a mutually beneficial experience and provide a practical, experiential learning environment for competent, energetic students. The student is required to complete a total of 250 hours (per 3 hour credit) working at an approved internship site.

SC 600 Thesis (3/6 hrs) Students select a topic for original research; conducts and writes their research during the course of the class.

SPM 510 Sport Marketing. (3 hours) This course addresses the principles of sport marketing which include the areas of marketing, promotion, and fundraising within the context of interscholastic, intercollegiate, amateur, and professional sports. The course will include an overview of the past and present sport business industry and market; sport marketing theory and systems; the content, pricing, distribution, and promotional techniques of the sport product; media relations; endorsements and sponsorships; and licensing.

SPM 512 Facility Design and Maintenance. (3 hours) This course will provide the student with the practices and principles of planning, designing, constructing and developing sport facilities, including swimming pools, recreation centers, gymnasiums, fitness centers, golf courses, stadiums, ice skating rinks, skateboard parks, ball-fields and much more. Significant emphasis is placed upon wise land-use practices, current planning, design, construction and development techniques and standards, and, efficient, effective and practical recreation facility planning, design, construction and development.

SPM 515 Governing Bodies & The Law. (3 hours) This course is designed to provide the graduate student with information concerning the history, basic structure and governing principles of various sport agencies. The course will include, but is not limited to an examination of case law (collective bargaining, contracts, etc.), the National Collegiate Athletic Association, the National Association of Intercollegiate Athletics, and professional sports leagues in the United States and Europe.

SPM 530 Sport Finance. (3 hours) This course is an examination of the principles of economics, budgeting, and finance as it applies to the sport industry.

SPM 543 Sport Administration (3 hours) A comprehensive study of the various organizations and administrative patterns of athletics in schools, colleges, universities and other professional sport organizations. This course provides an introduction to the study of administrative considerations of various sport programs, including aims, policies, principles, staffing, scheduling, finance, facilities and equipment, maintenance, legal considerations, risk management, publicity and program evaluation within the realm of sport management and administration.

SPM 560 Ethics of Sport. (3hours) This course is designed to provide the graduate student with information concerning ethical theories and issues relating to sport and physical activity.

SPM 590 Sport Internship (3/6 hours) The internship is the capstone experience for the Graduate Sport Science student. The internship allows the student to work and learn outside of the classroom at an approved site selected by the student. This internship is designed to be a mutually beneficial experience and provide a practical, experiential learning environment for competent, energetic students. The student is required to complete a total of 250 hours (per 3 hour credit) working at an approved internship site.

SPM 600 Thesis (3/6 hours) Students select a topic for original research; conducts and writes their research during the course of the class.

Faculty

Dr. J. Franklin, Professor
Dr. A. Yeboah, Professor
Dr. D. Watkins, Assistant Professor

Mission

The Department of Social and Cultural Studies offers graduate programs leading the Master of Science Degree in Secondary Education Social Studies concentration and the Specialist in Secondary Education Social Science concentration. The Department has a mission to prepare responsive educators to work with learners of all ages and diverse cultures. The major focus of the Social Science Program is providing students the opportunity to develop knowledge, skills, attitudes, and values needed to participate in the civic life of their local communities, nation and the world. Additionally, the program prepares curriculum developers and Ethnic Study Specialists ready to work in diverse fields.

Objectives

The following objectives are offered as major aims of the programs:

1. To train prospective social studies secondary teachers.
2. To provide a liberal education, enabling students to enter many fields of work, especially in urban centers, as contributing professionals.
3. To prepare students in ethnic studies, enabling them to become curriculum and instruction specialists.
4. To prepare in-service secondary teachers for renewal of their teaching certificates.
5. To expose students throughout the University to basic social skills and concepts.
6. To develop understanding and use of the basic technological processes and resources useful in information retrieval.
7. To serve as facilitators for the total process of growing and learning.
8. To locate, interpret and apply research pertinent to social, cultural, and educational problems.
9. To investigate and analyze the dynamic relationship between schooling, education, diverse cultures and societies with interpretive, normative, critical and comparative theory and methods.
10. To derive the greatest benefit from classroom experiences as prepared prospective teachers skilled in the techniques of instruction.

Master of Science Degree in Secondary Education Social Studies Concentration

Admission Requirements

Prospective students must satisfy the requirements for admission to the Division of Graduate Studies. The

Department of Social and Cultural Studies requires the submission of a statement of purpose.

Students may apply for the Fall, Spring and Summer sessions. In order to apply for the Master's Program, students are required to have all of the following submitted according the deadlines of the Division of Graduate Studies.

1. A bachelor's degree with cumulative grade point average of at least 3.0 on a 4.0 scale. Conditional admission is available for applicants with a grade point average between 2.50 and 2.99.
2. Official Graduate Record Examination (GRE) Scores, taken within the past five years.
3. Class A teaching certificate.
4. Three letters of recommendation.
5. Statement of purpose.

Transfer of Credit

A maximum of nine (9) semester hours with a grade of "B" or above may be transferred.

Electives

Depending on degree option, (A, B, or C)	0-6
<i>Total Hours</i>	36

Option A. Thirty (30) semester hours of coursework plus a thesis. Student must enroll in EDAD 590 for six (6) semester hours, or

Option B. Thirty-three (33) semester hours of coursework plus a project. Student must enroll in EDAD 590 for three (3) semester hours, or

Option C. Thirty six (36) semester hours of coursework selected in consultation with the student's advisor.

Examination

A comprehensive examination is required of all master's degree candidates.

Specialist Degree in Education Social Science Concentration

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee
- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admission is January 15th

Three years of successful, full-time teaching.

State Department Certification Requirements

Class AAA Secondary Teacher's Certificates

1. Hold a Class AA teaching certificate in the area(s) of desired endorsement.
2. Hold a Specialist degree to include a minimum of 9 semester hours of graduate credit in the area(s) of endorsement; or, 45 semester hours of graduate credit since the Class AA Certificate was issued with a minimum of 21 semester hours in area(s) of desired endorsement with an overall "B" average in all graduate work.
3. Three years of teaching experience in area(s) of desired endorsement.

DESCRIPTION OF COURSES

SS 500 Philosophy of Social Science (3 Hours) A study of the major philosophies about the teaching of social studies in the high schools, especially the purpose.

SS 586 Special Projects: Planning the Curriculum for Secondary Schools (3 Hours) This course is designed primarily for in-service personnel in education desiring enrichment activities in Secondary Education. Students taking this course will be engaged in activities directed toward planning, developing, and evaluating curricular materials that may be used for teaching K-12 grades.

SS 587 Independent Study (3 Hours) This course is one which enables graduate students to develop and carry a research project on their own under the supervision of one of the graduate faculty members in the department.

SS 590 Social Science Seminar (3 Hours) This seminar is an interdisciplinary forum in the social sciences that brings together students who have cooperatively studied a social problem or issue from different perspectives.

SS 591 Models of Teaching (3 Hours) Exploration of problems and procedures important to student teaching and directed teaching itself in social studies.

SS 595W The New Social Studies Workshop (3 Hours) The workshop is multifaceted, providing an intensive survey of new projects, techniques and topics in the Social Studies, especially as they relate to teaching on the secondary level.

SS 601 Training, Supervising, and Evaluating Social Studies Teachers (3 Hours) Discussion of the content and procedures for the training of prospective teachers, the supervising of student teachers and the evaluation of in-service teachers in social studies.

SS 602 Selecting and Evaluating Reading, Audio, Visual, and Graphic Social Studies Material. (3 Hours)

SS 603 Black Studies Curriculum Development and Evaluation. (3 Hours) An examination of the structure, content and problems of current black studies program; and discussion of the objectives, procedures, and content essential to successful Black Studies programs.

DEPARTMENT OF SPECIAL EDUCATION

Dr. Ruby L. Wiggins, Associate Professor and Chair
P. O. Box 17870
Telephone: (601) 979-2370
E-mail: ruby.l.wiggins@jsums.edu

Faculty

Dr. R. Gentry, Professor
Dr. G. Johnson, Associate Professor
Dr. T. Knight-Lackey, Associate Professor
Dr. R. Wiggins, Associate Professor
Dr. G. Windfield, Assistant Professor

Mission

The Department of Special Education is located in the School of Instructional Leadership and the College of Education and Human Development. The Department of Special Education offers the Master of Science in Education Degree (M.S.Ed.) and a Specialist in Education Degree (Ed.S.) with a concentration in Mild/Moderate Disabilities at both levels. These programs are designed to prepare personnel to work with individuals identified as having exceptionalities, and professionals in school settings and other service provider agencies. Typically, graduates of these programs select careers as special education teachers, administrators, and other exceptional education service providers.

Accreditation

The Special Education Master's and Specialist's Programs at Jackson State University are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Southern Association of Colleges and Schools (SACS). Additionally, the program's standards are in compliance with the Council for Exceptional Children (CEC).

Department of Special Education Goals and Objectives

The mission of the Department of Special Education supports the broad mission of the University. The University's mission involves utilization of its human, cultural and physical resources to enhance the surrounding metropolitan community and urban areas of the state of Mississippi, the nation and the world. The Department of Special Education (DSE) seeks to encourage and facilitate the efforts of candidates to acquire knowledge, skills, understandings, appreciations and attitudes necessary for effective interaction and instruction of individuals with disabilities. The instructional curriculum and learning experiences provide opportunities for candidates to develop competencies and attitudes that promote and actualize excellence in teaching and outcomes.

The objectives of the Department of Special Education are:

1. To prepare personnel for staffing special education positions in schools and other related human resource agencies.
2. To offer candidates a comprehensive curriculum that incorporates a variety of experiences including: campus-based experiences (i.e. microteaching clinics, case studies, computer-

- assisted instruction) as well as field-based experiences (i.e. internships and tutoring).
- To facilitate candidates' professional development by broadening the knowledge base as set forth in the curriculum by attending conferences, workshops, seminars and participating in collaborative activities with other community agencies (e.g. public schools, human resource agencies, and so forth).
 - To enhance candidates' ability to work with culturally, linguistically, and exceptionally distinctive populations through selected research, teaching, and field-based experiences.
 - To accommodate candidates from various ethnic backgrounds and exceptionalities through an open, multicultural approach to special education personnel preparation.

Master's Program

Admission Requirements

Applicants for the master's degree must hold an undergraduate degree from a regionally accredited college or university, and must be admitted to Jackson State University's Division of Graduate Studies. A copy of the Graduate catalog can be acquired from the Division of Graduate Studies and online at:

<http://www.jsu.edu/~gadmappl/Catalog/Gradcatalog.html>.

Additional DSE requirements for **full** admission to the program include:

- Submission of an application packet which includes letters of recommendation from former collegiate faculty who taught the applicant, a current or former supervisor/administrator, and/or co-worker.
- Submission of a recent official transcript.
- A GPA of 3.00*.
- Successful completion of an oral interview with graduate faculty.
- Submission of an entry professional portfolio.

*Conditional admission would include the aforementioned but a GPA of 2.50 will be required. A checklist to assist you in this process will be provided.

Admissions Status

Candidates can be admitted as follows:

- Applicants successfully meeting the admissions criteria with an undergraduate cumulative grade-point average (GPA) of 3.00 or higher on a 4.00 scale may be admitted with a status determination of Full/Good Standing.
- Applicants successfully meeting the admissions criteria with an undergraduate cumulative grade-point average (GPA) of 2.50 to 2.99 may be admitted with a status of Provisional/ Conditional Standing. Applicants are required to submit GRE scores on or before the end of the second semester of provisional admittance or risk Program Dismissal.
- Applicants not meeting the admissions criteria will not be admitted.

Admission Requirements

All applicants for a Master of Education (M.Ed.) degree program in Special Education must first be

admitted to the University by the Division of Graduate Studies. Applicants must:

- Secure an admission packet from the Division of Graduate Studies.
- Submit two official copies of transcripts from all colleges and universities attended.

Departmental Requirements

The DSE of Special Education will review the transmittal packet from the Graduate School. Proof of the following additional information must be submitted to the DSE concurrent with the Graduate School application:

Admissions Criteria

- A letter of application to the M.Ed. Special Education Teaching Program faculty that includes an acceptable personal statement of goals for professional development.
- A copy of baccalaureate degree from accredited college or university.
- An "A" teaching certificate. Applicants who do not hold the appropriate credentials or who are not eligible for the appropriate certification must complete the prerequisite teacher certification requirements before continuance of application consideration.
- Three (3) letters of recommendation written by those familiar with applicant's academic achievement and potential.
- Verbal and Quantitative Scores earned on the Graduate Record Examination (GRE) (Scores earned within two (2) years of the application are acceptable)
- All required immunizations, specifically, candidate has had two (2) MMRs (Mumps, Measles, Rubella) in his or her lifetime and a Tetanus/Diphtheria immunization within the past two years. For more information, contact Student Health Services at (601) 979-2260.
- Satisfactory completion of an interview with DSE faculty. Interviews will be held for Fall admission during Spring Semester and Spring semester interviews will be held during Fall Semesters.
- An acceptable "in-house" writing sample that provides evidence of acquired writing competencies.

Course Requirements

The curriculum course offerings in the current catalog are being revised to meet the new standards required by our accrediting agencies.

Specialist Degree in Education Special Education

Students applying for admission to the Specialist program must obtain general admission to the Division of Graduate Studies; however, this does not guarantee admission to the College of Education Specialist program in the specific area of concentration. Students must also complete an application to the specific department.

Admission Requirements

- A master's degree from an accredited college or university
- An overall GPA of 3.0 or above (on a 4.0 scale) on the master's degree
- A completed Specialist program application
- Three letters of recommendation
- Acceptable evidence of the applicant's writing ability as determined by a writing sample completed under the supervision of the screening committee
- A successful interview with the program screening committee
- A recommendation for admission by the screening committee

- A satisfactory GRE score
- Student must hold a valid teaching license
- Deadline for applications for summer/fall admission is January 15th

The Special Education Specialist Program is a 36 semester hour program which includes the development of a thesis or project. All candidates for this degree must have an AA certificate from an accredited institution of higher learning. Approval for a thesis or a project must be granted by a Department Thesis Advisor or a Project Advisor. The Specialist Program is accredited by the National Council for Accreditation of Teacher Education (NCATE). This degree program qualifies a graduate to receive Mississippi AAA Certification (Graduates are capable of leadership roles in school and non-school settings for exceptional learners K-12).

Course Requirements

The curriculum course offerings in the current catalog are being revised to meet the new standards required by our accrediting agencies. This new curriculum will be effective by Fall 2006.

DESCRIPTION OF COURSES

SPED 500 Survey of Exceptional Children and Youth. (3 Hours) A study of definitions, characteristics, educational programs and problems of exceptional individuals. (Prerequisite: SPED 503)

SPED 503 Teaching the Severely and Profoundly Handicapped. (3 Hours) Provides students with the skills and understanding needed to teach severely/profoundly handicapped students; program needs, services, and an overview of the role of S/P handicapped persons within society are studied. (Prerequisite: SPED 500)

SPED 504 Administrative and Organizational Procedures for Special Education. (3 Hours) A study of administrative and organizational structures, programmatic procedures, policies, resources, and guidelines essential to the delivery of educational services for exceptional learners. (Prerequisites: SPED 500, 530, 532, 550, 599, 528, 507, and 586.)

SPED 507 Advanced Methods in Behavioral Management. (3 Hours) Emphasis will be placed on current techniques, educational strategies and tools that will aid the teacher in understanding and handling behavior problems in the classroom. (Prerequisites: SPED 500, 530, 532, 550, 599, and 528)

SPED 508 Educational Management of Students with Visual and Multiple Disabilities (3) Emphasis will be placed upon techniques, educational strategies, and tools that will aid the teacher in (1) understanding and addressing behavior and related problems of students with visual and multiple disabilities and (2) understanding issues related to the influences of additional disabilities on students who are visually impaired. (Prerequisites: SPED 543, 540, 542, 540, 541)

SPED 516 Career Education for Exceptional Children. (3 Hours) Dissemination of information about daily living skills, personal social skills, and occupational guidance and preparation in the career development of exceptional individuals.

SPED 520 Assistive Technology For Individuals With Disabilities. (3 Hours). A survey of assistive technology/devices, legislation and issues related to assistive technology. Hands-on demonstration experiences of technology and software that facilitate new ways of teaching individuals with disabilities is provided. (Prerequisite: SPED 500)

SPED 528 Advanced Educational Assessment and Prescriptive Planning In Special Education. (3 Hours) Prerequisite: SPED 311/500. Special diagnostic procedures with exceptional learners with implications for prescriptive planning. (Prerequisites: SPED 500, 530, 532, 550, and 599)

SPED 529 Assessment Procedures for Visually Impaired and Multi-Disabilities (3) Introduction to the concepts, issues, instruments and procedures involved in assessment of visually impaired children and adolescents. (Prerequisites: SPED 543, 540, 542)

SPED 530 Education and Psychology of the Mentally Retarded. (3 Hours) Deals with the medical and behavioral classifications, characteristics, interaction of biological, emotional and social factors, educational philosophy, objectives and programs for the mentally retarded. (Prerequisite: SPED 500)

SPED 532 Education and Psychology of the Learning Disabled. (3 Hours) Survey of the historical development of learning disabilities, problems of

definition and classification, screening and diagnosis, and instructional systems. (Prerequisites: SPED 500 and 530)

SPED 540 Introduction to Visually Impaired (3) An introductory course providing a comprehensive, life-span overview of the field of visual impairments. Examines the legal, demographic, historical, and psychosocial perspectives, as well as the various services and programs available. Through demonstration, simulation, and practical experiences, students will be exposed to a variety of adaptive skills, techniques, and devices used by persons with visual impairments. (Prerequisites: SPED 500)

SPED 541 Methods and Materials in Teaching the Visually Impaired (3) The students will design appropriate educational environments, plan instructional programs for low vision students, which will include: functional vision assessment, Braille literacy, learning media assessments, instructional strategies for activities of daily living, concept development, social skills, and subject content. (Prerequisites: SPED 543, 540, 542, 529)

SPED 542 Medical and Educational Implications of the Structure and Function of the Eye (3) This course provides an overview of normal and abnormal development of the human eye. Included are topics of ocular anatomy and physiology; pathological conditions affecting the human eye, and clinical and functional vision assessments. A strong component of low vision is provided within this course, which includes functional vision assessments, environmental vision assessments, optics, the use of optical devices, and the principles of optimizing visual efficiency. (Prerequisites: SPED 543, 540)

SPED 543 Introduction to Braille and Other Technology (3) Emphasis will be placed on technologies, educational strategies, and tools that will aid the teaching in (1) understanding and addressing behavior and related problems of students with visual and multiple disabilities and (2) understanding issues related the influence of additional disabilities of students who are visually impaired. (Prerequisites: SPED 500)

SPED 544 Introduction to Orientation and Mobility (3) This course is designed to give practical applications of orientation and mobility techniques to be used by teachers of students that are blind and visually impaired. This class will offer instruction and experiences through supervised blindfold activities in indoor and commercial environments; includes special travel situations, shopping malls, and in store travel. (Prerequisites: SPED 543, 540, 542, 529, 541, 508)

SPED 550 Education and Psychology of Children with Behavioral Disorders. (3 Hours) Characteristics, causes and problems of emotional disturbance in children and youth; diagnosis, and placement and in-depth study of educational programs. (Prerequisites: SPED 500, 530, and 532)

SPED 552 Personality Development of Exceptional Children. (3 Hours) Is designed to enhance knowledge related to personality development of exceptional children various theories of personality problems related to personality.

SPED 569 Strategies For Managing Violent and Aggressive Behaviors. (3 Hours). Emphasizes prevention and crisis management models, verbal intervention and personal safety skills applicable with verbal aggressive and physically violent behavior. (Prerequisites: SPED 550, 530, and 532).

SPED 570 Education and Psychology of the Gifted and Talented. (3 Hours) Characteristics of youth with potential superior performance in areas of academics, creativity, and talent. Emphasis on recent trends of school, home and community planning and on the culturally diverse gifted. (Prerequisites: SPED 500)

SPED 571 Methods and Materials in Teaching the Gifted and Talented. (3 Hours) Emphasis is given to innovative techniques and models appropriate for teaching the gifted and talented. Curricular development for the culturally diverse gifted receive special treatment. (Prerequisite: SPED 500)

SPED 572 Learning Theories for Special Educators. (3 Hours) This course is designed to provide students with basic understanding of selected theories of learning and to enable an analysis of curriculum strategies and materials to facilitate learning. (Prerequisite: SPED 500)

SPED 579 Research and Independent Study. (1-3 Hours) Prerequisite: Adviser permission. Implementation of individual student research project under guidance of an adviser. (Prerequisites: Must have advisor approval.)

SPED 586 Practicum in Special Education. (3 Hours) Supervised practicum; application of methods and techniques appropriate to various exceptionalities. SPED 587 Practicum: Mildly Moderately Handicapped, SPED 588: Practicum: Visually Handicapped, SPED 589 Practicum: Behavior Disorders, Practicum: Gifted and Talented. (Prerequisites: SPED 500, 530, 532, 550, 599, 528, and 507)

SPED 599 Seminar in Special Education. (3 Hours) Currents problems, issues, and trends in the field of special education. (Assignments are made according to area(s) of specialization - SPED 521 Seminar: Mildly/Moderately Handicapped, SPED 523 Seminar: Visually Impaired, SPED 524 Seminar: Behavior Disorders, SPED 526 Seminar: Gifted and Talented. (Prerequisites: SPED 500, 530, 532, and 550)

SPED 600 Guidance for Exceptional Children and Youth. (3 Hours) Study of the problems of personal, social, educational, and vocational adjustment of exceptional children and youth.

SPED 601 Behavior Management Approaches with Exceptional Children and Youth. (3 Hours) Classroom application of strategies for managing behavioral problems in the school, emphasis on research in classroom behavior modification. (Prerequisites: SPED 600, 607, 605, 699, and 606)

SPED 602 Cognitive Processes and Exceptional Children. (3 Hours) Study of cognitive development of exceptional children with emphasis on the impact of exceptionality on cognition.

SPED 603 Psychoeducational Evaluation of Exceptional Children. (3 Hours) Procedures in assessing exceptional children and youth with special attention given to interpretation and application of diagnostic instruments for the purpose of planning prescriptive programs.

SPED 604 Administration and Supervision in Special Education. (3 Hours) Analysis of organizational and administrative principles and practices for diverse programs in special education. (Prerequisites: SPED 600, 607, 605, 686, and 679)

SPED 605 Psychological Aspects of Exceptionality. (3 Hours) Intensive study of research findings relevant to differences in exceptional children; the

psychological, social, and vocational aspects of successful adjustment will be stressed.

SPED 606 Consulting/Itinerant, and Resource Teaching In Special Education. (3 Hours) Role responsibilities, and problems of consulting, itinerant, and resource teachers in special education. (Prerequisites: SPED 600, 607, 605, 699)

SPED 607 Research in Exceptional Child Education (3 Hours) Study, analysis, and evaluation of selected research and other literature reflecting various areas of exceptionality. (Prerequisite: SPED 605)

SPED 679 Individual Research. (1-3 Hours) Special attention given to design, application, and evaluation of student research projects (to be conducted under the supervision of an adviser). (Prerequisites: Permission of Advisor, Pass English Competency, Pass Area Comprehensive Examination; SPED 600, 607, 605, and 686)

SPED 686 Practicum in Special Education. (3-6 Hours) Supervised practicum; application of methods and techniques appropriate to various exceptionalities. (Assignments are made according to area (s) of specialization SPED 670 Practicum: Mildly/Moderately Handicapped, SPED 671 Practicum: Visually Handicapped, SPED 672 Practicum SPED 674 Practicum: Gifted and Talented. (Prerequisite: SPED 605).

SPED 699 Seminar in Special Education. (3 Hours) Intensive study and analysis of contemporary issues and trends in the area of special education with implications for curriculum planning and teaching methodology. (Assignments are made according to area (s) of specialization SPED 608 Seminar: Mildly Moderately Handicapped, SPED 609 Visually Handicapped, SPED 610 Seminar, SPED 612 Seminar: Gifted and Talented. (Prerequisite: SPED 600, 607, and 605)

SPED 701 Assessment of Special Populations. (3 Hours) Interpretation of test data to be used in remedial planning for individuals in special education programs.

SPED 706 Medical Aspects of Developmental Disabilities. (3 Hours) A study of definitions, classifications, characteristics, evaluations, diagnosis, and treatments of medical conditions of individuals with exceptionalities.

COLLEGE OF LIBERAL ARTS

Dr. Dollye M. E. Robinson, Dean

Dr. Thomas C. Calhoun, Interim Associate Dean

Dollye M. E. Robinson Building

Box 18019

Telephone: (601) 979-7036

School of Communications

- ◆ English and Modern Foreign Languages
- ◆ Mass Communications

School of Fine and Performing Arts

- ◆ Music

School of Social and Behavioral Sciences

- ◆ Criminal Justice and Sociology
- ◆ History and Philosophy
- ◆ Political Science
- ◆ Psychology

The principal objective of the College is to provide diverse opportunities for meaningful and quality liberal education. The College serves both graduate and undergraduate students. It offers a wide variety of majors in the academic disciplines, core courses, as well as balanced programs of study in related disciplines. The College of Liberal Arts prepares students for many kinds of professions and graduate studies; it cooperates with the College of Education and Human Development in offering joint professional and pre-professional studies for teaching majors.

While the long-range goal is that of producing a well-rounded individual--intellectually, spiritually, physically, emotionally, and aesthetically, the College seeks to accomplish this primarily by placing emphasis on intellectual achievement. Regardless of their professional interest, students are expected to become fluent in their own language, literate in at least one foreign language, and to give attention to the physical and life sciences, computer technology, and the fine arts.

It is hoped that such liberal studies will enlarge and augment the student's particular concern in order to produce the resourceful and thinking graduate who has an understanding of self, the past, and the present and who is prepared intellectually and morally for the task of shaping the future.

The College of Liberal Arts offers the following graduate degrees: Doctor of Philosophy in Clinical Psychology; the Master of Arts in Criminology and Justice Services, English, History, Political Science and Sociology; the Master of Arts in Teaching English; the Master of Music Education; the Master of Science in Mass Communications; and the Master of Science in Education with concentrations in several modern foreign languages.

SCHOOL OF COMMUNICATIONS

Departments

- ◆ English and Modern Foreign Languages
- ◆ Mass Communications

The School of Communications is comprised of the Department English and Modern Foreign Languages, the Department of Mass Communications, and the Department of Speech Communication and Theatre. The Department of Mass Communications is fully accredited by the Accrediting Council for Education in Journalism and Mass Communications (ACEJMC).

The Department of English and Modern Foreign Languages has offices on the fourth floor of the Dollye M. E. Robinson Building. It utilizes classrooms in several locations across the campus, including language lab facilities in the Blackburn Language Arts Building.

The Department of Mass Communications is located in the JSU e-center. In addition to faculty and staff offices, the facility includes writing and telecommunications labs and studios. The University also operates a low-power television station, a radio station, and a campus newspaper and several other publications. The faculty includes practicing journalists and features a strong orientation toward media research.

The School of Communications offers several programs of graduate study designed to complement the mission of the College of Liberal Arts and the University. The Department of English and Modern Foreign Languages offers the Master of Arts in English, also available with a concentration in Linguistics; the Master of Arts in Teaching in English; and the Master of Science in Education: Secondary Education, available with concentrations in French, German, or Spanish. The Department of Mass Communications offers the Master of Science in Mass Communications, available with a special concentration in Urban Communications.

DEPARTMENT of ENGLISH and MODERN FOREIGN LANGUAGES

Faculty

Dr. H. Chukwuma, Professor

Dr. P. Daniels, Professor

Dr. D. Ginn, Associate Professor

Dr. M. L. A. Harvey, Professor

Dr. W. Macon-Morgan, Assistant Professor

Dr. P. McDaniels, Assistant Professor

Dr. S. McLeod, Assistant Professor

Dr. E. Neasman, Assistant Professor

Dr. M. O'Banner-Jackson, Assistant Professor

Dr. C. Pizzetta, Assistant Professor

Dr. R. Smith-Spears, Associate Professor

Mission

The mission of this department is consistent with that of the University. More specifically, the mission of the department is to provide a general, liberal, and professional education to students in languages, literature, grammar and usage, and composition. To this end, the department offers courses in the Core to the general student population and specialized courses to its majors.

Program Objectives

The graduate program in English is designed

- ◆ To prepare students for advanced programs of study in English and related areas.
- ◆ To prepare well-qualified teachers of English for secondary schools and community colleges.
- ◆ To provide an in-service program for teachers of English who serve in secondary schools and community colleges.
- ◆ To prepare students for careers in the mass media.
- ◆ To prepare for classroom diversity in the sociolinguistics of languages.

Admission Requirements

In accordance with the admission requirements of the Graduate School, admission to the graduate degree program in English requires the following:

1. The Graduate Application for Admission
2. Two official copies of transcripts from all colleges/universities attended
3. Three letters of recommendation sent directly to the English Department
4. A satisfactory score on the Graduate Record Examination (GRE)

5. A satisfactory score on the TOEFL (Test of English as a Foreign Language) for International applicants

Degree Requirements

The Department of English and Modern Foreign Languages offers the following degrees in English: Master of Arts in English, which is also available with a concentration in Linguistics; Master of Arts in Teaching in English; and Master of Science in Education with concentrations in French, German, or Spanish. Thirty to thirty-six semester hours are required, depending on the degree program offered.

MASTER OF ARTS IN ENGLISH

Core courses		Semester
Course	Title	Hours
ENG 501	Research and Bibliography	3
ENG 505	Critical Analysis of Literature	3
ENG 590	Thesis Writing	6
LING 501	Fundamentals of Linguistic Science	3
<i>Total Core Hours</i>		15
Electives	(500 or 600 levels)	15

NOTE: No more than six (6) hours earned outside the major field may be counted toward the degree. Students must demonstrate the ability to read a foreign language.

Non-thesis Option: Students may elect to pursue the non-thesis option, but they must declare their intent upon entering the program. Students choosing this option must satisfy the following:

1. Complete a 33-hour curriculum which must include the core courses (ENG 501, ENG 505, and LING 501) and two courses from the following list: ENG 558W, ENG 570, ENG 620, ENG 622, LING 509, LING 511, LING 512, LING 514.
2. Prepare a portfolio.
3. Present the portfolio as a part of an oral examination to be held no later than six weeks prior to the expected date of graduation.

DESCRIPTION OF COURSES

English

ENG 500 Advanced Laboratory Writing. (3 Hours)
A practical course for graduate students who wish to improve their writing and to be informed about modern grammar and usage. (Cannot be used for graduate degree credit.)

ENG 501 Research and Bibliography. (3 Hours) An intensive study of sources for research in literature and of representative problems and techniques of literary research.

ENG 503 Survey of Grammatical Principles. (3 Hours) A course for teachers of English surveying the concept of grammar and its working principles.

ENG 505 Critical Analysis of Literature. (3 Hours) A study of the literary genres in terms of their conventions, and analysis of literature using methods of explication de texte and structural analysis.

ENG 506 Seminar in English Literature. (3 Hours) A detailed study of major figures or a genre in English literature.

ENG 507 Comparative Literature. (3 Hours) Cross-cultural study of a selected period, theme or genre in world literature.

ENG 514 World and Classical Literature. (3 Hours)
Part I Undergraduate 430. This course will acquaint the students with a wide variety of genres from the classical, medieval, and renaissance periods of Western Literature.

ENG 515 World and Classical Literature. (3 Hours)
Part II Undergraduate 431. This course is a continuation of 514. Beginning with the late Renaissance, students will read a wide variety of genres from Western Literature. The course concludes with contemporary writers.

ENG 520 American Fiction before 1900. (3 Hours) A study of major writers such as Hawthorne, Melville, and the novelists of the Gilded Age.

ENG 521 American Fiction after 1900. (3 Hours) A study of major writers of fiction in the twentieth century.

ENG 530 Modern Drama. (3 Hours) A course on recent trends in drama, particularly Theatre of the Absurd, including Ibsen, Strindberg, Ionesco, Leroi Jones, Beckett.

ENG 531 Modern Poetry and Poetics. (3 Hours) A study of the major poets, of the aesthetic principles

which govern literary form, and of the principles and rules of poetic composition.

ENG 541 Publishing Procedures for Poetry and Prose. (3 Hours) A course which acquaints the student with the basics of how to get creative works, as well as other kinds of writing, into print. Several authorities in these fields will be available to share their expertise with the students.

ENG 555W Humanities Workshop. (3 Hours) An interdisciplinary course which deals with man's ideas about what it means to be human and with the ways in which he has expressed these ideas. Specifically, the workshop integrates the study of literature, art, music in the context of an examination of various fundamental concepts.

ENG 558W Improving Instruction in Composition. (3 Hours) A workshop designed to help teachers in secondary schools improve the teaching of composition. Varied approaches and methods will be stressed each time the workshops are offered.

ENG 560 Seminar in American Literature. (3 Hours) A research course in which the subject varies from semester to semester; one or more term papers with complete bibliographies and a reading list are required.

ENG 570 Technical Writing. (3 Hours) A writing course for students in business and industry; emphasis on letters, formal and informal reports, technical instructions, description and technical articles.

ENG 586 Practicum in Teaching Composition. (3 Hours) This graduate course in teaching composition is a prerequisite for all graduate assistants in English; but it is also open to in-service teachers. Content of course will include writing papers based on principles which freshman papers are based on, reading about teaching freshman English, reading materials for the JSU freshman course and discussing ways of presenting it, grading papers, observing composition classes, and teaching freshman classes.

ENG 590 Thesis Writing. (1-6 Hours)

ENG 591 Independent Study. (3 Hours) For students working on projects.

ENG 600 Old English. (3 Hours) Prerequisite: LING 501. A study of Old English phonology, morphology, and syntax to prepare the student to read Anglo-Saxon literature in the original.

ENG 601 Readings in Old English. (3 Hours) Prerequisite: Eng 600. Readings from *Beowulf*, Old English Poetry of other types; selections from Bede, *Domesday Book*, the *Anglo-Saxon Chronicle*, and *Holy Writ*.

ENG 602 Middle English. (3 Hours) Prerequisites: LING 501, ENG 600 desirable but not required. A study of the phonology, morphology and syntax of Chaucerian English to prepare students to read English literature produced between 1100 and 1500.

ENG 603 Readings in Middle English. (3 Hours) Prerequisite: ENG 602. Exercises in reading Middle English poetry and prose.

ENG 604 Seminar in Medieval Literature. (3 Hours) Prerequisites: ENG 600 and 602. A study of Old and Middle English literature and authors including

discussion of the historical, social and religious background.

ENG 606 Seminar in Renaissance Literature. (3 Hours) A study of English Renaissance literature and its European antecedents.

ENG 608 Seminar in Nineteenth Century Literature. (3 Hours) A study of Romanticism and Realism in English, American and other national literatures.

ENG 609 Seminar in Contemporary Literature. (3 Hours) A study of a specific theme, genre, or style exemplified in American, English and other contemporary literature.

ENG 611 Seminar in African-American Literature. (3 Hours) In-depth study of selected works by African-American writers.

ENG 613 Seminar in African Literature. (3 Hours) A study of selected contemporary African poets, novelists and dramatists with special attention to the traditional culture and to social and political conditions reflected in them.

ENG 619 Creative Writing. (3 Hours) A course designed for the advanced writer of poetry, fiction, essay, and drama in which publication, readings, and presentations are required.

ENG 620 Classical Rhetoric. (3 Hours) A study of persuasive discourse applying the system set up by Aristotle, Cicero, and Quintilian with analysis of writings and application of effective strategies to the students' own writing.

ENG 622 Seminar on Writing Problems. (3 Hours) A course for teachers of composition in junior and senior high schools. Students will analyze problems, devise corrective exercises and appropriate writing assignments, and write model essays.

ENG 690 Independent Study. (3 Hours)

Linguistics

LING 500 Research in The Social and Behavioral Sciences. (3 Hours) A course in basic research theory, practice and concepts. Emphasis is on proposal writing; research techniques; thesis form; structure; development; and APA documentation.

LING 501 Fundamentals of Linguistic Science. (3 Hours) Introduction to the scientific study of language; topics include language and linguistics, philology, phonology, morphology, and syntax with emphasis on the linguistic features of English.

LING 503 Phonetics and Phonemics. (3 Hours) Prerequisite: LING 501. A study of the production and discrimination of speech sounds. Emphasis on production, application, and discrimination of phonological differences and variations. Topics include phonetic change, phonological rules and pronunciation standards.

LING 504 Applied Linguistics. (3 Hours) Prerequisite: LING 501. Application of the principles of linguistics to the teaching of composition and grammar; emphasis on linguistic terminology, immediate constituent analysis, and transformational-generative grammar.

LING 505 Semantics. (3 Hours) Prerequisite: LING 501. An advanced course in semantics; emphasis on types of meaning, transfer functions of speech, and systems of semantic principles. (Restricted Elective)

LING 506 Transformational Syntax. (3 Hours) Prerequisite: LING 501. An advanced course in the techniques of generative analysis and the transformational implications of Noam Chomsky's theory with exercises in the structure of English and other languages.

LING 507 Psycholinguistics. (3 Hours) Prerequisite: LING 501. A study of the principles of learning theory in verbal behavior with emphasis on operant conditioning and its applications to language programs and other remedial situations.

LING 508 Sociolinguistics. (3 Hours) Prerequisites: LING 501, 503. A study of language in society: its social settings, and its speech communities. Topics include dialects, language variation, and bilingualism.

LING 509 Modern Trends in Grammar. (3 Hours) Prerequisite: LING 501. A study of grammatical principles derived from structural and generative-transformational grammar with exercises in grammatical analysis.

LING 510/406 Morphosyntax. (3 Hours) Prerequisites: LING 501, 506. The study of word formations and syntactic arrangement. The goal of the course is to familiarize students with the basic principles of morphological theory and analysis, including traditional approaches (item-and-arrangement, item-and-process, and word-and-paradigm) as well as generative-transformational morphology.

LING 511 Linguistics and Pedagogy. (3 Hours) Prerequisites: LING 501, 504. A practicum which focuses on the principles that underline the transfer of linguistic information from teacher to student. Emphasis is on the comprehension of content. Students perform individual research tasks, adapt theory to practical classroom activities, and fit linguistic principles and educational requirements together.

LING 512 Second Language Teaching. (3 Hours) Prerequisite: LING 501. A course designed to give methods and techniques for teaching English as a Second Language, English as a Second Dialect and English as a Foreign Language. The primary focus is the linguistic discovery of individual differences in language learning, language aptitude, and the natural and unnatural methods of language teaching. (Restricted Elective).

LING 514 Linguistics in Education. (3 Hours) Prerequisites: LING 501, 504. A course that demonstrates the role of linguistics and language in education. A variety of topics are analyzed and discussed to determine the best approaches to the development of skills in the language arts. There is a brief survey of general linguistics and of the nature and functions of language. (Restricted Elective).

LING 546 Languages of the World. (3 Hours) Prerequisites: LING 501, 506. A survey of major language families Investigating the topological classifications of languages and language universals,

writing systems, artificial "international" languages, and "mixed" languages.

LING 590 Thesis Writing. (Variable 1-6)

LING 639 The History of Linguistic Science. (3 Hours) Prerequisite: LING 501. A historical study of language and linguistic theories from the early middle ages through the rise of structuralism and the theories of the twentieth century. (Restricted Alternate Elective)

LING 650 Dialectology. (3 Hours) Prerequisite: LING 501. An introduction to field work methodology, dialect variations, and linguistic surveys of regional and social language differences.

LING 651 Black Dialect in Literature. (3 Hours) Prerequisites: LING 506, 650. A study of the forms of dialect and their expressive power in the literature of America and other regions where blacks adapt the dialect to standard language. [Cross reference: FR 551, FR 552].

LING 653 Bilingualism and Cultural Pluralism. (3 Hours) Prerequisites: LING 501, 508. A course designed to promote better understanding among cultures in present day societies. This course gives a description of bilingualism and bidialectalism as social, psychological, and linguistic. Students study language contact situations in communities among individuals from a variety of cultures. (Restricted Alternate Elective)

LING 654 Afro-American Sociolinguistics. (3 Hours) Prerequisites: LING 504, 508. A course in the historical development and linguistic description of Caribbean and North American Creoles, including an investigation of Black Vernacular English and the relationships between linguistic and socio-cultural factors of these varieties; the complex processes of creolization and pidginization; the Creole Continuum; Black-white speech differences.

Students who are proficient in a modern foreign language may wish to choose electives from among the following courses offered by the Area of Modern Foreign Languages: FR 527, SP 527, GER 527, FR 528, SP 528, GER 528, FR 524, SP 524.

Modern Foreign Languages

Mission

The Area of Modern Foreign Languages offers a multi-faceted program in foreign languages:

1. The Proficiency Advancement Program for secondary teachers of French or Spanish;
2. The Master of Science in Secondary Education degree with a concentration in French or Spanish. (MSEd.)

The design and intent of the concentrations of Modern Foreign Languages at Jackson State University are to offer training and opportunities for persons wishing to further their mastery of foreign language skills.

The Modern Foreign Language Area is furthermore committed to the continued education of para-professionals through the offering of special courses and workshops designed to increase their professional competencies, i.e., the Proficiency Advancement Program.

Accreditation

This Area implements its programs in accordance with the certification requirements of the Mississippi State Department of Education and the standards of the Modern Language Association of America.

Program Objectives

1. To develop an awareness of the commitment to the importance of foreign language learning at all levels of education.
2. To become proficient in the systematic skills inherent in teaching Modern Foreign Languages.
3. To meet teacher certification requirements for the State of Mississippi and other states.
4. To become well-rounded in the related linguistic and humanistic disciplines and their application to the individual, to his profession, and to his society.
5. To interact for the purpose of personal growth with a multi-national faculty representing broad multi-cultural experiences with global perspective.
6. To prepare for advanced degrees.

Proficiency Advancement Program

(for Secondary Teachers of Modern Foreign Languages)

The Proficiency Advancement Program is a 21-hour concentration of courses leading to a Certificate of Proficiency in the Teaching of Modern Foreign Languages. The program is an assemblage of courses on the graduate level meant specifically for those people teaching a foreign language whose foreign training on the undergraduate level is less than that required for a minor. The courses in themselves will not satisfy any requirements for an undergraduate major in that language. The program is basically designed for nondegree students currently engaged in teaching one or more junior high or high school foreign language courses.

Program Objectives

1. To reinforce and implement basic skills already being used in the classroom.
2. To intensify the teacher's speaking skills.
3. To strengthen the teacher's command of grammatical structures.
4. To acquire a knowledge and understanding of the culture.
5. To offer source materials, techniques and activities in every phase of language learning and teaching.

Admission Requirements

To enter the Master of Science in Secondary Education with a concentration in French, Spanish or German, the incoming student must present a B.A. or B.S. degree in the language of concentration or credit hours equivalent to the number of hours required for majors in the above languages.

Proficiency Advancement Program

Required Courses		Semester
Course	Title	Hours
<u>French</u>		
FR 501, 502	French Grammar for Teachers	6

DESCRIPTION OF COURSES

French

FR 500 French for Reading Knowledge. (3 Hours) A course designed to prepare nonlanguage MA candidates for the Graduate Foreign Language Reading Examination. S or U grades given. May be repeated. Does not satisfy the undergraduate language requirement or by itself the graduate reading requirement. The student is encouraged to become familiar with the other options associated with the graduate foreign language requirement.

FR 501-502 French Grammar for Teachers. (3-3 Hours) Structure and function of the French language with direct application to modern usage, both oral and written. Prerequisites: Fr. 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

FR 503-504 Oral French for Teachers. (3-3 Hours) Designed to develop oral-aural skills and general fluency in the language. Prerequisites Fr. 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

FR 505 France: Its People and Culture. (3 Hours) Study of the French culture with emphasis on geographical and historical introduction, aesthetic, linguistic and philosophical insights into French civilization and culture. Prerequisites: Fr. 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

FR 511 Studies in French Culture I. (3 Hours) French culture as expressed in its art, architecture, music, philosophy. The historical background leading to such achievements will be emphasized.

FR 512 Studies in French Culture II. (3 Hours) A continuation of FR 511. Additionally, cultural aspects of French-speaking African countries, Canada, and the French-speaking Caribbean area will be studied.

FR 515 Methods of Teaching French. (3 Hours) May be waived. (Not required for students who have had an equivalent course on the undergraduate level.) A survey and free discussion of historical and modern methods

employed in the teaching of French. Familiarity with pedagogical journals and literature will be especially stressed.

FR 520 Advanced Composition. (3 Hours) Practice in written French designed to give the student mastery of grammar and composition.

FR 521 Advanced Conversation in French. (3 Hours) Practice in spoken French designed to give the student mastery and confidence in his/her use of spoken French. Will also include contemporary changes in the sounds and vocabulary of French.

FR 523 French Telephonemics. (3 Hours) A theoretical and practical study of French Telephonemics and Telephonetics with emphasis on corrective methods. May be taken instead of French 524.

FR 524 French/English Contrastive Linguistics. (3 Hours) Prerequisite: Undergraduate preparation in French. A study of the contrast between English and French and of the techniques for comparing them.

FR 527 History of the French Language. (3 Hours) (Cross-reference with LING 602). The development of French from Latin together with other influences on the growth of the language.

FR 528 Readings in Old French. (3 Hours) Prerequisite: FR 527. Readings in the poetry and prose of Old French from the *Serments de Strasbourg* (842 a.d.) to the fourteenth century.

FR 532 Seventeenth Century French Novel. (3 Hours) Study of principal literary trends in the novel.
FR 533 Seventeenth Century French Theatre. (3 Hours) Study of principal literary trends in the theatre.

FR 534 Seventeenth Century French Essayists. (3 Hours) Study of principal trends of thought in the writings of Descartes, Pascal, and others.

FR 536 French Literature of the Enlightenment. (3 Hours) Study of principal trends of thought in the writings of Voltaire, Montesquieu, Diderot, Rousseau, and others.

FR 537 Eighteenth Century French Novel. (3 Hours) Study of principal literary trends in the novel.

FR 538 Eighteenth Century French Theatre. (3 Hours) Study of principal literary trends in the theatre.

FR 539 Pre-Romanticism. (3 Hours) Study of principal literary genres in this movement.

FR 541 Nineteenth Century French Novel. (3 Hours) Study of principal literary trends in the novel.

FR 542 Nineteenth Century French Theatre. (3 Hours) Study of principal literary trends in the theatre.

FR 543 Nineteenth Century French Poetry. (3 Hours) Study of principal literary trends in the poetry.

FR 547 Contemporary French Novel I. (3 Hours) Study of principal trends in the novel from Pre-World War I France to Post-World War II France.

FR 548 Contemporary French Novel II. (3 Hours) Study of principal trends in the novel after World War II. Includes *Nouveau Roman*.

FR 549 Contemporary French Theatre. (3 Hours) Study of principal literary trends in the theatre.

FR 550 Contemporary French Poetry. (3 Hours) Study of principal literary trends of poetry in France, beginning with Surrealism.

FR 551 The Negritude Literary Movement. (3 Hours) History of the Negritude literary movement, with emphasis on early works of all genres and essayists.

FR 552 The Novel in Afro-French Literature (3 Hours) Study of Black novelists of French expression from Africa and the Caribbean area.

FR 553 The Theatre in Afro-French Literature. (3 Hours) Study of Black playwrights of French expression from Africa and the Caribbean area.

FR 554 Poetry in Afro-French Literature. (3 Hours) Study of Black poets of French expression from Africa and the Caribbean area.

FR 560 French Literary Criticism. (3 Hours) Study of the evolution of literary criticism with particular attention to theories of literature and their application. Includes Structuralism and Semiotics.

FR 564 Intensive Reading. (3 Hours) A course designed to fill in some of the gaps in the studies of the individual students and to help them acquire rapidity in reading in the original language, including an introduction to the method of explication *de texte*.

FR 570 Intensive Advanced French for Teachers. (3 Hours) A course designed principally for teachers of French. Student is instructed in Methodology, Culture, Civilization, Conversation, Composition, and Grammar. Credit hours may be used for certification.

FR 570W Intensive Advanced French for Teachers. (4 Hours) A two-week intensive summer workshop from 9:00-3:00 p.m. daily. Student is instructed in Methodology, Culture, Civilization, Conversation, Composition, and Grammar. Credit hours may be used for certification.

FR 580 Independent Study. (3 Hours) Intensive study of a subject selected in accordance with student needs. Topics will vary and may include civilization, techniques of literary analysis and criticism, study of major literary movements, individual authors and their works.

FR 588 Master's Project (1-3 Hours)

FR 590 Master's Thesis. (1-3 Hours)

FR 599 Seminar In French Literature. (3 Hours) Intensive work with an author, genre, or period. Papers will be prepared and presented.

German

GR 500 German for Reading Knowledge. (3 Hours) A course designed to prepare non-language MA candidates for the Graduate Foreign Language Reading Examination, S or U grade given. May be repeated. Does not satisfy the undergraduate language requirements or by itself the graduate reading requirement. The student is encouraged to become familiar with other options associated with the graduate foreign language requirement.

GR 511 Studies in German Culture I. (3 Hours) Studies in art, architecture, music, philosophy, and leading figures. Students will be required to become thoroughly familiar with one important non-literary figure (e.g., Kant, Mozart, Durer, Gropius)

GR 512 Studies in German Culture II. (3 Hours) A continuation of GER 511.

GR 515 Methods and Materials of Teaching German. (3 Hours) Resources, classroom materials, standard practices and problems in the teaching of German. Practical application to actual classroom situations. Familiarity with pedagogical journals and literature. May be waived for students who have had an equivalent course on the undergraduate level.

GR 527 History of the German Language. (3 Hours) Study of the development of the German language. Special attention to etymology and sound shifts.

GR 528 Readings in Old High German. (3 Hours) Prerequisite: GR 527. Readings from the earliest samples of German literature.

GR 534 Baroque Literature. (3 Hours) An intensive study of the literary theory and lyric poetry of the period with special emphasis on Opitz, Gryphius, Lohenstein, Fleming, Harsdorffer, Kuhmann, and others.

GR 537 The German Novel of the 18th Century. (3 Hours) A survey of the most important novels from Schnabel's *Insel Felsenburg* to Goethe's *Wahiver wantschanen*. Includes the novels of Gellert, Wieland, Moritz, and others.

GR 540 German Classicism: Schiller and Goethe. (3 Hours) Readings in the drama and Lyric poetry of these two authors.

GR 543 German Romanticism. (3 Hours) The period from 1798-1835. Works of such representative writers as Schlegel, Brentano, Eichendorff, Goethe, Hoffmann, Kleist, and Tieck will be treated.

GR 546 The German Novelle. (3 Hours) Readings and discussion of the Novellen of Goethe, Moerike, Stifler, Fontaine, Keller, Meyer, Raabe, Storm, Hauptmann, and others.

GR 550 Twentieth Century Novel. (3 Hours) Reading and discussion of selected works of Mann, Kafka, Musik, Boll, and Grass.

GR 580 Independent Study. (3 Hours) Intensive study of a subject selected in accordance with student needs. Topics will vary. May include civilization, techniques of literary analysis and criticism, study of major literary movements, individual authors and their works.

GR 588 Master's Project. (1-3 Hours)

GR 590 Master's Project. (1-6 Hours)

GR 599 Seminar in German Literature. (3 Hours) Intensive study of an author, work, or period mutually agreed upon by the students and the professor. Papers will be prepared and presented.

Spanish

SP 500 Spanish for Reading Knowledge. (3 Hours) A course designed to prepare non-language MA candidates for the Graduate Foreign Language Reading Examination. S or U grades given. May be repeated. Does not satisfy the undergraduate language requirement or by itself the graduate reading requirement. The student is encouraged to become familiar with the other options associated with the graduate foreign language requirement.

SP 501 Spanish Grammar for Teachers. (3 Hours) Emphasis on those elements required for the effective presentation of syntactical structure in the classroom on

all levels. Prerequisites: SP 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

SP 503-504 Oral Spanish for Teachers. (3-3 Hours) Designed to develop oral-aural skills and general fluency in the language. Prerequisites SP 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

SP 505-506 Spain and Spanish America: The People and Culture. (3-3 Hours) Study of the Spanish culture with emphasis on geographical and historical introduction, aesthetic, linguistic and philosophical insights into Spanish civilization and culture. Prerequisites: SP 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

SP 507 Readings from Spanish Cultural Materials. (3 Hours) Acquaints teachers and prospective teachers with such works as may be used effectively in the classroom. Selections from the writings of outstanding literary figures are read and discussed. Prerequisites: SP 101-102, 201-202 or equivalent. Cannot count toward any undergraduate degree program except by special departmental arrangement.

SP 511 Studies in Spanish Culture I. (3 Hours) The presentation of Spanish Culture and History as expressed in its art, architecture, music and philosophy.

SP 512 Studies in Spanish Culture II. (3 Hours) The presentation of Spanish American culture and history as expressed in its art, architecture, music and philosophy.

SP 515 Methods and Materials of Teaching Spanish. (3 Hours) Resources, classroom materials, standard practices and problems in the teaching of Spanish. Practical application to actual classroom situations. Familiarity with pedagogical journals and literature. May be waived for students who have had an equivalent course on the undergraduate level.

SP 520 Advanced Composition in Spanish. (3 Hours) Practice in written Spanish designed to give the student mastery of grammar and composition.

SP 521 Advanced Conversation in Spanish. (3 Hours) Practice in spoken Spanish designed to give the student mastery of and confidence in his/her use of spoken Spanish. Will also include contemporary changes in the sounds and vocabulary of Spanish.

SP 524 Spanish/English Contrastive Linguistics. (3 Hours) Prerequisite: Undergraduate preparation in Spanish. A study of the contrast between English and Spanish and of the techniques for comparing them.

SP 527 History of the Spanish Language. (3 Hours) Study of the development of the Spanish language from Latin together with other influences on the growth of the language.

SP 528 Readings in Old Spanish. (3 Hours) Prerequisite: SP 527. Readings from the earliest samples of Spanish including *Cantar de Mio Cid*.

SP 533 Don Quixote. (3 Hours) Reading and careful literary analysis of *Don Quixote* in its entirety.

SP 534 The Picaresque Novel. (3 Hours) A study of the development of the picaresque novel. Critical analysis of the most important works.

SP 535 Spanish Mystics and Their Literature. (3 Hours) A survey of the life and works of the Spanish mystics, prefaced by brief introductory history of Western mysticism.

SP 536 Spanish Novel of the Nineteenth Century. (3 Hours) Study of the most important novels and their authors from Fernan Caballero to Blasco Ibanez.

SP 537 The Generation of 1898. (3 Hours) An analysis of the general characteristics of the Generation of '98. Unamuno, Antonio Machado, Azorin, Baroja, Valle Inclan.

SP 538 Twentieth Century Spanish Literature. (3 Hours) Extensive reading and discussion of the works of the major literary figures following the Generation of 1898.

SP 539 The Contemporary Novel. (3 Hours) The major Spanish novelists from the late 19th century to the present time, and the dynamics of their works.

SP 540 Literature of the Conquest. (3 Hours) Intensive study of the accounts of the conquest of the New World. Original Spanish and Indian sources will be used to present both sides of this conflict of cultures.

SP 541 The Spanish American Novel. (3 Hours) Development of the novel of Spanish American countries with particular attention given to the Romantic and Realistic periods.

SP 542 The Novel of the Mexican Revolution. (3 Hours) Study of the major novels of this period, prefaced by a brief introductory history of the Mexican Revolution itself.

SP 543 New Visions of Reality—The Modern Spanish American Novel. (3 Hours) A study of the novels that have been written in the last few years. The works of Garcia Marquez, Vargas Llosa, Rulfo and Fuentes will be emphasized.

SP 544 Gaucho Literature. (3 Hours) An analysis of the literature produced by and concerning the Gaucho. A comparison of the use of different genres to depict a way of life.

SP 545 Twentieth Century Spanish American Poetry. (3 Hours) Reading and discussing Latin American poetry beginning with Modernism and continuing to the present day. Poets to be read will include Silva, Dario, Storni, Guillen, Vallejo, Neruda, and Paz.

SP 546 The Contemporary Spanish American Theatre. (3 Hours) A critical study and analysis of the most outstanding works of the Latin American Theatre in the last twenty years.

SP 570 Intensive Advanced Spanish. (3 Hours) A course designed principally for teachers of Spanish. Student is instructed in Methodology, Culture, Civilization, Conversation, Composition, and Grammar. Credit hours may be used for certification.

SP 570W Intensive Advanced Spanish. (4 Hours) A two-week intensive summer workshop from 9:00-3:00 p.m. daily. Student is instructed in Methodology, Culture, Civilization, Conversation, Composition, Grammar. Credit hours may be used for certification.

SP 580 Independent Study. (3 Hours) Intensive study of a subject selected in accordance with student needs. Topics will vary. May include civilization, techniques of literary analysis and criticism, study of major literary movements, individual authors and their works. Students will make periodic reports on their work and will prepare a substantial paper.

SP 588 Master's Project. (1-3 Hours)

SP 590 Master's Thesis. (1-6 Hours)

SP 598 Seminar in Spanish Literature. (3 Hours) Specialized study of selected subjects or trends in the literature of Spain.

SP 599 Seminar in Spanish Literature. (3 Hours) Investigation of a particular geographical area, literary period, or movement.

General Foreign Languages Courses

Courses with the FLG prefix are primarily for students who have had little or no exposure to a foreign language, but who wish to pursue courses with foreign language or literary content. All courses in this section are taught in English.

FLG 509 Methods and Materials for Intracurricular Activities. (3 Hours) Prerequisite: An undergraduate Methods course in foreign language or the 515 Methods course. Presentation of innovative techniques and activities in the language classroom in art, music, dancing, games, graphics, projects, drama, travel, etc. To be team-taught in English with extensive use of specialists and consultants. Cannot count toward any undergraduate degree program except by special departmental arrangement.

FLG 550 Seminar in Literary Themes. (3 Hours) Study of the ways in which different European literatures approach identical themes, plots, and/or characters. Readings in English. Team-taught in English.

FLG 555 Travel/Study Course in Language and Culture. (3 or 6 Hours) For a student who wishes to become familiar with the culture of a foreign country before going on a trip to that country. Three hours credit to complete the reading list and three hours credit if the student takes a trip of at least one month in duration to an area or country which speaks that foreign language. Not restricted to foreign language majors.

FLG 559 Seminar in International Concerns as Reflected In World Literature. (3 Hours) Reading and discussion of literature reflecting concerns of different world areas and matters of global scope. Topics such as racism, sexism, hunger, violence, politics. Readings in English. Team-taught in English.

FLG 560 Special Studies in Modern Foreign Languages. (1-6 Hours) Course designed to adapt to almost any problem of a student whose needs cannot be filled by existing arrangement of courses. May include study of language, literature, or culture. Emphasis on either oral, written, or reading aspects. Number of credit hours to be dependent on amount of work and research involved.

ESL/EFL 581 English Communications. (3 Hours) Prerequisite: The Graduate English Competency Examinations. (GECE) Credit for the course does not

count toward a degree. The course focuses on the development of multiple communication skills among international students at the written and spoken levels. Students are exposed to the theories and practices of standard American English Competence through reading comprehension and intra-cultural sociolinguistics. It is especially recommended for students with minimal proficiency in English.

ESL/EFL 582 Advanced ESL Communications. (3 Hours) Prerequisite: Graduate English Competency Examination (GECE) passed or completion of EFL 581 Advanced English as a Second Language (ESL) Communications is designed for international students who need extended training in the sociolinguistics of English, specific English pronunciations, intonations, stress patterns, syntax, and semantics; and the writing of narrative, descriptive, expository, argumentative, and comparison/contrast essays. Other writing tasks will include activities in technical and professional writing. The purpose of the course is to accentuate the use of English to near native competence.

DEPARTMENT OF MASS COMMUNICATIONS

Dr. O. Aworowa, Associate Professor and
Interim Chair
e-Center, Box 2100
1230 Raymond Road
Jackson, MS 39204
Telephone: (601) 979-1352
Fax: (601) 979-5800
e-mail: jsumasscom@jsums.edu

Faculty

Dr. J. Alsobrooks-Meredith, Assistant Professor
Dr. A. Chang, Assistant Professor
Dr. A. Dilworth, Assistant Professor
Dr. T. Taylor, Assistant Professor

The Master's degree program in Mass Communications is offered for students who have a desire to develop those skills and attributes necessary for participation as media practitioners in the areas of News Editorial, Public Relations, Advertising, Broadcast Journalism or Production, and the concentration in Urban Communication. As the urban university of Mississippi, Jackson State University's Mass Communications program is uniquely positioned to provide graduate students working in the metropolitan area with late afternoon and evening courses tailored to meet professional requirements.

Program Objectives

1. To aid students in developing a philosophical framework for understanding the communications process and its societal impact.
2. To guide students toward in-depth research and advanced investigative journalism techniques.
3. To assist students in enhancing writing and analytical skills.
4. To educate and train students for professions related to mass communications.
5. To provide hands-on experience in utilizing state-of-the-art technologies.
6. To utilize the critical thinking approach in problem solving, and in the dissemination of information on controversial issues.

Admissions Requirements

Applicants for the Master of Science degree must present a satisfactory score on the Graduate Record Examination or present a minimum grade point average of 3.0. Conditional admission requirements to the Master's program involve a satisfactory GRE score or a grade point average of at least 2.5. A TOEFL score is required also for international students.

Upon admission the student should arrange for an interview with the chairperson of the Department of Mass Communications who will assign a permanent adviser.

Prerequisites for Applicants with a B.A., or B.S. degree in Mass Communications include taking an elementary statistics course unless the student has earned a grade "C" or above in a previous statistics course. If the student takes a graduate course in statistics, it will count in the 15 hours of electives. No credit will be given for undergraduate hours earned in Elementary Statistics.

Degree Requirements

The Master of Science degree in Mass Communications requires a minimum of thirty (30) semester hours of acceptable graduate credit with at least twenty-one to twenty-four (21-24) hours earned from Jackson State University. A thesis or non-thesis option is elected by the student. A creative research project such as a documentary, a series of videotaped public affairs programs, or a series of investigative reports, etc. is required of all students who select the non-thesis option. A final examination is required on all graduate work, including the thesis/creative project as applicable. A committee will be convened once the thesis or the creative research project is selected and the Graduate Comprehensive Examination is passed. This committee will advise the student and assess the final product.

The thesis and non-thesis tracks in Mass Communications require the following core courses:

Core Courses Semester

Course	Title	Hours
MC 500	Seminar in Mass Communications	3
MC 501	Research Methods in Mass Communication	3
MC 502	Advanced News Reporting	3
MC 506	Seminar-Urban Affairs Reporting	3

Thesis Option:

MC 599	Thesis Writing	3
	or	

Non-thesis Option:

MC 598	Independent Research Project	3
--------	------------------------------	---

Electives:*

Electives or Restricted electives	15-18
<i>Total Hours</i>	30-33

*NOTE: The remaining 15-18 semester hours may be derived from the Mass Communications sequences in News Editorial, Public Relations, Advertising or Broadcast (Production or Journalism) or 9-12 semester hours may be selected from a Mass Communications sequence and 6 semester hours from graduate electives in related areas pending the adviser's approval.

- ◆ If the Urban Communications Concentration is selected, 15 hours will be selected from the list of restricted electives.
- ◆ If the non-thesis option is selected, the student must take 18 hours of electives.

Concentration in Urban Communications

Select five (5) courses from the following group

ECO 544	Problems in State and Local Finance	3
ECO 556	Urban Economics	3
MC 527	Politics and the Press	3
PPAD 525	Urban Politics	3
PPAD 548	Public Administration	3
PPAD 551	Metropolitan Government and Politics	3
PS 522	Urban Management & Urban Services	3
BIO 501	Environmental Science	3
SOC 528	Urban Sociology	3
UA 545	Urban Planning	3

DESCRIPTION OF COURSES

MC 500 Seminar in Mass Communications. (3 Hours) An intensive course in the origin, theories and influence of the mass media. Theoretical models and uses of mass communication in determining public policy, responses to pressure groups and media agenda setting will be examined and discussed.

MC 501 Research Methods in Mass Communications (3 Hours) Explores the quantitative and qualitative methodologies required to conduct research in news editorial, broadcast, public relations and advertising. Stresses content analysis, survey research, ratings research, and statistical analysis.

MC 502 Advanced News Reporting. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Emphasis on investigative reporting, news analyses, environmental, scientific and business writing, etc.

MC 503 Seminar in Mass Media Research. (3 Hours) Prerequisite: MC 501 or equivalent. An advanced research course designed to apply the methodologies learned in MC 501.

MC 504 Feature Writing. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Substantial research and analytical and critical examination of feature articles. The market for magazines and freelance features will be explored and selling strategies examined.

MC 506 Seminar-Urban Affairs Reporting. (3 Hours) Prerequisite: MC 502 or consent of the instructor. Involves the selection and writing of news stories, features, and investigative reports generated in an urban setting. Topics include city government, transportation, inner city re-development, waste management, urban blight, crime, the performance of urban infrastructures such as the fire and police departments, etc.

MC 508 Broadcast Journalism. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Examines newscasting, commentary, documentaries and elements of standup journalism for broadcast media.

MC 509 Electronic Newsgathering. Prerequisite: MC 500 or consent of the instructor. Examines the elements of gathering the news for broadcasts, including field work utilizing camera and editing equipment.

MC 510 Computer Analysis of Communication Research Data. (3 Hours) Prerequisite: MC 501 or consent of the instructor. An introduction to computer

programming and data analysis used in communications research.

MC 511 Scriptwriting. (3 Hours) Prerequisite: MC 500 or consent of the instructor. A detailed study and application of the various styles of writing for television and film.

MC 520 Minorities and Women In Mass Media. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Profiles the careers of key individuals in the media. Examines legislation that aids or impacts negatively on the careers of women and minorities.

MC 522 Television Production. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Examines the practical aspects of television production, planning, operation of camera, lights, audio components and direction.

MC 523 Advertising Media and Selection. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Concepts in marketing strategies and objectives with emphasis on selection of the appropriate media for use in initiating an ad campaign, use of market surveys and application of skills in the simulation of a model ad campaign.

MC 525 Advertising & Marketing/ Management and Sales. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Basic techniques and skills involved in the management and planning of sales and the evaluation of transactions. Strategic selling of print, broadcast, cable, and Internet Media. Structuring of sales' packages to maximize revenue of the media organization and the advertising agency.

MC 526 Television Documentary. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Writing and video taping with emphasis on form, function, and method.

MC 527 Politics and the Press. (3 Hours) Prerequisite: MC 501 or the consent of the instructor. Examines the print and broadcast coverage of political candidates and elected officials. Examines campaign rhetoric and television campaign ads from an ethical position. Describes the role and ethical dilemmas of press secretaries and public relations practitioners who are intimately involved in the political process. Involves extensive public opinion polling.

MC 529 Legal and Ethical Aspects of Mass Communication. (3 Hours) Prerequisite: MC 500. Studies the laws governing communications, focusing on the regulatory powers of agencies such as the FCC and FTC, the legal codes dealing with slander, libel and rights to privacy. Also examines the gray areas where both ethical and legal concerns may interface. Heavy emphasis is placed on "mapping" ethical decisions through the use of the Potter's Box.

MC 530 Media Management. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Basic formats for operating a broadcast or print facility; management, programming, production, advertising sales, traffic and technical services.

MC 532 International Journalism. (3 Hours) Prerequisite: MC 500 or consent of the instructor. A comparative study of journalism in the world. Focuses on government restraints on the press and broadcast

establishments in various nations; the varied perspectives offered on world events and the unique "gatekeeping" policies in various countries.

MC 546 Studies In Film Criticism. (3 Hours) Prerequisite: MC 500. Introduces a selected body of American and continental approaches to film aesthetics. Assesses trends in recent filmmaking.

MC 547 Film as Social and Intellectual History. (3 Hours) Prerequisite: MC 500 or consent of the instructor. Studies of Hollywood and underground/avant-garde attitudes toward themes and myths in the American experience such as capitalism, social reform, sexuality, male/female roles, etc.

MC 550 Seminar: Communications Media and Issues In Society. (3 Hours) Prerequisite: MC 501. Analysis of the contemporary posture of the media, nationally and internationally, as they have depicted events and influenced popular thought.

MC 553 Workshop in Journalism. (3 Hours) This course is designed for high school teachers. Publication of a newspaper; examination of the prospects of the newspaper in the next decades and the challenge of teaching in a rapidly changing technological and increasingly electronic environment are dealt with. The use of desktop publishing software will be utilized.

MC 570 Writing for Public Relations. (3 Hours) Prerequisite: MC 502 or consent of the instructor. Writing course designed to develop professional skills in preparing public relations materials such as annual reports, press releases for print and broadcast media, public service announcements, newsletters and financial reports.

MC 571 Public Relations Practices. (3 Hours) Prerequisite: MC 502 or consent of the instructor. Analysis and evaluation of internal and external public relations practices; management of public and employee information programs; and contemporary trends.

MC 572 Corporate Communications. (3 Hours) Prerequisite: MC 502 or consent of the instructor. An analysis of the scope and functions of institutional publications. Emphasis on interpersonal communication in the corporate setting; both verbal and non-verbal communication will be examined.

MC 573 Advertising Campaigns. (3 Hours) Prerequisite: MC 502 or consent of the instructor. Developing the advertising campaign from concept through development, execution and final evaluation.

MC 598 Independent Research Project. (3 Hours) Prerequisites: Twenty-four semester hours of graduate course credit. Research project in one or more of the media, directed by a major professor. (Non-thesis track)

MC 599 Thesis Writing. (3 Hours) Prerequisites: Twenty-four semester hours of graduate course credit. Thesis under the direction of a major professor.

SCHOOL OF FINE AND PERFORMING ARTS

Department

◆ Music

The School of Fine and Performing Arts is comprised of the Department of Music and the Department of Art. The Department of Music offers comprehensive programs in music leading to the Bachelor of Music, Bachelor of Music Education, and Master of Music Education degrees.

The Department of Music is a fully accredited member of the National Association of Schools of Music (NASM).

The Department of Music in the School of Fine and Performing Arts supports many performing ensembles, which include the "Sonic Boom of the South" Marching Band, University Choir, Chorale, Orchestra and Jazz Ensemble, among others. The Department of Music is located in the F.D. Hall Music Center, which houses a recital hall, rehearsal facilities, digital recording studio, and piano and electronic music technology labs. Our faculty members are highly qualified professional educators and musicians, including instrumentalists, vocalists, composers and conductors, trained at some of the most highly respected colleges and conservatories in the nation.

The graduate program leading to the Master of Music Education degree offers a curriculum aligned with the mission of the College of Liberal Arts and the University. The Master of Music Education degree is creatively designed and provides the graduate student with a comprehensive music education program with options for study in a Thesis, Project, Recital or Extra Hours Plan.

Faculty

Dr. D. Bishop, Associate Professor
Dr. R. Blaine, Associate Professor
Dr. K. Laubengayer, Professor
Dr. D. Robinson, Professor
Dr. D. Ware, Associate Professor

The Department of Music in the College of Liberal Arts, School of Fine and Performing Arts, and in cooperation with the School of Education, offers the Master of Music Education Degree with emphases in:

- Elementary School Music Education
- Secondary School Music Education (choral, instrumental, general)
- Junior College Music Education (choral, instrumental, general)
- Comprehensive Music Education (combined, integrated areas of study)

Accreditation

The Master of Music Education degree program is accredited by the National Association of Schools of Music (NASM), and the National Council for Accreditation of Teacher Education (NCATE).

Program Objectives

Based upon the stated guidelines and standards of the National Association of Schools of Music (NASM), NCATE, the Music Educators National Conference (MENC), and "AA" Certification requirements of the State of Mississippi as stated in Bulletin 130, the Department of Music at Jackson State University offers graduate programs in Music Education which will prepare students to:

1. Raise the instructional competencies of music teachers in K-12 schools and junior colleges.
2. Meet the increasing demands, ever changing environments and growing needs of today's society for qualified music educators in early childhood, elementary, secondary and junior/community college levels.
3. Promote learning environments conducive to improving the instructional programs in music throughout the State of Mississippi.

The Master of Music Education program will:

- a. Provide concentrated, advanced post-baccalaureate study in a major field or specialization in music.
- b. Provide studies beyond the major which supports the major directly by developing a breadth of competence.

- c. Improve the competencies of music students to become proficient performers of music in general, vocal, keyboard and instrumental areas.
- d. Broaden the scope of graduate study and learning in music with particular reference to various idioms, styles, media, careers, and methodologies.
- e. Provide historical, theoretical and technical bases for effective development of musicality on the graduate level.
- f. Contribute to and participate actively in the cultural life of the University, area schools, and the community.

Licensure

Candidates for the Master of Music Education Degree in the Department of Music at Jackson State University are required to complete a minimum of 36 credit hours. The candidate has an option to complete one of the following plans of study: Thesis Plan, Project Plan, Recital Plan, and Extra Hours Plan. Students who complete this program are eligible for Class "AA" licensure from the Mississippi Department of Education to teach instrumental or vocal music in K-12 schools and community colleges.

Admission Requirements

Full admission to the Master of Music Education degree program requires:

- Undergraduate degree in Music (Bachelor of Music Education, BME; Bachelor of Music, BM; Bachelor of Science, BS; Bachelor of Arts, BA.
- 3.00 Grade Point Average on a 4.00 scale
- Satisfactory scores on the Graduate Record Examination (GRE)
- 3 letters of recommendation
- Personal interview/audition scheduled with the program coordinator/advisor
- Entrance examinations in Music Theory and Music History

Curricula for Master of Music Education Degree

Based on an individualized approach to instructional programming and the selection of a degree plan, a graduate student's program of study in music at Jackson State University is outlined according to one of the following plans:

Degree Plans

Core courses required for area of concentration and each degree plan for all graduate students are:

1. Thesis Plan
2. Project Plan
3. Recital Plan
4. Extra Hours Plan

Core Courses		Semester
Course	Title	Hours
EDFL 514	Elementary Statistics	3
EDFL 515	Methods of Educational Research	3
EDFL 568	Curriculum Methods	3
<i>Total Core Hours</i>		9

Suggested Curricular for Concentrations

Concentrations are available in:

1. Elementary School Music Education;
2. Secondary School Music Education (choral, instrumental, general);
3. Junior College Music Education (choral, instrumental or general); and
4. Comprehensive Music Education.

Courses and the appropriate number of hours are determined in conference with graduate advisers in accordance with the degree plan selected.

DESCRIPTION OF COURSES

MUS 511 Special Problems in Teaching Music I-II.
(3 Hours) Class and individual study of problems and

opportunities faced by teachers of music. For classroom teachers, music teachers and supervisors, principals and administrators.

MUS 512 Musical Aesthetics and Music Education. (3 Hours) Theories of philosophers, psychologists and musicians from antiquity to the present time related to the justification, values and practices of music education in everyday life.

MUS 513 Bibliography and Research Methods. (3 Hours) Survey of fields of historical and systematic investigation in music; bibliographical studies and research analysis.

MUS 514 Advanced Conducting. (3 Hours) Conducting the concert band, the symphony orchestra, and the chorus in the larger musical forms. Analysis of scores, recordings, and live performances. Emphasis on style, technique and interpretation.

MUS 515 Choral Literature and Techniques. (3 Hours) Survey and analysis of choral literature from Palestrina to the present, using scores, records, and class performance. Techniques of teaching and conducting unfamiliar styles.

MUS 516 Instrumental Literature and Techniques (3 Hours) Specific and intensive research in each student's major instrument, covering: (1) history of the instrument, (2) texts, methods and periodicals, (3) orchestral studies, (4) solo and ensemble techniques and literature, and (5) listening and performance.

MUS 517 Marching Band Techniques. (3 Hours) Organization, developing system, equipment and facilities, personnel, planning the show, basic styles and fundamentals, continuity and pace, rehearsal and drill techniques, charting, instrumentation, selecting and arranging music.

MUS 518 History and Philosophy of Music Education. (3 Hours) Examination of the historical and philosophical foundations which underlie the curricula and instructional programs in music.

MUS 519 Survey of Research In Music Education. (3 Hours) Designed to help students to develop the scientific method of educational research in music, to define areas of need, and to develop potential research problems.

MUS 521 Curriculum Development for Music In the Elementary School. (3 Hours) Study and appraisal of curricula, plans and materials for the sequential development of musical learnings in children; contemporary techniques for implementing; relationships to other areas of instruction.

MUS 522 Curriculum Development for Music In the Secondary School. (3 Hours) Study of general and specialized curricula in the junior and senior high school; interrelationships, goals, and implementation techniques in the light of musical growth in the adolescent years.

MUS 523 Curriculum Development for Music in Two and Four Year Colleges. (3 Hours) Study of curricula, plans, materials, and implementation procedures for general and specialized curricula in junior and senior colleges. Emphasis on theories and practices, student development, administrative processes, and teacher competency.

MUS 524 Music in Childhood Education. (3 Hours) A detailed consideration of the music program for nursery school through the primary grades. The nature of musical responses, objectives, experience levels, and materials and techniques utilized.

MUS 525 Tests and Measurement in Music Education. (3 Hours) Investigation of evaluative tools in music education; formulation and utilization of measurement devices in music teaching and research.

MUS 526 Administration and Supervision of Music. (3 Hours) An integrating course involving the administrative consideration basic to all facets of music education programs in K-12, and junior and senior colleges.

MUS 527 Projects In Elementary Music Curricula Development, Implementation and Supervision. (3 Hours) Basic curriculum principles, program planning and development, preparation and presentation of courses in selected classrooms. An in-depth course employing the processes of lecture, seminar, and practicum.

MUS 528 Projects In Secondary Music Curriculum Development, Implementation and Supervision. (3 Hours) Basic curriculum principles, program planning and development, preparation and presentation of courses in selected classrooms. Provision for individual projects in general, choral or instrumental areas.

MUS 529 The Church and Music Education. (3 Hours) A comprehensive program constructed to enable the church musician to study materials, methods, and activities and to present programs specifically designed to educate the taste of various congregations.

MUS 530 Jazz Music Workshop. (2 Hours) Discussions and demonstrations relative to the historical, theoretical, and performance areas of jazz. The various styles and the music of a variety of composers will be explored. Sessions on career opportunities and recording studio techniques.

MUS 531 Vocal Pedagogy (3 Hours) Processes in voice production. Psychological, physiological, and acoustical problems. Study of voice classification, quality, diction, breath support and breath control.

MUS 532 Piano Pedagogy. (3 Hours) Survey of techniques, practices, and materials for group and individual instruction for various age levels. Teaching under faculty supervision.

MUS 533 Instrumental Pedagogy. (3 Hours) Teaching techniques and materials for string, woodwind, brasswind and percussion instruments. Individual and group instruction for various age levels. Teaching under faculty supervision.

MUS 534 Music in Special Education. (3 Hours) Survey of materials for teaching music to the handicapped. Analysis of psychological principles and procedural concepts, development of pilot programs for music teaching and learning in special education.

MUS 535 Discovery-inquiry Approach to Musical Learning. (3 Hours) Integrative and individualized approach to teaching music to pre-school and elementary school children. Study of concepts, methods, materials and experience.

MUS 536 Church Music Workshop. (1 Hour) Rehearsal procedures, reviewing literature of the past and present, philosophies of church music as well as liturgies will be studied. Planning a program that is flexible and dynamic as well as contemporary trends will be covered.

MUS 537 Seminar in Church Music. (3 Hours) Study of the relationship of music and liturgy to Christian worship, how to plan the comprehensive church music program, selecting appropriate music for worship and the calendar year, building and maintaining an adequate choir, and how to utilize instruments in the worship service.

MUS 539 Independent Study (2 hours) Individual program of study in major area of interest, under the direction of the faculty. Opportunities to broaden knowledge and develop further skills in special areas of music.

MUS 540 Theory Review (2 Hours) Designed to prepare students for graduate level theory. Aural techniques, triads, chordal structure, modulation, analysis, harmonic and contrapuntal techniques. Credit not applied to degree requirements.

MUS 541 Theory I. (3 Hours) Basic principles of music theory. Emphasis on sixteenth and seventeenth century styles. (Sum.)

MUS 542 Theory II. (3 Hours) A study of the styles of the eighteenth and nineteenth centuries.

MUS 543 Theory III. (3 Hours) A study of impressionistic and modern styles.

MUS 544 Analytical Techniques. (3 Hours) Techniques of analysis of style and structure of music from all periods of music history. Analytical concepts in learning, teaching, and performing music.

MUS 545 Pedagogy of Theory. (3 Hours) Teaching materials, text, classroom procedure, methods, and sequence. Introduction to the contemporary music project (CMP) approach. Study of the theoretical systems and theoretical bibliography.

MUS 546 Advanced Ear Training. (3 Hours) Harmonic, contrapuntal, and melodic dictation drawn from masterworks and idioms of composers from Haydn to the present. Employment of all clefs. Sight singing.

MUS 547 Advanced Orchestration. (3 Hours) Investigation of orchestration practices of the great composers from the classical period to the present. Non-orchestral works will be orchestrated in the style of the period of their composition.

MUS 548 Advanced Band Instrumentation. (3 Hours) Arranging for the concert and marching band works from orchestra, organ, chamber and/or popular music by composers of the classical, romantic, and modern periods.

MUS 549 Composition. (3 Hours) Advanced study of contrapuntal forms, study of contemporary melodic and harmonic practices; original work in advanced composition.

MUS 550 Instrumental Forms. (2 Hours) The evolution of the sonata, the symphony and the concerto. Historical/analytical/theoretical approaches.

MUS 551-552 Arranging for School Band, Chorus, and Orchestra I, II. (3-3 Hours) The technique of arranging for band, chorus and orchestra within the skill limits of school performances, skill levels according to school grade and integration of all levels in a composite school performing unit.

MUS 553 Jazz Analysis I. (3 Hours) Analysis of scale systems and harmonies used in jazz improvisational techniques and stylistic analysis of major artists in the 1940's and the 1950's.

MUS 554 Jazz Improvisation. (3 Hours) Continuation of Jazz Analysis I with emphasis on improvisational techniques and stylistic analysis of major jazz artists of the 1960's and 1970's.

MUS 555 Music as a Business (3 Hours) Designed to show students how to make a good living with music. Presentations in sound business-like manner in relationship to career opportunities. Lectures by guest consultants in the business of music. Panel discussions on career opportunities in the field of music. Visits to recording studios will be included.

MUS 557 Orff-Schulwerk Level I. (3 Hours) Basic knowledge and pedagogic foundations in the Orff-Schulwerk approach. A complete introductory course based on Level I course outlines as published by the American Orff-Schulwerk Association which includes the use of the pentatonic, the simple bordun, the ostinato, basic elemental forms, basic body movements and application to the Schulwerk; soprano recorder; vocal and rhythmic training; and improvisation.

MUS 558 Orff-Schulwerk Level II (Intermediate). (3 Hours) Satisfactory completion of Orff-Schulwerk Level I course. Study of all the pentatonic scales; review of simple and moving borduns; I-V and I-IV-V accompaniments; explanation of rhythmic training and continuation into irregular rhythms and meters; vocal, movement and instrumental improvisation; soprano and alto recorder. Level II includes in- depth study of Volumes II and IV of the Schulwerk.

MUS 560 General History of Music. (2 Hours) Study and review of forms, styles, literature and composers from Middle Ages to modern period. To prepare students for graduate level history. Credit not applied to degree requirements.

MUS 561 Baroque Music. (3 Hours) The age of the basso continuo 1580-1750; opera and oratorio, instrumental forms, keyboard music, and performance practices.

MUS 562 Classic Music. (3 Hours) Rococo and Pre-classical music in England, France, Italy, Spain, and Germany. The Viennese classical tradition.

MUS 563 Romantic Music. (3 Hours) The development of romanticism in music from late Beethoven through Mahler.

MUS 564 Medieval Music. (3 Hours) The history of music from classical antiquity to C. 1400.

MUS 565 Renaissance Music. (3 Hours) The history of music from 1400 to 1600.

MUS 566 Music in the Twentieth Century. (3 Hours) The history of music from the turn of the century to the present. Forms, styles, idioms, media, composers, and performance practices.

MUS 567 Studies In Music History. (3 Hours) Topics may be selected from the following: Sonata History; Opera History; 19th Century Art Song; Cantata History; Symphony History; Brahms; Mozart; Bach; Beethoven; Debussy-Ravel; Jazz History; Ethnomusicology.

MUS 568 Introduction to Ethnomusicology. (3 Hours) A comprehensive survey of concepts, problems and methods of research in non-Western and folk music.

MUS 569 History of Instrumental Music from 1450 to 1750. (3 Hours) A comprehensive study of instruments and instrumental music, both Western and non-Western, from the Middle Ages to the end of the Baroque era. (Sum.)

MUS 570 Chamber Ensemble. (1 Hour) Performance of chamber music in various styles, periods and media. Open to pianists, instrumentalists, and singers with technical proficiency equivalent to undergraduate senior level. Public performance each quarter.

MUS 571 Vocal Literature. (3 Hours) Study of solo song in larger works, and solo art song. Analysis, performance and collateral reading.

MUS 572 Wind Instrument Literature. (3 Hours) Survey of solo and ensemble wind including analysis, collateral reading and performance.

MUS 573 Jazz History. (3 Hours) Study of the development of jazz from African origins to its present status as an organized art form. Contributions of selected jazz musicians. Relationship to rock and pop music.

MUS 575 Thesis Writing. (2 Hours)

MUS 576 Project Writing. (2 Hours)

MUS 577 Seminar in Band Conducting. (4 Hours) An intense study of the essentials of band conducting with appropriate practical experience instrumental and band performance ensembles.

MUS 578 Seminar in Orchestral Conducting. (4 Hours) An intense study of the essentials of orchestral conducting with appropriate practical experience with string and orchestral ensemble performance ensembles.

MUS 579 Seminar in Choral Conducting. (4 Hours) An intense study of the essential of conducting with appropriate practical experience with vocal performance ensembles.

MUS 581 Marching Band. (1 Hour) Designed to give graduate students lab experience in dealing with contemporary marching band techniques. Open to all students upon audition.

MUS 582-584 Concert Band. (1 Hour) An organization designed to provide a graduate medium the aim of which is to broaden the graduates' realm of experiences in performing in large performance organizations and to enhance understanding and knowledge of the literature and concert performance practices.

MUS 585-587 Orchestra. (1 Hour) Designed through performance to instill in students a knowledge of musical literature from all periods and idioms, basic music patterns and usages, musical vocabulary and meaning, music's development as an art, and the principal forms and composers.

MUS 588-590 Choir. (1 Hour) Study and performance of selected choral literature from all stylistic periods, both accompanied and a cappella. Emphasis on increased skill in reading, development of basic voice techniques and interpreting the score.

MUS 597 Recital. (2 Hours) Graduate level technical study, continued development of repertoire, stylistic interpretation and performance skills. Preparation and presentation of graduate recital.

MUS 598-599 Woodwind Ensemble. (1 Hour) Exploration of the finest in woodwind ensemble literature with emphasis on the individual performer.

MUS 598-599 Brasswind Ensemble. (1 Hour) Performance of brass ensemble literature of all periods and styles. Open to all students by audition.

MUS 598-599 Percussion Ensemble. (1 Hour) Designed to acquaint each student with the art of playing as a unit and to have each music major work toward the development of being able to perform on melodic and non-melodic percussion instruments.

MUS 598-599 String Ensemble. (1 Hour) Study and performance of standard ensemble literature. Open to qualified students.

MUS 598-599 Stage Band. (1 Hour) An organization designed to acquaint the student with styles, techniques, and works of prominent jazz figures. Special attention will be given to improvisatory expressions of individual students.

Applied Music

MUS 591-596 Applied Piano. (1-3 Hours)

MUS 591-596 Applied Organ. (1-3 Hours)

MUS 591-596 Applied Voice. (1-3 Hours)

MUS 591-596 Applied Violin. (1-3 Hours)

MUS 591-596 Applied Viola. (1-3 Hours)

MUS 591-596 Applied Violoncello. (1-3 Hours)

MUS 591-596 Applied String Bass. (1-3 Hours)

MUS 591-596 Applied Flute. (1-3 Hours)

MUS 591-596 Applied Oboe. (1-3 Hours)

MUS 591-596 Applied Bassoon. (1-3 Hours)

MUS 591-596 Applied Clarinet (1-3 Hours)

MUS 591-596 Applied Saxophone. (1-3 Hours)

MUS 591-596 Applied Trumpet. (1-3 Hours)

MUS 591-596 Applied French Horn. (1-3 Hours)

MUS 591-596 Applied Trombone. (1-3 Hours)

MUS 591-596 Applied Baritone Horn. (1-3 Hours)

MUS 591-596 Applied Tuba. (1-3 Hours)

MUS 591-596 Applied Percussion. (1-3 Hours)

MUS 597 Recital. (2 Hours)

SCHOOL OF SOCIAL AND BEHAVIORAL SCIENCES

Departments

- ◆ Criminal Justice and Sociology
- ◆ History and Philosophy
- ◆ Political Science
- ◆ Psychology

The School of Social and Behavioral Sciences consists of leaders in graduate education at Jackson State University. Academic units comprising the School of Social and Behavioral Sciences are the Department of Criminal Justice and Sociology, the Department of History and Philosophy, the Department of Political Science, and the Department of Psychology.

In addition to the four academic units shown above, students and faculty participate in several interdisciplinary research and citizenship programs - - two centers, the Margaret Walker Alexander National Research Center for the Study of the Twentieth Century African American, spawned from the Department of History; the Alcohol and Drug Studies Center; whose genesis was the Department of Sociology; a planned program of research for the Department of Psychology, the Community Health Program (CHP) and a Clinical Psychology Services Program; and the Fannie Lou Hammer National Institute on Citizenship and Democracy, which grew out of more than a quarter of a century of activity by the faculty of the Department of Political Science.

The aforementioned four units, their programs of teaching, research and service, attract a substantively diverse and international faculty and student body. All graduate programs in the social and behavioral sciences maintain an optimal student enrollment and provide excellent mentoring by core faculty with combined research and practioner experiences in traditional academic specializations and public service roles. Graduate students are expected to meet with their mentors many times during the course of the academic year and are encouraged to begin research projects with their mentor the summer preceding their admission. Graduate coursework, preliminary examinations, qualifying examinations, internships, thesis and/or major papers, and dissertation preparation, are the major components of the graduate programs in the School of Social and Behavioral Sciences. The College of Liberal Arts's only doctoral program - Clinical Psychology - has an excellent teaching faculty with planned programs of clinical research. The social and behavioral sciences have engaged teaching faculty with quality research publications. The School of Social and Behavioral Sciences generates large sums of external funds to support graduate student fellowships, foster research opportunities that advance student's careers, generate new knowledge/discoveries in collaboration with graduate students.

The School of Social and Behavioral Sciences offers the Doctor of Philosophy in Clinical Psychology; the Master of Arts in Criminal Justice and Justice Services, History, Political Science, and Sociology.

DEPARTMENT OF CRIMINAL JUSTICE AND SOCIOLOGY

(601) 979-2626
Fax: (601) 979-8275
e-mail: ettta.faye.morgan@jsums.edu

Faculty

Dr. H. Al-Fadhli, Associate Professor
Dr. T. Calhoun, Professor
Dr. J. Griffin, Assistant Professor
Dr. T. Kersen, Assistant Professor
Dr. C. McNeal, Professor
Dr. M. Owens-Sabir, Associate Professor

Program of Criminology and Justice Services

The Master of Arts degree in Criminology and Justice Services is designed to create a cadre of education and policy makers in the area of Criminal Justice. The primary focus of the program is on providing a strong theoretical and methodological foundation for those individuals desiring to restructure and plan for change in the contemporary justice system. The student is expected to demonstrate knowledge of the key theories as well as critical theoretical crime and justice perspectives within the progression of the humanistic spectrum. The curriculum includes significant strategies, issues and themes on the dimensions of planned change throughout the justice system.

Program Objectives

- ◆ To prepare students for studies beyond the master degree focusing on planned change.
- ◆ To provide studies in theory, analysis of varied criminal justice systems, management and research sufficient to prepare students for career development in the field.
- ◆ To provide courses to enhance the performance and employment potential of individuals in criminal justice agencies.

Admission Requirements

Students must meet all admission, testing and graduation requirements of the Graduate School at Jackson State University. Students must submit a satisfactory score on the Graduate Record Examination, GRE, three letters of recommendation and a statement of purpose.

Students without a background in Criminal Justice, Criminology, Juvenile Justice or Administration of Justice must take System Dynamics in the Administration of Justice (CJS 500) before taking courses in the degree program.

Applicants will only be admitted once a year during the Fall Semester.

Transfer Credits

A maximum of nine (9) hours of credit may be transferred from an accredited graduate school provided the courses are significantly related to those required for the M.A. in criminal justice and the student has approval from the director of the program.

Degree Requirements

The Department offers two degree options at the Masters' level: THESIS and NON-THESIS.

1. **THESIS:** A total of 36 semester hours are required for the M.A. Each student must complete twelve (12) semester hours of core courses, eighteen (18) semester hours of criminal justice electives and six (6) semester hours of thesis writing. A written comprehensive examination must be taken **and successfully passed** following the completion of the core courses. A student must write and defend a thesis to the Thesis Committee for approval.
2. **NON-THESIS:** A total of 36 semester hours are required for the M.A. Each student must complete twelve (12) semester hours of core courses, twenty-one (21) semester hours of criminal justice electives and three (3) semester hours of writing a policy paper. A written comprehensive examination must be taken **and successfully passed** following the completion of the core courses.

Master of Arts Criminology and Justice Services (Thesis Option)

Core Courses		Semester
Course	Title	Hours
CJS/SOC 502	Theoretical Criminology	3
CJS/SOC 513	Statistics	3
CJS 515	Research Methods	3
CJS 526	Criminal Justice Organization and Management	3
	Criminal Justice Electives	18
CJS 600	Thesis	<u>6</u>
	<i>Total Hours</i>	36

Master of Arts Criminology and Justice Services (Non-Thesis Option)

Core Courses		Semester
Course	Title	Hours
CJS/SOC 502	Theoretical Criminology	3
CJS/SOC 513	Statistics	3
CJS 515	Research Methods	3
CJS 526	Criminal Justice Organization and Management	3
	Criminal Justice Electives	21
CJS 601	Policy Paper	<u>3</u>
	<i>Total Hours</i>	36

Criminal Justice Electives

CJS 520	Ethical Issues in Criminal Justice
CJS 525	Designing New Criminal Justice Delivery Systems
CJS 530	Implementing Behavioral Strategies for Planned Change
CJS 535	Assessment and Evaluation of Criminal Justice Policies and Practices
CJS 540	Comparative Justice Systems
CJS 580	Special Topics
CJS 599	Independent Study
CJS/SOC 504	Sociological Jurisprudence
CJS/SOC 506	Seminar in Juvenile Justice
CJS/SOC 591	Seminar in Police Administration
CJS/SOC 620	Community Analysis
CJS/SOC 622	Research and Statistics
CJS/SOC 635	Crime and Urban Community

Sociology Program

The Sociology program offers the Master of Arts Degree in Sociology and the Master of Arts Degree in Sociology with emphasis in Alcohol and Drug Studies. The Alcohol/Drugs Program is a member of Alcohol and Drugs Problems of America.

Mission

The missions of the department is to provide learning experiences that will enable the sociology student to analyze, synthesize, and evaluate sociological concepts and research. Marketable skills such as effective written and oral communication, problem solving, and familiarity with quantitative and qualitative methodologies will be emphasized. Students will learn to use their sociological imagination to study emerging social issues such as globalization and modernization. Students with these skills are highly sought after in various parts of the labor market such as social service agencies, correctional systems and research institutions. The M.A. program is also designed to provide adequate training to pursue a doctoral program at other universities. The M.A. in Sociology with Emphasis in Alcohol and Drug Studies Program is designed to develop a manpower pool for service delivery in the human services profession with emphasis on the training of alcohol and drug counselors. This program also provides planning, management and public information expertise to the general public. Specialists in the field of substance abuse and human services engaged in the applied research develop and test theories on the nature and extent of alcohol and drug abuse problems.

Program Objectives

The purposes and intent of the graduate programs in Sociology are careers and human services oriented. As such, the objectives are to:

- ◆ Use the social scientific approach to study problems and locate possible solutions.

- ◆ Provide ample opportunities for students to write and present research from a sociological perspective.
- ◆ Challenge students to analyze, synthesize, and evaluate sociological concepts and theories.
- ◆ Familiarize students about quantitative, qualitative and mixed-method approaches.
- ◆ Prepare teachers for community colleges or further graduate studies.
- ◆ Prepare counselors for Alcohol and Drug abuse centers and programs.

Admission Requirements

The program for the Master of Arts Degree in Sociology is open to those who have completed the Bachelor of Arts Degree in Sociology or its equivalent from an accredited institution. All applicants are required to submit a satisfactory score on the Graduate Record Examination (GRE), three letters of recommendation and a statement of purpose.

Applicants will only be admitted once a year during the Fall Semester.

Degree Requirements

The Department offers two degree options at the Masters' level, THESIS and NON-THESIS.

1. THESIS: A total of 36 semester hours are required for the M.A. Each student must complete 24 semester hours of core courses, six (6) semester hours of electives, and six (6) semester hours of thesis writing. A written comprehensive examination must be taken **and successfully passed** following the completion of the core courses. A student must write and defend a thesis to the Thesis Committee for approval.
2. NON-THESIS: A total of 36 semester hours are required for the M.A. Each student is required to complete 15 semester hours of core courses, 6 semester hours of electives in the field and 15 hours of general electives (500 level). A written comprehensive examination must be taken **and successfully passed** following the completion of core courses.

Master of Arts – Sociology (Thesis Option)

Core Courses

SOC 505	History of Sociology	3
SOC 507	Recent Sociological Theory	3
SOC 512	Methods of Social Research	3
SOC 513	Statistics	3
SOC 622	Research and Statistics	3
SOC 600	Master's Thesis	6
	Electives (500 Level)	<u>15</u>
	Total Hours	36

Master of Arts - Sociology with Concentration in Alcohol/Drug Studies

Core Courses

SOC 503	History and Philosophy of Substance Abuse	3
---------	---	---

DESCRIPTION OF COURSES

Criminal Justice

CJ 500 System Dynamics in the Administration of Justice (3 Hours) This course is designed for students without a criminal justice or closely related discipline background. Students will examine the components of the criminal justice system and their impact on the lives of offenders and non-offenders. This course does not count toward degree credit (D).

CJ 515 Research Methods (3 Hours) This course is designed to assist the student to understand and execute the basic research processes and judge the worthiness and usefulness of research as a knowledgeable consumer. (F)

CJ 520 Ethical Issues In Criminal Justice. (3 Hours) An analysis of the impact of federal and state laws, court decisions and moral and ethical factors associated with the delivery of service in the criminal justice system. (S)

CJ 525 Designing New Criminal Justice Delivery Systems. (3 Hours) This course focuses on creating new approaches to the delivery of human services. Special consideration will be given to the history of human service work, the process of getting services to people in need, helping consumers to function more effectively and the management of work to deliver effective and efficient services. (S)

CJ 526 Criminal Justice Organization and Management (3 Hours) Prerequisite: CJS/SOC 502. Theories of Crime and Delinquency. This course focuses on the application of organization and administration principles to law enforcement, courts, and correctional settings. There will also be a review of theories and an assessment of trends. (F)

CJ 530 Implementing Behavioral Strategies for Planned Change. (3 Hours) This course is designed to develop a system for organizing and conceptualizing crime prevention efforts. Special consideration is given to crime prevention planning, programming and assessment. (S)

CJ 535 Assessment and Evaluation of Criminal Justice Policies and Practices. (3 Hours) This course will focus on developing assessment skills and conveying the evaluative information to the appropriate audience. Special consideration is given to the ability of the learner to determine and judge the value and

effectiveness of a particular policy or system relative to its purpose and goals. (F)

CJ 540 Comparative Justice Systems (3 Hours) This course is a survey of various international criminal justice systems. Special emphasis will be placed on historical, geographical, and cultural perspectives that impact the systems unique and/or similar to those in the United States. (S)

CJ 580 Special Topics (3 Hours) An exploration of critical issues in criminal justice. Course may be repeated for credit as topics will vary each semester. (D)

CJ 599 Independent Study. (3 Hours) This course is designed to permit students to research topics not covered in other criminal justice courses. (D)

CJ 600 Thesis. (3-6 Hours) The candidate for the master of arts degree must present a thesis based on research conducted, stipulated, and approved by an advisor. (D)

CJ 601 Policy Paper (3 Hours) Students who select the non-thesis option are required to select a criminal justice policy and research it. The student should provide a thorough analysis of the policy resulting in the policy paper. (D)

Sociology

CJ/SOC 502 Theoretical Criminology (3 Hours) An intense overview of the major theories of crime and delinquency from the 18th century to the present. (F)

SOC 503 History and Philosophy of Substance Abuse (3 Hours) Background information on society's management over time of alcohol and other substances and the effects of their use, with emphasis on philosophical orientations underlying the management strategy. (F)

CJ/SOC 504 Sociological Jurisprudence (3 Hours) Intensive study of the historical development of current status of constitutional doctrine in relation to the administration of justice by utilizing the options of the U.S. Supreme Court as the basis for equal protection, police practices and the fundamental rights guaranteed in the Bill of Rights. Federal and State constitutional laws as they relate to the criminal justice system. (F)

SOC 505 History of Sociology. (3 Hours) Analysis of the works of major contributors to classical sociological theory, e.g., Durkheim, Weber, Merton, Parsons, and an examination of the ways in which their work converges to form a cumulative body of sociology theory. (F)

CJ/SOC 506 Seminar in Juvenile Justice (3 Hours) Administrative, management, supervisory, policy, and legal aspects of the juvenile justice system; problems of manpower training and development; planning, program evaluation, and management strategies related to juvenile courts; community diversion and correctional programs and institutions; recent court decisions and legal standards. (S)

SOC 507 Recent Social Theory. (3 Hours) Nineteenth and 20th century sociological theory. Contemporary theoretical thought is studied and applied to contemporary issues such as modernity and globalization. (S)

SOC 508 Current Issues In Law Enforcement (3 Hours) Police-management problems; organization and objectives, planning and coordination, public relations and support. (D)

SOC 512 Methods of Social Research. (3 Hours) A course which covers methodology and techniques for selection and formulation of a research problem, research design, questionnaire and schedule construction, proposal writing. (F)

CJS/SOC 513 Statistics. (3 Hours) Quantitative techniques of data analysis are introduced in the context of their application in sociological research. Research design, measurement theory, data collection, coding, machine use, and statistical analysis and interpretation are stressed. (S)

SOC 515 Legal Aspects of Corrections (3 Hours) Functions, powers, procedures and legal limitations germane to correctional administration with particular emphasis on those operating in the criminal justice field. (D)

SOC 523 Seminar—Family and Marriage with Special Emphasis on the Black Family. (3 Hours) Varying forms and functions of family organizations in different societies. Family relations and personality formation. Contemporary social changes influencing family life, with special emphasis on the Black family. (S)

SOC 525 Correctional Treatment and Rehabilitation (3 Hours) The study of the process of rehabilitating adult and juvenile offenders in prisons, jails, detention centers, and reform schools. Includes an analysis of offender classification schemes, the major institutional treatment programs and strategies. (D)

SOC 526 Seminar in Race Relations and Minorities. (3 Hours) Sociological examination of relationship between and within racial groups; analysis of social causes of prejudice and discrimination. (F)

SOC 532 Seminar in Crime Prevention and Control (3 Hours) An examination of the roles played by public and private law enforcement security officials, the community, and community agencies in deterring and controlling crime and delinquency. Analysis of the coordinating efforts between the community, its agencies, and the justice system. Theories of crime prevention and control with environment will be analyzed. (S)

SOC 535 Understanding the Role of Various Disciplines in the Study of Urban Problems. (3 Hours) Students will undertake projects correlating the contributions made by various disciplines to the solution of urban problems. (D)

SOC 538 Social Psychology of Deviant Behavior. (3 Hours) An intensive examination of the concept of deviant behavior and associated concepts, e.g., alienation, abnormality, anomie, pathology, marginality. (Su, D)

SOC 541 Industrial Sociology. (3 Hours) Socio-economic aspects of industrialization; technological change, changing of occupational structure and labor market, labor commitment, the roles of unions in development, bureaucratization, and change and managerial ideology. (O, D)

SOC 543 Stress Management in Justice Administration (3 Hours) Provides criminal justice personnel with a bio-social framework or model to identify specific stresses peculiar to law enforcement work and develop adaptive mechanisms to mediate stress and alleviate the psychological effects of stress. (D)

SOC 544 Security Systems and Administration (3 Hours) The organization and management of security units in industry, businesses, governments, institutions, etc. The protection of manpower, facilities, and other assets. Administrative, legal, and technical problems and issues in professional security management. Loss prevention, government internal security controls, employee dishonesty, shoplifting, and other issues are analyzed. (S, Sum)

SOC 548 Social Change. (3 Hours) Reform, revolution and involvement. (Sum)

SOC 550 Methods of Research and Evaluation (4 Hours) This course is designed to increase the student's skills in formal research and report writing and in drawing up empirical indicators for use in program evaluation. Practical application of skills developed in the course will be required in evaluation activities carried out during the formulation and actual fielding of a research project to be reported in the Masters' thesis. (F)

SOC 551 Public Policy Justice Administration (3 Hours) Analysis of interrelationship of criminal justice system components and the political setting surrounding the formulation and administration of public policies for crime control. (D)

SOC 572 Research and Independent Study. (3 Hours) Opportunity for students to undertake independent study and research under the direction of a faculty member. Research proposal must be approved by a faculty member prior to registration. At the close of the period of study, the student will submit a written report and may be asked to take a comprehensive examination on his/her work. (O, D)

SOC 588 Interventive Methods I. (3 Hours) Strategies, techniques and approaches to the intervention, redirection and amelioration of substance misuse behavior with special emphasis on individual, group and community organization foci. (F)

SOC 589 Interventive Methods II. (3 Hours) Prerequisite: SOC 588. Advanced study of interventive methods with focus on use of games, simulation, role-playing, etc. in intervention. (S)

SOC 590 Practicum. (5 Hours) The practicum experience will be obtained at one of the local agencies or at an agency in another city or state. The internship will include: supervised leadership assignments, administrative and supervisory functions in a public or private agency or institution with emphasis on services for alcoholics or other substance abusers. A bi-weekly integrative seminar during the practicum allows students to share their field experiences with each other. (D)

CJS/SOC 591 Seminar in Police Administration (3 Hours) The study of police practices and problems, functional and organizational dilemmas of law

enforcement, role and interaction of police and community, examination of police subculture and public policy implications on police practices. Includes an analysis of police organization, management and operations, issues and problems of contemporary law enforcement. (S)

SOC 592 Crime and Substance Abuse (3 Hours) This course will examine concepts of crime and substance abuse in our society and issues and consequences. It will relate to the differential association, differential social organization theories, and their underlying assumptions and propositions. Criminal substance abuse behavior causation as well as other factors will be discussed during course and crime and substance abuse. Attention will also focus on typologies of criminal substance abuse and the criminal justice system. (D)

SOC 597 Directed Individual Project (4 Hours) Students work under an advisor on research project. Attention is given to the development of analytical writing and communication skills in scholarly research paper. Defense of paper is required. (D)

SOC 598 Internship (3 Hours) Students will obtain practical experience at one of the local or state correctional institutions. The internship will include supervised leadership assignments, administrative and supervisory functions in these settings with emphasis on acquisition of knowledge and service experience for juveniles and criminals. A weekly seminar during the internship will allow the students to share their field experiences with each other. (D)

SOC 599 Special Topics (3 Hours) Varying advanced sociological topics selected by the instructor for study in depth. Course may be repeated for credit for a maximum of nine semester hours provided registrations cover different topics. Topics announced in advance. (D)

SOC 600 Master's Thesis. (6 Hours) The candidate for the Master of Arts degree must present a thesis based on research conducted on a topic that is approved by his/her advisor. (D)

***CJ/SOC 620 Community Analysis.** (3 Hours) Various approaches to community; types of community; the structural and functional aspects such as leadership, social stratification, subgroups, values and norms. (F)

***CJ/SOC 622 Research and Statistics.** (3 Hours) Descriptive and inferential statistics will be reviewed and used to explore contemporary sociological issues. Methods of collection, maintaining, analyzing and reporting data will be addressed. (S)

CJ/SOC 635 Crime in the Urban Community. (3 Hours) This course will cover a wide array of topics on crime in the urban community. Most importantly, this course will seek to find solutions to "why" the crime rate is steadily rising in the urban community and what measures are taken to curb the crime rise. (S)

SOC 700 Methods of Alcohol/Drug Prevention in the Elementary School. (3 Hours) This course is designed to provide knowledge and skills in the prevention of alcohol and drug related problems. Emphases are placed on primary and secondary prevention strategies.

Specific prevention approaches appropriate for school and community settings are presented. (D)

*Courses above the 600 level may be taken for the Master of Arts in Sociology or as electives in the Educational Specialist degrees.

Faculty

Dr. J. Brockley, Associate Professor
Dr. M. Bernhardt, Assistant Professor
Dr. R. Lockett, Assistant Professor
Dr. S. Maneck, Associate Professor

The History Department offers both the thesis and non-thesis options for the Master of Arts Degree. The areas of concentration for the degree include: American, African-American, Global, African, and Public History and Oral History.

Mission Statement

The Department of History and Philosophy offers students the opportunity to pursue a course of study that prepares them to enter a range of professional paths and careers. These potential careers include teaching from elementary to high school to junior college to the four year university. Additional professional forays are possible in research and scholarship enterprises, public and leadership service and a welter of other pursuits, all requiring a demonstrated knowledge, appreciation and application of the human historical experience in response to an everchanging multi-cultural world.

The graduate History program's area of concentration include American, African-American, Asian, African, Latin American, Public, Women's and Disability History. In the areas of African-American, African Women's, Public and Disability History, the department has an especially impressive curriculum as well as an assembled coterie of talented teaching-research faculty.

Program Objectives

1. To use classroom instruction and relevant professional experiences, thereby, preparing majors to conduct historical research while acquiring the requisite knowledge, competencies and mastery essential to a history discipline concentration in a general liberal arts education.
2. To prepare students to either continue graduate study beyond the Master of Arts degree and/or engage in history related professional careers.
3. To prepare students to teach history in elementary and secondary schools and at the junior college level.
4. To serve the instructional needs of teachers, principals, and supervisors as required to maintain or improve their current teaching or leadership status.

5. To promote the scholarly study and investigation of the human historical experience as well as the dissemination of such research via both presentations at professional conferences and publication in the discipline.

Admission Requirements

1. Satisfying all admission requirements of the Division of Graduate Studies.
2. Completing a Personal Statement.
3. Application packet for the Graduate History Program.
4. Submitting a satisfactory score on the Graduate Record Examination, GRE.

Transfer of Credits

Up to nine semester hours of credits in significantly related courses may be accepted toward the M.A. Degree in History. The earned credits must be from a graduate history program at an accredited institution of higher learning.

Degree Requirements

1. Required Courses - History 545, Historical Criticism and Historiography; History 546, Historical Research.
2. Required number of hours for thesis option: 30; for non-thesis option: 36.
3. An M.A. student must complete a thesis or written project within two years after passing the Graduate Comprehensive Examination.
4. A written Comprehensive Examination is required for completion of the M.A. degree in history. The written examination is given at the time designed by the Graduate School.
5. All M.A. students in history are required to pass a foreign language written examination. If, however, a student has taken and passed the first year sequence of a foreign language (101, 102) as an undergraduate and averaged a grade of "B" or better, the examination is usually waived. Additionally, specified course(s) in computer science may be used to satisfy the foreign language requirement. If one chooses this option, it must be agreed upon by both the student's advisor and the Department Chair. All candidates must satisfy the language requirement before graduation.
6. A student who has demonstrated some academic deficiencies and is provisionally admitted to the graduate program may be asked to take an undergraduate course(s) or to enroll in a structured remedial program. In this way, the Department increases the likelihood of the student successfully completing the program and receiving the Master of Arts degree.
7. After completing all class requirements for the degree, M.A. candidates who opted for a thesis option must register for History 590- "Thesis". Thesis degree candidates must initially complete six (6) hours of History 590. If the thesis is not completed after the initial six hours, a student will

need to register for one (1) hour of History 590 until all degree requirements have been satisfied. Non-thesis candidates instead of a thesis are required to complete a written research project. Until the project is completed and approved by the student's project committee he/she is required to be registered for one (1) hour of History 590. A non-thesis M.A. candidate must complete the project within one year of completing the required course work.

Required Courses

HIST 545 Historical Criticism and Historiography	3
HIST 546 Historical Research	<u>3</u>
<i>Hours</i>	<u>6</u>

DESCRIPTION OF COURSES

HIST 500 Seminar in African History. (3 Hours) A study of pre-colonial African History. The course emphasizes African Civilizations before the coming of Europeans.

HIST 501 Seminar in African History. (3 Hours) The study of the European scramble for Africa and the subsequent division of the continent's societies into colonies. The course explores as well the emergence of nationalism in Africa and the struggle for independence that it wrought.

HIST 502 Contemporary Africa. (3 Hours) A study of the emergence of Africa since 1945 with emphasis on the role of nations of the continent in both regional and world affairs.

HIST 505 Introduction to Public and Applied Historical Studies. (3 Hours) An introduction to selected subjects and skills related to the use of history in the public and private sectors.

HIST 506 Introduction to Museology. (3 Hours) A survey of the history of American museums and the principles of museum management.

HIST 507 Archives and Records Management. (3 Hours) A survey of the principles of archive and resource management with an emphasis on the study of material culture.

HIST 508 Survey of Art and Architecture. (3 Hours) A survey of American art and architecture with emphasis on the evolution of the American house.

HIST 509 Historical Archaeology. (3 Hours) Introduction to archaeology with an emphasis on material culture.

HIST 510 Discovery and Preservation of Local, State, and National History. (3 Hours) Survey of techniques and methodologies for researching and writing the histories of various political and cultural subdivisions. The subdivisions that will serve as venues for the historical studies include and range from local municipalities, small towns and counties to the state, region and nation.

HIST 511 Constitutional History of the United States (3 Hours) An examination of the origin and development of American political parties as agencies of popular government. Other topical issues explored include: the growth of the nation's judicial system,

nationalism, states rights, and other major constitutional issues and crises of the period of antebellum America.

HIST 512 Constitutional History of the United States (3 Hours) An analysis of major developments in American constitutional history from the Civil War to the 21st Century. Special attention is devoted to the expansion of federal government.

HIST 513 American Revolution and the Federal Period. (3 Hours) The course chronicles and analyzes the origins of the United States via the American Revolution and the nation's post-revolutionary constitutional developments.

HIST 514 From Jackson to Lincoln. (3 Hours) A survey of America's Antebellum era. The course emphasizes the major historical developments of the epoch which included various social reform movements, sectionalism, slavery, Indian Removal, manifest destiny, a religious awakening movement and the nation's drift toward Civil War.

HIST 515 Civil War and Reconstruction. (3 Hours) The course provides a broad and yet penetrating overview of many developments, social, economic, and political, that defined what was surely the most tumultuous era in American History.

HIST 516 Recent American History—Post World War I Era to the present. (3 Hours) The course provides for the study of a wide range of historical developments that informed American History from the end of World War I to dawn of the 21st century.

HIST 517 History of the American Military. (3 Hours) A survey of the American military experience and establishment from the 17th through the 20th century.

HIST 518 Vietnam and the American Society. (3 Hours) A study of the impact of the Vietnam War on American society.

HIST 519 American Intellectual and Cultural History. (3 Hours) A survey of the major currents of thought and gallery of ideas that fueled America's intellectual and cultural development since the 17th century.

HIST 520 Diplomatic History of the United States. (3 Hours) An examination of the development and evolution of American foreign policy since 1776. America's transition to active participation in world affairs between the 18th and end of the 20th century will be emphasized.

HIST 521 History of Women in America. (3 Hours) An examination of the problems, challenges and experiences of American women from the colonial period to the 21st century.

HIST 522 Afro-American History. (3 Hours) Designed to offer an examination and an analysis of the historical participation of African descended people in American life and national development.

HIST 523 Seminar in Afro-American History. (3 Hours) A research intensive course offering optional study of either the antebellum period, Civil War era, Reconstruction epoch or Post-Reconstruction era in 19th century American History.

HIST 525 History of the Frontier. (3 Hours) The concept of the Frontier is perhaps the most important

idea in U.S. History. Is the Frontier a process, a place, or perhaps both? This question has been a source of endless debate. In this course we will examine the concept of the Frontier and the corresponding region of the United States it is most often associated with: the American West. Together, the Frontier and the West have a long, complex history that is often difficult to separate from myth - a history this course will explore from many different angles.

HIST 528 War, Depression, and Recovery, 1917-1941. (3 hours) The period of the 1920s and 1930s was an age of extremes in U.S. History. Situated between two World Wars, the United States experienced an era of economic growth and prosperity followed by the worst depression in the nation's history. These extremes dramatically shaped the social, cultural, and political events of these decades.

HIST 529 Contemporary United States, 1941 to the Present. (3 hours) The Postwar Era in the United States has been marked by social upheaval. Marginalized people, including African Americans, Mexican Americans, Native Americans, women, and homosexuals, fought for their civil rights. The Cold War pushed the world to the brink of annihilation. Vietnam divided the nation. The Counterculture challenged the status quo. The contrast between the Rust Belt and the Sun Belt signified economic, demographic, and political changes. Liberals launched a political revolution and Conservatives a counterrevolution in response. This course will address these social, cultural, and political developments, and others, that have taken place over the last 65 years.

HIST 530 Seminar in History of the South. (3 Hours) The course is organized around readings and research into the socio-demographic, political and economic developments of the 19th and 20th century American South.

HIST 531 History of the Caribbean. (3 Hours) A study of Caribbean historical development from the 17th century to the end of the 20th century. Socio-cultural, economic and political developments in the region will be emphasized.

HIST 532 Seminar in Latin American History. (3 Hours) A readings and research centered course focusing on the historical development of Latin America in the Western Hemisphere. Primary emphasis will be given to the impact of Spanish culture in the region, patterns of political, economic, social and intellectual ferment as well as historic and enduring problems specific to Latin America.

HIST 533 Advanced Research in Mississippi History. (3 Hours) A research intensive course devoted to the study of special topics in post-Civil War, late 19th and 20th century Mississippi History.

HIST 540 British Empire: Imperialist Experiment. (3 Hours) A course that chronicles Britain's development as the World's pre-eminent imperialist power between 1880 and 1970. The major focal points in the course will include Britain's colonial exploits in Africa, Southeast Asia and elsewhere along with the resulting development of a British Commonwealth of territorial possessions.

HIST 541 Europe from Napoleon to Bismarck 1815-1871. (3 Hours) A period course that explores the major historical developments in Europe between the defeat of Napoleon and the emergence of Otto von Bismarck.

HIST 542 European Expansion and Diplomatic Relations. (3 Hours) A course that offers study of the imperialist expansion of European nations into Africa and Asia during the late 19th and early 20th centuries. Additionally, the course chronicles the diplomatic relations and international conflicts associated with Europe's expansion and the resulting impact on World Affairs.

HIST 543 Seminar in European Imperialism. (3 Hours) A course offering reading and research intensive study of 19th and 20th century European imperialism, beginning with the scramble for Africa.

HIST 544 World War II. (3 Hours) An examination of World War II from its origins in a policy of appeasement to wartime events and the dropping of the atomic bomb.

HIST 545 Historical Criticism and Historiography. (3 Hours) A course devoted to the studies of theories of historical criticism and their application in the analysis and writing of history. Selected works of historical scholarship are used for analysis, illustration and comparison. (Required)

HIST 546 Historical Research. (3 Hours) A course designed to assist students, especially those completing a thesis, in honing both their research and writing competencies. (Required)

HIST 547 Quantitative Methods in History. (3 Hours) The application of statistics and computer techniques to historical research and writing.

HIST 550 Oral History. (3 Hours) Designed to expose students with the techniques, methodologies and preparation of advanced projects in oral history.

HIST 550W Oral History Workshop. (3 Hours) Designed to expose students to the advanced methodologies, scholarship and research relative oral history through specific topics, special consultants, and mass media presentation.

HIST 551 Reading in Special Topics in History. (3 Hours) Designed for independent reading and critical analysis of selected subjects and historical issues in American or European history.

HIST 552 Problems in American History. (3 Hours) Designed to allow students to perform creative research in strategic areas and on topics such as women, reform movements, history of ideas, urban and regional planning, African-American experience, and American economic history.

HIST 554 Renaissance and Reformation Eras (3 Hours) A survey of the political, economic, social, scientific, intellectual, and ecclesiastical developments in Europe during the fourteenth and fifteenth centuries, culminating with the Reformation and counter-Reformation movements of the sixteenth century.

HIST 555 History of Southeastern Asia. (3 Hours) A survey of the roles of individual countries of the region in world politics, and affairs including an analysis of the Vietnam War.

HIST 556 Contemporary Middle East. (3 Hours) Surveys of the modern near east beginning with the dissolution of the Ottoman Empire, the rise of Zionism and Arab Nationalism, the pre-World War II Palestine conflict, the establishment of the State of Israel in 1948 and the subsequent Arab-Palestinian wars of the past half century.

HIST 557 Contemporary Middle East Seminar. (3 Hours) Designed for students interested in research in Middle East history.

HIST 590 Thesis Writing. (3 Hours) The research and writing of a thesis under the direction of a major professor and advisor. Prerequisites: Twenty-four hours of graduate credit.

HIST 591 History Internship. (3 Hours) Provide History Majors the opportunity to intern with a public or private agency or organization which may result in job placement possibilities.

HIST 652 Urban History. (3 Hours) Focuses on the growth of urbanism and the impact urbanization on American life and culture.

DEPARTMENT OF POLITICAL SCIENCE

Dr. D'Andra Orey, Professor and Chair

Telephone: (601) 979-2136

Fax: (601) 979-2904

e-mail: byron.d.orey@jsums.edu

Faculty

Dr. M. Deardorff, Professor

Dr. E. Nwagboso, Associate Professor

Dr. H. Park, Assistant Professor

The Department of Political Science offers a graduate program leading to the Master of Arts in Political Science. Students may take the thesis or non-thesis routes to the M.A. degree.

Mission Statement

Working in partnership, students and faculty in Jackson State University's M.A. program in Political Science enter the public square and observe, debate, and analyze the effective uses of power in a democratic society and in the larger global community. The graduate program serves the public interest by preparing leaders for service in institutions of public life and contributes to the development and understanding of the discipline of political science. Our urban location in the capital city allows us to utilize a rich laboratory for applied research, as well as observation of and participation in politics.

Program Objectives

In the M.A. Political Science program at Jackson State University students will:

- ◆ Examine and critique the operation of government institutions and political participation;
- ◆ Learn to use the varied texts, tools, technologies, and methods of the political scientist;
- ◆ Increase understanding of divergent views and unpopular beliefs, gaining competence in constructive criticism of political and social problems;
- ◆ Improve their ability to organize ideas and present them orally and in writing;
- ◆ Participate in taking practical action toward achieving their political ideals; and by doing so;
- ◆ Develop their own personal political philosophy.

Admission Requirements

Prospective students must satisfy the requirements for admission to the Division of Graduate Studies. The Department of Political Science requires the submission of a statement of purpose.

Requirement for Degree Candidacy

The comprehensive examination and completion of the required political science courses are required for a student to be admitted to candidacy for the M.A. in Political Science. The comprehensive examination consists of written essay questions in three fields of

political science. It should be taken and passed by the end of the second year.

Retention Requirement

A minimum grade point average of 3.00 (on a 4.00 scale) on graduate work earned in the degree program is required.

Degree Requirements

The Department offers two routes to the M.A. in Political Science: the thesis route and non-thesis route. Ideally suited for students who will eventually pursue a doctorate, the thesis route requires a minimum of thirty semester hours of coursework and six credits of thesis culminating in the writing and defense of a thesis. The non-thesis route requires the completion of a minimum of thirty-six semester hours of coursework and the submission of a significant research paper.

All students must successfully complete the following and maintain an overall 3.00 GPA (on a 4.00 scale) in order to earn the M.A. degree in Political Science.

1. Complete 15 hours of required courses, (see below).
2. Take and pass the Graduate English Competency Examination.
3. Take and pass the Graduate Area Comprehensive Examination in three fields.

Students pursuing the thesis option must also complete the following requirements.

1. Complete at least fifteen (15) hours of electives in consultation with the major advisor.
2. Write and defend orally a masters' thesis.

Students pursuing the non-thesis option must also complete the following requirements.

1. Complete at least twenty-one (21) hours of electives in consultation with the major advisor.
2. Write and submit a significant research paper.

Core Courses		Semester
Course	Title	Hours
PS 506	Methods and Approaches to Political Science	3
PS 507	Political Inquiry and Research	3
PS 509	African Political Systems	3
PS 513	History of Political Philosophy, <i>or</i>	
PS 514	History of Political Philosophy	3
PS 532	Blacks and the American Political System	3

DESCRIPTION OF COURSES

PS 506 Methods and Approaches to Political Science. (3 Hours) A review of traditional, behavioral and post behavioral approaches to political science, methods of research and explanation. A required course.

PS 507 Political Inquiry and Research. (3 Hours) An inquiry into concepts and methods of social science in general and of political science in particular; the philosophy of science; presuppositions, aims and

history of procedures and methods, research techniques, sources, bibliography and the presentation and publication of investigative results. A required course.

PS 508 Politics of African Independence Movements. (3 Hours) Examination of the motivations, methods, philosophies and politics of the African independence movements including the influences of Pan-Africanism, the role of political parties, the challenges of nation-building, and the impact of external actors (i.e. colonial powers, United Nations, Organization of African Union, US and USSR).

PS 509 African Political Systems. (3 Hours) This course includes traditional African political systems and their developments; the impact of colonialism on the systems, African nationalism, and the politics of independent Africa.

PS 510 Third World Ideologies. (3 Hours) Analysis of the ideologies generated among the political theorists of the new nations of the post-colonial period with attention devoted to ideologies of revolution, national independence, national development, international alignment, with an evaluation of the validity of third world ideas in international political theory.

PS 511 Asian Political Theory. (3 Hours) An examination of the foundation and development of non-European political thought with special attention to Asian political ideas and the impact of these ideas on contemporary politics of liberation.

PS 512 Black Political Theory. (3 Hours) A study of Black political theory that has developed since the end of the civil rights period with an evaluation of new concepts in Black political theory and the links between these concepts and the historical problems considered in Afro-American political theory.

PS 513 History of Political Philosophy. (3 Hours) An examination of the foundation of political philosophy with emphasis on the ancient philosophers through the Middle Ages, such as given in the works of Plato, Aristotle, Polybius, Cicero, Epictetus, Marsilio of Padua and Machiavelli.

PS 514 History of Political Philosophy. (3 Hours) An examination of political philosophy with emphasis on concepts of secular and temporal authority, tyrannical government, social contract, revolution, and the principal of utilitarian political philosophy. Attention will be given the works of Martin Luther, John Calvin, Stephen Julius Brutus, Bodin, Hobbes, Locke, Montesquieu, Rousseau, Burke, and Bentham.

PS 515 Modern Political Philosophy (3 Hours) A history of political philosophy with attention given to the dilemma of democracy with emphasis on liberty and equality, liberalism-old and new, revolutionary communism, democratic socialism, and the welfare state, and psycho-analysis based theory with attention given the works of Tocqueville, Mill, Hegel, Mussolini, Spencer, Keynes, Marx, Engels, Lenin, Attlee, Lord Lindsay, Gaitskell, Myrdal, Freud and Einstein.

PS 516 The Administrative State (3 Hours) Political effects of taxes, public debt, and public expenditures on resources allocation, employment, and income distribution, fiscal and monetary policy; economic stabilization.

PS 517 Seminar in State Politics. (3 Hours) Investigation of organization, function, political dynamics and policy outputs of state governmental systems focusing on the specific features of Mississippi governmental structure and political institutions.

PS 519 Problems of State Administration. (3 Hours) Administrative operations in state government; emphasis on planning and research, purchasing and contracting, personnel and financial administration reporting and public relations.

PS 520 Civil Rights Laws and Affirmative Action. (3 Hours) An extensive study of the Civil Rights Law of 1964 (as amended), the Voting Rights of 1965 (as amended), the Civil Rights Act of 1969 (as amended) as well as affirmative action procedures designed to bring about equal opportunity.

PS 521 Black Perspectives in Public Administration. (3 Hours) Public Policy problems, perceptions and experiences of Blacks are examined along with the policy process. Broader questions concerning systematic change, structural transformation and historically built-in dilemmas are examined. Clarification of the relationship between bureaucracy and the Black client is explored.

PS 522 Urban Management and Urban Services. (3 Hours) Prerequisite: PS 371. This course examines and analyzes the methods by which local public services are designed, delivered and evaluated.

PS 525 Urban Politics. (3 Hours) Prerequisite: PS 450. Focus on community power and decision-making, political leadership; the relationship of citizens to their government; the urban bureaucracy, citizen participation, and delivery of services.

PS 530 Seminar on the American Presidency and Civil Rights. (3 Hours) An in-depth analysis of the role of the American presidency in dealing with civil rights problems, particularly discrimination against Blacks in the United States.

PS 531 The Judicial Process and Policy Making. (3 Hours) Basic concepts of jurisprudence, study of the American legal system, an analysis of federal, state and local judicial processes and decision-making, actors, and their roles in the judicial process with materials and research in public law.

PS 532 Blacks and the American Political System. (3 Hours) An assessment of the position of Blacks in the political system of the United States, both historical and contemporary, with special attention to alternative political strategies for the present political epoch. Special emphasis will be placed on urban political systems. A required course.

PS 533 Constitutional Law and Politics. (3 Hours) The role of courts in American society with respect to such questions as legitimacy, conflict resolution, and representation, also a study of courts as political institutions, as reflected in revolution of doctrine with respect to federalism, powers and limitations on government, and advancement of individual and group interests and rights.

PS 534 Comparative Public Law and Policy. (3 Hours) Anthropological, philosophical, historical, and

behavioral approaches to the study of public law and conflict resolution.

PS 535 Constitutional Law and Separation of Powers. (3 Hours) An analysis of leading Supreme Court decisions dealing with the use of and curbs upon federal powers to enact economic and social legislation with special attention to urban issues. Resolution of conflicts engendered by the federal system and separation of powers also will be studied.

PS 537 Urbanization, Social Change and Political Power. (3 Hours) This course will explicitly examine the political effect of urbanization and its attendant social changes as reflected in the political culture of different parts of the United States and the world.

PS 538 Community Political Processes. (3 Hours) This course is an analysis of political consequences of the underlying socio-economic forces operating in urban areas.

PS 539 Urban Political Structures. (3 Hours) This course examines the rise of Black politics in urban areas, relations between whites and Blacks in the urban city, as well as the concept of community, and particularly, the changing political process.

PS 540 Black Political Parties. (3 Hours) The rise and development of separate Black political entities will be examined both historically and in the present, and attention will be focused on types of Black parties and the rationale for their organization and development.

PS 541 Black Politics and Public Policy. (3 Hours) An analysis of inter-relationships between Black politics and the nature, operations, mechanisms and consequences of governmental policy-making in the United States, identification and analysis of problems of policy formation, mobilization, application, influencing, controlling, and exercising power in government and determining public policy outcomes. (F, Sum.)

PS 542 Politics of the Developing States. (3 Hours) An examination of the political processes in the developing countries and a study of the general problems arising in the transition from traditional societies to modern industrial states in an effort to describe the typical patterns of political change.

PS 543 Government and Politics of Latin America. (3 Hours) An examination of Latin American political institutions and political forces with special emphasis on the role of the military, the church and the legacy of European and United States exploitation.

PS 544 Government and Politics of Southeast Asia. (3 Hours) A survey of politics in the countries of Southeast Asia, to include the process of nation-building and modernization and a study of authority in traditional society, colonial rule and the impact of the west, the rise of nationalism and the struggle for independence, the contemporary political systems, politics, and processes with particular attention to the elites and their ideologies and the institutions of government.

PS 545 Chinese Foreign Policy. (3 Hours) An analysis of Chinese capabilities, intentions and strategies in world affairs, the institutions of foreign policy making and implementation in achieving Chinese goals.

PS 546 Comparative Political Movements. (3 Hours) An analysis of political forces, successful or not, that have sought to gain control over the established order, with special attention to political movements in the Third World and to those of Black people in the United States.

PS 547 Western Political Systems. (3 Hours) Prerequisite: PS 336. The politics of Western Europe, Great Britain, France and Germany, data and analysis of changing class structures, institutional (especially parliamentary) breakdown, recurrent mobilization of workers and students, repression and manipulation as governmental responses to crises, growing bureaucratization, authoritarian leadership in France and Germany. Emancipating efforts and subculture are presented on a comparative basis.

PS 550 Seminar In Southern Politics. (3 Hours) Southern politics in both state and nation, and in the international arena, a systematic and comprehensive approach with focus on African Americans in the region.

PS 556 The Political Economy of African States. (3 Hours) This course is designed to introduce students to the nature of the political economy of many African States. The examination of the infrastructure, the socio-economic base and the socio-political ramification of African States in the world economy.

PS 564 State and Local Politics. (3 Hours) A comparative appraisal of state and local politics, organization and processes including problems of intergovernmental relations.

PS 565 International Relations. (3 Hours) The nation-state system and conceptions of the national interest in modern world politics, forms and distribution of power and the adjustment of international conflict.

PS 566 Seminar-Modern African Governments and Politics. (3 Hours) This course is an in-depth study of selected African governments and their politics, including their social and economic problems.

PS 567 Colloquium-African Political Thought and Ideology. (3 Hours) Examination of social and political thought of African peoples and their manifestations in politics including the development of Pan-Africanism and African communalism (i.e. Ujaama), ideological underpinnings of the liberation movements and the role of African intellectuals and writers.

PS 570 Third World Nations and International Politics. (3 Hours) The role, policies, actions and techniques of third world nations in the international arena are thoroughly analyzed for trends and continuities.

PS 574 International Organization. (3 Hours) A study of the international system, with emphasis on the institutional forms of international order and the functions and processes of global and regional organizations.

PS 575 International Law. (3 Hours) The nature and functions of international law in interstate relations, with special emphasis on cases, documents and other original material.

PS 581 Metropolitan Areas and Community Power Analysis. (3 Hours) An examination of the national and

urban power structures in the United States, community power structures, studies, models of urban political process. Elitism and pluralism and the implications for the Black community, the politics of metropolitan reorganization and its impact on Black politics, the metropolitan areas in the American federal system, and suburban-central city conflicts.

PS 585 Seminar in Urban Problems. An analysis of major urban problems, strategies and approaches proposed for their resolution, historical perspective and political implications. Reformist efforts of government and private efforts will be examined with special emphasis on Post-New Deal developments and the impact on the Black community.

PS 589 Seminar In American Political Process. (3 Hours) The factors, institutions and actors in the American political arena are analyzed, as well as the structures and political organizations from the view of all groups within the pluralistic society.

PS 596 Independent Study. (3 Hours) The student is allowed to select research which will be beneficial to his/her program. The topic must be approved by the adviser and the instructor selected by the student for the research.

PS 597 Internship (3 Hours) Prerequisite: Core Courses. Individual work experience in government agencies.

PS 598 Thesis (3 Hours) The candidate for the Master of Arts degree presents a Thesis embodying the results of his research. The candidate chooses his problem but approval by his adviser is required.

DEPARTMENT OF PSYCHOLOGY

Dr. Richard Chiles, Assistant Professor and
Interim Chair

Faculty

Dr. P. Banks, Associate Professor

Dr. T. Bell, Assistant Professor

Dr. D. Bishop-McLin, Associate Professor

Dr. K. Hudson, Assistant Professor

Dr. C. Moreland, Assistant Professor

Dr. B. Nevels, Assistant Professor

Dr. D. Pate, Associate Professor

Dr. K. Sly, Associate Professor

Dr. B. Williams, Assistant Professor

Program Objectives and Mission

The Department of Psychology offers a Ph.D. degree in Clinical Psychology. The mission of the doctoral program is:

1. To produce highly skilled, license eligible graduates who can function as both scientists and practitioner of professional psychology.
2. To increase the awareness, knowledge, and skills of students, faculty, and professionals in the area of multicultural psychology.
3. To support the progress of graduate students from diverse racial and ethnic backgrounds, as well as immersing graduate students from the dominant culture in multi-cultural experiences within the community.
4. To provide field experiences designed to meet the diverse psychological, health, and service needs of ethnic minority populations.

Individuals applying to our a Ph.D. in Clinical Psychology should be aware that the departmental faculty, supervisors, and administrators have a professional, ethical, and potentially legal obligation to ensure that graduates from this program are competent to engage in an ethical, effective, and appropriate service, research and practice in the profession of psychology. This requires the administrative authority of the Program Faculty, training staff, supervisors, and administrators only to admit, advance, graduate, or recommend student-trainees without demonstrable problems (e.g., cognitive, emotional, psychological, interpersonal, technical, and ethical) that may interfere with professional competence to other programs, the profession, employers, or the public-at-large.

Participants in this program will be guided by a curriculum anchored in the cumulative body of psychological knowledge with a firm basis in statistics, research design, and experimental methodology. The program develops in the student, the knowledge and

skills required for effective functioning as an empirically-oriented clinical psychologist in diverse settings. This is accomplished through a sequence of formal clinical courses, distinguished by in-depth exploration of multicultural issues and exposure to ethnic minority communities, including interdisciplinary and inter-organizational collaboration and consultation.

The process through which this mission will be accomplished is consistent with the goals and mission of Jackson State University as a comprehensive university. An essential part of the program is students and faculty who are committed to multicultural issues and who are comfortable with objective assessment and systematic intervention on both individual and community levels. The department strives to support students and faculty involved in basic and applied research, while providing a challenging intellectual environment.

Accreditation

The program is accredited by the American Psychological Association. If you have questions about the graduate program's accreditation status or the accreditation process feel free to contact the responsible APA Office in writing or by Telephone:

Office of Program Consultation and Accreditation
Education
American Psychological Association
750 First Street NE
Washington, DC 20002-4242
(202) 336-5979

Admission Requirements

A major goal of our program is retention and graduation of admitted applicants who have the educational foundation, motivation, and personality characteristics required to successfully complete an intensive and rigorous doctoral program. Applicants who have passed the initial screening are required to participate in a personal interview conducted by the Doctoral Admissions Committee, interested faculty, and currently enrolled doctoral students. Admission is, of necessity, competitive. A limited number of slots (6 to 8) are available annually with entry in the fall semester only. Because of the competitive nature of the process, meeting minimal standards does not guarantee admission.

The minimum requirement for admission is a Bachelor's degree from an accredited institution with at least 24 semester hours of psychology coursework in these psychology subject domains: abnormal, developmental, experimental or research methods, learning or cognition, biological or physiological, personality, social, and statistics.

1. The applicant must provide official transcripts of all post-secondary academic work sent from institutions directly to the Clinical Psychology Admissions Committee.

2. The applicant must provide an official copy of the GRE test scores sent from ETS directly to the Admissions Committee. The program does not use specific GRE cut-off scores in the admission process, however, submission of GRE scores prior to the application deadline is required. The GRE subject test in Psychology is also required.
3. A completed and signed "Informed Consent to Participate in the Admissions Screening, Evaluation and Interview Process" form and the "Clinical Psychology Doctoral Program Application."
4. A vita or resume must be submitted to the Admissions Committee.
5. Three letters of recommendation from individuals qualified to assess the applicant's academic and professional potential must be submitted directly to the Admissions Committee. A minimum of two letters must be written by faculty members or faculty mentors familiar with your academic performance; the third letter may be written by qualified mentors who have supervised previous clinical or research work. Please send no more than four letters. All letters must be typed and accompanied by the "Clinical Psychology Evaluation and Recommendation Form."
6. An acceptable score of the Test of English as a Foreign Language (TOEFL) must be submitted, if applicable.

The following application materials and other related information are available for download at www.jsu.edu/psychdept/gradapply/index.htm:

- a. Clinical Psychology Doctoral Program Application;
- b. Clinical Psychology Recommendation and Evaluation Form;
- c. Clinical Psychology Assistantship Application;
- d. Clinical Psychology Program Brochure, and;
- e. Disclosure of Education and Training Outcomes Statement.

Using all admission data (applicant files, other publicly available documents and interview data) the Clinical Admissions Committee evaluates the prospective doctoral applicant along the following domains:

1. Academic aptitude for doctoral-level studies;
2. Understanding and appreciation of diversity issues;
3. Understanding and appreciation of the program's requirements;
4. Previous professional or training experience in a clinical setting;
5. Previous research experience and dissemination history;
6. Psychological suitability to perform as a Clinical Psychologist;
7. Verbal communication skills;
8. Interpersonal relations skills;
9. Professional demeanor;
10. Evidence indicating a situation where admission to the program places the applicant or program faculty

at risk for conflict with the Ethical Principles of Psychologist and Code of Conduct (APA, 2002);

11. If necessary, additional clarification of issues observed in the application materials.

Criminal background checks are not currently required as part of the admission process to the Clinical Psychology Program at Jackson State University. However, all applicants should be aware that the various agencies that provide practicum, externship and pre-doctoral internship training opportunities may require a criminal background prior to placement. These agencies are external to the University and may set or revise placement policies at any time; a background check which reveals professional misconduct or a criminal conviction could result in a student's ineligibility for initial or continuing enrollment in clinical training courses. The Ph.D. in Clinical Psychology cannot be completed without the successful completion of all coursework.

Readmission to the Program

Inactive and/or former students of the program must consult with the Director of Clinical Training regarding current policies regarding readmission.

Transfer Credits

For students with previous graduate coursework in psychology, a maximum of 15 credit hours (typically the equivalent to five courses that are three semester hours each) may be transferred provided that the coursework has been completed within eight years of the first enrollment with a grade of "B" or better. Any course transferred must be equivalent to 500 - 700 level courses at Jackson State University and should include coverage of pertinent multicultural issues commensurate with the program's focus and expectations.

Program policy is to allow up to two of these courses to be transferred as satisfying specific course requirements listed under the General Core or Research Core. No more than one of these courses to be transferred as satisfying specific course requirements listed under the Multicultural/Diversity Core. Any remaining courses (no more than two) can be transferred as satisfying elective requirements. Any transfer courses to be considered as satisfying General Core, Research Core, or Multicultural Core requirements must have PSY or equivalent prefix. Equivalent coursework for the Clinical Core are not accepted for transfer credit.

Degree Requirements

The Ph.D. program is a full-time, on campus program typically requiring a minimum of five years of post-baccalaureate study, including the completion of Dissertation Research and a one-year, full-time predoctoral Clinical Internship. This five-year minimum may be shortened under certain circumstances, but in all cases a minimum residency requirement of three years must be met. Some courses will only be offered during summer sessions. A student is expected to complete all requirements for the Ph.D. degree and graduate within

eight years of the date of first registration. (At present the Department does not offer a Master's degree.)

The Ph.D. program requires 18 hours of General Core Courses, 16 hours of Research Core Courses, 23 hours of Clinical Core Courses, 9 hours of Multicultural/Diversity Core Courses, 20 hours of Practica and Externship Courses, 9 hours of Elective Courses, 9 hours of Dissertation Credit, and a one-year internship at an APA-accredited/APPIC-member pre-doctoral training program (during which the student registers for at least 2 hours of Internship Credit).

During the third year of study, the student must pass a written qualifying examination. The student must pass this examination to be admitted to candidacy for the Ph.D. The student must also pass an oral clinical-competency examination and defend their dissertation proposal before applying for a pre-doctoral internship position.

For a detailed explanation of program requirements consult the Department's *Policies and Procedures Handbook*.

Curriculum Outline

Course Title	Semester Hours
I. General Core	
PSY 710 Theories of Personality	3
PSY 711 Learning and Cognition	3
PSY 712 Advanced Developmental Psychology	3
PSY 713 Biological Psychology	3
PSY 714 Social and Cognitive Bases of Behavior	3
PSY 715 History and Systems	<u>3</u>
<i>Hours</i>	18
II. Research Core	
PSY 700 Research Seminar	1
PSY 730 Research Methods	3
PSY 731 Advanced Statistics I	3
PSY 732 Advanced Statistics II	3
PSY 733 Multivariate Methods I	3
PSY 734 Psychometrics	<u>3</u>
<i>Hours</i>	16
III. Clinical Core	
PSY 740 Psychopathology	3
PSY 742 Cognitive Assessment	3
PSY 743 Personality Assessment	3
PSY 750 Ethics in Psychology	1
PSY 751 Psychotherapy	3
PSY 752 Behavior Therapy	3
PSY 753 Group Therapy	3
PSY 756 Assessment Principles	<u>3</u>
<i>Hours</i>	23
IV. Multicultural/Diversity Core	
PSY 720 Cross-Cultural Psychology	3

The student must take 2 of the following courses:

PSY 721	Psychology of African-Americans	3
PSY 722	Psychology in the Urban Environment	3
PSY 723	Psychology of Gender	<u>3</u>
	<i>Hours</i>	9

V. Practicum and Externships

PSY 735	Research Practicum I	1
PSY 736	Research Practicum II	1
PSY 760	Clinical Practicum I	3
PSY 761	Clinical Practicum II	3
PSY 762	Clinical Practicum III	3
PSY 764	Externship I	3
PSY 765	Externship II	3
PSY 766	Externship III	<u>3</u>
	<i>Hours</i>	20

VI. Electives

The student must take 3 of the following courses:

PSY 741	Psychopathology of Childhood and Adolescence	3
PSY 744	Neuropsychological Assessment	3
PSY 745	Forensic Psychology	3
PSY 755	Psychopharmacology	3
PSY 770	Advanced Seminar	3
PSY 771	Human Sexuality	3
PSY 772	Health Psychology	3
PSY 773	Theory and Treatment of Addictive Disorders	3
PSY 774	Group Processes	3
PSY 775	Marital and Family Therapy	3
PSY 776	Neuro-Behavior Science	3
PSY 777	Multivariate Methods II	<u>3</u>
	<i>Hours</i>	9

VII. Dissertation Research

PSY 790	Dissertation Research	<u>var.</u>
	<i>Hours</i>	9

VIII. Predoctoral Internship

PSY 799	Internship	<u>var.</u>
	<i>Hours</i>	2

Total Required Hours 106

DESCRIPTION OF COURSES

PSY 700 Research Seminar* (1 hr) Reviewed and discussion of ongoing departmental research project; literature review of research topics of interest. The seminar is intended to assist the student in developing research ideas for implementation.

PSY 710 Theories of Personality (3 hrs) Consideration of the major theoretical orientations concerning personality and the evidential basis for each.

PSY 711 Learning and Cognition (3 hrs) Research and theory in human and animal learning, memory, and cognition.

PSY 712 Advanced Developmental Psychology (3 hrs) A study of the biological, social, and cultural factors

affecting life-span human development. A cross cultural perspective will be emphasized.

PSY 713 Biological Psychology (3 hrs) Physiological bases of learning and motivation; nervous system structure, function, and disorder in relation to behavior.

PSY 714 Social and Cognitive Bases of Behavior (3 hrs) Theory and research on attitude formation and change, attributional styles, prejudice, interpersonal perception, group dynamics, self regulation, and cognitive styles.

PSY 715 History and Systems (3 hrs) Historical evolution of psychology from philosophical antecedents to the development of major systems and theories.

PSY 720 Cross Cultural Psychology (3 hrs) An examination of research and practice regarding assessment and treatment of culturally diverse populations with particular emphasis on the cultural context of etiology and course of psychological disorders.

PSY 721 Psychology of African-Americans (3 hrs) A study of the psychological literature pertaining to the cultural, social, economic and political realities of African-Americans; a critical analysis of the development of Black Psychology and its contributions to clinical psychology.

PSY 722 Psychology in the Urban Environment (3 hrs) The city as an environment, personal space and territoriality, crowding, noise, crime, drugs, and other urban hazards. Special problems of minorities in urban settings.

PSY 723 Psychology of Gender (3 hrs) Research and theory regarding gender differences and similarities.

PSY 730 Research Methods (3 hrs) An in depth study of research methodology with emphasis on experimental approaches. The course covers basic within and between group experimental designs, mixed designs, single subject experiments, non experimental research (correlational methods, case studies, meta-analysis) and program evaluation. Research ethics are stressed. Further, students are encouraged to begin developing a topic for their second year paper.

PSY 731 Advanced Statistics I (3 hrs) Elements of probability theory, discrete and continuous random variables and their distributions, principles of estimation, hypothesis testing, introduction to regression and analysis of variance, computer applications.

PSY 732 Advanced Statistics II (3 hrs) Advance topics in regression and analysis of variance, analysis of covariance, non-parametric procedures, computer applications, Prerequisite : PSY 731

PSY 733 Multivariate Methods I (3 hrs) Multivariate analysis of variance and covariance, canonical correlation, factor analysis, discriminant analysis, selected advanced topics. Prerequisites: PSY 731, 732.

PSY 734 Psychometrics (3 hrs) Theories of measurement; evaluation of psychological assessment processes; test construction, validation, uses, problems and social implications. Prerequisites: PSY 731, 732, or equivalent.

PSY 735 Research Practicum I* (var.) Supervised experience conducting a psychological research project. The student will review literature, conceptualize a research problem, formulate a research hypothesis and

design a study to test it, execute the study, analyze the data, and write the second year paper. May be repeated.

PSY 736 Research Practicum II* (var.) Continuation of PSY 735. May be repeated. Prerequisite: PSY 735.

PSY 740 Psychopathology* (3 hrs) Etiology, epidemiology and dynamics of behavior and personality disorders: Theory, research, diagnosis and treatment. Introduction to DSM IV as a diagnostic tool.

PSY 741 Psychopathology of Childhood and Adolescence* (3 hrs) Review of descriptive, experimental and clinical research on psychological disorders of children and adolescence with attention to the emotional, cognitive, and behavioral consequences cultural influences Prerequisite: PSY 740.

PSY 742 Cognitive Assessment* (3 hrs) Administration and interpretation of major intelligence tests and other cognitive instruments. Training in test interpretation and report writing are emphasized.

PSY 743 Personality Assessment* (3 hrs) Theoretical, conceptual and methodological aspects of objective and projective personality assessment; integration of results into the written psychological test report.

PSY 744 Neuropsychological Assessment* (3 hrs) Administration and interpretation of selected neuropsychological tests and batteries. Prerequisites: PSY 714, 742, 743

PSY 745 Forensic Psychology* (3 hrs) Competency to stand trial, criminal responsibility, expert witnesses, jury dynamics, and other applications of psychology within the legal system. Prerequisites: PSY 742, 743

PSY 750 Ethics in Psychology (1 hr) Professional and ethical issues affecting the practice of psychology. Focus will be on the development of sound ethical and professional standards in psychology practice, teaching, and research.

PSY 751 Psychotherapy* (3 hrs) Critical examination of principles, techniques, research, and theoretical models in psychotherapy and behavior change.

PSY 752 Behavior Therapy* (3 hrs) Principles of behavior modification and their application in psychotherapy. Prerequisites: PSY 751.

PSY 753 Group Therapy* (3 hrs) Therapeutic procedures for small clinical groups, dynamics of clinical groups. Prerequisites: PSY 751, 752.

PSY 755 Psychopharmacology* (3 hrs) Physiological, psychological, and behavioral effects of psychoactive drugs with attention to those prescribed for psychiatric disorders. Role of the clinical psychologist in approaches combining medication and psychotherapy. Prerequisite: PSY 714.

PSY 760 Clinical Practicum I* (3 hrs) Supervised training and in interviewing and cognitive assessment. Prerequisites: PSY 740, 742, 743, 750.

PSY 761 Clinical Practicum II* (3 hrs) Supervised training and experience in personality assessment and Psychotherapeutic procedures. Prerequisite: PSY 760.

PSY 762 Clinical Practicum III* (3 hrs) Supervised training and experience in psychodiagnostics and psychotherapy. This course requires a minimum of ten clock hours per week. The student is expected to become competent in interviewing, assessment, therapy, and case conceptualization. Prerequisite: PSY 761.

PSY 765 Externship I* (3 hrs) Supervised clinical experience in approved community, institutional, or hospital settings. Prerequisite: PSY 762.

PSY 766 Externship II* (3 hrs) Continuation of PSY 765. Prerequisite: PSY 765.

PSY 767 Externship III* (3 hrs) Continuation of PSY 766. Prerequisite: PSY 766.

PSY 770 Advanced Seminar (3 hrs) Selected topics. May be repeated.

PSY 771 Human Sexuality* (3 hrs) Biological, psychological, social, and cultural bases of human sexuality. Diagnosis and treatment of sexual dysfunctions and disorders.

PSY 772 Health Psychology (3 hrs) Psychological, social and cultural factors related to physical health and illness; impact of life style on health; significance of cultural values in health-promoting and health-damaging; clinical psychology in community health and medical settings.

PSY 773 Theory and Treatment of Addictive Disorders* (3 hrs) Psychology of addiction: techniques and procedures for intervention and treatment.

PSY 774 Group Processes (3 hrs) Large and small group dynamics, theory and research concerning minority/majority group relations. Prerequisites: PSY 606

PSY 775 Marital and Family Therapy* (3 hrs) A study of psychotherapeutic practice and theory applied in the treatment of families and couples.

PSY 776 Neuro-Behavior Science (3 hrs) The brain in relation to cognition, perception, and judgment; analysis and comparison of normal and brain-damaged modes of functioning. Prerequisite: PSY 714.

PSY 777 Multivariate Methods II (3 hrs) Continuation of topics in Multivariate Methods I and selected advanced topics based on student needs and interests. Prerequisite: PSY 733.

PSY 790 Dissertation Research* (var.) May be repeated. Corequisite: approved dissertation proposal.

PSY 799 Internship* (var.) Residency in an APA-accredited mental health setting. Prerequisites: All coursework, comprehensive exam, clinical-competency exam, and dissertation proposal. May be repeated.

**Courses marked by an asterisk are open only to students enrolled in the Clinical Psychology Ph.D. program or with permission of the instructor.*

Mission

The mission of the College of Public Service is to educate a diversity of students for the highest quality professional service in collaboration with the public and private sectors, and to develop local, national, and international leaders in the professional academic disciplines in the Schools of Policy and Planning, Health Sciences, and Social Work.

Goal

The primary goad of the College is to provide undergraduate and graduate education to students which promotes the development of intellectual leaders in the identification, conceptualization, and dissemination of knowledge related to services in the professions.

SCHOOL OF HEALTH SCIENCES

Dr. Emeka Nwagwu, Professor and Interim

Associate Dean

Jackson Medical Mall
350 West Woodrow Wilson Drive, Suite 320
Jackson, MS 39213
Phone: (601) 979-8806
Fax: (601) 979-8809
E-mail: emeka.nwagwu@jsums.edu

School Mission

The mission of the School of Health Sciences is to provide quality education and leadership in community-based research and practice. Through collaboration with communities, the School will promote health and prevent disease and disability with special emphasis on the underserved and at-risk populations in Mississippi, the nation, and the world.

DEPARTMENT OF COMMUNICATIVE DISORDERS

Dr. Emeka Nwagwu, Interim Chair

3825 Ridgewood Road, Box 23

Jackson, MS 39211-6453

Phone: (601) 432-6717

e-mail: emeka.nwagwu@jsums.edu

Faculty

Dr. B. Newkirk, Assistant Professor

Dr. N. Radford, Professor

The Department of Communicative Disorders offers programs leading to the Master of Science degree in Communicative Disorders and the Bachelor of Science degree in Communicative Disorders. Students enrolled in the master's program are trained to screen, assess, identify, diagnose, refer, and provide intervention, habilitation/rehabilitation to persons of all ages and cultural/ethnic backgrounds, with, or at risk for, disorders of articulation, fluency, voice, cognition, language, swallowing, hearing and other disabilities. Students learn to counsel and educate individuals with communicative disorders, their families, caregivers and other service providers to select, prescribe, dispense assistive, augmentative and alternative communication devices and other communication prostheses, and to provide services supporting the effective use of these devices.

Accreditation

The Master of Science degree program in Communicative Disorders is accredited in Speech-Language Pathology by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA). Students who successfully complete the program meet the academic and clinical requirements for a license in Speech-Language Pathology granted by the Mississippi State Board of Health, for the Certificate of Clinical Competence in Speech-Language Pathology awarded by ASHA, and the Mississippi Educator Standard Class AA Vocational license.

Mission

The mission of the Department of Communicative Disorders is to provide quality education to diverse preprofessional and graduate students who are

majoring in Communicative Disorders. The program will: (a) prepare preprofessional students for entry into the graduate program; and, (b) guide graduate students to (i) acquire the knowledge and develop the skills, competencies and attitudes that are essential for the prevention of communicative disorders and the safe and effective practice of entry-level speech-language pathology, (ii) develop the ability to analyze, synthesize, and evaluate data, and to conduct research, (iii) provide professional and public services to local, state, national, and world communities, (iv) continue their professional growth by exploring developments in the profession and learning new models of management, and (v) develop an understanding and appreciation of ethnic and cultural diversity, and the impact of such diversity on normal and disordered communication.

Program Objectives

The objectives of the Master of Science in Communicative Disorders Program are to:

- ◆ Educate students to independently, effectively and safely: (a) differentiate between normal and abnormal communication, as well as normal and abnormal swallowing patterns; (b) diagnose and treat persons of all ages who have speech, voice, cognitive, language, communication and swallowing disorders; and, (c) habilitate/rehabilitate infants, children and adults with hearing loss.
- ◆ Equip students to ask relevant questions and provide appropriate information to patients, their families, care givers and other service providers regarding the prevention, diagnosis and management of disorders of human communication and swallowing.
- ◆ Facilitate clinical experiences that will train students to provide clinical services in a variety of settings including community clinics, hospitals, private practices, and university settings.
- ◆ Prepare students to meet the academic and clinical requirements for licensure granted by the Mississippi State Department of Health and the Certificate of Clinical Competence in Speech-Language Pathology awarded by ASHA.
- ◆ Guide students to evaluate developments in the professions, and conduct research in (a) the normal processes of language, speech, hearing and swallowing; and, (b) the prevention, diagnosis and treatment of disorders of human communication and swallowing.
- ◆ Assist students to develop sensitivity to and an appreciation of diversity in society, so that they (a) take into consideration individual differences in the provision of clinical services, (b) do not discriminate in the delivery of services on the basis of race or ethnicity, age, gender, religion, national origin, sexual orientation or disability; and, (c) work effectively with other professionals who may be different from them in respect to race or ethnicity, age, gender, religion, national origin, sexual orientation or disability.
- ◆ Encourage students to develop high standards of integrity, responsibility and ethics, so that they (a) hold paramount the welfare of patients they serve; (b) provide services only in areas in which they are competent; and, (c) adhere to the fundamentals of ethical conduct.
- ◆ Prepare students for advanced programs of study in communicative disorders.
- ◆ Advocate the pursuit of continued professional growth through continuing education.
- ◆ Offer educational programs that will (a) promote the maintenance of current knowledge and skills of speech-language pathologists in the Jackson area, state, national and world communities; and (b) provide the general public with information regarding the prevention, nature, diagnosis and treatment of communication and swallowing disorders.
- ◆ Provide professional and public services to local, state, national and world communities.

Admission Requirements

Admission is competitive. Applicants must meet the following requirements for regular admission:

- ◆ A baccalaureate degree in speech-language pathology from a regionally accredited college or university. Students may be admitted with baccalaureate, master's or specialist degrees in professions other than speech-language pathology but first must complete specified prerequisite courses with a grade of "B" (on 4-point scale) or better.
- ◆ A cumulative grade point average (GPA) of 3.0 (on 4-point scale) for courses completed during the junior and senior years, and a cumulative GPA of 3.0 (4-point scale) at the undergraduate level.
- ◆ A satisfactory Graduate Record Examination (GRE) score.
- ◆ A personal typewritten statement that includes the applicant's (a) reasons for pursuing a degree in speech-language pathology; (b) commitment to rigorous study and engagement in service learning as well as clinical research; (c) professional goals; (d) strengths that will contribute to success in the graduate program at Jackson State University; (e) limitations, if any, that may need to be addressed in order to successfully pursue graduate studies in speech-language pathology; and (f) past work experiences, if any, that have helped to prepare the applicant for graduate studies.
- ◆ At least three letters of recommendation from speech-language pathology instructors and/or clinical supervisors. (Students with degrees in professions other than speech-language pathology may obtain

these letters from instructors in their major area of study.)

- ◆ A satisfactory score on the Test of English As A Foreign Language (TOEFL) from international applicants and those for whom English is a second language.

[Conditional admission may be given to a student who has earned a cumulative GPA of at least 2.50 - 2.99 (on 4-point scale) for courses completed during the junior and senior years. However, admission is competitive. Therefore conditional admission is rare. The student must earn regular status with a GPA of 3.00 in the first semester of full-time enrollment or the first 12 hours of graduate work.]

Prerequisites

Applicants with baccalaureate, master's or specialist degrees in professions other than speech-language pathology must complete courses in the areas listed below with a grade of "B" or better, prior to or concurrent application for the graduate program:

Courses	Semester Hours
*Anatomy and physiology of the speech mechanism	3
*Speech science	3
*Phonetics	
*Normal language development	3
Audiology	3

Note: *These courses are available online for post-baccalaureate students.

Additionally, applicants must have successfully completed:

- a. One course in biological science, **and** one course in physical sciences, **and** one course in college level mathematics.
- b. Courses in behavioral and/or social sciences for a total of 6 semester hours.

Prerequisite courses in the professional area taken more than 10 years before the initiation of the graduate program may not be accepted.

Transfer of Credits

The Department of Communicative Disorders may allow the transfer of a limited number of credit hours providing criteria specified by the Graduate School and the Department are met. A maximum of 9 graduate semester hours of course credit earned with a grade of B (on 4.0 scale) or better in approved speech-language pathology or audiology courses may be transferred providing the course content is commensurate with the requirements of this program and the credit hours were earned within the immediate past five years from a program accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology. The applicant must apply for transfer of credit with 30 days of notification of acceptance into the program and prior to enrollment. A

maximum of 25 clinical observation hours and 50 clinical clock hours obtained in another graduate program may be allowed providing national certification and state licensure criteria for clinical supervision were met. A maximum of 25 clinical observation and 225 undergraduate clinical clock hours obtained in another program may be allowed. A student who wants to transfer clinical clock hours from another program must have that program's director verify the number of clock hours in each clinical category, the amount of supervision that was provided, and the names and ASHA membership numbers of the clinical supervisor(s) before or at the time the student enrolls in the graduate program at Jackson State University. Transfer of academic (course) credit and clinical clock hours must be approved in writing by the Department of Communicative Disorders.

Degree Requirements

A student pursuing the Master of Science degree in Communicative Disorders is required to:

1. Complete at least 52 semester hours (including no more than 6 semester hours of clinical practicum) with a cumulative average of B (on a 4.0 scale) or better. In addition to the core curriculum (45 semester hours), the student **must** successfully complete a thesis, or a project, or additional coursework.

Thesis Option. The student must enroll in CMD 590: Thesis, for a total of 6 semester hours, successfully complete a thesis, and the Final Oral Examination.

Project Option. The student must enroll in CMD 589: Master's Project, for 6 semester hours, and successfully complete a project.

Additional Coursework Option. The student must successfully complete an additional 6 semester hours of electives within the Department, selected with the approval of the academic advisor.

2. Acquire the knowledge and skills required for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) by ASHA. Additionally, the student must successfully complete all clinical clock hours required at the time of graduation by (a) the Department of Communicative Disorders, (b) the Mississippi State Board of Health for licensure, and (c) ASHA for the CCC-SLP.
3. Successfully complete the Graduate English Competency (and ENG 500, if required) and written Comprehensive Examinations. Students who choose the thesis option must successfully complete a Final Oral Examination.

Plan of Study for the Master of Science in Communicative Disorders

For Use by Students in the Full-Time Program

Year 1: Fall Semester

CMD 510	Advanced Articulation and Phonological Disorders	3
CMD 527	Seminar in Child Language Disorders I	3
CMD 532	Methods of Research	3
CMD 537	Neuroanatomy and Neurophysiology	3
CMD 540	Advanced Clinical Practice in SLP	1
		<u>13</u>

Spring Semester

CMD 528	Seminar in Child Language Disorders II	2
CMD 530	Seminar in Acquired Disorders of Language I	3
CMD 541	Advanced Clinical Practice in SLP	1
CMD 565	Seminar in Fluency Disorders	2
CMD 575	Seminar in Organic Speech Disorders	3
		<u>11</u>

Summer Semester

CMD 525	Dysphagia	3
CMD 531	Seminar in Acquired Disorders of Language II	3
CMD 542	Advanced Clinical Practice in SLP	1
PHS 500	Introduction to Public Health Disciplines	3
		<u>10</u>

Year 2: Fall Semester

CMD 535	Augmentative and Alternative Communication	3
CMD 543	Advanced Clinical Practice in SLP	1
CMD 570	Seminar in Aural Rehabilitation	3
CMD 578	Seminar in Voice Disorders	3
		<u>10</u>

Spring Semester

CMD 544-545	Advanced Clinical Practice in SLP Elective/Thesis/Project	2
		<u>6</u>
		<u>8</u>
	<i>Total Hours</i>	52

Academic Requirements

CMD 510	Advanced Articulation and Phonological Disorders	3
CMD 525	Dysphagia	3
CMD 527	Seminar in Child Language Disorders I	3
CMD 528	Seminar in Child Language Disorders II	2
CMD 530	Seminar in Acquired Disorders of Language I	3
CMD 531	Seminar in Acquired Disorders of Language II	3
CMD 532	Methods of Research	3
CMD 535	Augmentative and Alternative Communication	3
CMD 537	Neuroanatomy and Neurophysiology	3
CMD 565	Seminar in Fluency Disorders	2
CMD 570	Seminar in Aural Rehabilitation	3
CMD 575	Seminar in Organic Speech Disorders	3
CMD 578	Seminar in Voice Disorders	3
CMD 540	Advanced Clinical Practice in	
-549	Speech-Language Pathology	6

Electives

CMD 515	Counseling in Speech-Language Pathology	1
CMD 519	Audiology for the Speech-Language Pathologist	3
CMD 523	Assessment and Evaluation in Speech-Language Pathology	3
CMD 550	Professional Issues in Speech-Language Pathology	1
CMD 555	Speech-Language Pathology in the Medical Setting	2
CMD 558	Seminar in Multicultural Issues	2
CMD 563	Research & Clinical Instrumentation	2
CMD 572	Communication Behaviors and the Aging Process	2
CMD 580	Business and Management Aspects of a Speech-Language Pathology Practice	2
CMD 582	Special Problems in Speech-Language Pathology	2-4
CMD 585	Independent Study	3-6
CMD 589	Master's Project	3-6
CMD 590	Master's Thesis	3-6
PHS 500	Introduction to Public Health Disciplines	3

NOTE: During each semester in which clinical clock hours are earned, the student must enroll in Advanced Clinical Practice in Speech-Language Pathology (CMD 540-549). However, no more than 6 semester hours may be counted towards the required 51 semester hours.

Clinical Practicum Requirements

The student must successfully complete all clinical clock hours required at the time of graduation by (a) the Department of Communicative Disorders, (b) Mississippi State Board of Health for licensure, and (c) ASHA for the Certificate of Clinical Competence in Speech-Language Pathology. Additionally, the student must acquire all required clinical skills specified in the new certification standards before the student will be cleared for graduation. The Department operates the Central Mississippi Speech, Language and Hearing Clinic. The student must complete the clinical clock hours at this Clinic and at other off-campus clinical sites assigned by the Department.

The current cumulative clinical practicum requirements are specified below:

- ◆ At least 25 clock hours of clinical observation must be completed before beginning the clinical practicum.
- ◆ In addition to the observation, a minimum of 375 clock hours of supervised clinical practicum must be successfully completed, of which 325 clock hours must be earned in the graduate program.

DESCRIPTION OF COURSES

CMD 510 Advanced Articulation and Phonological Disorders: (3 Hours) Prerequisites:

Course in phonetics. Students will develop the skills to effectively assess, plan, and implement appropriate intervention strategies for persons presenting with articulation and/or phonological disorders (including with functional or organic etiology) as well as regional or cultural dialectal variations of speech sound production.

CMD 515 Counseling in Speech-Language Pathology: (1 Hour) Prerequisites: Permission of instructor and academic advisor. This course will explore the social, emotional, cultural and vocational effects a communication disorder may have on individuals, their families and significant others. Students will learn appropriate techniques and strategies for counseling children, adolescents and adults presenting with conditions impacting communication. Students will also learn how to counsel and interact with families (immediate and extended), case managers and other service providers.

CMD 519 Audiology for the Speech-Language Pathologist: (3 Hours) Prerequisite: Course in speech/hearing science or permission of instructor. Students will learn the etiology, signs, symptoms, and differential audiological findings in infants, children and adults with a variety of auditory disorders. The theory, methodology and procedures in differential diagnosis and test interpretation, including the appropriate modification of test procedures to accommodate the patient's chronological age, intellectual age, cultural differences, physical and emotional states will be examined. The assessment and management of persons with central auditory processing disorders will be explored.

CMD 523 Assessment and Evaluation in Speech-Language Pathology: (3 Hours) Prerequisites: Courses in normal language development, articulation disorders, and language disorders or permission of instructor and academic advisor. Students will learn to select, critique, administer, score and interpret standardized tests while also learning compensatory strategies to help reduce the impact of cultural bias. Procedures for informal and naturalistic assessment will be reviewed. The integration of informal and formal data to develop appropriate recommendations will be emphasized.

CMD 525 Dysphagia: (3 Hours) Prerequisite: Course in anatomy and physiology of the speech mechanism. Students will learn the normal anatomy and physiology of swallowing in infants, children and adults. The etiology, signs and symptoms of dysphagia, as well as screening, instrumental assessment and non-instrumental evaluation procedures will be explored. Management, including counseling and sensitivity to cultural differences, models of service delivery, indications and methods of oral and non-oral feeding, nutritional issues, and prevention of complications will be investigated. The student will learn to assess the effectiveness of treatment by using relevant outcomes.

CMD 527 Seminar in Child Language Disorders I (3.0 Hours) Prerequisite: Course in normal language development. This course will address normal

communication development in children from birth to age three. Students will develop an understanding of the major etiologies of language disorders in infants and toddlers across cultures. Assessment and strategies, including the infusion of technology, for those presenting with disorders as well as for the at-risk child will be discussed. Skills to informally and formally determine the present communicative level of an infant or toddler using non-standard methods, such as play-based assessment will be addressed. Strategies for helping families from diverse backgrounds participate in the successful implementation of speech and language services to infants and toddlers will be shared. Policies impacting service delivery to this population and their families will be explored.

CMD 528 Seminar in Child Language Disorders II: (2 Hours) Prerequisites: Course in normal language development. Students will develop an understanding of the etiologies of language delay and disorders in children, and the impact of language impairment on the learning process. Formal and informal assessment and intervention strategies as well as treatment outcomes will be discussed. Students will develop awareness of issues pertinent to service delivery including cultural diversity, preparation of individualized educational programs, literacy, assessment of progress, behavior management, collaboration and infusion of technology. Various group processes and structures required for successful service delivery will be recognized. Legislation and policies impacting services to school aged children will be explored.

CMD 530 Seminar in Acquired Disorders of Language I: (3 Hours) Prerequisites: CMD 537 or equivalent. This course will explore the incidence, ethnocultural differences and etiology of impairments that jeopardize acquired language as a result of insult to the central nervous system. The characteristics of different types of aphasia, as well as the effects of right hemisphere damage, including neglect, attention, linguistic, communicative, cognitive and affective deficits will be explored. Students will acquire knowledge of standardized and functional assessment of communication to ascertain the individual's abilities and impairments. Treatment approaches and strategies (including the infusion of technology) that promote compensation for deficits and promote recovery of function will be explored. Issues including counseling and educating patients, family members, significant others and care givers specific to the patient's diagnosis, management plan, prognosis and discharge will be discussed.

CMD 531 Seminar in Acquired Disorders of Language II: (3 Hours) Prerequisites: CMD 537 or equivalent. This course will address the incidence, pathophysiology, as well as communicative, mood and behavior changes in persons with dementia (including Alzheimer's disease), and those with traumatic brain injury across various cultures. The physiologic, cognitive, auditory and motor speech characteristics, as well as the language, pragmatic and discourse abilities of these individuals will be investigated. The

social impact on the individual and the family will be reviewed. Professional services provided to the individual and care giver, including differential diagnosis, assessment and rehabilitation, and the infusion of technology will be discussed. Direct and indirect communication management approaches, including individual and group therapy, stabilization strategies, the use of assistive and augmentative devices, and collaboration with other health care professionals will be explored. Educational intervention and transition to school/work after traumatic brain injury, as well as efficacy, ethical and legal issues pertaining to both disorders will be examined.

CMD 532 Methods of Research: (3 Hours) The student will learn to read critically and evaluate research in normal and disordered speech, language, hearing and swallowing processes. The principles of research, research designs, issues in conducting unbiased research, types of research, observation, measurement, statistical treatment and reporting of data will be explored. The student will be guided in developing an intuitive understanding of clinical research methodology and integrating it with core statistical concepts and techniques.

CMD 535 Augmentative and Alternative Communication: (3 Hours) This course focuses on approaches to the development of augmentative and alternative modes of communication for individuals of all ages with limited oral communication. The skills to effectively evaluate, select, and properly use a variety of gestural and symbol-based communication systems will be developed. Factors that affect assessment and treatment, such as, severity, age, cultural differences, nature of disorder, etc. will be discussed.

CMD 537 Neuroanatomy and Neuro-physiology: (3 Hours) The neuroanatomy and neurophysiology of the central and peripheral nervous systems will be discussed with emphasis on structures that control language, speech and swallowing. The student will learn about the normal embryonic development of the nervous system, and the critical periods of susceptibility to teratogenic agents. The neurological examination and pertinent diagnostic issues including variations in different countries and cultures will be investigated. Signs, symptoms and sequelae of pathological agents will be correlated with clinical implications. Rehabilitation issues will be addressed.

CMD 540-549 Advanced Clinical Practice in Speech-Language Pathology: (1-6 Hours) The student will provide supervised screening, diagnostic and treatment services to persons of all ages, from culturally diverse backgrounds, presenting with speech, language, cognitive, swallowing, or hearing disorders. Clinical experiences will include assessment and treatment planning, report writing, oral and written communication with other professionals and family members, client/family education, and counseling. Clinical sites will vary depending on student needs, interest, competency, and availability.

CMD 550 Professional Issues in Speech-Language Pathology: (1 Hour) Prerequisite: Permission of instructor and academic advisor. This course will focus on topics such as professional standards, quality improvement, outcome measures, ethical considerations, funding sources, third party reimbursement, work force issues, health care legislation, as well as the role of professional organizations in developing policies that impact speech-language pathology. Approaches to planning, managing and marketing speech-language pathology services in various communities, cultures and practice settings will be discussed.

CMD 555 Speech-Language Pathology in the Medical Setting: (2 Hours) This course will prepare students to work in medical settings with professionals and patients of all ages and cultural backgrounds. The organizational structure of institutions such as managed care organizations, home-health agencies, long-term care facilities, and acute, subacute and rehabilitation hospitals will be explored. Students will learn appropriate protocols, abbreviations, and universal precautions used in most medical settings.

CMD 558 Seminar in Multicultural Issues: (2 Hours) This course will focus on the historical origins, rules and features of nonstandard English dialects. Normal language and speech acquisition in speakers from culturally/ethnically and linguistically diverse groups will be examined. Strategies to distinguish individuals with communication differences from those with communication disorders will be identified. Students will learn about current clinical standards and practices associated with service delivery to speakers from different backgrounds in respect to race or ethnicity, age, gender, national origin, sexual orientation and disability.

CMD 563 Speech and Clinical Instrumentation: (2 Hours) This course includes work in the speech science lab and in the clinic where students will obtain hands on experience in the use of equipment to study the acoustics of speech and hearing. Students will also learn the proper use of instruments in research activities and clinical assessment/intervention procedures. Experience in instrumental measurement and analysis of physical, physiological, perceptual and acoustical aspects of normal and abnormal speech production will provide valuable insight in understanding theoretical concepts introduced in other courses.

CMD 565 Seminar in Fluency Disorders: (2 Hours) Prerequisites: Permission of instructor and academic advisor. Current as well as historically relevant theories of stuttering and its etiology will be considered. Students will develop skills to identify and classify various types of dysfluencies as well as the social, emotional, cultural, vocational, and economic impact of stuttering. Assessment and intervention strategies for children, adolescents and adults who stutter will be presented.

CMD 570 Seminar in Aural Rehabilitation: (3 Hours) Prerequisites: Courses in audiology and normal language development. This course is an advanced

exploration of the critical role of hearing in normal language, speech and psychosocial development. The effects of hearing loss on communication across the life span, and the importance of early intervention and counseling will be investigated. Assessment of oral, signed and written language, speech and voice production, auditory discrimination and perception, and speech reading skills will be discussed. Scales used to assess specific communication breakdown and resultant attitudes will be identified. Treatment options and communication strategies, including the use of amplification systems, assistive listening devices, sensory aids and cochlear implants will be explored. Pertinent legislative and multicultural issues will be reviewed. Assessment and management of auditory processing disorders will be addressed.

CMD 572 Communication Behaviors and the Aging Process: (2 Hours) Current research and theory concerning age-related changes in communication and swallowing due to anatomical, physiological and cognitive changes will be reviewed. The influence of attitudes and expectations, the effects of cultural, psychological and pharmaceutical variables, the role of genetic factors and deleterious environmental influences will be analyzed. Appropriate modifications in assessment and management procedures to meet individual needs in different health care settings, including the use of group treatment and a collaborative management approach will be discussed. Counseling and assistance provided to caregivers and members of the extended social support network will be explored.

CMD 575 Seminar in Organic Speech Disorders: (3 Hours) Prerequisites: Courses in anatomy and physiology of the speech mechanism, neuroanatomy, neurophysiology and articulation disorders or permission of instructor. This course is a comprehensive study of the theory and research related to underlying neurological pathology, salient features, confirmatory signs, diagnosis and treatment of motor speech disorders across the life span. The etiology and classifications of congenital orofacial anomalies and dentofacial growth problems, genetics of clefting and associated syndromes, including those typically associated with specific racial and ethnic groups will be explored. Acoustical, perceptual and instrumental measures in assessment, as well as models of service delivery and management procedures will be discussed. Pediatric care and feeding of the newborn with a cleft, and complications associated with clefting and craniofacial disorders will be reviewed.

CMD 578 Seminar in Voice Disorders: (3 Hours) Prerequisites: Courses in anatomy and physiology of the speech mechanism and speech science. This course includes a comprehensive study of the models of voice production, as well as organic and functional voice disorders across the life span in culturally diverse populations. Etiology, signs, symptoms, and perceptual correlates of vocal pathologies and management will be discussed. The art of assessment including perceptual ratings and the use of

contemporary equipment will be explored. Interdisciplinary collaboration in planning and monitoring treatment will be investigated. Communication and swallowing management of tracheotomized and ventilator dependent children and adults, as well as assessment and rehabilitation of head/neck cancer patients will be examined.

CMD 580 Business and Management Aspects of a Speech-Language Pathology Practice: (2 Hours)

This course provides business and practice management principles and procedures for starting and managing a speech-language pathology practice, or in buying/selling an existing private practice. Topics of discussion include market analysis, marketing plan, operation and organizational plan, financial analysis, risk management, office automation, and personnel issues. Procedures for proper bookkeeping and accounting, strategies in pricing, and financial planning will be examined. Issues such as reimbursement, negotiating service contracts, continuous quality improvement, and risk abatement will be discussed.

CMD 582 Special Problems in Speech-Language Pathology: (2-4 Hours) Prerequisite: Permission of academic advisor and instructor. This course has

varying content dealing with issues, trends and topics of current interest. Content will be developed based on assessed needs, interests and goals of a group(s) of students.

CMD 585 Independent Study: (3-6 Hours)

Prerequisite: Permission of academic advisor and instructor. This course allows for the exploration of topics and/or issues based upon assessed needs, interest and goals of the individual student under the guidance of a faculty member. Typically, such a study will concentrate on an area not covered in other courses, or an area in which the individual student has developed particular interest and wishes to explore beyond what was covered in another course(s).

CMD 589 Master's Project: (3-6 Hours) Candidates for the Master of Science degree in Communicative Disorders may choose to complete a creative project within the student's professional area under the supervision of a graduate advisor within the Department. It is expected that this project will contribute to the knowledge base of the profession.

CMD 590 Thesis: (3-6 Hours) Candidates for the Master of Science degree in Communicative Disorders may choose to present a thesis that embodies independent research. The topic must be within the student's major professional area and must be approved by the student's thesis advisor within the Department. It is expected that the research will contribute to the knowledge base of the profession.

GRADUATE PROGRAMS IN PUBLIC HEALTH

- ◆ Master of Public Health (M.P.H.)
- ◆ Doctor of Public Health (Dr.P.H.)

The Public Health Program is comprised of the following three departments.

DEPARTMENT OF
BEHAVIORAL AND ENVIRONMENTAL HEALTH
Dr. Mohamed Shahbazi, Professor and Chair
350 West Woodrow Wilson Drive, Suite 2301B
Jackson, MS 39213
Telephone: (601) 979-1143
Fax: (601) 979-8848
E-mail: mohammad.shahbazi@jsums.edu.

Faculty

Dr. C. Arthur, Professor
Dr. D. Brown, Assistant Professor
Dr. S. Leggett, Associate Professor
Dr. G. Cannon-Smith, Associate Professor

DEPARTMENT OF EPIDEMIOLOGY
AND BIOSTATISTICS
Dr. Mario Azevedo, Professor and Chair
350 West Woodrow Wilson Drive, Suite 109
Jackson, MS 39213
Telephone: (601) 979-8789
Fax: (601) 979-8802
e-mail: mario.azevedo@jsums.edu

Faculty

Dr. A. Bhuiyan, Assistant Professor
Dr. O. Ekundayo, Associate Professor
Dr. J. Lee, Assistant Professor
Dr. M. Payton, Professor
Dr. I. Perkins, Professor
Dr. H. Taylor, Clinical Professor
Dr. A. Whaley, Professor

DEPARTMENT OF HEALTH POLICY AND
MANAGEMENT
Dr. 'Emeka Nwagwu, Professor and Chair
350 West Woodrow Wilson Drive, Suite 2301A
Jackson, MS 39213
Telephone: (601) 979-8826
Fax: (601) 979-8802

Faculty

Dr. R. Bennett, Associate Professor
Dr. B. Johnson, Assistant Professor
Dr. S. Ochai, Assistant Professor
Dr. F. Okojie, Professor
Dr. M. Younis, Professor

Mission

The mission of the Public Health Program is to provide quality education and leadership in community-based research and practice. Through collaboration with communities, the Program promotes health and prevent disease and disability with special emphasis on the underserved and at-risk populations in Mississippi, the nation, and the world.

Goals

Instructional Goal: To provide students with discipline-specific and core competencies in the essential public health services. To achieve this goal, the program will prepare individuals at the masters' and doctoral levels through mentoring and training in public health with a focus on the underserved and at-risk populations in Mississippi, the nation, and the world.

Research Goal: To provide leadership and advance social justice through evidence-based scientific inquiry, generate knowledge in the reduction of risk and prevention of disease and disability among the underserved and at-risk populations in Mississippi, the nation, and the world.

Service Goal: To provide technical expertise, advocacy, and translational resources to internal stakeholders (university, school, departments, program) and external stakeholders (local, national and global communities, public agencies, and the private sector).

MASTER OF PUBLIC HEALTH (M.P.H.)

This range of work includes healthcare, preventive and regulatory agencies, community health promotion service organizations, health policy organizations, and an array of health-oriented public, not-for-profit, and private groups. The concentrations for the Master of Public Health are as follows.

Concentration in

Behavioral Health Promotion and Education

Behavioral Health Promotion and Education focuses on the health related behavior of individuals in the context of sociocultural structures, communities, healthcare systems, and family units. Of particular interest is how health-related behaviors of individuals are determined by and interact with conditions in the social, political, cultural, economic, physical, and biological environment to influence health status. Emphasis is placed on identifying, evaluating, and diminishing unhealthy behaviors and promoting positive personal health. This concentration seeks to integrate and apply public health theories and methods to problems of human health. Assessment, planning and evaluation with emphasis on sociocultural aspects of health are the core themes of the study of health promotion and education.

Concentration in Epidemiology

Epidemiology prepares students for careers as scientific researchers, practical field investigators, health officers, research program directors and managers, and other research areas of public health. Epidemiologists work closely with biostatisticians in designing and analyzing research studies. This concentration is designed for students to acquire a thorough understanding of epidemiological methods, statistical principles, and computer software applications to apply to the practical fields of public health. It offers students an opportunity to acquire specific skills in designing research studies and knowing how to collect data, analyze, and interpret research studies.

Concentration in Health Policy and Management

The degree concentration in Health Policy and Management prepares students for careers in public health policy and healthcare management. This concentration provides the student core competencies in management, strategic planning, marketing, human resource management and motivation. Students evaluate the role of governmental institutions in the policy process; examine policy models; and learn how health policy in the United States is uniquely different from that of other countries. Financial aspects of health care are offered to those in the discipline that plan to be future managers. Social and legal principles impacting healthcare delivery in the United States are other core components.

Admission Requirements

Applicants must be admitted to both the Division of Graduate Studies and the MPH Program. To facilitate determination of admissions into the MPH Program, applicants must send materials to both the Division of Graduate Studies and the MPH Program. Applications may be found on-line with the Division of Graduate Studies (<http://www.jsu.edu/~gadmappl>) and the various departments in the School of Health Sciences. Applicants will only be admitted once a year during the Fall semester. This information must be sent to the program:

- ◆ A personal statement of professional goals.
- ◆ Three letters of reference must be submitted with the completed application forms, which may be obtained from the Division of Graduate Studies

Regular Status

- ◆ Baccalaureate degree from an accredited college or university with a 3.00 or better cumulative grade point average. International students must meet equivalent standards and possess a satisfactory score on the Test of English as a Foreign Language (TOEFL) Examination.

Conditional Status

Conditional status may be assigned to students who have a cumulative GPA of 2.50-2.99 (on a 4.0 scale)

and are admitted to a degree program.. Students must earn regular status during the first semester of full-time enrollment, or in the first 12 credit hours of part-time enrollment courses by acquiring a 3.00 or better GPA which must be completed within one year of conditional admission.

Transfer of Credits and Other Requirements

A maximum of 9 graduate semester hours earned with a "B" or higher may be transferred from Jackson State University programs and other institutions toward MPH degree. Transfer credit is made upon the recommendation of the chair of the major department, the academic college dean or designee and approval of the Dean of the Division of Graduate Studies.

Scholarships and Graduate Assistantships

Financial support may be offered to matriculating students holding regular admission status and maintaining a 3.0 program GPA as determined by the department. In order to remain eligible for financial assistance, students must maintain a minimum 3.00 cumulative GPA and remain in good professional academic standing (e.g., achieve a passing score on the Graduate Area Comprehensive Examination). Only full-time students are eligible for assistantships offered by the MPH Program.

Academic Performance

Once admitted to the MPH program, graduate students are required to maintain a 3.0 GPA to continue studies in good academic standing.

M.P.H. Curriculum

Full-time students can usually complete the curriculum in two and a half years. Part-time students usually requires two additional semesters to complete the program.. Most students are expected to graduate within three years. Students acquire the necessary professional knowledge, skills and competencies that qualify them for employment in public health and health service organizations in their specialized disciplines. The program must be completed with a 3.0 or higher cumulative GPA for the minimum 45 credit hours. The curriculum has four major components: core courses, required concentration courses, electives, and the field practicum.

The core courses include the following basic subject studies as required by the CEPH: a) philosophy and historical basis of public health concepts; b) statistical basis of population health demography and quantitative, computer-based problem solving; c) epidemiological foundations of public health; d) social and behavioral determinants of community and personal health status; e) environmental and biological factors in public health; and f) management theory and practice of health and human services.

Required courses in each of the three concentrations assure thorough grounding in the particular public health discipline in which the student chooses to

qualify. Additional elective courses towards the M.P.H. degree may be taken in the student's concentration or from other specializations of individual preference, as approved by the concentration faculty advisor. All students must complete a public health residency in the field. As a component of the "capstone" and integrating experience, an applied master's project is required focusing in the student's concentration area. The other component of the "capstone" is the required master's comprehensive examination.

The M.P.H. curriculum requires 6 core courses or 18 credit hours (3 hours per course) for all students. Each department assures that students take 5 required specialization courses or 15 credit hours for the advanced study in a specific public health concentration: Behavioral Health Promotion and Education, Epidemiology, and Health Policy and Promotion.

Elective courses are offered in each concentration. Students may complete their three courses or 9 credit hours of electives within these specializations or other graduate level courses by advisor approval.

The Program will assist in the placement of students in field training which will account for 3 credit hours. Students will be placed at least one full semester and commit a minimum of 400 clock hours during the semester under the supervision of a professional public health preceptor and faculty mentor. The location and specific residency activities will be worked out individually between the student and field work organization with approval by the faculty member of record, prior to initiating the experience. Comprehensive "guidelines" following the requirements of CEPH accreditation will be employed by the program. They will include appropriate covenants of mutual obligation between the university and the field agency through a written affiliation agreement. The purpose of this experience is to provide students with opportunities to apply and demonstrate their acquired knowledge and skill competencies in a public health setting as practice preparation for professional employment or doctoral studies upon graduation.

Graduation Requirements

Students culminate their study program by taking PHS 508- Public Health Internship. A minimum of 45 semester hours with a cumulative average of 3.0 or 'B' (on a 4.0 scale) or higher are required to earn the M.P.H. degree. The Graduate Comprehensive Examination must be taken before graduation. The Graduate English Competency Examination must be passed during the first semester of graduate studies at Jackson State University and must be passed before graduation. Students who fail this test must successfully complete English 500-Advanced Laboratory Writing during their second semester of enrollment.

Master of Public Health Curriculum

Behavioral Health Promotion and Education

Core Courses		Semester
Course	Title	Hours
PHS 501	Public Health and Behavioral Science	3
PHS 502	Public Health Policy and Administration	3
PHS 503	Biostatistics and Computer Applications	3
PHS 504	Environmental and Occupational Health	3
PHS 505	Principles of Epidemiology	3

Important Notice for all M.P.H. Students: For students entering the M.P.H. Program on a full-time basis in the Fall 2008 and after, the full time plans must be followed in each of the concentrations. Students entering the M.P.H. Program on a part-time basis in the Fall 2008 and after, the part-time plans must be followed in each of the concentrations. Full-time students are admitted for full-time study to one department only. Each student must complete a Degree Plan with the assistance of their advisor at the beginning of their first semester. The Plan will reflect a Full-time or Part-time cohort enrollment status. Transfer from (1) full-time to part-time student status, or, (2) part-time to full-time student status, must be applied for and approved by the department of origin. Change of department must be approved by both the department chairs of the originating department and of the transfer department. Transfers are not automatic.

DESCRIPTION OF COURSES

Core Courses

PHS 501 Public Health and Behavioral Science (3 hours) This course introduces public health organization and practice, including history, concepts, legal basis, purposes, programs and trends in the evolving of public and private sectors of social and preventive medicine in America. It discusses various

behaviorally-related health determinants, and presents a number of theories/models to change behaviors at individual and group levels.

PHS 502 Public Health Policy and Administration (3 hours) This course presents an overarching introduction to national legislative issues and policy processes together with the managerial functions and practices in public and private healthcare organizations. Study emphasis is on the essentials of how executive and supervisory managers professionally perform their roles in the work of leading system-wide teamwork, strategy building, reengineering, resource acquisition, and market effectiveness in competitive environments.

PHS 503 Biostatistics and Computer Applications (3 hours) This course introduces the principles and methods of statistical analysis. Topics include hypothesis testing, confidence limits, sample size, statistical tests of inferences, and simple linear and multivariate analysis. Statistical software packages such as SPSS and Stata will be used in illustrating the basic principles of data analysis.

PHS 504 Environmental and Occupational Health (3 hours) This course introduces major community health concerns and problems in the related fields of environmental and occupational health with an emphasis on disease and disability. Students will review and analyze the policy and ecological change implications of these two public domains.

PHS 505 Principles of Epidemiology (3 hours) This course explores the science and practice of epidemiology and its contributions to disease detection, measurement, and prevention in clinical and public health settings. Specific topics include measurement of disease frequency, measurement of disease association, standardization, bias, and study designs. This course also introduces the practical fields of epidemiology.

PHS 506 Research and Quantitative Methods (3 hours) This course introduces students to applied research methods in public health. It emphasizes essential concepts, techniques and methods of research practice. Basic measurement procedures for analyzing health data are examined through SPSS computer software, and the student is required to complete the design of a research study. Prerequisites: PHS 503 and PHS 505.

Capstone Courses

PHS 508 Public Health Internship (3 Hours) Students conclude their MPH studies with a supervised field experience in their respective specializations. This supervised residency practice operates for the full semester with a student commitment of a minimum of 400 clock hours with the placement organization, recognizing flexible arrangements for the mutual benefit of all parties and including possible compensation. The department, student, preceptor and field setting will abide by a formal affiliation agreement which provides policies and guidelines for the placement expectations and responsibilities. It culminates with an analytical focus

on the student's concentration area. The report should emphasize the learning objectives and competencies for the internship. Enrollment requires permission of the advisor, the instructor of record, and chair. Completion of the course requires the agency's preceptor's evaluation.

Required Courses

Health Policy and Management

PHS 511 Organizational Design and Behavior (3 hours) This course examines universal organizational theories which adapt to private healthcare and public health services. Students study a framework of analysis looking at the management science explanations of human behavior in these settings from the perspectives of individual worker and patient roles, group and team relationships, and global systems. Topics include professional understanding of organizational culture, conflict, strategic design, change, measuring performance, and creating alliances.

PHS 512 Public Health Policy, Law and Ethics (3 hours) This course provides an overview of principles and policies relating to public health law and ethical applications. This course will explore federal laws and directives, along with state statutes and local ordinances. Recent case law from federal and state courts will be used as illustrations.

PHS 513 Financial Management of Health Services (3 hours) This course explains important financial management techniques applicable to health care settings. Course materials will include the language and function of financial management, analysis of an organization's financial position, management of working capital and current assets, budgeting, and the use of financial data for decision making. Students will further their knowledge of computerized information systems through class exercises. Emphasis will be placed on the application of techniques to health services organizations. Students will synthesize techniques through completion of an analysis project and/or research paper in health economic and financing. Prerequisite: HCA 450 or instructor approvals.

PHS 514 Health Management Information Systems (3 hours) This course introduces students to systems in managing for-profit and not-for-profit organizations (such as manufacturing, banking, and health care organization) and emphasizes the role of information systems to increase productivity, to improve quality of products and services, and to insure overall effectiveness or organizational operations. Appropriate application software will be used to analyze cases and complete the class project. Prerequisite: Basic knowledge of computing skills.

PHS 515 Marketing Public Health and Strategic Planning (3 Hours) This course examines an overview of the strategic planning process and state-of-the-art marketing applications used by community health organizations. Marketing is viewed as a social change opportunity for public health practitioners and the analysis and design of market plans are studied.

As an extension of the marketing audit, several key planning strategies and methods are critically reviewed for their relative value to managers and stakeholders in decision making of long-range and short-terms system futures.

Epidemiology and Biostatistics

PHS 521 Advanced Seminar in Epidemiology (3 hours) The hallmark of the course is designing and presenting an epidemiological research study. Emphasis will be placed on the major types of epidemiological study designs: cross-sectional, case-control, cohort, and intervention studies. In addition, diagnostic studies to evaluate screening programs will be discussed. Prerequisite: PHS 505.

PHS 522 Multivariate and Probabilistic Statistics (3 hours) This course addresses modeling and practical application of statistical principals in data analysis. Statistical Software packages such as SAS and SPSS will be used. Topics include probability distributions, simple linear regression, multiple linear regression, log linear modeling, logistic recession, Poisson, and Cox-Proportional Hazard modeling. Prerequisites: PHS 503 and PHS 505.

PHS 523 Chronic and Infectious Diseases Epidemiology (3 hours) This course introduces students to various fields of practical epidemiology. This course primarily addresses the epidemiology of cancer, cardiovascular, and infectious diseases. Prerequisite: PHS 505.

PHS 524 Statistical Methods for Applied Epidemiology (3 hours) This course reviews the basic statistical tools used in epidemiology research. The course includes: sampling and sample size determination, methods to compute confidence intervals and p-values for key epidemiological measures of association, and an overview of regression and statistical methods for analysis of data. Prerequisite: PHS 503 and PHS 505.

PHS 525 Epidemiology of Minority and Special Populations (3 hours) This course introduces the salient features of conducting epidemiological research in special populations with a particular emphasis on African Americans. This course covers the epidemiology of diseases and conditions affecting racial/ethnic minorities, children and the elderly. Other components include psychological and behavioral factors and preventive services. Prerequisite: PHS 505.

Behavioral Health Promotion and Education

PHS 531 Health Behavior, Promotion and Education (3 hours) This course provides a comprehensive understanding of health promotion and health education, concepts and applications. It offers students an opportunity to develop a broad understanding of social, cultural and psychological factors as they affect health and health-related behaviors and outcomes at individual, family, and group/community levels. Areas of responsibilities for health educators, as required by the National Commission for Health Education Credentialing

(NCHEC) body, are discussed, and students gain competencies essential to pass the Certified Health Education Specialist (CHES) examination. The CHES related skills and competencies in combination with an MPH degree create better job opportunities at state and national levels.

PHS 532 Community and Patient Health Education (3 hours) This course examines professional health education practices in most community and individual settings where opportunities exist to acquire and behaviorally deploy personal health knowledge into action. Health risk factors are studied using the socioecological paradigm as applied to a selected community. Furthermore, the roles of the health educator as a community advocate, facilitator and collaborator are explored. Patient education in clinical settings focuses on equipping clinical personnel in the competencies and skills of health promotion techniques. Prerequisites: Completion of all MPH core courses and PHS 531.

PHS 533 Wellness and Maternal Child Health Promotion (3 hours) This course provides the historical perspective, organization and delivery of maternal child health services as well as an analysis of the major health determinants associated with the system of health care and health promotion for this population. Ethical issues, cultural diversity, special and vulnerable populations, disparate health outcomes, environmental health and nutritional issues will be emphasized while highlighted strategies to overcome barriers in health promotion and provision of care.

PHS 534 Communication and Health Education Marketing (3 hours) This course provides an overview of communication and marketing within a health education context. This course examines communication in health care settings, public health campaigns, and cultural differences in communication. Prerequisites: Completion of all MPH core courses, and PHS 531.

PHS 535 Behavioral Change Program Strategies (3 hours) This course examines the behavioral science theories which underpin the fundamental ingredients of most change strategies in continuous health program development. Several models/theories that are designed to alter behaviors are discussed. Theories and models of health perception, health promotion and education along and program planning, research and evaluation are explored. Theories of individual health behavior (e.g., Health Belief Model); interpersonal theories (e.g., Social Cognitive Theory), and models for community level behavioral change (e.g., PRECEDE-PROCEDE Model) are discussed; and their applications are shown through research, practices, and actual projects that students undertake in targeted populations. Students also evaluate both classroom case studies and the actual community implementation of health behavior change programs. Prerequisite: PHS 531 Health Behavior Promotion and Education.

Electives

PHS 507 Applied Master's Project (3 hours) The Masters' Research Project provides a culminating experience of the student's scientific and professional practice preparation, including proposal formulation of the problem to be studied or an operational project to be implemented with the evaluating conclusion and defending report of the outcome. Prerequisite: PHS 506 Research and Quantitative Methods.

PHS 516 Human Resources Management in Public Health (3 hours) This course examines the role of healthcare administrators and supervisors with respect to personnel interviewing, selection, orientation, performance counseling and appraisal; staff development; leadership development; and related functions of human resources management. Issues of job analysis, labor relations, performance appraisal, training and development, and other concerns are studied in relationship to the human resource process system.

PHS 517 Managed Care Networks and Public Health (3 hours) This course introduces the dynamic impact that managed care has had on the delivery of healthcare services and cost containment features of the health plans that thrived in the 1990's. The student will become familiar with all aspects of managed care (HMOs, PPOs, and POS) from effectiveness measurement of these health care plans medical/loss ratios, profit margins and outcomes measurement to the effect on access to quality healthcare services.

PHS 518 Policy Analysis of Health Legislation and Regulation (3 hours) This course identifies public policies that direct and or influence health care in the United States. Health legislation and regulations that support the implementation of policies will be analyzed. Policies will also be analyzed to determine their strategic importance and implications for individuals, communities and organizations.

PHS 519 Health Program and Evaluation (3 hours) This course provides an overview of theories and application of program planning, implementation, and evaluation for public health programs while emphasizing essential components of program planning models and a range of evaluation objectives and designs.

PHS 526 Environmental and Occupational Epidemiology (3 hours) This course introduces the student to the application of epidemiological principles to environmental and occupational health problems. Topics include exposure assessment, study design, and conduct of epidemiological studies in the environment and work place, and the effect on the healthy worker. Also examined will be epidemiological research on a range of known environmental and occupational hazards. Prerequisite: PHS 505.

PHS 527 Occupational Disease and Injury Prevention (3 hours) This course introduces students to concepts and challenges of work related diseases and injury prevention. Students learn a systematic approach to the identification and clarification of occupation risks and hazards and the quantification of

exposure effects relationships with a view towards prevention.

PHS 528 Genetic Epidemiology (3 hours) This course focuses on the pattern of disease incidence in populations in order to infer the genetic basis of the disease. This course includes studying the extent to which environmental risk factors interact with genetic risk factors to increase susceptibility and manifestation of disease. Prerequisite: PHS 505.

PHS 529 Psychosocial Epidemiology (3 hours) This course provides an overview of the literature incorporating social and personality factors, cultural influences upon individual behavior, stress, and related psychosocial factors as determinants of health. Health and illness determinants are multi-factorial and enmeshed in the social fabric and psychologic constitution of the person and may involve a complex interaction of the person and environment. Psychosocial epidemiological models of chronic disease will be discussed. Prerequisites: PHS 505.

PHS 536 Health Education Competencies for Clinical Professionals (3 hours) This course examines the principles, methods and skills of education and promotion practices in alternative health services and medical care settings. Students learn why and how health professionals are able to teach and influence patient clientele roles and behaviors in supportive healing interventions of the healthcare environment. Clinical applications of health promotion and education address risk factor assessment, self-care, patient-program readiness, institutional decision making, consumer culture, and emotional stress management. This study leads to the professional acquisition of skills to design and implement effective program planning, evaluation, and training of healthcare personnel and their patients.

PHS 537 Medical Anthropology in Public Health (3 hours) This course explores the fundamental relationship of anthropology to the art and science of medicine and public health, broadly defined. Readings and lectures emphasize the impact of anthropology on current modes of biomedical research; alternative systems of health and healing including culture-bound syndromes; the role of anthropologists in biomedicine and public health; critical medical anthropology and the political economy of health; and the interplay between anthropology and other components of public health. Concepts of efficacy, outcome, and healing are also examined.

PHS 539 Pain Issues in Public Health (3 hours) This course exposes students to the cross-cultural and public health aspect of pain and pain related issues like assisted suicide, substance abuse, narcotic regulation, alternative therapy, palliative care and disability. Students will explore the roadblocks to better pain management as they relate to the public and providers, discuss evidence based outcome measures, cost control issues, and pain in special groups including minority populations.

PHS 541 Environmental Management and Industrial Hygiene (3 hours) This course introduces

students to the basics of Environmental Management and Industrial Hygiene. The course will be divided into two parts. Part I will help students understand the regulatory approaches, effects of pollution and the source of pollutants, and the various environmental management issues. Part II will place an emphasis on control of occupational health hazards that arise as a result of work or during work. Prerequisites: PHS 504.

PHS 542 Environmental and Occupational Health Risk Assessment (3 hours) This course assists the student in developing the skills necessary to assess, evaluate and recommend control measures to reduce environmental and occupational risks. This course will involve the study of chemical exposures and the harmful actions of chemicals on humans. Students will study scientific methods currently employed to assess human risks to environmental and occupational contaminants.

PHS 543 Occupational Health and Safety Management (3 hours) This course introduces the field of safety, prevention management, and issues in occupational health. This course will provide the opportunity for the student to apply public health principles and decision making skills with relation to prevention of injury and disease, health promotion, and protection of worker populations from occupational hazards.

PHS 544 Environmental and Occupational Toxicology (3 hours) This course examines the basic concepts of toxicology and demonstrates how the basic principles are applied in occupational and environmental regulations. Toxicology, the study of the adverse effects of chemical or physical agents on biological systems, is a pillar of both clinical medicine and public health. Students will acquire the armament to develop, interpret, and utilize toxicological data for solving environmental and occupational health problems.

PHS 545 Environmental Policy and Occupational Health Regulations (3 hours) This course examines Federal laws and regulations concerning environmental and occupational health. This course will introduce students to State environmental policies and occupational health regulations while and emphasize implementation and compliance with environmental and occupational health regulations and laws. Prerequisites: PHS 543.

PHS 551 MCH-Nutrition Program Management (3 hours) This course provides application of core public health functions to the field of maternal and child health and nutrition. Emphasis is on assessing community nutrition-related assets and problems, principles of grant writing, program planning, administration, budgeting, and evaluation; and leadership skills. Use of the media and social marketing is also covered.

PHS 552 Women's Health and Preventive Medicine (3 hours) This course addresses determinants of health, morbidity, and mortality across several transitions of the life-span of women; explores biological, behavioral, environmental and societal

influences; and provides an integrated approach to women's health issues and public health policy, practice, and research.

PHS 553 Child - Adolescent Health and Preventive Medicine (3 hours) This course analyzes child and adolescent public health issues, stressing the social, developmental, and environmental determinants of health status. The interrelationship of developmental issues, risk behavior, care-seeking behavior, and the effectiveness of adolescent programs and services will be examined.

PHS 554 MCH/Nutrition Programs and Public Policy (3 hours) This course integrates maternal and child health and nutrition programs and policies to provide the foundation for advocacy and the development of health services for women, children, and their families. The historical foundation, organization, and delivery of maternal and child health and nutrition services and the influence of public policy are reviewed. Major issues such as cultural sensitivity, financing, unique needs of vulnerable groups (such as minority populations and children with special health care needs) and the social and environmental influences on health and the delivery of services are covered.

PHS 555 Maternal and Child Nutrition (3 hours) This course presents important aspects of growth and development, nutritional requirements and concerns, and dietary recommendations from conception to adulthood. Emphasis is on the special nutritional concerns of minorities and the medical, psycho-social, and environmental factors influencing nutritional status. Topics in current controversies, chronic disease prevention, nutrition education, and health promotion are also covered.

PHS 556 Cultural Nutrition and Health Disparities (3 hours) This course addresses food and its role in the culture and food beliefs and practices of various religious and ethnic groups in the United States. It emphasizes the impact of culture, socio-economic differences, and other factors on food practices and health beliefs to prepare students to provide culturally sensitive services to communities and clients.

PHS 557 Sports, Wellness, and Contemporary Nutrition Issues (3 hours) This course examines the scientific basis for diet and exercise recommendations, nutritional needs and concerns of athletes, ergogenic aids and nutrition supplements, eating disorders, health benefits and risks of vegetarian diets, and promotion of physical activity and healthy eating habits. Current nutrition issues and controversies covered include research in weight management and obesity treatment, high protein, low carbohydrate and other weight loss diets, health benefits of phytoestrogens and functional foods, food irradiation and biotechnology, dietary supplements and alternative nutrition and herbal therapies. Modern and ancient approaches to diet and exercise are explored.

PHS 561 Administration of Integrated Health and Hospital Systems (3 hours) This course focuses on the complex and essential interrelationships that exist within and among healthcare entities. The course will

(1) identify and study components of the healthcare system (hospitals, clinics, home care agencies, hospice care, emergency medical services, etc.) and discuss the interrelationships necessary for their survival and (2) explore the variety of arrangements (networks, systems, alliances, etc.) used to integrate and manage these entities. The course illustrates that survival within the healthcare industry is largely predicted upon an entity's ability to partner with other healthcare providers.

PHS 562 Nursing and Mental Health Facilities Administration (3 hours) This course focuses on the essential function of management and administration within nursing and mental health facilities. Attention will be given to the multitude of facets of management and administration and the theoretical and practical foundation of each facet. Attention will also be given to environmental factors, both internal and external, that managers must attend to within the nursing and mental health environment.

PHS 563 Primary Care and Group Practice Management (3 hours) This course focuses on management issues pertaining to the primary care and group practice settings in healthcare. This course will deeply explore a variety of management aspects, stressing management implementation strategies and techniques in the practice setting.

PHS 564 Comparative and International Health Systems (3 hours) This course introduces important methodological approaches to comparative analyses. For analytical purposes, the health systems of the world will be classified into four major categories. Important examples from each of these categories will be discussed. Specific objectives of the course are: to discuss the health system categories and their determinants; to identify important components of a health system; and to illustrate the health system categories by selecting country case studies. Health care reform proposals of various countries will also be discussed.

PHS 565 Health Care in Developing Countries (3 hours) This course introduces the students to health care in settings with severe resource constraints, rapid population growth, critical competing priorities, poor data collection, and high disease burden. Students are prepared for effectiveness in international health by studying infectious disease control, nutrition, environmental health, health practices, and needs for sustainability as they apply to the tropical setting.

PHS 571 Statistical Theory (3 hours) This course is an introduction to the mathematical foundation of statistics and statistical theory. It provides an in depth coverage that includes probability theory, probability distributions, random variables, theories of statistical testing, interval estimation, and hypothesis testing. The course starts with defining a sample space and the random variable then expounds to include distribution and density functions and concludes with applications of hypothesis testing and confidence interval estimation. Prerequisites: PHS 503 or an equivalent introductory course in biostatistics.

PHS 572 Statistical Computer Applications (3 hours) The purpose of this course is to teach two statistical computing applications: Statistical Packages for the Social Sciences (SPSS) and Statistical Analysis Software (SAS). This course covers the basic and intermediate applications of these two statistical programming applications. For SPSS, students will learn the following: the basic components of the software (input, analysis and output interfaces), using the data editor, creating SPSS data file, create and recode variables, and set properties of variables. For SAS, students will learn the following: components to a SAS program, syntax of SAS program, comment statements, the various features of the Data Step, Procedure (PROC) Steps, common features of both Steps, and SAS Utilities will be covered in much detail. Students will apply the knowledge and skills acquired to the generation of statistical reports using descriptive statistics and related charts. The common feature of the PROC Step of statistical methods ranging from Descriptive Statistics through Analysis of Variance.

PHS 587 Special Topics in Public Health (3 hours) This course enables students to pursue a topic or project of their choice in Public Health, such as health disparities, prevalent illnesses in Mississippi and the US, eg., diabetes and obesity, HIV/AIDS, cardiovascular ailments, and stroke; international health systems; interventional studies in public health; and tropical diseases, e.g., leprosy, onchocerciasis, trypanosomiasis, malaria, and yellow fever. The course provides MPH students additional research methods training and skills in their public health concentration. Consent of the department chair required.

PHS 598 Contemporary Issues in Public Health (1-3 hours) This course highlights selective topics in public health relevant to today's changing public health forum and environment. The topics are designed to encompass a broad range of public health issues. Thus, topics for discussion are addressed within each of the following core areas of public health: Behavioral Health, Biostatistics, Environmental Health, Epidemiology and Health-Related Conditions, and Health Care Planning and Organization.

PHS 599 Independent Study (1-3 hours) This is an individual directed study in a specific concentration of public health selected by the student and approved by the professor.

PHS 601 Advanced Biostatistics and Computer Science Applications (3 hours) This course is an advanced, intermediate level course in biostatistics with emphasis on statistical and analytical techniques important to researchers and practitioners within the public health setting. This course provides in depth coverage of bio-statistical methods including statistical inference, sample size calculation, and multivariate regression techniques. This course is offered as an advanced PSH 701 with modification in the theoretical exercises and course expectations for examinations. Prerequisites: PHS 503, PHS 506 and PHS 572.

DOCTOR OF PUBLIC HEALTH (Dr.P.H.)

The Doctor of Public Health is offered in a specific concentration through the following departments:

Behavioral and Environmental Health

Dr.P.H. with a concentration in Behavioral Health Promotion and Education

Department of Epidemiology and Biostatistics

Dr.P.H. with a concentration in Epidemiology

Department of Health Policy and Management

Dr.P.H. with a concentration in Health Policy and Management

Overview

The Doctor of Public Health degree provides a foundation of core and elective courses beyond the master's degree that will prepare the student for leadership in public health research and/or practice. This includes a dissertation that involves independent study under a faculty mentor. The specific program at Jackson State University focuses on eliminating disparities in health and healthcare.

The Dr.P.H. Degree Program prepares students to assume leadership roles in public health, especially as research scientists, administrators, educators, or practitioners. Such roles can be expected to include, but not be limited to, positions in organizations and agencies such as universities, public health agencies, hospitals, managed care organizations, pharmaceutical companies, research firms, and other settings where public health specialists are employed.

The program will include advanced theoretical and practical studies in the specialized fields of public health as well as the preparation of a dissertation. The dissertation will establish the student as a competent researcher and scholar, capable of conducting and supervising independent research studies. Students will be trained to study public health from a multidisciplinary perspective to appreciate the disparities affecting minorities in terms of health and healthcare services.

Students will master core competencies in public health as well as specialized courses in their chosen concentration. They will develop a high level of analytical (quantitative and qualitative research) skills, complemented by an extensive breadth of relevant leadership knowledge in research grant preparation, management, study implementation and evaluation.

Admission Requirements

Requirements for admission to the Dr.P.H. program include dual admission to the Division of Graduate Studies and to the program itself, together with two official copies of transcripts from all colleges and/or universities attended, a masters' degree in Public Health from an accredited college or university,

specific program requirements, and a minimum GPA of 3.0 on the highest degree earned.

All students seeking admission to the program must meet the following criteria:

1. A master's degree from an accredited college or university.
2. Dr.P.H. program and Division of Graduate Studies applications.
3. An overall GPA of 3.0 or above (on a 4.0 scale) on the highest earned degree.
4. Transcripts from universities or colleges prior to program application.
5. A satisfactory score on the GRE.
6. Three letters of recommendation with at least two from academic professionals.
7. Statement of purpose reflecting applicant's career goals in public health. Recommendation by the program steering committee.
8. For international applicants, satisfactory performance on TOEFL demonstrating oral and written proficiency.

Admission to the Division of Graduate Studies does not automatically guarantee admission to the Dr.P.H. Program. Applications are accepted year round for admission each Fall. The priority deadline for the Fall admission is March 1. Applications received after that date cannot be guaranteed review for the current year Fall admission.

Degree Requirements

The Dr.P.H. curriculum provides a broad grounding in overall public health knowledge and skills in addition to an in-depth learning experience within the program concentrations. The curriculum represents an interdisciplinary approach and bridging of academic core areas.

Community Research Practicum.

Students are required to spend a minimum of 100 clock hours per semester in the community health research practicum. A minimum of three hours per week must be on site. The research practicum, which begins the second semester of enrollment, requires three continuous, one-semester hour courses, which culminates in the final semester. A written and oral presentation of the community research project and the submission of a manuscript to a refereed journal for publication review are required to complete the third course.

Comprehensive Examination

To become a candidate for the Dr.P.H. degree a student must take and pass a written comprehensive examination. The comprehensive examination must be passed prior to approval of the dissertation proposal. The examination will include core doctoral courses and information from each concentration. A score of 80 percent or higher will be required for passing.

Transfer of Credits

Students accepted into the program can transfer up to nine (9) credit hours from previous graduate work from a regionally accredited institution of higher education. A maximum of nine graduate credit hours may be transferred subject to the discretion of the faculty, department chair, and dean.

Course Requirements

The course requirements for the two tracks of the Dr.P.H. program are described below.

Candidates with a Master of Public Health degree or a master's degree in a public health discipline.

The curriculum is divided into advanced core courses (18 credit hours), concentration courses (15 credit hours), three elective (9 hours), a community research practicum (3 credit hours), and a dissertation. The advanced core courses (18 credit hours) are required for each concentration. The required concentration courses are specific to each concentration. Electives (9 credit hours) expand the student's focus within a specific concentration. Although electives may be selected from other disciplines, including non-public health degree programs, they must be related to the concentration of interest and approved by the doctoral program advisors.

The community research practicum – the field residency – is based on research and issues related to each student's concentration. The practicum allows students to develop insight into planning their dissertation so that research can be focused on addressing practical concerns in public health and the community.

Students are required to complete a minimum of 45 credit hours plus a dissertation. Students with an M.P.H. or master's degree in a public health-related discipline may transfer up to nine credit hours as electives. For successful completion of the program, all students are required to have taken an introductory course in each of the five core areas of public health: epidemiology, biostatistics, environmental and occupational health, health policy and management, and behavioral health. Students who have not completed introductory core courses must complete the courses prior to beginning their dissertation or taking any advanced courses in the concentration.

Upon admission into the program, students must choose a concentration in public health for their doctoral studies. The course requirements for the concentrations of Behavioral Health Promotion and Education, Epidemiology, and Health Policy and Management are listed below.

Advanced Core Courses

Course	Title	Hours
PHS 701	Advanced Biostatistics and Computer Science Applications	3
PHS 702	Disease Pathogenesis and Behavioral Risk Factors	3

PHS 703	Designing Research Studies on Minorities and Special Populations	3
PHS 704	Survey and Qualitative Research Methods	3
PHS 705	Advocacy and Public Health Policies	3
PHS 706	Principles of Environmental and Occupational Health	3
PHS 711-713	Advanced Biostatistics Laboratory (I-III)	<u>3</u>
	<i>Hours</i>	21

Concentration Courses

Required Courses	15
(See Specific Concentrations Below)	
Electives (Related to the concentration)	<u>9</u>
<i>Hours</i>	24
Community Research Practicum	3
Dissertation (maximum 15 credit hours)	<u>15</u>
<i>Total Hours (not including dissertation)</i>	45

Concentration Courses

The course requirements for the concentrations of Behavioral Health Promotion, Environmental and Occupational Health, Epidemiology, and Health Policy and Management:

Behavioral Health Promotion and Education 15

(Required Concentration Courses)		
PHBS 711	Advanced Theories and Scientific Principles for Health Promotion and Education	3
PHBS 712	Behavioral and Psychosocial Epidemiology	3
PHBS 713	Qualitative Research Methods (SW 742)	3
<i>(Two of the following)</i>		
PHBS 714	Clinical Trials and Interventional Study Designs	3
PHBS 715	Research Seminar in Health Promotion	3
PHBS 716	Social and Cognitive Bases of Behavior (PSY 606)	3
PHBS 717	Data Base Management Systems (CSC 520)	3

Epidemiology 15

(Required Concentration Courses)		
BIOS 711	Categorical Data Analysis	3
EPI 711	Behavioral and Psychosocial Epidemiology	3
EPI 712	Clinical Trials and Interventional Study Designs	3
<i>(Two of the following)</i>		
BIOS 712	Multivariate Analysis I (PSY 635)	3
EPI 713	Infectious Disease Epidemiology	3
EPI 714	Nutrition and Genetic Epidemiology	3
EPI 717	Environmental Epidemiology (ENV 780)	3

Health Policy and Management 15

(Required Concentration Courses)		
HPM 711	Strategic Leadership in Management of Human Resources	3
HPM 712	Public Health Economics	3

HPM 713	Analysis of Health Legislation and Regulations	3
<i>(Two of the following)</i>		
HPM 714	Evaluation of Performance and Quality of Health Service Organizations	3
HPM 715	Decision Modeling	3
HPM 716	Administration of Integrated Health and Hospital Systems	3
HPM 717	Managed Care Networks and Public Health	3

DESCRIPTION OF COURSES

Interdisciplinary Courses

PHS 701 Advanced Biostatistics and Computer Science Applications (3 Hours) This is an advanced course in biostatistics with emphasis on statistical inference, sample size calculations, and multiple regression techniques. The course emphasizes the use of computer software packages in conducting statistical procedures. The software packages include SPSS, SAS, Epi Info, GIS, and others. Emphasis is placed on selecting the appropriate statistical test and the most appropriate analytical procedure. Advanced Biostatistics Lab I course (PHS 711) must be taken simultaneously with this course.

PHS 702 Disease Pathogenesis and Behavioral Risk Factors (3 Hours) This course addresses the major behavioral factors causing diseases in the nation. The course focuses on cardiovascular disease, cancer, HIV, and other chronic diseases. Disease pathology and pathogenesis are described, and their major determinants and behavioral risk factors are examined. Current models and theories of disease prevention and health promotion are addressed. Students will learn how to implement effective strategies and interventions to reduce risk factors and diseases.

PHS 703 Designing Research Studies for Minorities and Special Populations (3 Hours) This course examines unique health problems and concerns among African Americans, rural populations, women, children, other minorities and special populations. It describes basic study designs and their strengths and limitations, and addresses specific cultural competencies, research codes of ethics, and health disparities. It also addresses strategies for designing studies and interventions involving lay community leaders, faith-based organizations, and innovative means to reach special communities.

PHS 704 Survey and Qualitative Research Methods (3 Hours) This course explores descriptive research methods and emphasizes the importance of using a mixed approach of qualitative and quantitative techniques. Students are provided with an overview of survey research methodology. Questionnaire and interview design, scale construction, methods of administration, response rate, reliability measurements, scale construction and validity are discussed. Also, specific qualitative methods and techniques such as participant observation, interviewing, focus groups, and use of personal documents and records are discussed.

PHS 705 Advocacy and Public Health Policies (3 Hours) This course introduces advocacy and support measures for the promotion and formation of new legislation and the establishment of public health policies. Important federal, state, and international legislation is analyzed. The course also addresses the trends and processes by which public health programs are established in the United States and around the world.

PHS 706 Principles of Environmental and Occupational Health (3 Hours) This course addresses comprehensive public health functions of environmental health issues, evaluation and control of occupational disease hazards, effects of pollutants on human health and ecological balances; and future legislative directions for environmental policy. Topics addressed include environmental health exposures science, environmental health policy (aspects of justice, social, economic, and ethical issues), chemical and physical agents through air, food, water and workplace environment, and behavioral modifications to prevent exposures and promote public health.

PHS 711-712-713 Advanced Biostatistics Lab I, II, and III (1 Hour per lab course) These laboratory courses accompany the Advanced Biostatistics and Computer Applications courses. The computer laboratory courses provide practical experience with the computer software programs discussed in the class. The biostatistics course (PHS 701) and Lab I must be taken at the same time. Lab II and Lab III are taken during the following semesters. Each lab course is a one-hour credit.

PHS 750 Community Research Practicum (1-3 Hours) This is a supervised community experience where students participate in a community-oriented service or practice to gain first hand knowledge of community issues and decision-making processes. In the context of this experience, the student begins developing a research agenda that should be relevant to community needs and/or practices. Students are required to register for the 1-credit hour practicum during the second semester and maintain enrollment each semester for three consecutive semesters, with the third semester culminating as the capstone experience. A final paper of publishable quality is required for completion of the course and registering for the dissertation.

PHS 755 Independent Study (Variable Hours) This is an individually directed study in a specific concentration in public health selected by the student and approved by the professor.

PHS 756 Special Topics in Public Health (1-2 Hours) This course enables students to pursue a topic or project of their choice in Public Health, such as health disparities, prevalent illnesses in Mississippi and the US, e.g., diabetes and obesity, HIV/AIDS, cardiovascular ailments, and stroke; international health systems; interventional studies in public health; and tropical diseases, e.g., leprosy, onchocerciasis, trypanosomiasis, malaria, and yellow fever. The course provides Dr.PH students additional research methods training and skills in their public health

concentration. Consent of the department chair required.

PHS 798 Dissertation (3-15 Hours) Students will complete doctoral level research that demonstrates the ability to conduct a rigorous project within a specific concentration. The research topic, approved by the dissertation committee, should reflect the candidate's interest in a problem unique to public health. The completion of a minimum of 45 semester credit hours is required before enrolling in this course. Enrollment must be continuous until the research experience culminates in the successful defense of the dissertation. Prerequisite: Consent of the Chair of the Dissertation Committee each semester of enrollment.

Behavioral Health Promotion and Education Concentration

PHBS 711 Advanced Theories and Scientific Principles for Health Promotion and Education. The course provides an extensive overview of current theories and models of health promotion and education. In addition, it reviews the scientific evidence and principles supporting the foundation of health promotion and educational programs.

PHBS 712/EPI- 711 Behavioral and Psychosocial Epidemiology (3 Hours) This course provides an overview of social, personality, and cultural factors influencing behavior. It also addresses stress and related psychosocial factors as determinants of health and disease. Psychosocial and behavior models are also discussed. Doctoral students are required to analyze a specific data set and prepare a research literature report on a specific topic in behavioral and psychosocial epidemiology. A prerequisite for the master's students is PHS 505 Principles of Epidemiology. Prerequisite for doctoral students is PHS 702 Disease Pathogenesis and Behavioral Risk Factors.

PHBS 713/SW 742 Qualitative Research Methods (3 Hours) This course examines major qualitative approaches that are most frequently applied to the study of process in human service settings. Students learn how to conduct systematic investigations of in-depth, non-quantitative studies of individuals, groups, organizations, or communities.

PHBS 714/EPI 712 Clinical Trial and Interventional Study Designs (3 Hours) This course reviews in greater detail the design, conduct, and evaluation of clinical trials and cohort studies. In addition it addresses errors and common methodological pitfalls using practical illustrations. The first half of the course addresses clinical trials and the second half focuses on other interventional study designs. Prerequisites include PHS 521 Epidemiological Study Designs and PHS 703 Designing Research Studies on Minorities and Special Populations.

PHBS 715 Research Seminar in Health Promotion (3 Hours) This course exposes graduates to current research methods and practice in health promotion. The course will consist of a series of guest lecturers.

PHBS 716/PSY 606 Social and Cognitive Bases of Behavior (3 Hours) This course addresses the theories

and research on attitude formation and change, attributional styles, prejudice, interpersonal perception, group dynamics, self-regulation, and cognitive styles.

PHBS 717/CSC 520 Database Management Systems (3 Hours) This is an introduction to database concepts including data independence, relations, logical and physical organizations, schema, and subschema. Hierarchical, network, and relational models, with description of logical and physical data structure representation of the database system are discussed. Finally, normalization: first, second, and third normal forms of data relation and relational algebra, relational calculus, data structure for establishing relations, and query functions are addressed.

PHBS 718/EPI 712 Clinical Trials and Intervention Study Designs (3 Hours) This is an in-depth course on the design, conduct, and evaluation of clinical trials and cohort studies. In addition, it addresses systemic errors and common pitfalls using practical illustrations from various sources. The first half of the course addresses clinical trials and the second half focuses on other interventional study designs. Prerequisites include PHS 521 Epidemiological Study Designs and PHS Designing Research Studies in Minorities and Special Populations.

PHBS 719/SW 744 Clinical Practices with Urban Poor and Undeserved Populations (3 Hours) This course examines a range of modalities used in working with urban poor populations, including the use of empowerment strategies with women of color and victims of urban violence, use of group work models with parenting teens, and the diagnosis and treatment of Posttraumatic Stress Disorders (PTSDs). Theoretical models and social work strategies that have been applied in urban settings are critically analyzed.

Epidemiology Concentration

PHEP 711 Behavioral and Psychosocial Epidemiology (3 Hours) This course provides an overview of social, personality, and cultural factors influencing behavior. It also addresses stress and related psychosocial factors as determinants of health and disease. Psychosocial and behavior models are discussed. Doctoral students will be required to analyze a specific data set and prepare a research literature report on a specific topic in behavioral and psychosocial epidemiology. A prerequisite for the master's students is PHS 505 Principles of Epidemiology. Prerequisites for doctoral students include PHS 505 and PHS 702 Disease Pathogenesis and Behavioral Risk factors.

PHBI 711 Categorical Data Analysis (3 Hours) This course provides an in-depth review of the appropriate biostatistical techniques for analyzing categorical data. Included will be chi-square statistics, log-linear analysis, and logistic regression. SPSS and/or SAS statistical software packages will be utilized. Prerequisites: PHS 503 Introduction to Biostatistics and Computer Applications, PHS 701 Advanced

Biostatistics and Computer Applications, and a multiple regression analysis course.

PHEP 712 Clinical Trial and Interventional Study Designs (3 Hours) This course provides an in-depth review of the design, conduct, and evaluation of clinical trials and cohort studies. In addition it addresses errors and common methodological pitfalls using practical illustrations. The first half of the course addresses clinical trials and the second half focuses on other interventional study designs. Prerequisites include PHS 521 Epidemiological Study Designs and PHS 703 Designing Research Studies on Minorities and Special Populations.

PHEP 713 Infectious Disease Epidemiology (3 Hours) This course reviews infectious agents of public health importance. Included are vaccine-preventable infectious diseases; diseases spread by personal contact, water, and food; and arthropod-borne diseases and nosocomial infections. In addition, the emergency preparedness system will be discussed and agents involved in bioterrorism will be addressed regarding treatment and (PHS 702) prevention. Prerequisites are PHS 505 Principles of Epidemiology, and Disease Pathogenesis and Behavioral Risk Factors.

PHEP 714 Nutrition and Genetic Epidemiology (3 Hours) This first half of the course addresses nutritional factors and their relationship to disease. The second half involves a review of genetics, inheritance, and molecular factors causing disease. Prerequisites are PHS 505 Principles of Epidemiology, and PHS 702 Disease Pathogenesis and Behavioral Risk Factors.

PHEP 715/ MNGT 712 Applied Multivariate Analysis (3 Hours) This course offers doctoral students a thorough analysis of the theory and applications of multivariate methods. Topics to be covered include matrix algebra, factor analysis, canonical correlation, discriminant function analysis and multivariate analysis of variance. Prerequisite: MNGT 710 or equivalent. May substitute PSY 635.

PHEP 716/PPAD 610 Epidemiology and Toxicology for Public Managers (3 Hours) This course introduces and teaches the concepts, theories, facts, and principles of the study, prevention and treatment of disease and poisons. The course includes conducting an epidemiological study.

PHBI 712/PSY 635 Multivariate Method I (3 Hours) This course covers multivariate analysis of variance and covariance, canonical correlation, factor analysis, discriminant function analysis, and selected advanced topics. Prerequisite: PSY 502 may be substituted for MNGT 712.

PHBI 713/ PSY 665 Multivariate Methods II (3 Hours) Structural-equation models, log-linear models, and selected advanced topics based on student needs and interests. Prerequisite: PSY 635.

PHEP 717 / ENV 780 Environmental Epidemiology (3 Hours) This course is designed to provide students with the basic knowledge and skills required to develop and apply epidemiologic principles and concepts to the study of adverse effects of various environmental factors on both human and

ecological health. Emphasis is put on the study of the health effects of physical, chemical and biological factors in the external environment, broadly conceived from the epidemiological point of view. As such, it enables students to interpret epidemiological data and understand the approaches used in epidemiological investigations of acute and chronic diseases. The course also covers the basic methods and issues involved in epidemiologic investigations of disease conditions in human populations.

Health Policy and Management Concentration

PHPM 711 Strategic Leadership in Management of Human Resources (3 Hours) This course provides theoretical and practical knowledge for managing the human resources of public health organizations. Topics include cultural and psychological factors affecting recruitment, selection, placement, and promotion; training and development processes; performance appraisal methodologies; and job evaluation methods and compensation practices. Factors promoting employee productivity and job satisfaction are explored. Legal concerns, including the requirements for the validation of selection tools, are covered.

PHPM 712 Public Health Economics (3 Hours) This course examines factors determining the supply and demand for healthcare services. Markets for professional services, drugs, and insurance are discussed. Competitive effects on efficiency, effectiveness, and access are examined. The class discusses relevant theories of production, cost curves, market structure, and factor price determination.

PHPM 713 Analysis of Health Legislation and Regulations (3 Hours) This course identifies and analyses legislation and regulations that determine and/or influence healthcare access, delivery and practice. It focuses on the factors that influence policy formulation and implementation. Students are expected to analyze laws and regulations affecting the health of populations at risk for major health problems. Examples of current issues covered are Medicaid, Medicare, HIV/AIDS, family planning, and cardiovascular disease.

PHPM 714 Evaluation of Performance and Quality in Health Service Organizations (3 Hours) This course provides an overview of theories and designs used for measurement and evaluation of the performance of healthcare organizations. Emphasis is given to the importance of quality as a measure of performance. Strategies to insure continuous performance improvement and excellence in delivery of services are explored.

PHPM 715 Decision Modeling (3 Hours) This course describes the application of the techniques of analytical modeling to managerial decisions. The course offers a study of data collection, presentation, and analysis including Bayesian inference, decision matrices, and decision trees.

PHPM 716 Administration of Integrated Health and Hospital Systems (3 Hours) The course focuses on the complex and essential interrelationships that exist within and among healthcare entities. This

course will 1) identify and study components of the healthcare system (hospitals, clinics, home care agencies, hospice care, emergency medical services, etc.) as well as the interrelationships necessary for their survival. 2) It will explore the variety of arrangements (networks, systems, alliances, etc.) used for integrating and managing these entities. This course will also illustrate the fact that survival within the healthcare industry is largely predicated upon an entity's ability to partner with other healthcare providers.

PHPM 717 Managed Care Networks and Public Health (3 Hours) This course introduces the dynamic impact of managed care on the delivery of healthcare services and the cost containment features of health plans that thrived in the 1990s. The student will become familiar with all aspects of managed care (HMOs, PPOs, and POS) from effectiveness including of these healthcare plans medical/loss ratios, profit margins and outcomes measurements to their effects on access to quality of healthcare services.

PHPM 720/ PPAD 607 Management of Information Systems (3 Hours) This course familiarizes students with quantitative approaches that can be used to solve problems in public sector management.

PHPM 723/ PPAD 660 Financial Management in Public Organizations (3 Hours) The management of organizational resources is the focus of this course. While local governments will be highlighted, the principles and techniques have applications to all public and quasi-public organizations. Prerequisite: PPAD 549 - Public Finance Administration or equivalent.

PHPM 724/ MNGT 723 Seminar in Strategic Management (3 Hours) This course offers special topics dealing with important issues in strategic management. The course emphasizes global and technological perspectives of strategic management issues.

PHPM 725/ MNGT 725 Seminar in Organizational Change (3 Hours) This course focuses on the human aspects of problems arising in technical, social, and organizational arenas faced with the need to change. The course includes detailed analyses of organizations as systems, organizational leadership and change.

PHPM 726/ MNGT 726 Seminar in Organizational Strategy and Decision Making (3 Hours) This course offers an overview of the theory and research in strategic management with a scholarly research orientation on issues of both strategic content and process. The empirical study of these issues is emphasized.

PHPM 727/ SW 724 Policy and Practice Issues in Family and Children's Services (3 Hours) This seminar is designed to provide students with an opportunity to explore policies, programs, services, and related practice issues affecting families and children. It focuses on the nature of selected policies, the policy-making process, factors that influence policy formulation, implementation, and evaluation and approaches to policy analysis. Particular

emphasis is placed on the critical examination of selected policy and practice issues related to families and children. Students are expected to prepare a major analytical policy or practice issue paper. Examples of current issues covered are the impact of welfare reform, Medicaid coverage, managed care, homelessness, permanency planning for children at risk, and research on the prevention of family and /or youth violence.

PHPM 728/SW 762 International Health Policy and Practice Issues in Social Welfare (3 Hours) This course examines international health policy issues and trends and their implications for access to healthcare at the international level. It explores issues of accessibility, affordability, attitudes and belief systems, and indigenous governmental and non-governmental organizations. The course provides a seminar setting for conceptualization and organization of theoretical concepts and constructs related to healthcare policy and service delivery paradigms with implications for practical utilization.

Dr. Otha Burton, Associate Dean

Departments

- ◆ Public Policy and Administration
- ◆ Urban and Regional Planning

The School of Policy and Planning is made up of the Department of Public Policy and Administration, the Department of Urban and Regional Planning, and the Urban Studies Program. The School offers an undergraduate degree in Urban Studies, and master's degrees in Public Policy and Administration and Urban and Regional Planning. Doctorate degrees are offered in Public Administration and Urban and Regional Planning.

The School of Policy and Planning seeks to provide a vibrant, thriving learning environment for students, faculty and staff. The School seeks to address the growing complexity of urban problems in a supportive, interdisciplinary manner. All programs within the School are dedicated to and passionate about enhancing each individual so that he or she is:

1. Receptive to the world through the sharpening of senses;
2. Comprehending of the world through the exercise of intelligence;
3. Creatively envisioning other worlds through imagination;
4. Effective in the world through practice of skills;
5. Supportive of sensitive responses to problems of the environment.

The School introduces a sense of the relationship of communities and built form to culture, policy, and management, through the examination of theory, practice, prototypes, patterns, and precedents.

We believe in a learning process that is integrated, meaningful and implemented in a continuous-progress manner where all learners are successful. The learning is designed to accommodate each person's needs, unique gifts and style of learning while ensuring the common core of student learning.

We believe in learning that strikes a balance between comprehensive understanding and specialization, between theory and practice, and between academic inquiry and professional pragmatism. An innovative attitude toward the future of planning and design is emphasized and is explored through the classroom, group projects and field studies.

We believe each individual accepts responsibility for realizing his or her full potential and constantly works towards enhancing the capacity of others.

SCHOOL OF POLICY AND PLANNING

We realize the value of our individual role and service but also believe we are part of something larger than our School.

Dr. C. Moreland-Young, Professor and Interim
Chair
3825 Ridgewood Rd., Box 18
Jackson, MS 39211

Faculty

Dr. G. Billingsley, Visiting Professor
Dr. J. Gilleylen, Associate Professor
Dr. K. Choudhury, Associate Professor
Dr. B. Odunsi, Associate Professor

The department offers a Master of Public Policy and Administration (MPPA) degree and a Doctor of Philosophy (Ph.D.) in Public Administration.

Accreditation

The Programs within the Department of Public Policy and Administration are accredited and rostered by the National Association of Public Affairs and Administration (NASPPA).

Educational Philosophy

The effort to allocate resources and the administration of the allocation of resources is as old as the history of humankind residing communally. However, the academic discipline of American Public Administration is a comparatively new discipline, tracing its beginning to the late 1800's. From that time period to the present, the discipline of Public Administration has been linked, perhaps more than many others, to the ideological foundations of the American intergovernmental system. The major focus of any Public Administration Program of quality has, and continues to be on the administration of resources with equity. Indeed, the public servant then becomes the noblest of all professions, practicing the noblest art. The nobility of public service and the underpinnings of the concepts of equity and the allocation of resources with equity is the ethos which drives the philosophy of learning in the Public Policy and Administration Department at Jackson State. It is this philosophy which we seek to engender in the PPA student. The Department of Public Policy and Administration is the historical principal unit at Jackson State University which educates persons primarily for careers in the fields of public management and policy analysis and for service in public, non-profit, and "quasi" public organizations. Concomitantly, it is also the mission of the Department of Public Policy and Administration to serve as a resource to the Jackson State University community, the Jackson metropolitan area, the State of Mississippi, the Nation, and developing areas throughout the World.

**THE DEPARTMENT OF PUBLIC POLICY
AND ADMINISTRATION**

The Department of Public Policy and Administration seeks to prepare students for significant professional managerial and leadership positions. The curriculum is designed to equip students with the skills of contemporary public management, provide a broad understanding of the role of administration in the decision-making process, and provide a sound foundation in ethics.

The Master of Public Policy and Administration Degree

Mission

The mission of the MPPA Program are:

1. To provide a cadre of highly trained individuals who are committed to the notion of public service in a variety of organizational settings;
2. To develop advanced educational opportunities for students of public administration in an urban environment where a multiplicity of governmental opportunities, interactions and practices are observed; and
3. To fill the need for public, high-level executive management which exists in this state and the nation, particularly as this need relates to minorities and women.
4. To serve as a resource to the greater community.

Program Objective

The Master of Public Policy and Administration degree is designed to prepare students for significant professional and managerial positions primarily in public agencies, governmental departments, and non-profit and other administrative entities.

Admission Requirements

Students wishing to enter the Program must have a B.A. or B.S. from an accredited college or university. Program applicants should take the G.R.E. or G.M.A.T., submit three letters of recommendation (at least two academic references), academic transcripts, an MPPA application, and a University application. Students must have a 3.0 cumulative GPA for an unconditional admission. The Department may require an oral and/or written interview.

Alternative Admission Track

The Department of Public Policy and Administration has developed an "alternative admission track" for the MPPA degree program for students who do not meet the general admission requirement. The track establishes other criteria for gaining entry into the program.

1. The applicant must have graduated at least three years prior to admission.
2. The applicant must have a full-time employment history of at least three years.
3. The applicant must provide a rationale in writing, as a part of the career goals essay, which demonstrates to the Admission Committee that the applicant's prior history in academia is not indicative of their graduate potential.

4. The applicant must enroll in nine hours of MPPA core/concentration courses, three enhancement hours and obtain a 3.00 G.P.A. in the first semester of enrollment.
5. The applicant must attend a personal interview if requested by the Admission's Committee.

Program Curriculum

Students must maintain an overall 3.0 average in PPAD courses (4.0 scale) and successfully complete the following in order to earn the Master of Public Policy and Administration degree:

Thesis Option: 39 hours

1. Complete 18 hours of required courses.
2. Complete 12 hours of coursework in one of eight (8) specialized areas of general public administration
3. Take at least one (1) three- (3) hour course elective.
4. Complete 3-6 hours of internship or additional coursework if the student is in-service.
5. Take and pass a comprehensive examination. (*Given Spring and Fall only*)
6. Write and defend a thesis orally (3-6 hours).

Non-Thesis Option: 45 hours

1. Complete 18 hours of required courses.
2. Complete 12 hours of coursework in one of eight (8) specialized areas of general public administration.
3. Take at least one (1) three-(3) hour course elective.
4. Complete six (6) hours of internship or additional coursework if in services.
5. Take and pass a comprehensive examination. (*Given Spring and Fall only*)
6. Take six (6) additional hours (3 hours in a skill-based or research methods course and 3 hours in the area of specialization).

Specializations: Students have the opportunity to pursue the following program specializations:

Public Finance
Health Care Administration
Community and Economic Development
Judicial Administration
Human Resource Management
General Management
State and Local Government
Environmental Management, Planning & Policy

Students who enter the program without an understanding of the American Intergovernmental System, Research Methodology or Computer Applications to Management will have to take compensatory coursework which may not count towards the degree.

Only students admitted to a degree program may enroll in the Core Courses without prior approval.

Doctor of Philosophy in Public Administration

In 1992 Jackson State University commenced offering the Doctor of Philosophy Degree in Public Policy and Administration. The program requires a minimum of 60 semester hours of course work beyond the master's degree. This 60 hours includes the dissertation.

Mission of Program

The Ph.D. program has an urban management as well other areas of concentrations. Students are required to master a body of knowledge that centers around the public management aspects of urban problems; urban minorities; urban development (both past and present); and analysis of social systems. The program is designed to prepare persons for careers in executive management, teaching, research, and other positions of public and/or non-profit responsibility. Concomitantly, this degree program emphasizes the acquisition of a knowledge base in the discipline of Public Administration with an emphasis on policy making, planning, analysis, evaluation and program implementation. In addition to the urban

concentration, students will select a concentration in program management, policy analysis and/or environmental management, planning and policy. This degree is especially appropriate for persons in public, non-profit and "quasi-public" management settings.

Admission Requirements

The Doctor of Philosophy in Public Policy and Administration Degree is one which demands sound conceptual and analytical abilities. A solid educational foundation and substantial academic and professional achievement are among the criteria upon which applications for admission are evaluated.

Specific prerequisites for admission include the followings:

1. A graduate-level degree from an accredited institution with a grade point average of 3.5 as evidenced by an official transcript.
2. GRE (verbal and quantitative), MAT or GMAT.
3. Three letters of recommendation, two from academic sources.
4. A career goals essay.
5. Two samples of academic and professional writing.
6. For international students, a satisfactory score on the TOEFL or IELTS as determined by the Graduate School.
7. Other considerations such as work or life experiences which are directly related to potential successful completion of the program may also be factored into the admission review.
8. Interview.

Admissions to the Ph.D. Program are granted once per annum for the Fall Semester.

Alternative Ph.D. Admissions Tracks

The Admissions Committee reviews candidates' admission applications along with: GPA, letters of recommendation, writing sample, statement of professional goals, test scores, (GRE, GMAT or MAT) and work experience. Should a candidate fall below the 3.5 minimum GPA, three alternative admissions tracks are possible. Regardless of the track employed, each applicant must meet acceptable standards as reviewed by the Admissions Committee.

1. GPA 3.4 - 3.49 and one of the following:
 - A) Test Scores (GRE, GMAT or MAT)
 - B) Excellent writing sample
 - C) Excellent work experience
2. GPA 3.1 - 3.39 along with **A and B below**:
 - A) two of the following:
 - ◆ Test Scores (GRE, GMAT or MAT)
 - ◆ Excellent writing sample
 - ◆ Excellent work experience
 - B) An oral and/or written competency examination.
3. GPA 3.0 - 3.09 and all of the following:

- A) Excellent writing sample
- B) Public and private sector management experience in excess of 10 years
- C) An oral and/or written competency examination
- D) Test Scores (GRE, GMAT or MAT).

For the writing sample, excellence assessment is defined by a committee's assessment that the sample would be awarded a minimum of a B+ in a first- year Ph.D. course.

Excellent work experience is defined as a combination of duration in position and rank. Excellence is awarded to any combination of the following:

- ◆ Four (4) or more years of (4 year-college) teaching experience in a management field at the instructor level or above and performance evaluations of excellent.
- ◆ Four (4) or more years as senior executive (CEO, COO, VP, Facility Manager, or Department Head) of an organization employing 10 or more FTEs or which requires executive level skills such as fiscal and human resource management.
- ◆ Eight (8) or more years of public sector employment in mid-level or higher positions.

The committee may consider combinations of the above.

Oral and/or written interviews are required for admission to the doctoral program.

Deficiencies

Students who matriculate successfully in the Ph.D. Program in Public Policy and Administration must demonstrate a knowledge base of the American intergovernmental system, research methodology and computer applications, and fiscal resource and budgeting administration. Persons entering the program from academic disciplines without these subjects will be administered preliminary exams or other evaluative methods to determine the need for compensatory work. Compensatory work will not be counted toward the major program of students.

Degree Requirements

A minimum of 48 semester hours above the Master's degree, plus 12 hours in dissertation credits, is required to complete coursework for the Ph.D. in Public Administration. The 48 semester hours are divided as follows:

- ◆ 24 hours of public administration core courses
- ◆ 12 hours of urban management concentration courses
- ◆ 12 hours of elective concentration courses
- ◆ 12 hours of dissertation (which may be counted toward the degree)

Areas of concentration are: Policy Analysis, Program Management, Urban Management, Environmental Management, and Planning and Policy.

Public Administration Core

Required Courses

Course	Title	Hours
PPAD 705	Scope of Public Administration	3
PPAD 707	Management of Information Systems	3
PPAD 748	Human Resources Planning and Management	3
PPAD 760	Financial Management in Public Organizations	3
PPAD 776	Theories of Public Organizations	3
PPAD 777	Public Policy Formulation and Implementation	3
PPAD 796-90	Advanced Research Methods for Public Management I	3
PPAD 796-91	Advanced Research Methods for Public Management II	3
	Total Hours	24

Urban Management Core (12 Hours)

PPAD 712	Intergovernmental Relations	3
PPAD 738	Community Political Processes	3
PPAD 780	Administrative Law	3
PPAD 782	City Planning and Political Process	3
PPAD 786	Urban Problems, Non-Traditional Options & Techniques	3

*PPAD 782	Seminar in Program Development and Evaluation	3
FNGB 511	Computer Applications in Management	3

Policy Analysis

PPAD 706	Quantitative Methods	3
PPAD 708	Contemporary Topics in Public Administration	3
PPAD 709	Seminar in Executive Leadership Development	3
*PPAD 710	Advanced Quantitative and Qualitative Research	3
*PPAD 759	Seminar in Public Policy Analysis	3
*PPAD 782	Seminar in Program Development and Evaluation	3
xxx	"New Courses"	3

Environmental Management, Planning and Policy

PPAD 757	Environmental Law	3
*PPAD 760	Seminar in Politics of Environmental Administration	3
PPAD 761	Governmental Regulation of Natural Resources	3
*PPAD 709	Seminar in Executive Leadership	3
PPAD 781	Seminar in Community and Economic Development (strongly suggested)	3
PPAD 710	Toxicology and Epidemiology for Public Managers	3
ECON 700	Environmental Economics	3
BIO 501	Environmental Science (strongly suggested)	3
BIO 514	Methods of Environmental Analysis	3
UA 533	Rural Land Use and Plannin	3
UA 539	Risk Analysis	3
ITHM 529	Environmental Toxicology and Risk Assessment	3

Other Courses

PPAD 797	Internship
PPAD 798	Dissertation
PPAD 799	Independent Study

*Required Course: Must take at least six hours in concentration prior to enrolling in seminar course, unless granted an exemption.

Qualifying Exam

A qualifying exam must be taken by students at the completion of 18-21 hours of course work in selected courses (see Policy and Procedure Manual). This examination will determine the feasibility of a student continuing pursuit of the doctoral degree in Public Policy and Administration.

Students who do not pass the qualifying exam will be asked to exit the program.

Comprehensive Exam

A Comprehensive Exam will be administered by the Graduate Faculty. The student is expected to use the examination to creatively demonstrate his/her ability to integrate effectively the various fields of study and apply them to his/her own professional area. The Comprehensive Examination will be administered upon completion of course work and before the submission of a dissertation proposal.

Dissertation and Defense

To be awarded the Doctor of Philosophy in Public Administration degree, the candidate will be required to present and have approved a dissertation on a pertinent research problem in his/her area of concentration, and pass an oral examination in defense of the research. The student's plan for independent research will be developed with the assistance and active participation of the student's dissertation committee. The dissertation must demonstrate the student's competency in scholarly research.

Graduation Requirements

1. Completion of 48 hours of course work.
2. Passage of the qualifying examination.
(Given Fall, Spring and Summer)
3. Passage of the comprehensive examination.
(Given Fall and Spring only)
4. Maintenance of a GPA of not lower than 3.0 with no more than two grades of C.
5. Completion and Defense of the Dissertation Proposal and Dissertation.

Sample Matriculation Schedule of a Typical Ph.D. Student

Semester I

PPAD 705	Scope of Public Administration (C)
PPAD 760	Financial Management in Public Organizations
PPAD 796	Advanced Research Methods I. (C)

Semester II

PPAD 777	Public Policy Formulation and Implementation (C)
PPAD 796-91	Adv. Research for Public Man. II (C)
PPAD 776-90	Theories of Management in Public Organizations (C)

Semester III

PPAD 707	Management of Information Systems (C)
	Qualifying Examination to be taken

Semester IV

Submission of the Plan of Study

Semester V and VI

In subsequent semesters, the typical student will complete the Urban Core and Elective Concentration. Student must sit for the Comprehensive examination at the conclusion of all coursework.

Semester VII to X

Upon successful passage of the Comprehensive examination the Dissertation is initiated. After the Dissertation is written and successfully completed, the student graduates.

DESCRIPTION OF SELECTED COURSES

Notes: Courses offered outside the department may be taken with prior approval. For additional courses, please see Policy and Procedure Manual.

PPAD 504/704 Administration of Ambulatory Care Systems. (3 Hours) An analysis of primary health care as delivered in the United States and other countries. Various models of delivery are examined, e.g. via physician's office, Neighborhood Health Center, Health Maintenance Organization, etc.

PPAD 505 Principles of Public Administration. (3 Hours) An analysis of the basic principles and practices of Public Administration in the United States. Problems of structure, organization, administrative power, status and leadership are examined. Major actors in the struggle to control bureaucracy are identified. Value systems, ethics and application of administrative power are explored.

PPAD 507 Quantitative Analysis. (3 Hours) Students are familiarized with the application of relevant research techniques to the problems of public sector management and policy formulations. Required for entering students without research or computer skills.

PPAD 508/798 Advanced Quantitative/ Qualitative Analysis. (3 Hours) Prerequisite: Research for Public Management or Advanced Research I. This course gives the students a higher level of skills in research methodology.

PPAD 509/709 Seminar in Executive Leadership. (3 Hours) Leadership is an area of academic inquiry and skill development from historical, behavioral, political, and administrative perspectives. Additionally, students engage in research and projects which will develop their skills as executive leaders.

PPAD 513/713 Intergovernmental Relations. (3 Hours) Evolution of the American federal system; consideration of inter-unit cooperation and conflict; review of administrative issues like revenue-sharing, federal grants and regulations.

PPAD 514/714 Problems of County Administration. (3 Hours) Prerequisite: State and Local Government. Administrative operations in county government are discussed; emphasis is placed on understanding purchasing and contracting, personnel and financial administration, reporting and public relations.

PPAD 515 Metropolitan Government and Politics. (3 Hours) Prerequisite: American Government. Political and structural elements of public and private influences on policies like annexation, consolidation, regional development and planning are analyzed.

PPAD 516/716 The Administrative State. (3 Hours). Political environment of public administration; relation of bureaucracies to public opinion and

political pressure; relations among legislators, elected executives, and civil servants are discussed.

PPAD/PS 517 Seminar in Mississippi Government and Politics. (3 Hours) Special features of Mississippi governmental structure and political process are reviewed.

PPAD 518/718 Seminar in State Politics. (3 Hours). The examination of the organization, function, political dynamics and policy outputs of state governmental systems.

PPAD 519/719 Problems of State Administration. (3 Hours). Administrative operations in state government are reviewed with emphasis on planning research, purchasing and contracting, personnel and financial administration, reporting and public relations.

PPAD 520 Civil Rights Laws and Affirmative Action. (3 Hours) This course is designed to introduce the students to civil rights laws passed in America since the 1960s. As such this course examines the national government's response to the claims of racial/ethnic and language minorities. Every effort is made to relate changes in civil rights laws to the general nature of incremental policy making in the U.S.

PPAD 521/721 Black Perspectives in Public Administration. (3 Hours) Public Policy problems, perceptions and experiences of Blacks are examined along with policy process which impact the status of blacks. Broader questions concerning systemic change, structural transformation and historically built-in dilemmas are examined.

PPAD 525/725 Urban Politics and Policies. (3 Hours) Community power and decision-making; political leadership; the relationship of citizens of their government; the urban bureaucracy, citizen participation; and delivery of services are discussed.

PPAD 536/736 The Administration of Health Agencies. (3 Hours) A general overview of health care systems, especially the free enterprise system utilized in America, is discussed, including a review of empirical studies of demand for health services; behavior of providers, and relationship of health services to population health and the method in which public input into health care organizations helps form public policy.

PPAD 550/750 State and Local Government Budgeting and Finance. (3 Hours) Prerequisite: Public Finance or equivalent. Students study the fiscal problems of urban areas and the scope of government fiscal activities, including revenue trends, taxing policies, cash flow management, debt management and pension fund management.

PPAD 551 Public Policy. (3 Hours) Politics of the policy process; nature, determinants, and effects of public goods and services; formulation, implementation, and evaluation of public policies.

PS/PPAD 553 Constitutional Law and the Economic Enterprise.** (3 Hours) Prerequisite: PS 423 Constitutional Law. Selected social and regulatory legislation and its constitutional foundations are analyzed.

PPAD 557 Environmental Law. (3 Hours) Federal and state regulations designed to protect the environment are reviewed.

PPAD 558 The Correctional System. (3 Hours) Principles of the formal behavior-control devices are examined with an emphasis on legal systems and the philosophical background of criminal justice.

PPAD 559/759 Seminar in Public Policy Analysis. (3 Hours) Prerequisite: Public Policy Formulation and Implementation. This course provides a general and conceptual overview of the study of public policy as a major sub-field of public administration. Emphasizes the policy process and include methods and techniques of policy analysis.

PPAD 560 Seminar in Politics of Environmental Administration. (3 Hours) Prerequisite: Environmental Law. The contemporary aspects of environmental problems as reflected in society, politics and business that are faced by administrators are discussed.

PPAD 561 Governmental Regulation of National Resources. (3 Hours) Prerequisite: Environmental Law. The legal and political problems faced by government when trying to regulate use of natural resources are examined.

PPAD 562/762 Comparative Public Administration. (3 Hours) Prerequisite: Comparative Government. Students analyze administrative processes and systems in various types of governments including operation of national plans, public enterprises, and rural development.

PPAD 568 Labor Management Relations In the Public Sector (3 Hours) Prerequisite: PS 371. The course analyzes the development of labor unions at the national, state, and local government levels in the United States. (F)

PPAD 571/771 Program Development and Operation. (3 Hours) Prerequisite: Governmental Organization and Administration Theory. The development, operation, and evaluation of public programs; examination of various problem solving techniques; and problems associated with new programs are discussed.

PPAD 572 Human Relations in Public Employment. (3 Hours) Prerequisite: American Government. The course develops understanding of human problems in public agencies; focusing on collective bargaining, contract administration, personnel efficiency and morale, equal employment and affirmative action procedures.

PPAD 576 Administrative Theory. (3 Hours) Organizational change, effectiveness, and allocation processes in public agencies, are discussed. The theoretical models of open system, rationalist conflict, coalition-building and decision-making are examined, with the aim of presenting a unified set of propositions about organizations.

PPAD 579 Administrative Behavior. (3 Hours) The course examines administrative behavior and government management with appropriate comparison to private industry; analysis of principal elements of the public administrator's job, such as planning

procedures and work methods; evaluating and control programs and operations.

PPAD 580 Administrative Law. (3 Hours) Introduce students to series of important issues in Administrative Law. Issues and problems central to the field are explored by an analysis of relevant literature.

PPAD 582 City Planning and the Political Process. (3 Hours) A study of the planning process in urban and metropolitan areas, with particular attention to governmental and administrative policies and the machinery for dealing with problems involving complex political, economic, and technological factors and the planning process as it affects Black people.

PPAD 585/785 Seminar in Urban Problems. (3 Hours) An analysis of major urban problems, strategies and approaches proposed for their resolution, historical and political implications. Reformist efforts of government and private efforts will be examined with special emphasis on Post-New Deal developments and the impact on the Black community.

PPAD 586/786 Urban Problems and Non-Traditional Options. (3 Hours) An overview of the strategies, tactics and techniques of municipal administration. Innovative models for approaching political issues unique to municipalities and the impact of urbanization are discussed.

PPAD 587/787 Problems in Public Administration. (3 Hours) Case studies are analyzed to illustrate the major problems confronting top bureaucrats in public agencies. Problems studied include administrative policies and the relationship of public agencies to their clients in specific administrative situations.

PPAD 596 Research for Public Management. (3 Hours) Prerequisite: Quantitative Analysis or equivalent. Empirical analysis for practical administrative problems and the development of new management techniques, including controlled social experimentation; simulation of policy issues; evaluation of future, alternatives. Diagnostic examination must be passed.

PPAD 597 Internship. (3 Hours) Prerequisite: Twelve hours graduate course work in Public Administration prior to this individual work experience in a government agency. (Prior approval in the preceding semester)

PPAD 598 Thesis (3 Hours) Prerequisite: Completion of coursework and comprehensive.

PPAD 599/699 Independent Study. (3 Hours) The student selects a research area which may be of benefit to his/her program. Topics must be approved by the faculty advisor and by the instructor selected by the student to supervise the research.

Doctoral

PPAD 700 Health Care Finance and Administration (3 Hours) Prerequisite: PPAD 549 and PPAD 536/736. The course provides an understanding of the fiscal environment of health care organizations and how economic concepts can be applied in the management and planning of health services.

PPAD 705 The Scope of Public Administration. (3 Hours) This class emphasizes the historical and ecological factors influencing the development of the discipline of Public Administration, as well as contemporary trends. Students will discuss issues such as privatization, the third sector ethnics, and executive leadership. Some effort is directed toward providing a comparative analysis in the context of public administration.

PPAD 706 Quantitative Methods. (3 Hours) This course familiarizes students with quantitative approaches which can be used to solve problems in public sector management.

PPAD 707 Management of Information Systems. (3 Hours) Design and utilization of systems to assist administrative information flows, data management, and computer application to public management.

PPAD 708 Seminar in Contemporary Topics in Public Administration. (3 Hours) "Cutting edge" information and contemporary trends and issues are explored.

PPAD 709 Seminar in Executive Leadership. (3 Hours) Leadership as an area of academic inquiry and skill development is the focus of this course. Students explore leadership from historical, behavioral, political, and administrative perspectives. Additionally, students engage in research and projects which will help to develop their skills as executive leaders.

PPAD 710 Epidemiology and Toxicology for Public Managers. (3 Hours). Introduces and teaches students the concepts, theories, facts and principles of the study, prevention and treatment of disease and poison. The course includes conducting an epidemiological study.

PPAD 712 Urban Management and Urban Services. (3 Hours) Students examine and analyze the methods by which local public services are designed, delivered and evaluated.

PPAD 738 Community Political Processes. (3 Hours) Students analyze the political consequences of the underlying socio-economic forces operating in urban areas.

PPAD 748 Public Personnel Human Resource Administration. (3 Hours) Procedures and problems of governmental personnel administration are reviewed. Emphasis on staffing, remuneration, career system, motivation, evaluation, collective bargaining, and employee relations.

PPAD 749 Public Finance Administration. (3 Hours) Procedures for the control of public funds; assessment and collection of taxes; public borrowing and debt administration; preparation, enactment, and audit of the budget are reviewed.

PPAD 752 Consumer Law. (3 Hours) The law as it affects the rights of creditors and debtors, with special emphasis on the problems of the poor, is studied.

PPAD 755 The Criminal Justice System. (3 Hours) The process of law enforcement from commission of a crime through sentencing, trial, incarceration, and rehabilitation.

PPAD 752 Urban History. (3 Hours) Focuses on the growth of urbanism and the impact urbanization has had on the lives of Americans.

PPAD 760 Financial Management In Public Organizations. (3 Hours) Prerequisite: Public Finance Administration or equivalent. The management of organizational resources is focus of this course. While local governments will be highlighted, the principles and techniques have application to all public and quasi-public organizations.

PPAD 770 Administration of Non-Profit Organizations. (3 Hours) This course focuses on the role and character of private, non-profit organizations and their relationships with other sectors of the community. Examines the impact of recent public - particularly fiscal - decisions have had on service delivery in the non-profit environment. Visiting practitioners will make presentations to the class throughout the course.

PPAD 776 Theories of Public Organization. (3 Hours) This course exposes students of public-sector organizations to prominent explanations and theories of organizations as political, social and economic concepts. Major subject areas discussed are: (1) theories of individual and group behavior; (2) theories of organizational structure; (3) theories of organizational process.

PPAD 777 Public Policy Formulation and Implementation. (3 Hours) This course focuses on problems of policy formulation, implementation, and evaluation. The participants will be exposed to such issues as seeing the need for policy issues, thinking through goals and objectives, policy adoption, and problems of implementation (including perceptive and real gaps between intent and bureaucratic interpretations).

PPAD 781 Seminar in Community Development and Economic Development. (3 Hours) Provides students with a basic understanding of the broad field of community and economic development as carried out by the federal, state and local levels of government, as well as the impact of neighborhood development organizations. The course exposes students to a variety of readings, and to regular visits by practitioners.

PPAD 782 Seminar In Program Development and Evaluation. (3 Hours) This course teaches class participants the principles of program development and provides an understanding of how evaluators can help make government more effective by producing timely information on the promise and performance of existing programs.

PPAD 796-90 Advanced Research Methods I. (3 Hours) This is a research course in which participants will use both qualitative and quantitative techniques to address management problems. Students must take both semesters. (Pretest or evaluating or PPAD 606).

PPAD 796-91 Advanced Research Methods II. (3 Hours)

PPAD 797 Internship. (3 Hours) Executive-level, "hands-on," work experience in selected organizations. (Students must apply in the previous semester).

PPAD 799 Independent Study. (3 Hours) The student is allowed to select a research topic of interest. Prior approval must be granted. (See PPAD 599).

PPAD 798 Dissertation. (3 Hours) This course is for students who are admitted to candidacy so that they may engage in the writing of the dissertations. (Prior approval).

DEPARTMENT OF URBAN AND REGIONAL PLANNING

Dr. M. Kumar, Associate Professor

Dr. E. Merem, Associate Professor

Dr. E. Santos, Assistant Professor

Dr. J. Wesley, Assistant Professor

Mission of Program

The Department of Urban and Regional Planning seeks to develop leaders in the field of city planning. The program will provide students with learning opportunities that will enable them to develop the intellectual qualities necessary for meeting the broad and varied range of problems and challenges associated with urban growth and development. The Department offers a Master of Arts degree and Doctor of Philosophy degree. The Master of Arts program is accredited through the Planning Accreditation Board. The M.A. program consists of an inter-disciplinary curriculum of 49 semester hours, including practical community-based learning experiences and planning studios, while the Doctor of Philosophy consists of 48 semester hours. The Department has a special focus on increasing the number of under-represented groups and women in the profession. The rigorous program is designed for both full-time and part-time students. The program targets recognition at the regional, state, and national levels.

Program Objectives

The Department concentrates upon the challenging issues and problems confronting planning professionals and scholars in the rebuilding of cities across the nation. Courses and studios offer challenging scholarly and practical work that focuses attention on real world solutions while respecting the ethical, skill, and plan development practices of the profession.

Master of Arts in Urban and Regional Planning

Admissions Requirements

Admission to the graduate degree program in Urban and Regional Planning is governed by the regulation of the Division of Graduate Studies and Department. The following criteria must be met:

1. Admission by the Division of Graduate Studies.
2. A minimum grade point average of 3.0 on a 4.0 scale;

3. Satisfactory performance on the Graduate Record Examination or equivalent test;
4. Demonstrated promise for successful academic achievement in professional graduate work;
5. For international students, indication of adequate financial support and satisfactory performance on TOEFL demonstrating oral and written proficiency;
6. Three letters of recommendation;
7. Personal interview with a departmental faculty member where practical.

Degree Requirements

The Department offers courses on a semester basis. Forty-nine credit hours are required for a master's degree. A basic core and three areas of concentration (Community Development and Housing, Environment and Land Use, and Urban Design) are offered. A thesis or major report option may be elected. A non-credit summer internship is required of inexperienced students.

Course Requirements

Core Courses

(16 hours minimum)

Course	Title	Semester Hours
*URP 500	History of Planning	3
*URP 502	Planning Theory and Practice	3
*URP 504	Quantitative Analysis and Computers	4
*URP 506	Legal Aspects in Planning	3
*URP 508	Introduction to Urban Design	3

Concentration Courses

(15 hours minimum from one of the three concentration areas)

Community Development and Housing Concentration

#URP 520	Housing Policy	3
URP 521	African American Community	3
#URP 522	Introduction to Community Development	3
URP 523	Social Policy Planning	3
**URP 524	Neighborhood Revitalization	3
URP 525	Land Development Dynamics	3
URP 526	Citizen Participation	3
URP 527	Public Finance Planning	3
URP 528	Economic Development Planning	3
URP 529	Planning in Local Government	3
URP 551	Regional Planning	3
URP 571	Introduction to Geographic Information Systems for Urban Planning	3

Environment and Land Use Concentration

#URP 530	Introduction to Environmental Planning	3
#URP 531	Growth Management	3
URP 532	Environmental Planning Ethics	3
URP 533	Rural Land Use Planning	3
URP 534	Environmental Impact Assessment	3
**URP 535	Comprehensive Planning	3
URP 536	Developing Nations Environmental Planning	3

URP 537	Plan Implementation	3
URP 538	Zoning and Land Use Regulation	3
URP 539	Risk Analysis	3
URP 571	Introduction to Geographic Information Systems for Urban Planning	3

Urban Design Concentration

URP 540	Historic Preservation and Conservation	3
#URP 541	Technical Skills of Composition and Communication	3
URP 542	Infrastructure and Community Facilities	3
URP 543	Computer-Aided Design I: Introduction	3
**URP 544	Design of Cities	3
URP 545	Computer-Aided Design II: Applications in Urban Design	3
URP 546	Site Development	3
#URP 547	Behavioral and Cultural Factors in Planning and Urban Design	3
URP 571	Introduction to Geographic Information Systems for Urban Planning	3
URP 572	Advanced Concepts in Geographic Information Systems for Urban Planning	3

Electives

Faculty Advisor's approval required.

Internship

*URP 570	Internship	3
----------	------------	---

Thesis or Non-Thesis Option

(6 hours maximum in either thesis or non-thesis courses)

Thesis

URP 560	Thesis Research	3
URP 566	Master's Thesis	3

Non-Thesis

Faculty Advisor's approval required.

Notes

*Required Course

#Required Concentration Course

**Required Concentration Studio Course

Curriculum Plans

1. Community Development and Housing Concentrations: Non-Thesis Option Full Time Plan

First Year-Fall Semester

URP 500	History of Planning	3
URP 502	Planning Theory and Practice	3
URP 520	Housing Policy	3
		9

Spring Semester

Ph.D. Program in
Urban and Regional Planning
Admissions Requirements

Admissions to the doctoral program in Urban and Regional Planning is governed by the regulations of the Division of Graduate Studies and the Department. The following criteria must be met:

1. Admissions by the Division of Graduate Studies at Jackson State University with a minimum grade point average of 3.0 on a 4.0 scale;
2. Satisfactory performance on the Graduate Record Examination or equivalent test.
3. Promise for successful academic achievement at the doctoral level.
4. For international students, indication of adequate financial support and satisfactory performance on TOEFL demonstrating oral and written proficiency.
5. Three letters of recommendation.
6. Substantive statement of proposed research within one of the Department's areas of concentration.
7. When applicable, a description of professional experience and/or samples of previous scholarly works.
8. A personal interview with a departmental faculty when practical.

Candidacy Requirements

Students must successfully complete a comprehensive examination and prepare and defend a proposal for dissertation research prior to being declared a degree candidate.

Degree Requirements

The Department offers courses on a semester basis. A basic core curriculum and three areas of concentration (Community Development and Housing, Environment

and Land Use, and Urban Design) are offered. Thirty-six credit hours of course work beyond the master's degree are required prior to writing the dissertation. After completing these course requirements, students may earn a maximum of twelve additional credit hours of dissertation credit. The Ph.D. is awarded after successful completion and defense of the dissertation.

Course Requirements

Core Courses	Semester
Course Title	Hours
URP 700 Historical development of Cities	3
URP 702 Theoretical Perspectives in Planning	3
URP 710 Advanced Statistical Methods	3
URP 712 Research Methodology	3
URP 714 Ethics in Planning Seminar	3
<i>Total Hours</i>	15

Concentration Courses

12 hours minimum from one of the three concentration areas.

Community Development and Housing Concentration

The following seminars and studios would apply toward this concentration,

URP 720	Urban Housing Policies
URP 722	Community Development and Housing
URP 724	Urban Revitalization Studio
URP 726	Citizen Participation Strategies
URP 728	Local and Regional Economic Development Strategies
URP 760	Advanced Readings

Environment and Land Use Concentration

The following seminars and studios would apply toward this concentration,

URP 730	Environment and Land Use
URP 735	Land Use Planning Studio
URP 736	International Human Settlements
URP 737	Urban Implementation Strategies
URP 760	Advanced Readings

Urban Design Concentration

The following seminars and studios would apply toward this concentration,

URP 740	Foundations in Urban Design
URP 742	Analytical and Evaluation Methods for Urban Design Research
URP 744	Urban Design Studio

URP 746	Urban Design Doctoral Seminar
URP 760	Advanced Readings

Electives 9 hours minimum

Faculty Advisor's Approval Required

Dissertation	12 hours maximum
URP 899	Dissertation

DESCRIPTION OF COURSES

Core Area

URP 500 History of Planning. (3 hours) Introduction to the historical roots, periods, and personalities that have shaped the profession. A study

in the development of the profession within the context of urban American history.

URP 502 Planning Theory and Practice. (3 hours) Overview of theories that have contributed to the development of contemporary urban planning; theories introduced include rationality, advocacy, and critical. Also studied are issues related to professional ethics, race and class, and urban development.

URP 504 Quantitative Analysis and Computers. (4 hours) Introduction to the use of quantitative reasoning and statistical techniques to solve planning and policy problems. This course focuses on application of descriptive and inferential statistics, sampling, regression analysis and modeling.

URP 506 Legal Aspects of Planning. (3 hours) Introduction to the basis in constitutional, common, and statutory law for the authority of plan effectuation. This course delineates the legal and legislative bases for planning at the local, state, and federal levels.

URP 508 Introduction to Urban Design (3 hours) This course provides an understanding of the dynamics that created contemporary urban and regional spatial patterns, elements of physical planning in relation to social, economic, and political forces as well as the role of the urban designer in the planning process.

Community Development and Housing

URP 520 Housing Policy. (3 hours) Thorough review of the problems and issues related to housing planning and policy dealing primarily with inter-relationships and interdependencies among socio-cultural, economic and physical aspects of housing. This course focuses on the social, political, and economic aspects of housing policy in the United States.

URP 521 African American Community. (3 hours) Investigates processes of community development for their application in community building in African American communities. Explores the development of a model for development and discusses various roles of participants in the community development process.

URP 522 Introduction to Community Development. (3 hours) Overview of the elements of the community development process including housing, economic development, education, public safety, social services, transportation, infrastructure, the environment, citizen participation and leadership. This course places an emphasis on the application of planning methods and theory to the resolution of community problems.

URP 523 Social Policy Planning. (3 hours) Introduction to the theory and practices of social policy planning with attention to spatial, policy, resource, and advocacy relationships. This course focuses on matters of social services, income maintenance, education, and health.

URP 524 Neighborhood Revitalization. (3 hours) Exploration of planning and political activities that contribute to the restoration of older neighborhoods. Impacts of economic, social, and political processes that govern decision making and funding for revitalization efforts.

URP 525 Land Development Dynamics. (3 hours) Emphasizes private decision making and development, public/private relationships, and regulatory activities. This course explores patterns of land utilization from the perspectives of the neighborhood, city, and metropolis.

URP 526 Citizen Participation. (3 hours) Introduction to the issues, policies, and techniques related to the role of citizens in the public decision making process. Consideration will be given to legislative requirements for public involvement as well as the role of survey research in the citizen participation process. Techniques for developing local capacity through citizen mobilization and a focus on community building are explored.

URP 527 Public Finance Planning. (3 hours) Overview of the principle of public budgeting, capital budget planning and public finance strategies. This course considers issues surrounding local development and fiscal decision making as they relate to project planning, revenue sources and project evaluation.

URP 528 Economic Development Planning. (3 hours) Strategies and tools for developing employment, business ownership, and investment in local, state, and regional economies. This course focuses on contemporary economic development patterns and practices in central cities and urban areas in the South.

URP 529 Planning in Local Government. (3 hours) Examination of the role of local government in the city planning process. Special consideration is given to the functional areas of planning such as transportation, housing, neighborhoods, environmental constraints, and land use.

Environment and Land Use

URP 530 Introduction to Environmental Planning. (3 hours) Comprehensive overview of the field and the efforts being made to organize, control, and coordinate environmental, aesthetic, and uses of nature and of man-made substances. This course focuses on the problems, potential solutions, and methodologies of public policy, law, and economics as they affect environmental issues in planning.

URP 531 Growth Management. (3 hours) Techniques employed to manage growth-related change and to implement plans. This course focuses on matters of capital investment, development impact analysis, impact mitigation, ethical implications, and alternative growth potentials.

URP 532 Environmental Planning Ethics. (3 hours) Investigation of the issues and affects of decision making related to environmental justice. This course focuses on the history of the development, cases, and advocacies for ethical decision making related to the environment.

URP 533 Rural Land Use Planning. (3 hours) Small-town planning, rural populations, and development dynamics are explored. This course focuses on the social, economic, political, and environmental factors that are employed by planners to assist citizens plan for quality futures.

URP 534 Environmental Impact Assessment. (3 hours) Reviews the theory and methodology of evaluating the potential impacts of development on the natural and social environments. This course gives attention to the legal and planning practice elements of assessing environmental impacts.

URP 535 Comprehensive Planning. (3 hours) Introduction to the theory and practice of urban and regional planning. Planning as a method of decision making and strategic choice, goal setting, alternative development, and implementation solutions.

URP 536 Developing Nations Environmental Planning. (3 hours) Examines urban development issues and impacts in Third World nations. This course explores issues of environmental quality, policy responses, housing production, biological diversity, agriculture, conservation, wildlife management, and socio-economic pressures.

URP 537 Plan Implementation. (3 hours) Interactive community and governmental dynamics in plan implementation are explored. This course focuses on the use of land-use regulatory tools and community facilities in implementing the plan.

URP 538 Zoning and Land Use Regulation. (3 hours) The theory, practice, and consequences of zoning as a land use tool in the implementation plans. This course includes the legal and administrative elements employed in zoning law, ordinance preparation, and other regulatory devices.

URP 539 Risk Analysis. (3 hours) Introduces students to the concepts of risk and uncertainty and explores techniques for characterizing, framing, estimating, and communicating environmental risks. This course covers both human-related and natural risks and hazards.

Urban Design

URP 540 Historic Preservation and Conservation. (3 hours) Issues of revitalizing and preserving historic resources are explored. This course focuses on the history, context, methods, and public policies related to historic preservation movements and programs.

URP 541 Technical Skills of Composition and Communication. (3 hours) Studio introducing graphic communication (in two and three dimensions) as visual organization and sequencing of the complex and varied information considered in the decision-making process of planning. Exercise of cognitive and aesthetic judgment by selective use and drawing of lines, planes, perspective, solids, shade, shadow and color; including introduction to the examination of aesthetic, symbolic and cultural elements of design.

URP 542 Infrastructure and Community Facilities. (3 hours) Examines planning and policy issues surrounding public services and facilities. Topics include the distribution of the benefits and costs of various public services and fiscal, traffic, and environmental impacts of land development.

URP 543 Computer-Aided Design I: Introduction. (3 hours) Studio introducing the concepts, issues and methods of computer-aided design as a tool in the planning and urban design process. A previous

knowledge of computers is not required. (Prerequisite: URP 541)

URP 544 Design of Cities. (3 hours) Investigates the development of physical form of cities through models, geographic landscape, and intentional human use. This course focuses on the manner in which people exploit land and human experiences that determine design principles.

URP 545 Computer-Aided Design II: Applications in Urban Design. (3 hours) Studio stressing advanced concepts and methods in computer-aided design as applied in urban design and site development. Topics include interactive and procedural approaches, parametric design, and integration of spatial modeling with other information-processing activities. Emphasis is placed on the creation of three-dimensional models. (Prerequisite: URP 543)

URP 546 Site Development. (3 hours) Introduction to site analysis, using environmental and engineering principles and modeling exercises to analyze and understand the use of land for development purposes. This course focuses on elements of grading, drainage, and landscape architecture.

URP 547 Behavioral and Cultural Factors in Planning and Urban Design. (3 hours) Seminar concerning the relationship of social patterns, cultural values, and the formation of urban patterns. Explores the complexities involved in giving expression to human needs and desires in provision of shelter and movement systems, possibilities and limitations of building forms and public policies, and issues involved in relating the human-made to the natural environment.

Other Courses

URP 550 Special Topics. (3 hours) Students electing to not pursue the thesis option may enroll in this course to conduct a special project topic. A maximum of three credits are allowed for this course.

URP 551 Regional Planning. (3 hours) This course provides students with an in-depth understanding of regional planning - its historical roots, current practices, regionalism. Regional planning, metropolitan planning, and similar terms are constantly being used by planners. What do these terms mean? How can they influence practice and scholarship in this field?

URP 555 Independent Study. (3 hours) Students wishing to explore an in-depth study of a topic not directly offered in the curriculum may enroll in this course. A maximum of six credit hours of independent study may be accrued. Permission of the faculty is required.

URP 560 Thesis Research. (3 hours) Students pursuing the thesis option must enroll in this course. This course focuses on the methodology and techniques of writing a thesis, including the research and presentation of the document.

URP 566 Master's Thesis. (3 hours) Students electing the thesis option must obtain approval from the faculty for the prospectus. All requirements of the Graduate School for submission dates must be met.

URP 570 Internship (3 hours) All students must satisfactorily complete a Professional Development Assignment. The purpose of this internship is to provide students with opportunities to engage in experiential learning with governmental agencies, non-profit organizations and private corporations that confront and respond to planning problems and related issues. Students completing a Professional Development Assignment funded by the Department must be enrolled in URP 570 Internship for one semester in order to receive three semester hours of credit. Students with prior experience in planning or a closely related field may take an additional three semester hours of elective in lieu of the internship with the approval of the Master's Program Coordinator and Department Chair.

URP 571 Introduction to Geographic Information Systems for Urban Planning (3 hours). This course provides students with an introduction to the fundamentals of Geographic Information Systems (GIS). It will give students an understanding of the various components of a GIS. Data gathering techniques such as internet data, GPS data collection and government and private sources of data will be taught. Also, areas such as data models and structures for geographical information, geographic data input, data manipulation and data storage will be covered. Students also learn how manipulate tabular data, query a GIS database, and present data clearly and efficiently using maps and charts.

URP 572 Advanced Concepts in Geographic Information Systems for Urban Planning (3 hours) This course covers the advanced concepts of Geographic Information Systems (GIS) technology and how it is being applied in urban and regional planning. Students will learn the processes to collect, organize, analyze and display geographic data obtained from such as address geocoding, GPS and CD ROM, etc. Each student will complete a series of lab exercises that illustrate the typical steps in a GIS project. Prerequisite: URP 571 or equivalent courses or experience in using GIS in the work environment with permission of the instructor.

Doctoral Courses

Core Courses

URP 700 Historical Development of Cities. (3 hours) Intensive investigation and discussion of major contributing factors to the economic, social and ecological development of cities. The course will require students to apply historical research methodologies in the analysis of urban agglomerations.

URP 702 Theoretical Perspectives in Planning. (3 hours) Study of the advanced theoretical concepts in urban planning and the relationship between planning theory and social science precepts. Comparative analysis of theories that stimulate planning thought and philosophy.

URP 710 Advanced Statistical Methods. (3 hours) The course is designed to offer state-of-the-art procedures and paradigms in statistical applications.

URP 712 Research Methodology. (3 hours) Students acquire a foundation in conceptualization, measurement, research design, prospectus preparation, data collection, approaches to data analysis, documentation, and presentation of substantive research.

URP 714 Ethics in Planning. (3 hours) In this course students examine the theory and practice of professional ethics. The principles of ethical thinking and behavior in the planning profession are covered extensively.

Community Development and Housing

URP 720 Urban Housing Policies. (3 Hours) This course examines the policies that impact housing systems in the United States. Factors contributing to housing shortages and housing costs are analyzed, and programs developed to address these issues are evaluated. Additionally, the role of housing advocacy is studied.

URP 722 Community Development and Housing. (3 Hours) A thorough analysis and evaluation of the principles and practices of community development. Substantive areas of housing, economic development, education, public safety, social services, transportation, infrastructure, the environment, citizen participation and leadership will be selectively covered. This course places an emphasis on the application of planning methods and theory to the resolution of community problems.

URP 724 Urban Revitalization Studio. (3 Hours) In-depth study of a selected problem related to urban revitalization. Students will be required to prepare a detailed planning document addressing the redevelopment needs of a specific urban neighborhood or area. Topics vary each semester depending on research opportunities. Prerequisite: Specialization in community development and housing.

URP 726 Citizen Participation Strategies. (3 Hours) This course provides an intensive study of the roles of citizen participation influencing the public planning process. Consideration is given to emerging methods and programs for public involvement as well as the role of survey research in the citizen participation process. Techniques for developing local capacity through citizen mobilization and a focus on community building will be explored.

URP 728 Local and Regional Economic Development Strategies (3 Hours) An in-depth examination and evaluation of strategies and tools for developing employment, business ownership, and investment in local, state, and regional economics. This course allows students to conduct research on a specialized interest in the areas of economic development and finance, while gaining a greater understanding of the relationship between local and regional economic development patterns and practices.

Environment and Land Use

URP 730 Environment and Land Use (3 Hours) This course investigates the major competing theories and policies related to the built environment and natural world. Methods of classifying and evaluating

the effects of pollution upon natural and social systems are discussed.

URP 735 Brownfields Planning Studio. (3 hours) Selective problems related to urban and/or rural issues are presented. Students are required to prepare (individually or in teams) area or comprehensive plans that are designed to provide alternative solutions to identified problems.

URP 736 International Human Settlements. (3 Hours) An overview of conditions, policies, and programs that characterize living patterns in international settings. Students are required to conduct research and make scholarly presentations regarding the diverse settlements found in western and non-western nations.

URP 737 Urban Implementation Strategies (3 Hours) The theories, practices and rationalizations for planner involvement in the implementation of alternatives are investigated. Students are required to present a formal strategy for the implementation of a planning proposal.

Urban Design

URP 740 Foundations in Urban Design. (3 Hours) Examination of the social, physical and cultural determinants of form, pattern, and space that expresses the heritage of urban design and city building; and the role of urban design in the fields of architecture, landscape architecture and urban planning. Prerequisite: URP 700 or permission of the instructor.

URP 742 Analytical and Evaluative Methods of Urban Design Research (3 Hours) Exploration of the theoretical, methodological and practical issues of urban design, including urban space and morphology, conceptions of place, cognition, perception and information field theory. Students will gain a working competence in at least one of the methods analyzed. Focus on selected contemporary issues in commercial and neighborhood design and planning. Prerequisite: URP 740.

URP 744 Urban Design Studio. (3 Hours) Systematic study of specialized subject matter leading to the design and effectuation of physical improvement plans, program design, and public policies. Synthesis of urban design and planning issues and research methods in a laboratory setting. Topics vary each year, depending on current planning interest and needs.

URP 746 Urban Design Doctoral Seminar (3 Hours) Discussion and critique of selected research work and analytical methods involving issues of urban design. Presentation and critique of research proposed by members of the seminar. Prerequisite: Completion of Ph.D. core courses and required urban design concentration courses.

Other Courses

URP 750 Professional Practice Issues in Planning. (3 Hours) The course is designed to study the most current and effective practices in the profession. A range of considerations related to the techniques of intervention, methods of design, and public involvement in the planning and decision making process are selectively covered.

URP 760 Advanced Readings. (3 hours) In this colloquium students read and discuss the assigned books. The instructor facilitates the discussion. Each student will be responsible for at least two readings and weekly discussions.

URP 770 Independent Study or Research Practice (3 hours) By arrangement with the advisor and approval with the faculty, students may pursue a topic of special academic or research interest. The independent research must be at an advanced graduate level and related to the field of planning. May be repeated with change of topic.

URP 771 Seminar in Geographic Information Systems for Urban Planning (3 hours). Seminar in Geographic Information Systems for Urban Planning covers basic theories, concepts and structures in Geographic Information Systems (GIS). Data models and structures for geographic information, geographic data input, data manipulation and data storage will be covered. Student also learn how to manipulate tabular data, query a GIS database, and present data clearly and efficiently using maps and charts. Students will be expected to complete a project in the area of concentration utilizing basic GIS technology. This course is also directed at giving students an understanding of and experience with the practical use of GIS software and data.

URP 772 Advanced GIS Applications in Urban Planning (3 hours) Advanced GIS Applications builds upon the topics covered in the introductory course, URP 771 Seminar in Geographic Information Systems for Urban Planning. In preparation for the dissertation research requiring GIS application, this course covers the advanced concepts of GIS technology and its applications to urban and regional planning. Students will learn the processes to collect, organize, analyze and display geographic data obtained from such as address geocoding, GPS and CD ROM, etc.. Prerequisite: URP 771 Seminar in Geographic Information Systems for Urban Planning or equivalent courses or direct experience using GIS in the work environment may meet the prerequisite with approval from the academic advisor.

URP 777 Doctoral Research Preparation (1-6 hours) The course is designed to specifically and exclusively for those students who have completed all required coursework, obtained permission to enroll from the Department Chair, and seek time to prepare for the Comprehensive Examination. The course will permit qualified students to interact with faculty and colleagues to properly prepare for the Comprehensive Examination. Permission from the Department Chair is required.

URP 899 Dissertation (1-9 hours) Working with a faculty approved committee, the student is required to undertake dissertation research. Prerequisites: completion of all Ph.D. course work, approved dissertation proposal, and dissertator status with the Graduate School. Course may be repeated provided progress is being made on the dissertation.

SCHOOL OF SOCIAL WORK

Dr. Leon W. Chestang, Interim Associate Dean
Office: 3825 Ridgewood Road
Jackson, MS 39211
Telephone: (601) 432-6828
Fax: (601) 432-6812
e-mail: leon.w.chestang@jsums.edu

Programs

- ◆ Master of Social Work
- ◆ Doctor of Philosophy in Social Work

Accreditation

The Master of Social Work is accredited by the Council on Social Work Education (CSWE).

Mission

The mission of the School of Social Work is to provide opportunities for a diverse student population to earn social work degrees at the baccalaureate, master, and doctoral levels. Students are provided a supportive academic environment in which to acquire the knowledge, skill, values and ethics of the social work profession. The School also focuses on the development of leadership and scholarship in social work practice.

The School's goals are to produce graduates who will apply their knowledge and skills toward enhancing the quality of life in the urban and rural environments and to equip graduates to promote empowerment of vulnerable individuals, families, groups, organizations, and communities at the local, national, and international levels. Graduates will be prepared to address issues of social responsibility by demonstrating a commitment to economic, political, and social justice and develop as leaders in social work practice, service, and scholarly activities.

Mission of the Master of Social Work Program

The mission of the Master of Social Work (M.S.W.) Program is to prepare graduate level social workers for advanced direct social work practice with children, youth, and families in both urban and rural areas. The Program produces leaders who demonstrate and build upon the knowledge and skills of advanced direct social work practice; who exemplify the values and ethics of the profession; and who are responsive to the need for services which promote social, economic, and political justice for all groups, especially those confronting discrimination and oppression. Thus, the Program works to increase the pool of master's level social workers by providing a nurturing academic environment for promising students who reflect the diversity of the state, the nation, and the global community. The Master of Social Work Program supports the implementation of the missions of the University, the College of Public Service, and the School of Social Work.

The goals of the M.S.W. Program are:

1. to prepare students for advanced direct social work practice with children, youth, and families in local, national, and global settings with systems of all sizes;
2. to prepare students for leadership roles in the profession of social work and the social welfare arena;
3. to prepare students to identify patterns, dynamics, and consequences of social, economic, and political discrimination and oppression and promote appropriate change when necessary;
4. to prepare students for advanced direct social work practice in diverse organizational and social contexts, with an understanding of the ways in which these contexts influence social work practice and with the ability to promote

5. appropriate change when necessary; and to provide students with a challenging educational experience that develops self awareness and assures the acquisition of the knowledge, skills, and values and ethics necessary for competent advanced direct social work practice.

The objectives of the M.S.W. Program are to ensure that graduates:

1. demonstrate the knowledge, skills, and values and ethics relevant to advanced direct social work practice with children, youth and families in diverse environments;
2. demonstrate self-awareness and the effective use of self in direct social work practice;
3. evaluate their own practice in social work settings;
4. evaluate and apply theoretical perspectives and research findings to practice;
5. demonstrate the ability to use supervision and consultation appropriate to direct social work practice;
6. integrate into direct practice a knowledge of the historical development of the profession and the differential impact of social, economic, and political policies;
7. demonstrate the ability to advocate for social, economic, and political justice and promote appropriate change in organizational and social contexts;
8. practice without discrimination and with sensitivity when serving diverse populations;
9. utilize effective oral and written communication skills;
10. apply critical thinking skills within the context of direct social work practice; and
11. demonstrate leadership skills and abilities in practice settings.

Admissions Criteria

Admission to the full-time and part-time MSW Program is determined on a selective basis according to the following criteria:

- ◆ A baccalaureate degree from an accredited college or university. Students may be admitted with a baccalaureate degree in a field other than social work or social welfare. Transcripts will be evaluated for the presence of courses that meet program requirements for a liberal arts background, inclusive of courses in human biology and statistics;
- ◆ A cumulative grade point average (GPA) of 2.5 on a 4.0 scale;
- ◆ Academic and professional references;
- ◆ Written personal statement;
- ◆ Evidence of volunteer and/or work experience in the field of social work;
- ◆ An interview with the Admissions Committee may be required.

Admission to the Advanced Standing M.S.W. Program is determined on a selective basis according to the following criteria:

- ◆ Applicant must be a graduate of a CSWE accredited baccalaureate program within the past five (5) years.
- ◆ A letter grade of “B” or better in all social work courses.
- ◆ A cumulative grade point average of 3.0 on a 4.0 scale for undergraduate coursework.

Applicants must be admitted to both the Graduate School and the MSW Program. To facilitate determination of admission into the MSW Program, applicants must send materials to both the Graduate School and the MSW Program. Admission materials to be submitted to the Graduate School are as follows:

1. Graduate School Admission Application;
2. Out-of-state Application fee of \$25.00 if applicable;
3. Official transcript(s) from all colleges and universities attended;
4. Official copy of TOEFL Score(s), for applicants whose native language is not English;
5. Certified Declaration of Financial Support for International Students. Sufficient funds to cover expenses for one academic year should be placed on deposit with the Jackson State University Office of Fiscal Affairs; and
6. Immunization record showing proof of immunization compliance for measles and rubella, if born after December, 1957.

Admission materials to be sent to the MSW Program are as follows:

1. Copy of the Graduate School Admission Application;
2. MSW Program Application for Admission;
3. Official transcript(s) from all colleges and universities attended;
4. Three recommendation forms from instructors, employers, supervisors, or professional colleagues;
5. Copy of the TOEFL Score(s), for applicants whose native language is not English;
6. Personal Statement;
7. Work Experience Form;
8. Signature Form;
9. Graduate School Application for Financial Aid;
10. MSW Program Financial Aid Application; and,
11. MSW Program First-Year Field Instruction Application.

Applicants with a social work degree granted outside the United States must request and submit an Application for Evaluation of Foreign Credentials from the Council of Social Work Education, Foreign Equivalency Determination Service. The address is: 1725 Duke Street, Suite 500 Alexandria, VA 22314-3459. Their website is: <http://www.cswe.org>. A copy

of the evaluation is to be forwarded to the MSW Program Admissions.

Transfer Credits

The MSW Program will accept a limited number of transfer students each year. Transfer credits, up to 30 semester hours, may be accepted from a master's degree program accredited by the Council on Social Work Education, based on a review by the MSW Admissions Committee. Applicants must meet the following requirements:

- ◆ Admission requirements of the MSW Program and the Graduate School at Jackson State University;
- ◆ Submit a letter of recommendation from the dean or dean's designee of the previous or current MSW program relative to the student's status during enrollment; and

Within 30 days of notification of acceptance into the Program and prior to enrollment, the student must submit a written statement of intent to transfer credit and the specific credit(s) for which transfer is requested to the MSW Program Coordinator.

The request for transfer of credit(s) must be accompanied by an official copy of the graduate catalog from the institution at which the course(s) were taken that covers the year(s) the course(s) was/were taken. For each course for which transfer credit is requested:

- ◆ The course must have been taken within the past five years,
- ◆ The student must have earned a minimum grade of 3.0 on a 4.0 scale; and
- ◆ The name of the course and the course syllabus (including the bibliography) must be provided.

Academic Credit for Life Experience and Work Experience

No academic credit for life and work experience is given.

Duplication of Course Content in the Professional Foundation Curriculum

Students may be exempt from courses in the foundation curriculum that represent duplication of course content previously taken. The courses must have been taken within five years of the date of the request for exemption, with a minimum grade of “B” or 3.0 on a 4.0 point scale.

Each request for exemption must: (1) be made in writing to the MSW Program Coordinator and be submitted **within 30 days of being notified of acceptance into the Program**; (2) specify the course for which the exemption is requested; (3) be accompanied by an official copy of the graduate catalogue from the institution at which the courses were taken that covers the year(s) the course was taken; and (4) be accompanied by a copy of the course

syllabus, including bibliography and course assignment(s). Requests received after the deadline stated above and/or do not meet the requirements stated in this section will not be considered.

Following receipt of the request, a proficiency examination will be administered to determine the student's mastery of the content of the specified course. Proficiency will be determined by the student earning a grade of at least 3.0 on a 4.0 scale on the examination administered.

The MSW Program Coordinator will notify students of the proficiency examination results in writing. The results of the examination are final and there is no appeal of the grade received on the examination. Students who do not earn a minimum grade of "B" or 3.0 on a 4.0 scale on the examination must take the course for which exemption was requested.

Sixty semester credit hours are required for completion of the MSW Degree. Therefore, students who achieve a grade of 3.0 on a 4.0 scale on the examination administered and are exempted from a specific course or courses are required to take such additional courses as may be required to meet the compulsory sixty credit hours to earn the MSW degree. Courses must be approved by the MSW Program Coordinator.

Academic Performance

Passing Grades

Students must have a cumulative 3.0 grade point average to graduate from the MSW Program. A grade less than "C" or 2.0 is considered failure in a social work course. Students may not receive a grade of "C" in more than two courses.

Probation

If a student's cumulative grade point average falls below 3.0, the student will be placed on academic probation. The student will have until the end of the subsequent semester of enrollment to attain a cumulative grade point average of 3.0. Failure to attain the required cumulative grade point average by the end of the probationary period will result in dismissal of the student from the MSW Program. The probationary period in the MSW Program is defined as one subsequent semester of enrollment in the program after the cumulative grade point average falls below a 3.00.

Repeating Courses

Students may repeat only one course in the program with the recommendation of the advisor and approval of the program coordinator. Students desirous of this option must submit a written request to the program coordinator during the subsequent semester or term/session in which the student is enrolled. The advisor must indicate support (or non-support) of the request in writing to the program coordinator. When a student is allowed to repeat a course, both grades will

show on the transcript and both grades will be used in computing the cumulative grade point average.

Graduate English Competency Examination

Graduate students are required to take this examination during the first semester of graduate study to demonstrate competency in the areas of English grammar and usage and general writing skills. Students with unsatisfactory performance on this examination must enroll in English 500 and attain a letter grade of "B" or 3.0 to pass this course. This requirement must be met before a student can take the comprehensive examination.

Advanced standing students are required to take the Graduate English Competency Examination during the summer session in which they enroll in the MSW Program.

Social Work Licensure Examination

All MSW students must take the Association for Social Work Boards (ASWB) Intermediate-Level Examination for Licensed Master Social Workers (LMSW) status as a prerequisite for graduate clearance.

Degree Requirements

The MSW Program offers a two-year full-time curriculum. Foundation courses are offered in the first year, and the second year focuses on advanced direct practice with children, youth, and families. Students are required to successfully complete 60 credit hours to earn the MSW degree. The last 30 hours must be taken in residence at Jackson State University Field instruction in the two-year full-time and three-year part-time curricula consists of two lock field instruction courses (i.e., four days per week), one in the foundation year, and one in the concentration curriculum, which all students take in the spring of the final semester in which they are enrolled in the program. Both foundation and concentration require courses 450 hours of field instruction. Students must complete a total of 900 hours in field instruction, which is the CSWE required minimum. The foundation field instruction course is SW 595, while SW 594 is designated as the concentration field instruction course.

If the student plans to enroll full-time, the program strongly advises against simultaneous full-time employment, which generates barriers to the completion of field instruction and class attendance. A three-year part-time curriculum is offered, requiring six semesters and two summer sessions for completion of the 60 credit hour MSW program. If the student plans part-time enrollment and is employed full-time or part-time, the program strongly advises the student to consult with his/her employer regarding arrangements to complete field instruction during the regular work day.

An advanced standing curriculum is offered which requires one summer and two semesters to complete requirements for the MSW Degree. Advanced standing students must be enrolled as full-time students throughout the program, beginning in the Graduate Summer Term. Field instruction begins in the Graduate Summer Term.

To enroll in field practicum, a student must provide documentation of professional liability insurance. Please contact the School of Social Work for the required minimum liability coverage.

The following are the academic requirements for Field Instruction:

1. Students must maintain a 3.0 cumulative grade point average and a 3.0 or grade of "B" in all practice courses to be eligible for Field Instruction. Students who do not have a 3.0 cumulative grade point average in courses required to meet the compulsory 60 credit hours or approved equivalency to earn the MSW degree, will not be eligible to enroll in a Field Instruction course. Students course must earn a minimum grade of "B" or 3.0 in all of the practice courses.
2. Students are required to earn a 3.0 in all of the Field Instruction courses. Students may repeat one Field Instruction course in which a grade of less than 3.0 is earned. Students who fail to earn a minimum grade of 3.0 may not enroll in subsequent Field Instruction courses and are subject to dismissal from the MSW program.

DESCRIPTION OF COURSES

Note: Prerequisites apply primarily to students enrolled for a degree in the MSW Program. Please consult the MSW Program for changes in course prerequisites, course content and course numbers.

Practice

SW 580 Social Work Practice Lab (1 Hour) This foundation course provides students with the opportunity to apply knowledge gained in the classroom (SW 581), and enables them to begin to develop the core skills necessary for successful advanced clinical practice.

SW 581 Social Work Practice I (3 Hours) This course provides an introduction to social work practice methodology and the professional use of self in combination with the generalists practice approach to social work with individuals, families, and small groups, and within the context of communities and organizations.

SW 582 Social Work Practice II (3 Hours) Prerequisite: SW 581(Social Work Practice I), SW 560 (Human Behavior and the Social Environment), continues the theory and skill development that began in SW 581 (Social Work Practice I) by providing more in-depth knowledge and challenging learning situations in order for students to progressively build their practice capacities, and socialization skills in the profession of social work.

SW 583 Integrated Social Work Practice (Advanced Standing). (3 Hours) Prerequisite: Acceptance into advanced standing. This course is a review and refinement of practice skills and professional knowledge provided in the foundation curriculum content of the MSW program. The course focuses on the application and transformation of generalists knowledge and skills to prepare for entry into the concentration curriculum. This bridging foundation course provides an opportunity for students to develop critical thinking skills and apply empowering practice decisions in professional practice settings with all sizes of client systems. Special emphasis is placed on the reciprocal interactions between individuals and their environments toward the engagement of personal and community strengths.

SW 584 Intervention with Children and Youth (3 Hours) Prerequisites: All foundation courses. This course is designed to provide advanced practice knowledge and skills for intervention with children and youth, primarily in the context of the urban environment. Special needs and vulnerabilities of

these populations are addressed. Students are given orientations to the human services agencies primarily concerned with the complex issues and difficulties faced by these populations, and the implications of service delivery arrangements for clinical practice. Attention is directed to skills needed for the provision of services to children and youth in the context of their families and communities and to programmatic and advocacy activities on their behalf.

SW 586 Family Intervention (3 Hours) Prerequisites: All foundation courses. The focus of this course is on intervention with families. Advanced skills are developed in areas of social work practitioner roles, strength-based assessment, and specific models of intervention with families. Special attention is given to comparative approaches to couple and family intervention; relevant recent research findings related to family therapeutic approaches; the influences of environmental, ethnic, and cross-cultural variables; and ethical dilemmas in work with families.

Policy

SW 571 Social Welfare Policy and Services I (3 Hours) This first required course in the Social Policy area examines the history and development of social welfare policy and services in American society, with a major focus on the evolution and contributions of professional social work to this development. Emphasis is placed on the dynamic relationship between social welfare policy and services and the modern, post-industrial society in the context of social work values and ethics and the pursuit of economic, political, and social justice.

SW 572 Social Welfare Policy and Services II (3 Hours) Prerequisites: SW 571 (Social Welfare Policy and Services I), SW 560 (Human Behavior and the Social Environment I) and SW 510 (Ethics and Social Work Practice). This course builds on the introductory and historical content of SW 571 and focuses on the use of various conceptual frameworks to analyze and study current social welfare issues. Significant contemporary issues in social welfare policy will be examined with particular attention to the promotion of economic, political, and social justice with due consideration to needs and concerns of populations-at-risk and diverse groups. Permeating the course is consideration of content on ethnic groups and oppressed populations which are assessed as the most disadvantaged in American society, and how they are differentially affected by various social policies.

Human Behavior and the Social Environment

SW 560 Human Behavior and the Social Environment: HBSE I (3 Hours) Using ecological, systems, and developmental frameworks, this course emphasizes the influence that individual and environmental circumstances have on shaping individual and family dynamics across the life course. This foundation course is designed to provide students with selected theoretical perspectives on the

development, dynamics, and growth of individuals and families within their environmental context.

SW 561 Human Diversity: HBSE II (3 Hours)
Prerequisites: SW 560 (Human Behavior and the Social Environment), SW 571 (Social Welfare Policy and Services I), and SW 510 (Ethics and Social Work Practice). This course examines various issues of diversity (e.g., ethnicity, culture, socioeconomic status, gender, sexual orientation, disability, religion) across life course development with emphasis on the impact of oppression and discrimination by society-at-large and individuals. Selected organizational and community theories are examined in relation to institutional impacts on various oppressed groups. In this regard, special attention is given to the plight of African Americans.

SW 562 Psychopathology (3 Hours) This course focuses on the clinic assessment of children, youth and families. Students will learn approaches of assessment to evaluate human behavior and functioning throughout life course development, with special attention to vulnerable and diverse populations. Particular attention will be directed to the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) as the major tool utilized in human services.

Research

SW 555 Research Methods I (3 Hours)
Prerequisites: SW 581 (Social Work Practice I), SW 571 (Social Welfare Policy and Services I), SW 560 (Human Behavior and the Social Environment I), SW 510 (Ethics and Social Work Practice). The foundation research course provides an introduction to the principles and methods of basic social work research. Students are introduced to concepts of problem formulation, measurement, research design, sampling, data collection, and data analysis as employed in basic research. Particular attention is directed to social work research that addresses the economic, political, and social needs of people of color and populations-at-risk in American society. This course is designed to prepare students to understand and appreciate scientific research as a valuable tool in furthering professional capabilities and in contributing to the development of the growing body of knowledge in social work practice.

SW 556 Advanced Research Methods (3 Hours)
Prerequisites: All foundation courses. This course is designed to assist students in understanding and applying scientific research methods in advanced direct practice settings. It builds on the research knowledge of the foundation research course. Students in this course are expected to become proficient in the methods and basic principles of conducting and evaluating empirical research related to advanced direct practice. In this course, students participate in guided research projects which require a review of relevant research, data collection and analysis and implications for social work practice. Emphasis is given to the importance of demographic, biopsychosocial and cultural variables in the conduct of ethically based research.

Field Instruction

SW 593 Field Instruction (Advanced Standing) (3 Hours) Prerequisites: Acceptance into the Advanced Standing Program. The advanced standing field instruction course is taken concurrently with SW 583-Integrated Social Work Practice, the advanced standing bridging course. This course focuses on the application and transformation of generalists practice knowledge and skills to advanced direct practice knowledge and skills with children, youth and families.

SW 594 Field Instruction (6 Hours) Prerequisites: All foundation courses. This course is designed as a block placement and is taken in the spring of the final semester in which the student is enrolled in the MSW Program. This course is taken concurrently with SW 588 (Advanced Direct Practice Seminar). This field instruction course is focused on advanced direct practice with children, youth, and families and designed to facilitate development of advanced direct practice competency and includes an integrated seminar.

SW 594 Field Instruction II (6 Hours) This course is designed as a block placement and is taken in the spring of the final semester in which the student is enrolled in the MSW Program. This field instruction course is focused on advanced direct practice with children, youth, and families and designed to facilitate development of advanced direct practice competency and includes an integrated seminar.

Special Course

SW 510 Ethics and Social Work Practice (2 Hours)
This course is designed to orient students to values and ethics of the profession and to promote their internalization of the profession's values and ethics. Ethical issues and dilemmas in social work practice have become much more numerous and challenging in recent years, due in large measure to technological advancements, especially biomedical technology; the trend toward an increasing proprietary emphasis in human services delivery; and specifically, social work practice; and conservative ideology that undergirds much of the current American social policy. Particular attention is directed toward ethical issues and dilemmas as they relate to social work malpractice and liability.

Independent Study

SW 596 Independent Study (3 Hours) This is an individually directed intensive study in an area of social work practice which is selected by the student. The independent study selection is made in accordance with the curriculum plan of the MSW Program and is approved by the student's faculty advisor and the Master of Social Work Program Coordinator.

Electives

SW 515 Child Abuse and Neglect: Protective Services (3 Hours) This course focuses on assessment

and intervention skill development for social work practice with children and families who have experienced abuse and neglect or are at-risk of abuse and neglect. Clinical intervention strategies and dilemmas in role expectations of social work practitioners are analyzed. Attention is given to evaluation and use of research content in prevention and intervention services and programs.

SW 520 Forensic Social Work (3 Hours) This course focuses on issues common to the discipline of social work and the law. The course will include and introductory review of the law, the American justice system, and basic constitutional principles. Family-related issues-such as, the protection of children, education, adoption, custody and support, marriage, divorce, domestic violence, juvenile law, competency and guardianship-will be explored. Experiential components of the course are designed to prepare social work professionals for effective practice vis-a-vis the intersections of social work and the law.

SW 521 Crisis Intervention (3 Hours) The theory and methods of crisis intervention and subsequent consultation are examined in this course. Particular attention is given to the various contemporary techniques of intervention, consultation, referral, and resolution. Assessment techniques used in the intervention process are explored and skills practiced.

SW 545 Administration in Social Welfare (3 Hours) This course is designed to enhance the student's awareness and understanding of the basic knowledge and principles which guide the administrative process of social welfare agencies. Administrative skills are taught in relation to the advanced direct practice practitioner as well as to other administrative roles.

SW 546 Adult Development: Young Adulthood, Middle Years and Aging (3 Hours) This course will focus on contemporary theories of adult development. It will highlight the stages of development for young adults, middle-age and older persons. The processes of adult development will be explored from a psychological perspective within the content of societal change. A critical in-depth analysis of adult development and its challenges and opportunities is required for successful completion of the course.

SW 547 Intervention with the Elderly (3 Hours) The most important goal for social service professionals is to improve the quality of life for older people through effective intervention on their behalf. This course will focus on skill development and knowledge and understanding of older persons' behavior through the public health model of preventive intervention at the primary, secondary, and tertiary levels. Intervention strategies and case studies will be utilized in the course to develop skills for working with the elderly in institutions and in the community. Models of social work practice with the elderly are critically analyzed.

SW 548 Public Policy Issues in Aging (3 Hours) This course provides an analysis of legislative policy and organized social welfare services and resources for the elderly as a social group in society. The political, economic, and social realities of aging that

identify the elderly as requiring public policy solutions will be examined. Social policy analytical frameworks are employed to assess the legitimacy of aging as a social issue/problem and its impact on social institutions (family, social, political, economic, cultural).

SW 549 Independent Study: Special Topics in Aging (3 Hours) A primary focus of this course is its emphasis on the study special topics in aging in the behavioral, biological, and social sciences. In this regard, with faculty direction, students will explore, build upon and contribute to the knowledge base in aging and individual well-being. Students will engage in research through the independent study process in specific areas of interest in gerontology to increase knowledge and skills for policy and/or practice with the aged.

SW 550 Introduction to Social Gerontology (3 Hours) This course is designed to give students a general overview of social gerontology as a branch of knowledge in the field of gerontology. Social gerontology concerns itself with psychosocial and economic aspects of the aged individual and the social problems encountered from living in both formal and informal societal groupings. The interaction of these aspects and groupings and the services established and considered for the aged through public and social policy will be discussed.

SW 557 Applied Research Methods (3 Hours) This course is designed for the implementation and analysis of the research project. The project is to be conducted, when feasible, in the student's field setting. Students will have the opportunity to explore approaches to data collection and analysis and apply descriptive and inferential statistical measures to data sets. Students will be responsible for the computer processing of data using appropriate statistical software packages.

SW 573 Social Welfare Policy Affecting Children, Youth, and Families (3 Hours) This course builds on the foundation course SW 572 (Social Welfare Policy and Services II) which provides an analysis of current policy arrangements and what needs to be done to affect policies that promote economic, political, and social justice. In SW 573, students are challenged to think critically and creatively about how to best accomplish policy initiatives in keeping with social work values and ethics.

SW 587 Advanced Social Work Practice with Groups (3 Hours) Prerequisites: All foundation courses. The advanced social work practitioner is required to demonstrate group skills in a wide range of social situations. The foundation practice courses provide the basic skills for this course while the advanced practice with groups course expands, elaborates, and adds to the student's knowledge and skills. The focus of this course is on the development of knowledge and skills in the delivery of preventive, developmental, and remedial group services for at-risk populations of varying ages and social situations.

SW 589 Urban Poverty: Intervention Approaches. (3 Hours) This course focuses on developing services

and programs especially tailored to meet the needs of the urban poor, who are disproportionately people of color. It addresses the multiple and negative impacts of urban poverty on children, youth and families and their functioning in the social environment. Community-oriented and family-centered services in schools, churches, public housing projects, and neighborhood service centers are examined in regard to their individual and collective potential to improve the lives of at-risk children and their families. Particular attention is given to continuing and contemporary urban problems of substance abuse, violence, teen pregnancy, school dropouts, unemployment and underemployment, and the impact of welfare reform on families and their functioning in the community.

Mission

The mission of the program is to prepare students for leadership roles as scholars in social work education and research who will advance knowledge about social work and social welfare to assist in resolving urban and rural issues facing families, communities, and society in general.

Objectives

The objectives of the program are consistent with the missions of the School, College, and University. Students are required to demonstrate the following:

- knowledge of the history, philosophy, and organization of social work education, related contemporary issues, and design, implementation and assessment of social work/social welfare curricula;
- knowledge of social work perspectives and behavioral and social science theories and skills to analyze and assess their application to social work research;
- knowledge of social science and social work research/statistics and skills to conduct rigorous scientific inquiry;
- knowledge and skills required to synthesize, analyze, and evaluate social problems and social welfare policies, with emphasis on populations facing discrimination and oppression in the global society;
- knowledge regarding a substantive research area of interest.
- knowledge of the characteristics of higher education and related issues and strategies to enhance professional roles as scholars and educators.

Admissions Requirements

Admission to the program is on a selective basis and is determined by the following criteria:

- master's degree in social work from a program accredited by the Council on Social Work Education or a master's degree in a related discipline;
- admission to the Division of Graduate Studies at Jackson State University;
- 3.3 or above G.P.A., above average undergraduate G.P.A.
- satisfactory performance on the Graduate Record Examination (GRE) or Miller Analogies Test (MAT) taken within the past five years;
- for international applicants, satisfactory performance on TOEFL by demonstrating oral and written proficiency;
- for applicants with the M. S. W. Degree, professional competence as evidenced by at least two years of post-M.S.W. experience preferred;
- statement of purpose reflecting applicant's philosophy of social work and educational goals;
- scholarly or professional paper demonstrating the applicant's conceptual, analytical, or research ability;
- three letters of references (two academic and one professional);
- curriculum vitae; and
- interview with the Program Admissions Committee (contingent upon initial assessment).

Admission to the Ph.D. Program is granted once a year for the Fall Semester. For full consideration, applicants must submit all required material by March 1.

Transfer of Credits

A maximum of nine graduate credit hours, excluding credit applied toward previous degrees, may be transferred from graduate degree programs at Jackson State University or other accredited universities to fulfill the elective requirements.

The transfer of relevant graduate course work will only be considered if a grade of "B" or better, on a four-point scale, has been earned, and the course has been completed within the last five years.

Transfer credit for courses taken prior to entering the program must be approved during the first semester of enrollment by the advisor and program director. Transfer credit applied toward the doctoral degree after admission to the program must be approved prior to taking the course by the advisor and program director.

Academic Performance

The student must achieve a grade of "B" or better in all courses in the core curriculum. The student must maintain a "B" or better cumulative grade point average in all course work applied toward the degree.

Repeating Courses

Students may repeat only one course in the program. They must enroll in the course the next semester or term/session in which the course is offered. When a student repeats a course, both grades will show on the transcript and both will be used in computing the cumulative grade point average.

Probation

The probationary period in the program is defined as one subsequent semester of enrollment in the program after the cumulative grade point average falls below 3.00.

If a student's cumulative grade point average falls below 3.00, the student will be placed on academic probation the subsequent semester of enrollment. The student will have until the end of the probationary period to raise the cumulative average to 3.0. If the student fails to achieve a minimum cumulative grade point average of 3.0 by the end of the probationary period, the student will be dismissed from the program.

Unsatisfactory Course Work and Dismissal

A student whose course work is unsatisfactory (below 3.0 cumulative grade point average) at the end of the probationary period, as defined in the program, will be dismissed from the program.

Residency Requirement

The minimum period of residency for the degree in social work is one year or the equivalent of enrollment for two consecutive semesters. The student must be full time and therefore must take at least nine credit hours each semester counted toward residency. The student must meet the minimum residency requirement prior to taking the comprehensive examination.

Time Limit

Students must complete all degree requirements within seven years from the time of admission into the program. The average length of time for completion of doctoral programs in social work is 4.5 years. The actual amount of time required for completion will vary according to factors such as clarity of objectives upon entering the program and while moving through the process, prior preparation for research and knowledge building endeavors, and time for self-directed learning.

Leave of Absence/Re-admission

Any student who is in good standing may request a leave of absence for a period of up to one year. The request must be submitted in writing to the program director for the time period in which the student plans to be absent from the program. The request must outline the reason(s) for the leave and the time period involved.

Students must apply for re-admission to the program if more than 12 consecutive months have elapsed since enrollment. An application for re-admission requires the submission of all material required by the program at the time the applicant requests re-admission. Applications for re-admission will be considered with the other new applications.

Degree Requirements

Core Courses

Course Title	Hours
SW 700 Doctoral Proseminar	3
SW 705 Social Welfare History and Philosophy	3
SW 710 Macro Theory	3
SW 711 Micro Theory	3
SW 714 Social Work Education Seminar: Issues & Processes	3
SW 720 Research Methods I	3
SW 722 Statistical Methods I	3
SW 721 Research Methods II	3
SW 723 Statistical Methods II	3
SW 724 Policy and Practice Issues in Family and Children's Services	3
SW 725 Statistical Methods III: Advanced Quantitative Methods	3
SW 742 Qualitative Research Method	3
SW 760 Research Practicum in Family and Children Studies	3
<i>Total Hours</i>	39

Electives

Students may select, in consultation with the advisor, a total of 12 credit hours of courses offerings in social work and a related discipline in the Graduate School at Jackson State University or at other colleges or universities.

Dissertation Hours

Following admission to candidacy, students must continuously register for a minimum of three dissertation hours per semester (six credits hours per year) until completion of the dissertation.

Curriculum

The curriculum is built upon the knowledge base of the social work profession and its values and principles. It also draws upon theoretical and empirical knowledge from related disciplines that are helpful in the formulation, analysis, and solution of social problems. Particular instruction focuses on theory building and assessment, research methods, social work education, critical analysis and assessment of social problems, social welfare policy and social work practice models/perspectives, and knowledge development in a substantive area of interest.

The curriculum consists of a minimum of 51 credit hours, excluding the dissertation hours. It is organized around three major components: core curriculum, electives, and dissertation.

Core Curriculum

The core curriculum consists of 39 credit hours. The courses focus on the history and philosophy of social welfare, social welfare policy, with emphasis children and their families, social work behavioral and social science theory, research methods, statistics, and social work education.

Electives Semester

The elective courses offer students an array of subject-specific content to develop a substantive area of interest that complements the core curriculum and supports the dissertation work. Students may select, in consultation with the advisor, a total of 12 credit hours of courses offerings in social work and a related discipline in the Graduate School at Jackson State University or at other universities.

Comprehensive Examination

Students take the comprehensive examination upon successful completion of the core curriculum. The examination places emphasis on a comprehensive synthesis of material covered in the core courses, with special attention to the student's ability to conceptualize, integrate, and communicate knowledge. In case of failure, the student may be permitted only one additional opportunity to take the examination.

Admission to Candidacy

The student enters candidacy for the degree after passing the comprehensive examination, which is administered after completion of the core courses.

Certification of Dissertation Proposal

Candidates must submit a dissertation proposal to their dissertation committee for approval prior to implementing the research.

The proposal must be approved by the University's Institutional Review Board (IRB) whenever human subjects are proposed for use in the dissertation research. In cases where animal subjects will be used in the study, the research protocol must be approved by the Institutional Animal Care and Use Committee (IACUC).

Dissertation

Candidates for the degree are required to complete a dissertation that demonstrates their ability to conduct rigorous scientific inquiry. The dissertation topic should emanate from the candidate's interest in a problem or issue relevant to social work or social welfare. The dissertation is expected to represent a substantial contribution to social work knowledge.

Oral Defense

Upon completion of the dissertation, an oral examination is required. The purpose of the examination is to assess the candidate's ability to present and defend a conceptually and

methodologically rigorous dissertation that contributes to social work knowledge. No student is permitted to defend the dissertation unless all requirements of the Ph.D. Program in Social Work, the School of Social Work, the College of Public Service, and the Division of Graduate Studies have been satisfied.

The student passes the oral defense when all dissertation committee members indicate agreement by signing the appropriate form.

Description of Courses

SW 700 Doctoral Proseminar (3 Hours) This seminar is designed to enhance the students' matriculation in the doctoral program and their preparation for leadership roles as social work scholars and educators. As a backdrop, it provides an overview for discussion of higher education in general and doctoral education as a major focus of study in social work education. Students engage in dialogue and related activities considered essential to their success in the program and preparedness for their prospective professional roles as faculty in higher education..

SW 705 Social Work History and Philosophy (3 Hours) This course covers the evolution of social welfare in American society and focuses upon the current issues and trends in the development and delivery of various social welfare problems and services. Further, this course provides basic information on the history and evolution of professional social work in the United States. Particular attention is given to the emerging trends in social welfare policy and services and its values, and practices, as they relate to the social, economic, cultural, and political environment. Within this framework, philosophical themes of European/Anglo American culture are examined to demonstrate their influence on the character of social welfare and social work in the United States. This course also considers aspects of a welfare system important to a modern industrial society. The process of historical research is discussed in the context of social work and social welfare. Moreover, since the United States is a multicultural society that practices cultural oppression, there will be discussion of the social welfare practices regarding people of color, especially African Americans.

SW 710 Macro Social Science Theory (3 Hours) This course critically examines and assesses macro social science theories and explores how they are applied to social problems with major emphasis on scientific inquiry. Selected theories are examined, conceptual and philosophical assumptions assessed, values, constructs and propositions are considered, and empirical evidence analyzed and assessed. Particular attention is given to issues of inequality and oppression in relation to race, gender, and class. The course prepares students for the macro theories to guide their research. (Prerequisites: SW 711).

SW 711 Micro Behavioral and Social Science Theory (3 Hours). This course examines human

behavior theories and theoretical approaches to child and family studies in social work. The course traces the development of major theoretical approaches in the social and behavioral sciences and examines emerging schools of thought. Conceptual and philosophical issues related to theory building in clinical practice are explored. Through an analysis of the theoretical knowledge base of social work practice with individuals, families, and other small groups, this course prepares students for subsequent use of theory in practice-focused research.

SW 714 Social Work Education Seminar: Issues and Processes (3 Hours). This course examines content, context, and processes in social work education. It critically analyzes current issues and future trends in social work education. Among the areas covered are accreditation, values and ethics, educational and professional organizations, curriculum development, methods of instruction, career development, and ancillary educational roles.

SW 720 Research Methods I (3 Hours). This research course provides students with a foundation for understanding and conducting scientific inquiry in social work. It covers the research process, critically examining problem formulation, use of the literature and theory, research questions, hypothesis development, research design, sampling procedures, measurement, and data collection. Students also consider the ethical, philosophical, and other dimensions of research that are essential to understanding the role of research in social work.

SW 721 Research Methods II (3 Hours) This advanced research seminar attempts to equip the first-year doctoral students with the knowledge and competence in research methods that they will need in order to conduct future independent research activities aimed at increasing the social work knowledge base. It encompasses an in-depth study of quantitative research and a broad overview of qualitative research. Emphasis is placed on measurement, sampling, data analysis, research writing and other relevant issues in quantitative research. The course is designed to focus largely on the application of concepts learned in the first research methods course. In line with the research production thrust of the course, it involves a heavy experiential component in which much class time will be devoted to critiquing research articles and student projects. The expectation is that students will learn primarily by applying what they studied "by doing and receiving critical feedback regarding what they have done." (Prerequisites: SW 720).

SW 722 Statistical Methods I (3 Hours) This course provides a review of basic statistical concepts and a thorough examination of univariate and bivariate statistical methods. Emphasis is placed on providing a conceptual framework for understanding when, why, and how different statistical techniques are used, and a working knowledge of the basic tenets of statistical reasoning.

SW 723 Statistical Methods II (3 Hours) This course builds on the first statistical methods course with an emphasis on building the students' conceptual

understanding of statistical procedures in addition to their effective use of statistical programs such as SPSS and an accurate interpretation of results. Students are introduced to multivariate and multi-variable data analysis and linear statistical methods in social work research. Particular emphasis is placed on the procedures involved in multiple independent and dependent variables use simultaneously in a comprehensive design. (Prerequisites: SW 720 and SW 722).

SW 724 Policy and Practice Issues in Family and Children's Services (3 Hours) This seminar is designed to provide students with an opportunity to explore policies, programs, services and related practice issues affecting families and children. It focuses on the nature of selected policies, the policy-making process, factors that influence policy formulation, implementation, and evaluation; and approaches to policy analysis. Particular emphasis is placed on critical examination of selected policy and practice issues related to families and children. Students are expected to analyze a major policy affecting families and children and prepare a related policy or practice issue paper.

SW 725 Statistical Methods III: Advanced Quantitative Methods (3 Hours). This course builds on the previous methods courses. It concentrates on advanced quantitative statistical procedures to provide an integrated and in-depth applied approach to data analysis and linear statistical models in social work research. Particular emphasis is placed on higher level statistical methods involved with multiple independent and dependent variables used simultaneously in a comprehensive design. Familiarity with the use of SPSS for data analysis is required. (Prerequisites: SW 720, SW 721, SW 722 and SW 723).

SW 732 Independent Study (3 Hours). This individualized study course provides students an opportunity to enhance their capacity in independent investigation and learning. Students request approval for an individualized course of study with a well-defined plan consistent with their research area of interest. It is expected the Independent Study will not substantially cover content and/or material covered in regular courses in the curriculum.

SW 742 Qualitative Research Methods (3 hours) This course examines the assumptions, theories, and practice of qualitative research in the social sciences. It is designed to facilitate the development of specific qualitative research skills while fostering familiarity with theories, issues and problems in qualitative research. This course also examines the relationships between the theoretical underpinnings and purposes of qualitative and quantitative inquiry. (Prerequisites: SW 720 and SW 721).

SW 754 Health Policy Issues in the United States (3 Hours). This course examines national health policy trends and their implications for access to health care at the state and local levels. It explores issues of accessibility, affordability, and availability, and their implications for social work.

SW 760 Research Practicum (3 Hours). This individualized learning experience course is designed to provide students with "hands-on" research experience prior to the dissertation project. The course requires development of a work plan consistent with one of two options. Students may elect to work with a faculty member regarding an ongoing or initiated research project. Alternatively, the student can conduct an independent research project under the supervision of a faculty member. (Prerequisites: SW 720, SW 721, SW 722, SW 723, SW 725 and SW 742).

SW 770 Dissertation (3-15 Hours). Students culminate their doctoral study by completing a major conceptually and methodologically rigorous research project of interest that contributes to social work knowledge. The topic of the dissertation is approved by the dissertation committee. Students must defend orally the document before the committee in a public forum. (Prerequisites: Completion of all core coursework, passing of the comprehensive examination and consent of the dissertation committee chair).

NOTE: All statements in this catalog description of the Ph.D. Program in Social Work are announcements of current policies and are subject to change.

The College of Science, Engineering, and Technology (CSET) was authorized in 2002, through an academic reorganization plan that combined the School of Science and Technology with the School of Engineering. The focal point of CSET's vision is the preparation of highly qualified and competitive graduates. Academic programs help to fulfill this vision which is complemented by a faculty with a rich diversity of recognized scholars and scientists who have established reputations around the world. A capable and energetic administration, with a well-trained staff, is in place to provide the knowledge, support and experiences required to ensure and enhance productivity in the academic environment.

Jackson, MS 39204
Phone: (601) 979-1802
Fax: (601) 979-1803

Program Mission

Jackson State University offers course work leading to the Master of Science in Engineering through the Graduate Engineering Program in collaboration with the Civil and Environmental Engineering Department and the Computer Engineering Department. The Department of Computer Science offers the Master of Science in Computer Science. Engineering students may pursue a MS degree with emphasis in Civil Engineering, Environmental Engineering, Geological Engineering, Computer Engineering, Electrical Engineering, or Telecommunications Engineering. The Programs offers a non degree admission for engineers in the Jackson area who are only interested in continuing engineering education or desire preparation for the Professional Engineering (PE) Exam.

One objective of the Graduate Engineering Program is to meet the post graduate engineering educational needs of individuals in the greater Jackson metro area who are employed full time. The curriculum is designed not only to meet individual needs, but to provide courses that upgrade the technical skills of employees in private industry, and municipal, state

and federal agencies. Classes are typically taught in the evenings to accommodate the working student. The Graduate Engineering Program provides an environment that accommodates full time graduate engineering students who plan to pursue careers in engineering practice, research or academia

Admission Requirements

Admission is open to applicants with an undergraduate degree in engineering. Applicants with an undergraduate degree in a closely related field may be considered. Engineering applicants may be admitted to the Graduate School as Regular Graduate Students, Qualifying Students, Conditional Students or Non-Degree Students. Admission requirements for each of these categories are outlined in the JSU Graduate Catalog. Applicants may have to satisfy undergraduate coursework prerequisites as determined by their Department Chairperson and/or Advisor.

Prior to admission as a Regular Graduate Student, each applicant must submit an official quantitative and verbal Graduate Record Exam (GRE) score. Applicants must meet all other admission requirements outlined in the JSU Graduate Catalog. In addition, international applicants must submit all documentation as outlined in the Graduate Catalog.

Transfer of Graduate Credit

Engineering Graduate students may transfer up to 9 semester hours of graduate credit from another institution upon the recommendation of their advisor and approval by the Department Chairperson.

Time Limit

All course work applied toward a Master of Science Degree in Engineering must be completed within an 8-calendar year period from the date of first entering the graduate program.

Degree Requirements

Thirty (30), or thirty-six (36), semester hours are required for the Master of Science Degree in Engineering depending upon which of the following three options the student selects with approval of his or her department chairperson and/or advisor:

- Option 1-Twenty four (24) semester hours of coursework plus a six hour thesis
- Option 2-Twenty seven (27) semester hours of coursework plus a three hour project
- Option 3-Thirty six (36) semester hours of coursework

Option 1 requires a formal written thesis, formal presentation and oral exam.

Option 2 requires a written project report, formal presentation and oral exam.

Option 3 requires an oral exam

To remain in "good standing", students must maintain a minimum cumulative grade point average (GPA) of 3.0 ("B" average).

Core Courses

Each emphasis area has either three or four core courses (9 to 12 semester hours). Electives are selected with approval of the student's graduate committee and/or graduate advisor.

Note: Please refer to the Department of Computer Science for admission and degree requirements, as well as emphasis areas, core courses and description of all courses for the Master of Science in Computer Science.

Dr. D. Leszczynska, Professor
Dr. L. Li, Associate Professor
Dr. Y. Li, Associate Professor
Dr. M. K. Sharp, Adjunct Professor
Dr. F. Wang, Assistant Professor
Dr. R. W. Whalin, Professor
Dr. M. Yassin, Adjunct Professor
Dr. M. Zakikhani, Adjunct Professor
Dr. W. Zheng, Associate Professor

Civil Engineering Emphasis

Mission

To provide graduate learning opportunities in civil engineering for acquiring the knowledge, skills and attitudes necessary for practice and life-long professional development; to contribute to the expansion of knowledge of civil engineering through research programs; and to provide professional and community service to the state, the nation, and the world.

Program Objectives

1. Provide the depth and breadth in civil engineering topics necessary for civil engineering practice and development.
2. Provide graduate education in specialized civil engineering areas.
3. Contribute to the discovery of new knowledge and methods that enhance the theory and practice of civil engineering; and engage in meaningful service activities.
4. Provide an environment that promotes professional development, growth of the intellect, character, and spirit of students, faculty, and staff.

Program Requirements

The students are required to select three courses among the list of core courses. The three courses must be approved by the Department prior to selection. The remaining courses may be chosen from the list of electives or from the other core courses with the approval of the student's advisor.

Geological Engineering Emphasis

Mission

To provide a high quality graduate education in the traditional and emerging areas of geological engineering which is locally responsive; to contribute to the expansion of knowledge of geological engineering through programs of basic and applied research; and to provide professional and community service to the state, the nation, and the world.

Program Objectives

1. Provide a graduate education in the broad area of geological engineering fundamentals.
2. Provide academic education and real world design experiences to prepare students for practice in the geological engineering profession.
3. Make contributions to the advancement of knowledge in geological engineering; and engage in meaningful service activities.

4. Create and maintain an environment that promotes professional development, growth of the intellect, character, and spirit of students, faculty and staff.

#Note: At least two courses must be selected among CIV 573, CIV 574, CIV 576, CIV 577, CIV 579 and CIV 671. In addition, at least one course must be selected among CIV 578, CIV 670, CIV 672, CIV 674, CIV 675, CIV 677 and CIV 679.

DESCRIPTIONS OF COURSES

CIV 520 Advanced Engineering Analysis I. (3 Hours) A comprehensive course to familiarize engineering professionals with advanced applied

mathematics as it relates to solving practical engineering problems. The course of intensive study blends the theoretical underpinnings of advanced applied mathematics with an understanding of how these powerful tools can be used to solve practical engineering problems. The material covered includes Ordinary Differential Equations; Linear Algebra, Vector Calculus; Fourier Analysis and Partial Differential Equations.

CIV 521 Advanced Engineering Analysis II. (3 Hours) A comprehensive course to familiarize engineering professions with advanced applied mathematics as it relates to solving practical engineering problems. The course of intensive study blends the theoretical use of advanced applied mathematics with an understanding of how these powerful tools can be used to solve practical engineering problems. The material covered includes Complex Analysis; Numerical Methods; Optimization; Graphs; and Probability and Statistics.

CIV 530 Advanced Pavement Analysis and Design. (3 Hours) Development of models for and analysis of pavement systems; use of transfer functions relating pavement response to pavement performance; evaluation and application of current pavement design practices and procedures; analysis of the effects of maintenance activities on pavement performance; and economic evaluation of highway and airport pavements. Prerequisite: CIV 475 or permission of Department.

CIV 531 Traffic Engineering. (3 Hours) Study of fundamentals of traffic engineering; analysis of traffic stream characteristics; capacity of urban and rural highways; design and analysis of traffic signals and intersection; traffic control; traffic impact studies; and traffic accidents. Prerequisite: CIV 390 or permission of Department.

CIV 532 Pavement Materials and Design. (3 Hours) Properties and control testing of bituminous materials, aggregates for bituminous mixtures, and analysis and design of asphalt, concrete and liquid asphalt cold mixtures; structural properties of bituminous mixes; surface treatment design; and recycling of mixtures. Introduction to Superpave mix design and applications. Prerequisite: CIV 390 or permission of Department.

CIV 533 Evaluation, Maintenance, and Rehabilitation of Public Works Infrastructure. (3 Hours) Evaluation, maintenance, and rehabilitation of deteriorated infrastructure systems by considering life cycle costs and long-term performance. Understanding rehabilitation alternatives used in the practical field and designing rehabilitation based on the nondestructive testing methods and economical considerations. Prerequisite: CIV 390 and CIV 475. (Cross Reference: CIV 479)

CIV 534 Urban Transportation Engineering System Design (3 Hours) Advanced design of highway systems, vehicle and driver characteristics, highway capacity, design of urban streets and expressways. Design constraints. Individual and team design projects oriented toward the solution of local

urban transportation problems, societal and economical considerations. Prerequisite: CIV 390, CIV 310 and CIVL 310 or permission of Department. (Cross reference: CIV 470)

CIV 535 Pavement Design. (3 Hours) Aggregate, binder systems. Theory and design of pavement structures, rigid and flexible pavement designs, subgrade materials, pavement management, nondestructive testing, pavement maintenance, design constraints, infrastructure maintenance, major design project. Prerequisite: CIV 380 and CIV 390. (Cross reference: CIV 475)

CIV 536 Highway Engineering. (3 Hours) Analysis of factors in developing highway transportation facilities; traffic estimates and assignment; problems of highway geometrics and design standards; planning and location principles; intersection design factors; street systems and terminal facilities; programming improvements; drainage design; structural design of surface; concepts of highway management and finance; and highway maintenance planning. Prerequisite: CIV 390 or permission of Department.

CIV 540 Advanced Structural Analysis. (3 Hours) A unified formulation of displacement and force methods of analysis including the topological view of the structure as an assemblage of members; matrix techniques of formulation; considerations for automatic computations; and evaluation of truss, grid, and frame models for the response of real structures. Prerequisite: CIV 320 or permission of Department.

CIV 541 Structural Dynamics. (3 Hours) Analysis of the dynamic response of structures and structural components to transient loads and foundation excitation; single-degree-of-freedom and multi-degree-of-freedom systems; response spectrum concepts; simple inelastic structural systems; and introduction to systems with distributed mass and flexibility. Prerequisite: CIV 320 or permission of Department.

CIV 542 Advanced Design of Concrete Structures. (3 Hours) Theory and design of reinforced concrete continuous beams, slender columns, two-way-slabs, footings, retaining walls, shear walls and multistory buildings. Design for torsion and design constraints. Framing systems and loads for buildings and bridges, design constraints and a major design project. Prerequisite: CIV 420. (Cross reference: CIV 477)

CIV 543 Advanced Mechanics of Materials. (3 Hours) Study of beams under lateral load; beams with combined lateral load and thrust; beams on elastic foundations; applications of Fourier series and virtual work principles to beam-type structures; stress and strain in three dimensions; applications to flexure of beams and plates; elements of the engineering theory of plates; and torsion of thin-walled open sections. Prerequisite: CIV 320 or permission of Department.

CIV 544 Advanced Design of Steel Structures. (3 Hours) Behavior and design of members subjected to fatigue, dynamic, combined loading. Methods of allowable design stress, and load resistance factor design. Design of continuous beams, plate girders, composite beams, open-web joists, connections,

torsion and plastic analysis and design. Framing systems and loads for industrial buildings and bridges, design constraints and a major design project. Prerequisite: CIV 360. (Cross reference: CIV 476)

CIV 545 Design of Wood and Masonry Structures. (3 Hours) Engineering properties and behavior of wood for analysis and design of wooden beams, walls and diaphragms. Engineering properties and behavior of masonry for analysis and design of masonry walls, columns and shear walls. Framing systems and loads for multistory buildings, design constraints and a major design project. Prerequisite: CIV 420. (Cross reference: CIV 478)

CIV 550 Engineering Hydrology. (3 Hours) Principles and theory of surface water and groundwater flow and quality; understanding and determination of water budget, hydrologic cycle, Darcy's law, and water resources management at the watershed scale. Water quality parameters including data analysis and interpretation, laboratory tests, and maintenance of water quality. Applications in engineering design. Prerequisite: CIV 370 or permission of Department.

CIV 551 Advanced Fluid Mechanics. (3 Hours) Kinematics of fluid flow; plane irrotational and incompressible fluid flow; Navier-Stokes equations; two-dimensional boundary layers in incompressible flow; dimensional analysis and dynamic similitude; hydrodynamic stability; turbulence; real life problems; Engineering applications and system approach. Prerequisite: CIV 330 or permission of Department.

CIV 552 GIS Applications in Civil and Environmental Engineering. (3 Hours) This course introduces students to the basic concepts and skills necessary to engage applied Geographic Information Systems (GIS) with the field of Civil and Environmental Engineering. Students will gain basic theoretical knowledge required for development and successful use of GIS and practical training on use of GIS software. This course will consist of lecture sessions, lab exercises and GIS project. While the principles taught will be general in nature, the students will be taught how to use the ArcView GIS software program, and working through several exercises that emphasize its use in Civil and Environmental Engineering. Selected topics include: GIS analysis procedures, integration of survey control for data acquisition and rectification, hardware software selection criteria, and error propagation analyses, Global Positioning Systems (GPS) and their use with GIS. Prerequisite: permission of the Department.

CIV 553 Experimental Methods in Civil Engineering. (3 Hours) Introduction to experimental methods, instrumentation, data acquisition and data processing; experimental aspects of static and dynamic testing in the various areas of civil engineering; overview of laboratory work with several hands-on applications in the laboratory. Prerequisite: permission of Department.

CIV 554 Water Resources Engineering Planning and Management. (3 Hours). Managing water resources; the planning process, systems analysis

methods; institutional framework for water resources engineering; comprehensive integration of engineering, economic, environmental, legal and political considerations in water resources development and management. Prerequisite: permission of the Department.

CIV 556 Groundwater Engineering. (3 Hours) Groundwater hydrology, theory of ground water movement, steady-state flow, potential flow, mechanics of well flow, multiple-phase flow, salt water intrusion, artificial recharge, groundwater contamination and models. Prerequisite: CIV 370 or permission of Department.

CIV 557 Computational Fluid Dynamics. (3 Hours) Finite-difference and finite-volume methods and basic numerical concepts for the solution of dispersion, propagation and equilibrium problems commonly encountered in real fluid flows; theoretical accuracy analysis techniques. Prerequisites: CIV 330 and knowledge of one programming language.

CIV 558 Sedimentation and River Engineering. (3 Hours) Hydraulics of sediment transport; erosion and sedimentation problems; river mechanics and morphology; mathematical modeling of river hydraulics; sediment transport and river channel changes. Design and environmental problems; erosion control and river training. Prerequisites: CIV 465 or permission of Department.

CIV 559 Environmental Hydraulics. (3 Hours) The application of fluid mechanics principles in the analysis of environmental flows. Topics include: stratified flows, turbulent jets and plumes, wastewater and thermal diffusers, cooling ponds and cooling channels and the control of environmental problems. Prerequisites: CIV 330 or permission of Department.

CIV 560 Environmental Engineering II. (3 Hours) The physical, chemical, and biological environmental engineering systems that are used to protect health and the environment. Examples include drinking water treatment, wastewater treatment, hazardous waste treatment, and air pollution control. Prerequisite: permission of Department.

CIV 561 Chemistry for Environmental Engineering. (3 Hours) The principles of physical, equilibrium, inorganic, and organic chemistry as they apply to drinking water treatment, wastewater treatment, natural water quality, air quality, and air pollution control. Applications in engineering design. Prerequisite: CIV 340, or CIV 560, or permission of Department.

CIV 562 Hazardous Waste Engineering. (3 Hours) Comprehensive study of the complex, interdisciplinary engineering principles involved in hazardous waste handling, collection, transportation, treatment, and disposal. Also covered are waste minimization, site remediation, and regulations important for engineering applications. Design constraints, engineering judgment, and ethical responsibility are covered. Contemporary hazardous waste issues and urban issues are also addressed. Prerequisite: CHEM 241, CHML 241, CIV 340, CIVL 340, or permission of Department. (Cross reference: CIV 468)

CIV 563 Microbiology for Environmental Engineering. (3 Hours) The microbiological principles that apply to wastewater treatment, drinking water protection, water quality, and disease transmission. Applications in engineering design. Prerequisite: CIV 560 or permission of Department.

CIV 564 Surface Water. (3 Hours) Water quantity, water quality, regulation of, and management of rivers, lakes, and wetlands. Applications in engineering design. Prerequisite: permission of Department.

CIV 565 Wetland Management for Environmental Engineering. (3 Hours) The physical, chemical, biological, and regulatory aspects of wetland ecosystems. The impacts of engineered structures on wetland systems, and the factors involved with developing specifications for wetland creation and restoration. Prerequisite: permission of Department.

CIV 566 Air Pollution and Control. (3 Hours) The sources of and engineering principles to prevent or control air pollution and to design and operate processes. Topics include the risks of air pollution to which the public is exposed, the principle and factor underlying the generation of pollutants, physical principles describing how pollution affects the atmosphere and human well-being, regulations which engineers will be expected to understand and comply with. The engineering aspects including principles governing pollutant production from stationary and mobile combustion systems, modeling of the generation and transport of pollutants in the atmosphere, methods for separation and removal of gases and particulates from a process gas stream. Prerequisite: permission of Department.

CIV 567 Environmental Remediation. (3 Hours) The course covers current engineering solutions for the remediation of soils and waters contaminated by hazardous waste or spills. The technologies to be covered include bioremediation, oxidation, soil vapor extraction, soil washing, surfactant-enhanced remedy, thermal treatment, air stripping, solidification/stabilization, electrokinetic decontamination, underground barriers, permeable reactive treatment walls, and other newly-emerging technologies. The engineering principles behind the remediation technologies are emphasized. Examples of successful applications of the remediation technologies are discussed. Prerequisite: permission of Department.

CIV 568 Land Disposal of Waste. (3 Hours) Theoretical, regulatory, and practical aspects of the disposal of waste on lands. Decontamination and reclamation of lands contaminated by industrial activities and spills of industrial chemicals. The usefulness and environmental impact of the disposal of municipal and industrial wastes via land treatment and land filling. Design considerations and engineering problems associated with the land disposal of septic tank effluent, municipal garbage, sewage sludge, sewage effluent, industrial and hazardous waste, and radioactive wastes. Prerequisite: permission of Department.

CIV 569 Environmental Systems Modeling. (3 Hours) Mathematical modeling of environmental systems, including rivers, lakes, estuaries, and air. Prerequisite: permission of Department.

CIV 570 Regional Geological Engineering. (3 Hours) Geological engineering problems unique to specific geomorphic and physiographic regions based on terrain, rock type, and geologic structure will be addressed. Examples will be presented to show how site-specific conceptual geologic models are necessary for successful engineering design in unique geologic regions of the United States. Prerequisite: permission of Department.

CIV 571 Principles of Geoenvironmental Engineering. (3 Hours) Topics in geoenvironmental engineering in an urban environment, landfill design and incineration options. Stability of landfills, geotechnical characteristics of landfills, liner systems. Waste characterization, minimization, collection, treatment, transport and disposal. Leachate characteristics and potential groundwater contamination, design constraints. Legal and ethical considerations. Prerequisite: permission of Department. (Cross reference: CIV 471)

CIV 572 Applied Geotechnical Engineering Design. (3 Hours) Practical real life urban projects and advanced laboratory experience in geotechnical engineering, construction dewatering, construction issues, safety and economy, urban geotechnical engineering issues, preparation of subsurface investigation and geotechnical engineering reports, ethical considerations, oral presentation. Pre or co-requisite: CIV 430 or permission of Department. (Cross reference: CIV 472)

CIV 573 Environmental Geology for Engineers. (3 Hours) Defines the role of Environmental Geology in the engineering design of remedial activities dealing with a wide range of geotechnical engineering problems. Fundamental concepts of environmental unity and the rising human population will be addressed. Topics will range from earthquakes to coastal processes with particular emphasis on landslides and water problems. Prerequisite: permission of Department.

CIV 574 Engineering Hydrogeology. (3 Hours) Defines the role of Hydrogeology in the engineering design of activities dealing with the interaction of ground and surface water. The course will address a wide range of topics including the role of water in earthquakes and landslides, land subsidence, swelling clay foundations, geothermal energy, engineered wetlands, cave and karst formation, contaminant transport, and water resources with emphasis in engineering design. Prerequisite: permission of Department.

CIV 575 Applied Geological Engineering. (3 Hours) Applications of geological concepts including geomorphology and structural geology in solving geological engineering problems. Study of engineering principles and properties of earth materials. Exploration during engineering design and methods of site investigations. Applications of instrumentation

and equipment used for soil, rock, and water analyses. Prerequisite: permission of Department.

CIV 576 Geological Engineering Analysis. (3 Hours) Computer applications to geological engineering, analysis, design, and use of computers for geological engineering projects. Computer-aided engineering facilities and use of general productivity and engineering software. Numerical methods in the solution of geological engineering and related problems. Case study of a complex project and a large-scale engineering analysis. Prerequisite: permission of Department.

CIV 577 Air-Photo Interpretation for Terrain Evaluation. (3 Hours) Determination of soil, bedrock, and drainage characteristics of land areas by air-photo interpretation and analysis; physical characteristics of landforms; application of air-photo interpretation for engineering soil surveys, land use suitability evaluation, and land use planning, applications in engineering design. Prerequisite: permission of Department.

CIV 578 Applied Geophysics. (3 Hours) Gravity and magnetic theory and methods. Gravitational field of earth and gravity measurements applications to geological engineering problems. Imaging subsurface features of earth using basic principles of physics, namely elastic, electric, magnetic, and density properties of earth material. Applications in engineering design. Prerequisite: permission of Department.

CIV 579 Engineering Seismology. (3 Hours) Theory and applications in earthquake seismology, earthquake mechanics, wave propagation, earth structure, instrumentation, interpretation of seismograms, focal mechanisms, faults, paleoseismology, seismotectonics, earthquake locations and magnitudes, selection of ground motion parameters. Applications in engineering design. Prerequisite: permission of Department.

CIV 631 Linear Theory of Ocean Waves. (3 Hours) A systematic theoretical development of the linear theory of simple harmonic ocean gravity waves, water particle kinematics, shoaling, refraction, diffraction, and reflection.

CIV 631L Linear Theory of Ocean Waves' Laboratory. (1 Hour) Laboratory for linear ocean wave theory generation and propagation of linear waves, measurement of wave properties and observation of wave transformations in shallow water.

CIV 632 Tides and Long Waves. (3 Hours) A systematic development of the theory of ocean tides, tidal forcing functions, near shore tidal transformations and tidal propagation in harbors and estuaries. An introduction to the response of harbors to long waves and the study of the generation of long ocean waves.

CIV 633 Airport Planning and Design. (3 Hours) Basic principles of airport facilities design to include aircraft operational characteristics, noise, site selection, land use compatibility, operational area, ground access and egress, terminals, ground service

areas, airport capacity, and special types of airports. Prerequisite: CIV 390 or permission of Department.

CIV 640 Finite Element Methods. (3 Hours) Theory and application of the finite element method; stiffness matrices for triangular, quadrilateral, and isoparametric elements; two- and three-dimensional elements; algorithms necessary for the assembly and solutions; direct stress and plate bending problems for static, nonlinear buckling and dynamic load conditions; displacement, hybrid, and mixed models together with their origin in variational methods. Prerequisite: CIV 540 or permission of Department.

CIV 642 Prestressed Concrete Design. (3 Hours) Study of strength, behavior, and design of prestressed reinforced concrete members and structures, with primary emphasis on precast, prestressed construction; emphasis on the necessary coordination between design and construction techniques in prestressing. Prerequisite: CIV 420 or permission of Department.

CIV 645 Plates and Shells. (3 Hours) Classical bending theory of plates and shells; emphasis on methods of solution including series expansions, finite element and finite difference methods; application of theories to commonly encountered structures in practice; and consideration of in plane loads, large deflections, buckling, and anisotropy. Prerequisite: CIV 640 or permission of Department.

CIV 650 Small Watershed Hydrology. (3 Hours) The role of land conditions in dealing with engineering problems of applied hydrology with emphasis on the small watershed, limited data, and land management situations; gain a physically-based understanding of hydrologic processes that define the functions of small watersheds; Effects of natural and human disturbances on the components of the hydrologic cycle; Investigate special characteristics of small watersheds; Approaches for dealing with limited data; Use the understanding of applied hydrology to predict the impacts of various land use activities on terrestrial and aquatic ecosystems; Develop analytic tools to integrate land use and catchment characteristics to predict catchment response and guide watershed management. Topics include stream flow generation, hill slope hydrology, stream channel hydraulics, hydrograph separation, evapotranspiration, hydrologic tracers, riparian zone hydrology, and hyporheic zone hydrology. Applications in engineering design. Prerequisite: CIV 550 or permission of Department.

CIV 652 Hydraulic Engineering Design. (3 Hours) Design of water supply and transport systems; Design and analysis of structures for controlling and conveying water in both the built and natural environment; Engineering applications of hydraulic and hydrologic engineering; Analytic methods and computer models for the design and evaluation of water resource projects such as flood control and river basin development; Common models, and typical applications for water resource systems; Reservoir design, flood routing; and design of water distribution and storm water management systems, and sanitary

sewers. Prerequisite: CIV 370 or permission of Department.

CIV 653 Advanced Design of Hydraulic Structures. (3 Hours) Analysis and characteristics of flow in open channels (natural and artificial); channel design considerations including uniform flow (rivers, sewers), flow measuring devices (weirs, flumes), gradually varied flow (backwater and other flow profiles, flood routing), rapidly varied flow (hydraulic jump, spillways), and channel design problems (geometric considerations, scour, channel stabilization, sediment transport); analysis and design of hydraulic structures such as dams, spillways etc. based on economic, environmental, ethical, political, societal, health and safety considerations. Prerequisite: CIV 370 or permission of Department. (Cross-Reference: CIV 466)

CIV 654 Water Resource Systems Engineering. (3 Hours) Linear and non-linear optimization models and simulation models for planning and management of water systems; single- and multi-objective analysis and deterministic and stochastic techniques. Prerequisites: CIV 554 or permission of the Department.

CIV 655 Stochastic Hydrology. (3 Hours) Advanced applications of statistics and probability to hydrology, time series analysis and synthesis, and artificial neural network methods. A combination of theory and application to the field of hydrology, environmental and water resource engineering, climatic modeling and other natural resources modeling. Prerequisites: CIV 550, MATH 307 or permission of the Department.

CIV 659 Advanced Topics in Water Resource Engineering. (Variable 1-4 Hours) Course will focus on a variety of topics in the field of water resources engineering. May be repeated for credit. Prerequisite: Permission of the Department.

CIV 660 Physicochemical Processes in Water and Wastewater Treatment. (3 Hours) Fundamental principles, analysis, modeling, and design considerations of physical and chemical processes for water and wastewater treatment processes and operations. Drinking water treatment processes will be focused on while parallel wastewater treatment schemes also being discussed. Relevant water quality characteristics, standards, and regulations in engineering design will be reviewed. Prerequisite: CIV 561 or permission of Department.

CIV 661 Biological Processes in Wastewater Treatment. (3 Hours) Theory and applications of the biological processes available for the treatment of wastewaters. Fundamentals of biological degradations and transformation of pollutants. Microbial growth kinetics and modeling. Wastewater treatment processes, both aerobic and anaerobic, including suspended growth biological processes and attached growth processes. Emphasis on engineering design considerations and parameters. Prerequisite: CIV 660.

CIV 663 Design of Environmental Engineering Facilities. (3 Hours) Analysis and design considerations and constraints for environmental engineering facilities such as water and wastewater

treatment plants, solid and hazardous waste landfills, and resources recovery facilities. Design of municipal wastewater treatment plant including site selection, plant layout, hydraulic profile, preliminary treatment processes (screening, sedimentation, flow equalization, etc.), secondary treatment processes (activated sludge, trickling filter), waste stabilization ponds/constructed wetland), and sludge treatment and disposal (thickening, centrifugation, belt press, anaerobic digestion, thermal process and land disposal). Completion of one major design project and two minor design projects. Prerequisite: CIV 661 or permission of Department. (Cross reference: CIV 460)

CIV 664 Limnology for Environmental Engineering. (3 Hours) The study of aquatic ecosystems, with an emphasis on lakes. The physical characteristics of water and lakes; the chemical characteristics of aquatic systems; the dominant plants and animals in lakes, streams, and wetlands. The impacts of pollution, engineered structures, and man-made alterations of lakes and streams. Prerequisite: permission of Department.

CIV 665 Environmental Law. (3 Hours) The major federal statutes and regulations that govern environmental protection. Included are the National Environmental Policy Act, the Clean Air Act, the Clean Water Act, Superfund, and others. Prerequisite: permission of Department.

CIV 666 Advanced Waste Treatment Processes in Environmental Engineering. (3 Hours) An in-depth study of the biological processes used to treat wastewater, with an emphasis on recently published information. Prerequisite: CIV 661 or permission of Department.

CIV 667 Biological Process Engineering. (3 Hours) Applications of the principles of microbial kinetics and heat transfer to the analysis and design of biological engineering processes. Emphasis on applications in environmental engineering processes or projects. Prerequisite: permission of Department.

CIV 668 Bioenvironmental Engineering. (3 Hours) Engineering principles for the design of systems for the biological treatment and utilization of organic by-products from animal and crop production and from industrial processes such as food and crop processing industries. Design of best management practices to protect bioenvironmental resources by minimizing non-point pollution (off-site movement of sediment, nutrients and other constituents) and by minimizing nuisance odors associated with land applied organic residues, inorganic fertilizers and pesticides. Economic utilization of beneficial components of typical wastes. Prerequisite: permission of Department.

CIV 669 Advanced Topics in Environmental Engineering. (Variable 1-4 Hours) Course will focus on a variety of topics in the field of environmental engineering. May be repeated for credit. Prerequisite: permission of Department.

CIV 670 Rock Mechanics. (3 Hours) Classification of rock masses, stress and strain in rock, elastic and time-dependent behavior of rock, state of stress in rock masses, failure mechanisms, construction

applications, geological and engineering applications. Prerequisite: permission of Department.

CIV 671 Advanced Topics in Geological Engineering. (Variable 1-4 Hours). Course will focus on a variety of topics in the field of geological engineering. May be repeated for credit. Prerequisite: permission of Department.

CIV 672 Advanced Geomechanics. (3 Hours) Theoretical and quasi-theoretical approaches for advanced soil mechanics including stress analysis, consolidation theory, immediate settlement, and saturated and partially saturated soils; problem idealization; introduction to rock mechanics; engineering judgment. Prerequisite: CIV 380 or permission of Department.

CIV 673 Advanced Foundation Engineering. (3 Hours) Advanced topics in foundations design, special cases of shallow foundations; horizontal load capacity of pile foundations; battered piles, load calculation of pile groups. Drilled caissons; design and construction of sheet piles including cantilever and anchored sheet piles; earth pressures and stability of retaining structures; design of braced supports, cofferdams; design examples. Prerequisite: CIV 430 or permission of Department.

CIV 674 Soil Dynamics. (3 Hours) Study of soil behavior under various dynamic loadings including earthquakes. Laboratory & field techniques for determining dynamic soil properties and liquefaction potential. Factors affecting liquefaction; dynamic soil-structure interaction. Engineering design examples. Prerequisite: CIV 380 or permission of Department.

CIV 675 Earth Dams and Slopes. (3 Hours) Stability of natural and man-made slopes under various loading conditions, slope protection. Selection and measurement of pertinent soil parameters. Engineering design and construction of earth dams and embankments. Practical aspects of seepage effects and ground water flow. Flow net and its use; wells; filters; total and effective stress methods of slope analysis. Prerequisite: CIV 380 or permission of Department.

CIV 676 Tunneling. (3 Hours) Overview of tunneling practice in rocks and soft ground. Underground construction techniques. Geological aspects and major technical problems in tunneling. Various tunneling methods and selections. Design and support of tunnels in soft ground and rock. Prerequisite: Permission of Department.

CIV 677 Design and Construction with Geosynthetics. (3 Hours) Properties and behavior of geosynthetics including geotextiles, geogrids and other fabrics; applications in geotechnical and geo-environmental engineering; quantify hydraulic behavior; applications in remediation, retaining structures, and foundations construction. Prerequisite: permission of Department.

CIV 678 Soil Bioengineering. (3 Hours) Engineering practices and ecological principles for the assessment, design, construction and maintenance of living vegetation systems. Slope stabilization against shallow mass movement and erosion through vegetated reinforcement. Root reinforcement, erosion control, aesthetics and environmental factors in engineering

design are considered. Prerequisite: permission of Department.

CIV 679 Advanced Topics in Geotechnical Engineering. (Variable 1-4 Hours) Course will focus on a variety of topics in the field of geotechnical engineering. May be repeated for credit. Prerequisite: permission of Department.

CIV 695 Scientific Writing Seminar. (1 Hour) Exercises in scientific writing format and style, with particular emphasis on writing abstracts and manuscripts for publication in referred archival journals.

CIV 696 Seminar. (1 Hour) Presentation of papers, projects and reports by visiting lecturers, graduate students, engineers, and community leaders.

CIV 697 Internship. (Variable 1-3 Hours) Supervised graduate internship and externship in various areas. Prerequisite: permission of Department.

CIV 698 Independent Study. (Variable 1-4 Hours) Intensive study of a special engineering project including research and literature review selected in accordance with student interests and arranged in consultation with the adviser. Topics will vary. Student will make periodic reports, and will prepare a scholarly paper at the end of semester. Prerequisite: permission of Department.

CIV 699 Thesis Research. (Variable 1-6 Hours) Master's thesis representing an independent and original research. Prerequisite: permission of adviser.

DEPARTMENT OF COMPUTER ENGINEERING

Dr. M. A. Manzoul, Professor and Chair
P.O. Box 17098
Telephone: (601) 979-3923
Fax: (601) 979-6988
E-mail: mmanzoul@jsums.edu

Faculty

Dr. K. Abed, Associate Professor
Dr. K. S. Ali, Professor
Dr. S. Alibadi, Northrup Grumman Professor
Dr. T. El-Bawab, Associate Professor
Dr. A. Eldek, Associate Professor
Dr. G. W. Skelton, Professor
Dr. S. Tu, Assistant Professor

Computational Engineering Emphasis

It is essential for engineers to be skillful in computational technologies. Emergence of high-performance computing has created a third mode of scientific investigation. Computational simulation now joins theoretical analysis and physical experimentation as tools for discovering new knowledge.

Program Objectives

1. Develop computational systems for the solution of physical problems in engineering and science.

2. Develop algorithms and software required for the mathematical models of physical processes.
3. Visualize, analyze, and interpret computed results and other physical data.

Core Courses		Semester
Course	Title	Hours
CPE 503	Computational Methods	3
CPE 520	Advanced Engineering Analysis I	3
CPE 521	Advanced Engineering Analysis II	3
CPE 618	High Performance Computing	3

Elective Courses

CPE 500	Software Engineering	3
CPE 505	Analysis of Algorithms	3
CPE 508	Operating Systems	3
CPE 512	Computer Architecture	3
CPE 515	Advanced Logic Design	3
CPE 530	VLSI Design	3
CPE 531	VLSI Testing and Design for Testability	3
CPE 532	Digital Integrated Circuit Design	3
CPE 533	Fault-Tolerant Computing Systems	3
CPE 541	Computer Networks	3
CPE 547	Modeling and Analysis of Computer and Communication Systems	3
CPE 552	Computer Vision	3
CPE 555	Control Systems	3
CPE 557	Robotics	3
CPE 560	Embedded Design with Microprocessors	3
CPE 601	Code Optimizations	3

CPE 611	Computer Arithmetic	3
CPE 630	Design Automation of VLSI Systems	3
CPE 640	Computer Security	3
CPE 641	Advanced Computer Networks	3
CPE 642	Computer Network Security	3
CPE 655	Advanced Control Systems	3
CPE 693	Advanced Topics in Engineering	1 to 4
CPE 695	Scientific Writing Seminar	1
CPE 696	Seminar	1
CPE 697	Internship	1-3
CPE 698	Independent Study	1-4
CPE 699	Thesis Research	1-6

Computer Engineering Emphasis

Mission

- ◆ Provide a solid foundation in the design and implementation of computer systems emphasizing the development of both software and hardware.
- ◆ Provide an outstanding educational program that enables graduates to have a solid background in both theoretical and practical aspects of Computer Engineering in order to prepare them to make meaningful contributions to their profession.
- ◆ Provide an outstanding educational program that enables our graduates to become leaders in their profession by imparting fundamental principles, skills, and tools necessary to innovate and excel in engineering practice, research or academia.

Program Objectives

1. Afford students the opportunity for in-depth study of Computer Engineering concepts and theories
2. Provide state-of-the-art applications and implementations in the design of computer-based systems
3. Provide graduates with effective communications skills required for career advancement
4. Endow students with a sense of professionalism, professional ethics and active participation in the affairs of the profession
5. Engage faculty and graduate students in meaningful Computer Engineering research
6. Promote professional development and growth of students and faculty

Electrical Engineering Emphasis

Mission

Provide students with a solid foundation in electrical engineering, knowledge of technical specialty areas, and an appreciation for collaborative problem solving

in order to make significant contributions to the profession.

Program Objectives

1. Provide students with a solid foundation in electrical engineering (EE), EE practices and major design skills to maintain high employability, adaptability to changing technologies, and an ability to conceive new technologies and innovative solutions to EE challenges
2. Graduates with effective communications skills required for career advancement
3. Endow students with a sense of professionalism, professional ethics and active participation in the affairs of the profession
4. Enable students to work effectively in a team environment

Telecommunications Engineering Emphasis

Mission

To provide quality education to prepare students to play a significant role in shaping the future telecommunication's environment, and to provide knowledge and skills necessary to foster life long learning.

Program Objectives

1. Provide students with both theoretical and practical foundations of telecommunications engineering
2. Engage faculty and students in research endeavors in telecommunications hardware, software, and systems
3. Promote professional development and growth of students and faculty
4. Produce graduates with effective communications skills required for career advancement
5. Endow students with a sense of professionalism, professional ethics and active participation in the affairs of the profession

Core Courses		Semester

CPE 545	Antennas	3
CPE 546	Digital Communication Systems	3
CPE 643	Wireless Networks	3
CPE 644	Optical Communication Systems	3
CPE 645	Microwave Circuits and Systems	3
CPE 646	Global Positioning Systems and Location Services	3
CPE 647	Mobile Computing Systems	3
CPE 648	Wireless Sensor Networks	3
CPE 649	Telecommunications Network Management	3
CPE 670	Wireless Design Laboratory	3
CPE 671	3G and 4G Wireless Networks	3
CPE 672	Network Quality Assurance and Simulation	3
CPE 673	Wireless Internet Application Development	3
CPE 693	Advanced Topics in Engineering	1 to 4
CPE 695	Scientific Writing Seminar	1
CPE 696	Seminar	1
CPE 697	Internship	1-3
CPE 698	Independent Study	1-4
CPE 699	Thesis Research	1-6

DESCRIPTION OF COURSES

CPE 500 Software Engineering. (3 Hours)
Examination of the software development life cycle; requirements elicitation; system design; Unified Modeling Language (UML) focus on design; risk analysis; configuration management; testing; maintenance; software project management; team building.

CPE 502 Telecommunication Software Design. (3 Hours) Comprehensive course to familiarize telecommunication professionals with the state of the art in software concepts and technologies in modern telecommunications applications; examination of state-of-the-art software concepts and technology in modern telecommunications applications; focus on software process modeling as applied to telecommunications; application of software engineering concepts and processes; user interface design; reusability; reuse; reliability; distributed computing; real-time operating systems; interfacing with Optical/IP Networks; Personal Communication Service (PCS); switch control; heavy emphasis on real world application topics including Optical/IP Network, Intelligent Network (IN) Service Creation, and Cellular/Personal Communication Service (PCS).

CPE 503 Computational Methods. (3 Hours) Computational methods for solving problems in engineering analysis; variational methods; finite-difference analysis; optimization methods; finite-difference analysis; matrix methods; focus is on real-world engineering problems; techniques and algorithms for simulating large-scale digital and analog circuits.

CPE 505 Analysis of Algorithms. (3 Hours) Mathematical foundations of algorithms and algorithm analysis; sorting and searching algorithms, graph algorithms, algorithm design techniques, lower bound theory, fast Fourier transforms, NP-completeness.

CPE 508 Operating Systems. (3 Hours) Examination of concepts of process communication and synchronization; protection; performance measurement; study of mutual exclusion; concurrent processes; device and memory management; I/O and interrupt structures.

CPE 512 Computer Architecture. (3 Hours) Study of architectural features of modern processors, including cache memories and memory systems, pipeline designs, branch prediction techniques; design of superscalar, multithreaded VLIW processors, code optimization for such systems will be studied; quantitative evaluation of architectural features.

CPE 515 Advanced Logic Design. (3 Hours) Advanced concepts in Boolean algebra; use of hardware description languages as a practical means to implement hybrid sequential and combinational designs; digital logic simulation; rapid prototyping techniques; design for stability concepts; focuses upon the actual design and implementation of sizeable digital design problems using a representative set of Computer Aided Design (CAD) tools.

CPE 520 Advanced Engineering Analysis I. (3 Hours) A comprehensive course to familiarize engineering professionals with advanced applied mathematics as it relates to solving practical engineering problems. The course of intensive study blends the theoretical underpinnings of advanced applied mathematics with an understanding of how these powerful tools can be used to solve practical engineering problems. The material covered includes Ordinary Differential Equations; Linear Algebra,

Vector Calculus; Fourier Analysis and Partial Differential Equations.

CPE 521 Advanced Engineering Analysis II. (3 Hours) A comprehensive course to familiarize engineering professions with advanced applied mathematics as it relates to solving practical engineering problems. The course of intensive study blends the theoretical un of advanced applied mathematics with an understanding of how these powerful tools can be used to solve practical engineering problems. The material covered includes Complex Analysis; Numerical Methods; Optimization; Graphs; and Probability and Statistics.

CPE 530 VLSI Design. (3 Hours) Theory of MOS transistors: fabrication, layout, characterization; CMOS circuit and logic design; circuit and logic simulation, fully complementary CMOS logic, pseudo-NMOS logic, dynamic CMOS logic, pass-transistor logic, clocking strategies; sub system design; ALUs, multipliers, memories, PLAs; architecture design: data path, floor planning, iterative cellular arrays, systolic arrays; VLSI algorithms; chip design and test; full custom design of chips, possible chip fabrication by MOSIS and subsequent chip testing.

CPE 531 VLSI Testing and Design for Testability. (3 Hours) Introduction to testing of digital electronic circuits and systems; faults and fault modeling, test equipment, test generation for combinational and sequential circuits, fault simulation, memory and microprocessor testing, design for testability, built-in self-test techniques, and fault location.

CPE 532 Digital Integrated Circuit Design. (3 Hours) Design methodologies for digital systems using a modern hardware description language; algorithmic, architectural and implementation aspects of arithmetic processing elements; design of Complex Instruction Set (CISC), Reduced Instruction Set (RISC), and floating point processors; synthesis, simulation and testing of processors with computer-aided design tools.

CPE 533 Fault-Tolerant Computing Systems. (3 Hours) Analysis and design of very high reliability and availability systems; fault types, reliability techniques, and maintenance techniques; case studies of high-availability long-life, life-critical systems; both hardware and software techniques for achieving fault-tolerance will be studied.

CPE 534 Coding Theory. (3 Hours) Introduction to linear codes; error detection and correction; bounds on the error correction capabilities of codes; Hamming distance code; linear block codes; syndrome decoding of linear block codes; cyclic codes; error trapping; decoding; burst error correcting codes; convolutional codes with threshold, sequential and viterbi decoding; cyclic random error correcting codes; P-N sequences; cyclic and convolutional burst error correction codes; other coding conceptions and implementations.

CPE 536 Solid State Electronics. (3 Hours) This course explores the electronic properties of semiconductor and related materials used in modern day devices. For common semiconductor devices,

operation, electrical characteristic, manufacturing and applications are covered.

CPE 539 Lasers. (3 Hours) Review of electromagnetic theory; ray tracing in an optical system; Gaussian beam propagation; resonant optical cavities; study of excitation and laser mechanisms in gas and semiconductor lasers.

CPE 540 Telecommunication Systems. (3 Hours) Preparatory course for all subsequent graduate work in telecommunications; theoretical and technical foundation for the analysis and design of communications systems; use of classical and modern mathematical analysis techniques, including Fourier Series and Fourier Transform; classical modulation techniques (amplitude, frequency, phase).

CPE 541 Computer Networks. (3 Hours) Study of computer network architectures, protocols, and interfaces; OSI reference model; Internet architecture; networking techniques (multiple access, packet/cell switching, and internetworking); end-to-end protocols; congestion control; high-speed networking; network management.

CPE 542 Computer and Network Security. (3 Hours) In-depth examination of computer and network security; coverage of encryption, public/private keys, certificates, security of wired and wireless communication systems; invasion and intrusion techniques and detection; security architectures; network and computer risk analysis; biometrics and their application to computer security will be examined.

CPE 543 Wireless Communication Systems. (3 Hours) Principles of mobile communication systems; models of wave propagation; compensation for fading; modulation, demodulations; coding, encoding; multiple-access techniques; performance characteristics of mobile systems; wireless device characteristics; low-power mobile devices; wireless communication system design; mobile and cell antenna designs.

CPE 544 Electromagnetic Field Analysis. (3 Hours) Maxwell's equations; solutions of Laplace's equation; Green's Function; scalar and vector potentials; energy and momentum in electromagnetic fields; interaction of fields and material media.

CPE 545 Antennas. (3 Hours) Examine the theory and properties of various communication antennas covering the range from RF frequencies to millimeter wavelengths; examine actual antennas and their characteristics.

CPE 546 Digital Communication Systems. (3 Hours) Maxwell's equations; numerical propagation of scalar waves; numerical implementation of boundary conditions; absorbing boundary conditions for free space and waveguides; selected applications in telecommunications, antennas, microelectronics, digital systems.

CPE 547 Modeling and Analysis of Computer and Communication Systems. (3 Hours) Modeling of single and multiprocessor systems, single and multi-stage interconnection networks, computer networks; analysis using Stochastic processes, Markov and

Queuing techniques; modeling using Petri Nets and Finite State models.

CPE 551 Digital Signal Processing. (3 Hours) Signals and systems; sampling continuous-time signals and reconstructions of continuous-time signals from samples; spectral analysis of signal using the discrete Fourier transform; the fast Fourier transform and fast convolution methods; z-transforms; finite and infinite impulse response filter design techniques; signal flow graphs and introduction to filter implementation.

CPE 552 Computer Vision. (3 Hours) Examination of information processing approaches to computer vision; algorithms and architectures for artificial intelligence and robotic systems capable of vision; inference of three-dimensional properties of a scene from its images, such as distance, orientation, motion, size and shape, acquisition and representation of spatial information for navigation and manipulation in robotics.

CPE 555 Control Systems. (3 Hours) Analysis and design of control systems with emphasis on modeling and dynamic response; transform and time domain methods for linear control systems; stability theory; root locus, bode diagrams and Nyquist plots; design specification in time and frequency domains; state-space design with computer solutions; compensation design in the time and frequency domain; modern design principles.

CPE 556 Systems Theory. (3 Hours) Linear operators; impulse response including convolution; transition matrices; fundamental matrix; linear dynamical system; definition; representation; diagramming principles; signal flow diagramming; analog and digital modeling; controllability and observability; eigenstructure; similarity transformations.

CPE 557 Robotics. (3 Hours) Fundamentals of robotics; rigid motions; homogenous transformations; forward and inverse kinematics; velocity kinematics; motion planning; trajectory generation; sensing; vision; and control.

CPE 560 Embedded Design with Microprocessors. (3 Hours) Microcomputer system design and use of microprocessors and single chip microcomputers as basic system components; basic microcomputer design and the interface between microprocessor and external devices; course examines the software aspects of microcomputers using assembly language and C programming; single chip microcomputers for embedded and power efficient applications; direct memory access, memory design and management, cache memory, fault tolerance issues, parallel processing with emphasis on hardware issues.

CPE 571 Engineering Foundations of Biomedical Engineering. (3 Hours) This course is designed for engineering graduate students who come from traditional engineering disciplines and provides a comprehensive survey of the multi-disciplinary field of biomedical engineering. This course is intended to provide a broad perspective of the role that biomedical engineers play and to serve as an engineering

foundation for subsequent, more advanced courses in biomedical engineering. Prerequisite: permission of Department

CPE 573 Biomedical Instrumentation. (3 Hours) Origins and characteristics of bioelectric signals, recording electrodes, amplifiers, chemical, pressure and flow transducers, noninvasive monitoring techniques, and electrical safety. Prerequisite: CPE 571

CPE 575 Biomaterials. (3 Hours) Introductory course in biomaterials. Topics include structure property relationships for synthetic and natural biomaterials, biocompatibility, and uses of materials to replace body parts. Prerequisite: CPE 571

CPE 601 Code Optimizations. (3 Hours) Discussion of methods to improve the performance of code generated by compilers; data-flow and dependence analysis, peep-hole optimization, instruction scheduling, and parallelism enhancing transformations; techniques to improve the utilization of registers, instruction level parallelism, and memory hierarchies in modern computer systems.

CPE 610 Parallel Computing and Programming. (3 Hours) Introduction to processing in parallel and distributed computing environments; general concepts of parallel machine models, processes, mutual exclusion, process synchronization, message passing, and programming languages for parallel computing and scheduling; design and analysis of parallel algorithms; performance analysis of parallel algorithms; parallel programming environments: P threads for shared memory multiprocessor systems and PVM/MPI for distributed networks computers.

CPE 611 Computer Arithmetic. (3 Hours) Theory and application of computer arithmetic, design, and analysis of computer arithmetic units: fast adders, fast multipliers, shifters, dividers, and floating-point arithmetic units.

CPE 618 High Performance Computing (3 Hours) The class will study a variety of algorithms, their applications, and tradeoffs between different solutions. There will be discussions on topics such as parallel computer architectures (memory hierarchy, interconnection networks, latency, bandwidth, parallel I/O), and software systems, with the aim of understanding their capabilities, costs and limitations. Students will make use of recent technology through a number of software packages and programming environments appropriate to the topics addressed. High performance computing tools will be used to compare and evaluate the performance of different implementations through a variety of criteria. Students will draw conclusions regarding preferred algorithms, programming paradigms, and programming environments and tools for parallel and distributed computing.

CPE 630 Design Automation of VLSI Systems. (3 Hours) Theory and algorithms for design automation, design automation tools in VLSI systems, Advanced VLSI design principles, Verilog and VHDL hardware description languages; timing-driven physical design and synthesis, circuit simulation and validation, formal

verification, design for reuse and System on Chip (SOC) design methodology.

CPE 635 Advanced Circuit Theory. (3 Hours) CMOS technology; structured digital circuits; VLSI systems; computer-aided design automation tools and theory for design automation; chip design and integration; microelectronic systems architecture; VLSI circuit testing methods; advanced high-speed circuit design and integration.

CPE 640 Computer Security. (3 Hours) Comprehensive introduction to field of computer security; security architectures; physical security; communications security; system security; operational security; network and computer risk analysis; invasion and intruder techniques; case studies; in-depth examination of cryptography; biometrics and their application to computer security will be examined.

CPE 641 Advanced Computer Networks. (3 Hours) Concepts and fundamental design principles of computer networks and Internet that have contributed to modern network implementations; survey of new trends in networks and Internet/intranet with design of real networks; topics include discussion of fundamental aspects of Internet application layer (HTTP, FTP, DNS), TCP/UDP socket programming, reliable data transfer, congestion control; network layer (IPv4 and IPv6) and routing; link layer and Local Area Networks (LAN); multimedia networking (RTSP, RPT, RSVP, DiffServ); security in computer networks.

CPE 642 Computer Network Security. (3 Hours) Principles and concepts in computer network security; introduction to cryptography, confidentiality, authentication, digital signatures, E-mail security, IP security, Web security, intruders, intruder detection, malicious software, firewalls, biometrics as applied to security, and other network security-related issues.

CPE 643 Wireless Networks. (3 Hours) Wireless architectures and networking; examination of both wireless LANs and mobile wireless networks; wireless network protocols; channel and resource allocation; mobile IP; wireless data management; Quality of Service (QoS); performance modeling; related wireless networking topics; examination of various architectures and standards (802.11, 802.15, 802.16), IR, and other related protocols.

CPE 644 Optical Communication Systems. (3 Hours) Principles of optical communication systems and fiber optic communication technology; characteristics of optical fibers, laser diodes, and laser modulation; laser and fiber amplifiers; detection; demodulation; dispersion compensation; system typologies.

CPE 645 Microwave Circuits and Systems. (3 Hours) Operating principles of devices at microwave and millimeter wave frequencies; sources; detectors; waveguide; cavities; antennas; scattering parameters; impedance matching; system design.

CPE 646 Global Positioning Systems and Location Services. (3 Hours) Examination of satellite navigation systems; overview of transition from radio navigation systems to modern satellite-based systems;

examination of satellite signal propagation, clock accuracy, and injected errors and their effect on accuracy; application of GPS and location services as related to autonomous mobile vehicles and public safety; examination of alternative location services and their comparison to GPS.

CPE 647 Mobile Computing Systems. (3 Hours) Overview of the emerging field of mobile computing; land mobile vs. satellite vs. in-building communications systems; RF vs. IR; cellular telephony; mobility support in cellular telecommunication networks; Personal Communications Systems/ Personal Communications Networks; wireless local area networks; direct broadcast satellite; low earth orbiting satellites; examination of data management, reliability issues; mobile IP; end-to-end communication; channel and other resource allocation; routing protocols; 2G and 3G standards and protocols such as TDMA, CDMA, GSM, PCS will be discussed.

CPE 648 Wireless Sensor Networks. (3 Hours) Survey of the field of wireless communications as related to low-power embedded sensor networks including communications standards and protocols, e.g. 802.11, Bluetooth, 802.15.4/Zigbee; examination of network services including reliable delivery, routing, naming, and security; examination of system architectures, operating systems and language support, distributed algorithms, and applications for wireless sensor networks; target tracking, data collection and analysis, power and resource management; a sensor network is implemented during the course.

CPE 649 Telecommunications Network Management. (3 Hours) Systematic examination of standards, basic concepts, current practices in telecom system management; Telecommunications Network Management (TNM) and OSI coverage; coverage of major telecom management standards; examination of management issues relating to both wireless mobile networks and traditional telecom systems, coverage of essential features of TNM architectures; examination of management of telecommunication network equipment and services; interoperability in a multi-supplier environment.

CPE 655 Advanced Control Systems. (3 Hours) Linearization of nonlinear systems; phase-plane analysis; Lyapunov stability analysis; adaptive estimation; stability of adaptive control systems.

CPE 670 Wireless Design Laboratory. (3 Hours) Laboratory experiments directed towards in-depth understanding of the implementation of components used in wireless communications; practical experience in the use of Bluetooth, WiFi, 802.11, and RF related components and networks.

CPE 671 3G and 4G Wireless Networks. (3 Hours) Examination of the technical, business, and regulatory issues surrounding third and fourth generation (3G and 4G) wireless communication systems; examination of the evolution of the various generation of wireless communications; focus on CDMA, Wideband CDMA, 3G, GSM, 4G designs and applications; extensive use of case studies; examination of both protocols and physical implementations.

CPE 672 Network Quality Assurance and Simulation. (3 Hours) Focus on the theoretical and practical aspects of network simulation and quality assurance; fundamentals of simulation and statistical modeling; random variable distributions; random number generation; wireless network performance; distributed systems; distributed and parallel systems and services; resolution in simulation; modeling and abstraction in multilevel simulation; distributed simulation consideration; implementation of actual network simulation and modeling project.

CPE 673 Wireless Internet Applications Development. (3 Hours) Course focuses on the Wireless Application Protocol (WAP) and the Wireless Markup Language (WML), Microsoft Mobile .Net framework, Java Server Pages, Active Server Pages, CGI, and related protocols; attention is directed to development of applications using both thin and thick client models; course is composed of development of applications using both simulators and actual application servers and wireless devices such as WAP enabled Telephones, PDAs, and personal communication devices.

CPE 693 Advanced Topics in Engineering. (Variable 1 to 4 Hours) Graduate standing in engineering. Lectures on advanced topics of special interest to students in various areas of computer engineering are introduced. This course number is used to offer and test new courses.

CPE 695 Scientific Writing Seminar. (1 Hour) Exercises in scientific writing format and style, with particular emphasis on writing abstracts and manuscripts for publication in referred archival journals.

CPE 696 Seminar. (1 Hour) Presentation of papers, projects and reports by visiting lecturers, graduate students, engineers, and community leaders.

CPE 697 Internship. (Variable 1-3 Hours) Supervised graduate internship or externship in selected areas. Prerequisite: permission of Department.

CPE 698 Independent Study. (Variable 1-4 Hours) Intensive study of a special engineering project including research and literature review selected in accordance with the student's interests and arranged in consultations with the advisor. Topics will vary. Student will make periodic reports as well as a paper at the end of the semester. Prerequisite: permission of Department.

CPE 699 Thesis Research. (Variable 1-6 hrs) Master's thesis representing independent and original research. Prerequisite: permission of advisor.

DEPARTMENT OF COMPUTER SCIENCE

Dr. Loretta A. Moore, Professor and Chair

Telephone: (601) 979-2105
Fax: (601) 979-2478
E-mail: loretta.a.moore@jsums.edu

Faculty

Dr. A. Abu El Humos, Assistant Professor
Dr. W. Brown, Associate Professor
Dr. S. Hong, Assistant Professor
Dr. J. Jackson, Assistant Professor
Dr. H. Kim, Associate Professor
Dr. X. Liang, Associate Professor
Dr. N. Meghanathan, Associate Professor
Dr. T. Pei, Associate Professor
Dr. M. Watts, Assistant Professor

The Department of Computer Science offers the Master of Science in Computer Science. The curriculum is geared to 1) provide training for those preparing to enter fields where a substantial working knowledge of computing is required, 2) provide additional training to people already working in the field, and/or 3) prepare students for study at the doctoral level.

Program Objectives

1. To afford students the opportunity for in-depth study of Computer Science concepts and theories.
2. To keep abreast of, and expose students to, state-of-the-art, as well as state-of-the-practice, computer applications and technologies.
3. To engage faculty and students in meaningful computer science research, and computer science applications research and development.
4. To promote professional development and growth of students and faculty.

Admission Requirements

In addition to satisfying the university requirements to enter the graduate school, students must meet other specific requirements in order to be formally admitted to the Department of Computer Science program. Ideally, students will have a B.S. in Computer Science, or a related field, and at least the equivalent of the following courses:

CSC 118 Programming Fundamentals
CSCL 118 Programming Fundamentals Lab
CSC 119 Object-Oriented Programming
CSCL 119 Object-Oriented Programming Lab
CSC 216 Computer Architecture and Organization
CSC 216L Computer Architecture and Organization Lab
CSC 225 Discrete Structures
CSC 228 Data Structures and Algorithms

CSC 228L Data Structures and Algorithms Lab
CSC 325 Operating Systems
EN 212 Digital Logic
ENL 212 Digital Logic Laboratory
BIO 111 General Biology
CHEM 141 General Chemistry
MATH 231 Calculus I
MATH 232 Calculus II
MATH 355 Probability and Statistics
PHY 211 General Physics I
PHY 212 General Physics II

Students who do not have the required background may be admitted as special students. These students must take specified courses to make up deficiencies and no credit toward the degree is awarded for courses prescribed to satisfy entrance requirements.

Degree Requirements

The Department offers courses on a semester basis. Thirty-six credit hours are required for a master's degree. All students are required to pass the departmental Graduate Comprehensive Examination. A thesis or project option may be chosen.

Areas of Emphasis

Software Engineering	Artificial Intelligence
Computer Architecture	Numerical Analysis
Parallel/Distributed Processing	Simulation
Database Management Systems	Operating Systems
Programming Languages	Information Systems

Core Courses

Course Title	Semester Hours
CSC 512 Computer Architecture	3
CSC 515 Data Structures and Algorithm Analysis	3
CSC 518 Operating Systems	3
CSC 519 Principles of Programming Languages	3
<i>Total Hours</i>	<i>12</i>

Major Courses

Students must choose four major courses for a total of 12 hours

CSC 520 Database Systems	3
CSC 524 Comp. Com. Networks and Distributed Processing	3
CSC 529 Compiler Construction	3
CSC 530 Theory of Computation	3
CSC 532 Numerical Methods	3
CSC 535 Information Systems Analysis and Design	3
CSC 545 Artificial Intelligence	3
CSC 560 Software Engineering	3

ELECTIVES

(Students must choose two electives)	6
OPTION A: THESIS	6
OPTION B: PROJECT	3
ONE ADDITIONAL COURSE	3

TOTAL REQUIRED FOR DEGREE:

(either option)	36
-----------------	----

DESCRIPTION OF COURSES

CSC 505 Computer Mathematics. (3 Hours) Elements of set theory, functions and relations nondecimal numbers, data representation, boolean algebra. Review of elementary differential and integral calculus with applications to the problems in computer science.

CSC 508 Legal and Economic Issues in Computing. (3 Hours) A presentation of the interactions between users of computers and the law and a consideration of the economic impacts of computers. Includes discussion of computer crime, privacy, electronic fund transfer, and automation.

CSC 509 Computers and Society. (3 Hours) History of computing and technology; place of computers in modern society; the computer and individual; survey of computer applications, legal issues; computers in decision making processes; the computer scientist as a professional; futurist's view of computing; public perception of computers and computer scientists.

CSC 511 Object-Oriented Programming. (3 Hours) Discussion of object-oriented languages. Object-Oriented techniques using the C++ language, classes, objects, constructors, destructors, friend functions, operator overloading, inheritance, multiple inheritance, and polymorphism. Reusability is emphasized.

CSC 512 Computer Architecture. (3 Hours) An advanced introduction to computer design and architecture. Topics include instruction set architecture, RISC computers, control unit design, pipelining, vector processing, memory system architecture, and classification of computers.

CSC 514 Statistical Methods for Research Workers. (3 Hours) Estimation and tests of hypotheses; regression and correlation; analysis of variance; non-parametric statistics; chi-square. SAS programming for data analysis.

CSC 515 Data Structures and Algorithm Analysis. (3 Hours) Mathematical foundations for complexity theory, asymptotic notation, recurrence relations. Strategies for development of algorithms like divide and conquer, greedy, dynamic programming, backtracking. Exposure to some typical and important algorithms in computer science. Introduction to the theory of NP-completeness.

CSC 518 Operating Systems. (3 Hours) Emphasizes the concepts of process communication and synchronization, protection, performance measurement, and evaluation. Problems associated

with mutual exclusion and synchronization, concurrent processes, information, process, device, and memory management are examined. Implementation of I/O and interrupt structure is also considered.

CSC 519 Principles of Programming Languages. (3 Hours) Important programming language concepts including, representation of data and sequence control, data abstraction and encapsulation; procedural and non-procedural paradigms: functional, logic, and object-oriented languages; distributed and parallel programming issues.

CSC 520 Data Base Management Systems. (3 Hours) Introduction to data base concepts including data independence; relations; logical and physical organizations; schema and subschema. Hierarchical, network, and relational models with description of logical and physical data structure representation of the database system. Normalization: first, second, and third normal forms of data relations. Relational algebra and relational calculus; data structures for establishing relations; query functions.

CSC 521 Linear Algebra and Finite Mathematics. (3 Hours) Matrices and determinants; ranks of matrix; inverse of matrix; solving systems of linear equations; bases of a vector space; probability; permutations and combinations; Gaussian vector space; probability; elimination, Gauss-Seidel iteration.

CSC 523 Probability and Statistical Inference. (3 Hours) Elements of probability; combinatorial methods; discrete and continuous distributions; cumulative distribution functions; moment generating functions; distribution associated with normal distributions derived distributions.

CSC 524 Computer Networks and Distributed Processing. (3 Hours) Topologies, media selection, medium access control for local area networks (LANs) including high speed and bridged LANs; circuit switched, ISDN wide area networks (WANs) internetworking issues and standards, 150/051, TCP/IP protocols.

CSC 526 Automata Theory. (3 Hours) Definition and representation of finite state automata and sequential machines. Equivalence of states and machines, congruence, reduced machines, and analysis and synthesis of machines. Decision problems of finite automata, partitions with the substitution property, generalized and complete machines, probabilistic automata, and other topics.

CSC 527 Real-Time Systems. (3 Hours) An introduction to the problems, concepts, and techniques involved in computer systems which must interface with external devices. These include process control systems, computer systems embedded within aircraft or automobiles, and graphics systems. The course concentrates on operating system software for these systems.

CSC 529 Compiler Construction. (3 Hours) An introduction to the major methods used in compiler implementation. The parsing methods of LL(k) and LR(k) are covered as well as finite state methods for lexical analysis, symbol table construction, internal forms for a program, run time storage management for

block structured languages, and an introduction to code optimization.

CSC 530 Theory of Computation. (3 Hours) A survey of formal models for computation. Includes Turing Machines, partial recursive functions, recursive and recursively enumerable sets, abstract complexity theory, program schemes, and concrete complexity.

CSC 531 Computer Simulation Methods and Models. (3 Hours) A study and construction of discrete-system simulation models. Use of discrete-system simulation language (GPSS/H), advance programming techniques, random number generation, generation of various random variate, and statistical validation procedure.

CSC 532 Numerical Methods. (3 Hours) Applying principles and techniques for computing methods. Solution of linear and nonlinear equations. Matrix methods for systems of equations. Polynomial approximation. Numerical integration. Solution of ordinary differential equations using various methods.

CSC 533 Distributed Database System. (3 Hours) Prerequisites: CSC 520, 524. A consideration of the problems and opportunities inherent in distributed database on a networked computer system. Includes file allocation; directory systems; deadlock detection and prevention; synchronization; query optimization; and fault tolerance.

CSC 535 Information System Analysis and Design. (3 Hours) Prerequisite: 519. A practical guide to information systems programming and design. Theories relating to module design, coupling, and module strength are discussed. Techniques for reducing a system's complexity are emphasized. The topics are oriented toward the experienced programmer or systems analyst.

CSC 539 Special Topics in Computer Science. (Variable 1-9 Hours) Prerequisite: Consent of instructor. Topics and problems of information systems that are of practical importance and current interest. New developments in system concepts, techniques, and equipment.

CSC 540 Microcomputer Local Area Networks. (3 Hours) Prerequisites: 518. This course describes various criteria for selecting and implementing local area networks (LANs) consisting of microcomputers.

CSC 545 Artificial Intelligence. (3 Hours) Efficient and intelligent search techniques. Knowledge representation e.g., logic, and semantic nets. Reasoning techniques including reasoning under uncertainty, e.g., fuzzy reasoning. Exposure to different artificial intelligence systems like planning and learning (including neural networks).

CSC 549 Applied Combinatorics and Graph Theory. (3 Hours) A study of combinatorial and graphical techniques for complexity analysis including generating functions, recurrence relations, Polya's theory of counting, planar directed graphs, and NP-complete problems. Applications of the techniques to the analysis of algorithms in graph theory, sorting, and searching.

CSC 555 Information Storage and Retrieval: (3 Hours) Advanced data structures, databases, and

processing systems for access and maintenance. For explicitly structured data, interactions among these structures, access patterns and design of processing/access systems. Data administration, processing system life cycle, system security.

CSC 560 Software Engineering: (3 Hours) Formal approach to techniques and software design and development. Software cycle encompassed from initial ideas through code design and implementation with emphasis on object-oriented design techniques will be included. Software testing and maintenance will be discussed.

CSC 595 Information Systems Development Project: (Variable 1-6 Hours) Prerequisites: Pass comprehensive examination and consent of advisor. Provide the student with the experience in analyzing, designing, implementing, and evaluating information systems. Students are assigned one or more system development projects. The project involves part or all of the system development cycle.

CSC 599 Thesis Research. (Variable 1-6 Hours) Prerequisites: Pass comprehensive examination and consent of advisor. An independent study course for the preparation of a Master's thesis.

SCHOOL OF SCIENCE AND TECHNOLOGY

Departments

- ◆ Biology
- ◆ Chemistry and Biochemistry
- ◆ Mathematics
- ◆ Physics, Atmospheric Sciences and Geoscience
- ◆ Technology

The School of Science and Technology resulted from the merger of the School of Industrial and Technical Studies and the Division of Natural Sciences, previously in the School of Liberal Studies. This reorganization was authorized July 1, 1983 for the purpose of consolidating the scientific and technical resources of the University into an efficiently focused endeavor capable of meeting the demands of new technology.

The departments comprising the School of Science and Technology are: (1) Department of Biology, (2) Department of Chemistry and Biochemistry, (3) Department of Mathematics, 4) Department of Physics, Atmospheric Science and General Science, and (5) Department of Technology. The school offers graduate programs in various areas leading to the M.S., M.S.T., and Ph. D. degrees.

Active research programs in all departments are consistently maintained. The School of Science and Technology is also actively involved in a number of cooperative external programs with national and international institutions designed to enhance student and faculty development. The cooperative programs serve to broaden faculty and student exposure as well as give national and international visibility to Jackson State University.

Degree Programs

The Department of Biology in the School of Science and Technology (SST) in the College of Science, Engineering and Technology (CSET) offers graduate studies leading toward the 1) Master of Science (M.S.) in Biology, and 2) Master of Science (M.S.) in Environmental Science degrees. Both M.S. degrees are research-oriented and designed to satisfy academic requirements for those students intending eventually to seek degree(s) beyond the master's level.

Programs Objectives

1. To provide academic and practical training of high quality at the master's degree level,
2. To contribute to the pool of biologists and environmental scientists qualified to undertake doctoral degree programs, and to obtain employment in industry, government and academic institutions, and
3. To offer a program that will enable biology and environmental science majors to obtain the necessary classroom, laboratory and/or field experiences required for entering areas in and related to environmental science directly upon graduation.

Admissions Requirements

In addition to the requirements set forth by the Division of Graduate Studies, all applicants seeking admission to the M.S. in Biology and/or M.S. in Environmental Science programs in the Department of Biology must meet the following minimum admission requirements:

1. An undergraduate (B.S.) degree in biology or related field. For M.S. in Environmental Science program applicants, at least 16 credit hours of biology courses are required,
2. A minimum undergraduate grade point average (GPA) of 3.00 or higher as evidenced by an official transcript,
4. Three letters of recommendation (sent directly to the department), at least 2 from academic professors who can assess the applicant's: a) academic qualifications; b) written and oral communication skills; c) capacity for critical and analytical thinking; and d) overall potential for graduate studies,
5. A Graduate Record Examination (GRE). The GRE score must be sent directly to the department,
6. A satisfactory score on the Test of English as Foreign Language (TOEFL) for international applicants.
7. A career goal essay (maximum of 800 - 1200 words),
8. A complete application package submitted before or on the following deadlines: March 1 for Fall semester; March 15 for Summer; and October 15 for Spring semester. (Incomplete and late applications (received after the deadlines will not be evaluated.)

Transfer of Credits

Course for which transfer credits are sought must have been completed with a grade of "B" or better. Approval is required by the Chair of the Department.

Time Limit

No student will be granted an M.S. degree unless all requirements are completed within a period of eight (8) consecutive calendar years from the time of admission to the program.

Residence

Students are required to spend one academic year in resident study on the campus. One academic year may include two adjacent regular semesters or one regular semester and one adjacent summer session. To satisfy the continuous residence requirement, the student must complete a minimum of eighteen (18) hours for the required period.

Admission To Candidacy Requirements

When approximately 12-15 semester hours have been completed, the student should make application for advancement to candidacy. Please note that students cannot be advanced to candidacy until:

1. All admission requirements have been met.

2. Notification of the program option the student is electing, or that is required.
3. All incompletes ("I" grades) have been removed.
4. The Graduate English Competency Examination (GECE) was passed, or in the event of failure, passed ENG 500 with a grade of B or better.
5. Earned a 3.00 cumulative G. P. A.
6. Filed the Application for Graduate Degree Candidacy with the approval of the Candidacy Committee in his/her major department.

Degree Requirements

A student seeking the M.S. in Biology or M.S. in Environmental Science degree must:

1. Complete a minimum of thirty (30) semester hours, with a B or higher cumulative G.P.A.. Six of the required semester hours must be in Thesis Research.
2. Pass the Graduate Area Comprehensive Examination (GACE) in 1 elective and 2 core/required courses.
3. Successfully defend the thesis before the Graduate Committee and public audience.
4. Submit an approved thesis to the Chair of the Department of Biology with one copy to the Department and one to the JSU library.
5. Completion of all departmental requirements.

Master of Science in Biology

Courses available for the M.S. degree in Biology provide appropriate preparation for: 1) biological, marine and environmental sciences, 2) advanced professional degrees elsewhere in zoology, plant science, marine science, environmental biology, environmental health, biomedical science, toxicology, genetics, immunology, physiology, microbiology, biochemistry, anatomy and other associated areas, 3) research careers in industry, government and academic institutions, and professional degrees in medicine, dentistry, veterinary medicine, pharmacy and related health fields.

Required Courses

Course	Title	Semester Hours
BIO 511	Biostatistics	3
BIO 515	Molecular Biology	3
BIOL 515	Molecular Biology Laboratory	1
<i>or</i>		
BIO 540	Cell Biology	3
BIO 540	Cell Biology Laboratory	1
<i>or</i>		
CHEM 531	Biochemistry	3
CHML 531	Biochemistry Laboratory	1
BIO 589	Graduate Seminar	1
BIO 599	Thesis Research	6
<i>Total Hours</i>		14

Elective Courses (Total = 16 semester hours)

A student in consultation with his/her advisor and guidance committee must select a minimum of sixteen (16) semester hours from departmental course offerings to complete degree requirements with emphasis in one of the following areas: Molecular Biology, Developmental Biology, Genetics, Microbiology, Plant Biology/Science, Anatomy and Physiology, Environmental Science, Marine Biology, and/or Invertebrate Zoology.

Master of Science in Environmental Science

The M.S. in Environmental Science program provides an education that allows for greater opportunities in employment and further education in the diverse field of environmental science, particularly as the need relates to minorities and women. It also provides a cadre of trained individuals committed to using their environmental literacy toward the betterment of the environment and mankind.

Required Courses

Course	Title	Semester Hours
BIO 506	Human Environments and Natural Systems	3
BIOL 506	Human Environments and Natural Systems Lab.	1
BIO 511	Biostatistics	3
BIO 523	Ecology	3
BIOL 523	Ecology Laboratory	1
BIO 589	Graduate Seminar	1
BIO 599	Thesis Research	6
	<i>Total Hours</i>	18

Elective Courses (Total = 12 semester hours)

A student in consultation with her/his advisor and graduate committee must select a minimum of twelve (12) semester hours from those areas and departments offering appropriate instruction.

Elective Courses

In addition to the required courses shown above, the student must complete a minimum of 16 semester hours (M.S. in Biology) and 12 semester hours (M.S. in Environmental Science) selected from some of the elective courses listed below.

BIO 509	General Genetics	4
BIO 514	Methods in Environmental Analysis	4
BIO 515	Molecular Biology	4
BIO 516	Marine Botany	4
BIO 512	Natural Resources and Conservation	4
BIO 513	Advanced Human Nutrition	3
BIO 524	Plant Physiology	4
BIO 530	Advanced Microbiology	4
BIO 531	Invertebrate Zoology	4
BIO 533	Biology of Water Pollution	4
BIO 534	Ichthyology	4
BIO 540	Cell Biology	4
BIO 546	Selected Topics in	

	Marine/Environmental Science	1
BIO 547	Introduction to Oceanography	4
BIO 550	Immunology and Serology	4
BIO 553	Tropical Marine Ecology	4
BIO 570	Human Physiology	4
BIO 575	Endocrinology	4
BIO 580	Limnology	4
BIO 602	Special Problems in Environmental Science	1-4
BIO 610	Environmental Microbiology	4
BIO 615	Principles of Bioremediation	3
CHEM 515	Environmental Chemistry	4
ITHM 520-	Industrial/Technical Hazardous	
531	Materials Management courses	3-6

DESCRIPTION OF COURSES

BIO 501 Environmental Science (3 Hours). An introductory course for non-major graduate students dealing with the science of the environment and man's relationships through political, social, economic, and ethical processes.

BIO 506 Human Environments and Natural Systems (3 Hours). Emphasis placed on fundamental problems that confront man from day to day. Topics among others for discussion are ecology, population, energy, food, transportation and land pollution.

BIOL 506 Human Environments and Natural Systems Lab. (1 Hour) Selected laboratory exercises, visiting lectures and field trips are designed to provide a broad view of applications and concepts in environmental science.

BIO 507 Biology for Elementary Teachers. (3 Hours) Prerequisites: None. The application of biological procedures and techniques at the elementary school level with emphasis on selected topics in biology.

BIOL 507 Biology for Elementary Teachers Laboratory. (1 hour) Prerequisite: Bio 101. Laboratory designed to expand and illustrate subject-matter areas stressed in Bio 507.

BIO 508 Fundamentals of Electron Microscopy. (4 hours) Prerequisites: Senior, graduate level, and consent of instructor. To introduce the students to the techniques of electron microscopy so that they may be able to initiate their own biological investigations. Emphasis will be placed on laboratory work.

BIO 509 General Genetics. (4 Hours) Prerequisite; Bio 318. A study of the principal concepts of heredity to include the application of classical and modern genetics.

BIO 511 Biostatistics. (3 Hours) This course is designed for students in biological sciences with no advanced training in mathematics. Basic concepts in statistical methods and experimental techniques and their general applicability in biology will be stressed.

BIO 512 Natural Resources and Conservation (3 hours) A study of our natural resources with emphasis on their origin, properties, use and misuse and good conservation practices.

BIOL 512 Natural Resources and Conservation Lab. (1 hour) Students are involved in the collection

of data concerning the use and the analysis of conservation practices for both domestic and public waste, water, and energy resources.

BIO 513 Advanced Human Nutrition. (3 hours) Prerequisites: Bio 233 or 218 and CHEM 241. Review of nutrient sources, requirements and deficiency diseases of man. Emphasis on nutritional metabolism under normal and pathological conditions, and current research.

BIO 514 Methods of Environmental Analysis. (3 Hours) Theory, methods and techniques for identifying and qualifying environmental contaminants. Sampling methods are discussed and some coverage is provided on methods for separation and concentration.

BIO 515 Molecular Biology. (3 Hours) Study of the structure, synthesis, isolation and interactions of macromolecules of biological interest.

BIOL 515 Molecular Biology Laboratory. (1 Hour) Prerequisite: Must be taken concurrently with Bio 515. Laboratory techniques used to purify proteins, DNA, and RNA and the methods used to analyze these macromolecules.

***BIO 516 Marine Botany.** (3 Hours) Prerequisites: Bio 119, Biol 119, Bio 416; open to qualified undergraduates. Survey of seaweeds (marine algae), marine phytoplankton and maritime vascular plants, treating structure, reproduction, life histories, distribution and ecology. Lecture and laboratory to be taken during same semester.

***BIOL 516 Marine Botany Laboratory.** (1 Hour) Prerequisite: Must be taken with lectures in Bio 516. Collection, preservation and preparation and microscopic examination with purpose of emphasizing identification of seaweeds.

BIO 517 Introduction to Remote Sensing for Environmental Science. (3 hours) Prerequisites: Phy201, 202, Math 111, 115, 231. This course introduces the theory and techniques of remote sensing and their application to environmental analysis. Topics include the concepts of remote sensing; characteristics of spectromagnetic waves; types of remotely sensed data; sensor types; the theory of photogrammetric techniques; digital image analysis for acquisition of geographical information. Several lab activities involve: learning of basics of ERDAS Imagine; data acquisition through internet search for satellite images; importing datasets, band characteristics & visual presentation.

BIO 518 Application of Remote Sensing in Environmental Science. (3 hours) Prerequisite: Bio 517. This course covers the quantitative and applied aspects and analysis of remotely sensed digital data. This course is designed to provide an understanding of digital image processing, analysis, and interpretation techniques. Topics include digital data visualization; geometric, radiometric, and atmospheric correction; image enhancement and manipulation; information extraction; digital change detection; integration of GIS and remotely sensed data, and spatial modeling. Laboratory exercises are in-depth applications of the exercise topics that were covered in Bio 417/517 as

well as thematic information extraction and change detection.

BIO 520 Biological Photography. (3 Hours) Prerequisite: Consent of instructor. The course is designed to equip students with the knowledge and expertise to produce high quality prints and slides. Emphasis is placed on laboratory work (darkroom).

BIOL 520 Biological Photography Laboratory. (1 Hour) Laboratory activities give the student experience in exposing and developing black and white films and making prints with various print papers. Must be taken concurrently with Bio 520.

BIO 521 Plant Morphology. (3 Hours) Prerequisite: Bio 119. Study of anatomical, reproductive, ontogenetic and phylogenetic aspects of vascular and non-vascular plants.

BIOL 521 Plant Morphology Laboratory. (1 Hour) Selection of exercises involving the structures, developments and relationships of nonvascular and vascular plants.

BIO 522 Plant Taxonomy. (3 Hours) Prerequisite: Bio 119. Classification and nomenclature of flowering plants; introductory method of collection; laboratory and field studies of representative plant families.

BIOL 522 Plant Taxonomy Laboratory. (1 Hour) Prerequisites: Botany 118, 119. Exercises on collection, classification and nomenclature of flowering plants.

BIO 523 Ecology. (3 Hours) Prerequisite: Senior standing or consent of instructor. A study of the tropic relationships and energy transfer in ecosystems.

BIOL 523 Ecology Lab. (1 Hour) This lab course is designed to be, and should be, taken concurrently with the Ecology lecture course (BIO 523). The ecology laboratory sessions are structured to reinforce topics discussed in lecture and provide a treatment of technical topics not covered in the lecture. Methods common to the laboratory and field will be taught. Students will 1) gain a deeper, understanding of the main concepts of ecology and ecological processes and 2) develop critical and analytical thinking skills along with reasoning and logical thinking skills, and apply them to ecological -concepts.

BIO 524 Plant Physiology. (3 Hours) Prerequisite: Bio 119. Principal physiological processes of plants including water relation, synthesis, and use of foods and growth phenomena are discussed.

BIOL 524 Plant Physiology Laboratory. (1 Hour) Laboratory exercises will be continued to verify the principles of Plant Physiology.

***BIO 525 Introduction to Marine Geology.** (1 Hour) Prerequisites: Bio 408, 408A, or permission of instructor; open to advanced undergraduates. Introductory geology from the marine viewpoint; morphology and origin of ocean basins, plate tectonics, marine sedimentation, coastal features and marine georesources. Lecture and laboratory to be taken during same semester.

***BIOL 525 Introduction to Marine Geology Laboratory.** (1 Hour) Prerequisite: Must be taken with lectures in Bio 525. Field and laboratory

exercises in recognition of geological features and specimens, study of techniques, core samples, mapping and marine topographic profiles.

BIO 526 Mycology. (3 Hours) Prerequisite: Bio 119. A survey of the principal fungal classes. Morphology and cytology of fungi and their relation to industry and agriculture.

BIO 528 Evolution. (3 Hours) Prerequisite: Bio 409 or the equivalent. A study of the processes of organic change. Historical developments of the major concepts and mechanisms. (S)

BIO 529 Plant Anatomy. (3 Hours) An introduction to cell division, development, and maturation of the structures of the vascular plants.

BIOL 529 Plant Anatomy Laboratory. (1 Hour) Selection of exercises involving cell division, development and maturation of the structures of vascular plants.

BIO 530 Advanced Microbiology. (3 Hours) Prerequisites: Bio 313; CHEM 242. Special techniques for culturing microorganisms. Includes a survey of some of the important microbes in medicine, industry and public health.

BIOL 530 Advanced Microbiology Laboratory. (1 Hour) Teaches the student special methods in isolating, culturing, and identifying certain microorganisms of medical and industrial importance. Must be taken concurrently with Bio 530.

BIO 531 Invertebrate Zoology. (3 Hours) Prerequisites: Bio 114, CHEM 142. Intended for students who wish to obtain a comprehensive knowledge of the invertebrates.

BIOL 531 Invertebrate Zoology Laboratory. (1 Hour) Prerequisite: Must be taken concurrently With Bio 531. A taxonomy consideration of the invertebrate fauna. Students are also introduced to empirical observation in such areas as ecology, physiology and behavior.

BIO 532 Advanced Parasitology. (3 Hours) Prerequisites: Bio 331; CHEM 142, 242. The physiology of specific parasite and host-parasite relationships will be studied in great detail. Clinical specimens will be studied.

BIOL 532 Advanced Parasitology Laboratory. (1 Hour) Prerequisite: Bio 331 and/or consent of the instructor. The course will emphasize the experimental approach to Parasitology. Important parasites of man and other animals will be studied from clinical specimens. Must be taken with Bio 532.

BIO 533 The Biology of Water Pollution (3 hours) Biological approaches to water pollution problems is discussed. The effect of pollution on life in aquatic environments is emphasized.

BIOL 533 The Biology of Water Pollution Lab. (1 hour) Selected laboratory exercises, instrument use, and field trips are designed to further enhance the student's awareness in water pollution effects, analysis and problem solving.

BIO 534 Ichthyology. (3 Hours) Prerequisites: Bio 115, Biol 115; open to advanced undergraduates. Biology and classification of marine and freshwater

fish; emphasis on identification and collecting. Lecture and laboratory to be taken during same semester.

BIOL 534 Ichthyology Laboratory. (1 Hour) Prerequisites: Bio 115, Biol 115. Must be taken with lecture in Bio 534. Field collecting, sorting, preserving, classification of marine fish; emphasis on identification.

***BIO 539 Marine Microbiology.** (3 Hours) Prerequisites: Bio 313, Biol 313, 416, Biol 416. Open to advanced undergraduates. A survey of the most important marine microorganisms; emphasis on bacteria, sampling techniques, enumeration of indicator organisms, isolation of pathogenic organisms from seafood. Lecture and laboratory to be taken during same semester.

***BIOL 539 Marine Microbiology Laboratory.** (1 Hour) Prerequisites: 313, 416. Must be taken with lectures in Bio 539. Techniques in sampling, isolation, culture and enumeration of pathogenic and nonpathogenic marine microorganisms.

BIO 540 Cell Biology. (3 Hours) Prerequisites: Bio 111, 119 or 121, 313, and CHEM 241. Study of cell anatomy as revealed by electron microscopy. Emphasis on bioenergetics, cell metabolism and current cell research.

BIOL 540 Cell Biology Laboratory. (1 Hour) Prerequisites: Bio 112, 119, 313. Must be taken concurrently with Bio 540. Laboratory activities which develop techniques for isolation of cellular organelles and quantitative analyses of biomolecules.

BIO 544 Arthropod Disease. (3 Hours) Prerequisites: Bio 115, 427. Emphasis is given to the control and prevention of insect and other arthropod borne diseases, the physiology, taxonomy, life-cycles and ecology of important vectors.

BIOL 544 Arthropod Disease Laboratory. (1 Hour) Study the external structure and make outline sketches to indicate the characteristics used in classification of representative forms and unknown specimens of organisms important to medicine and veterinary science.

BIO 546 Selected Topics in Marine and Environmental Studies. (1-2 Hours) Prerequisites: None; open to advanced undergraduates or others on consent of instructor. Lectures on a broad range of marine and environmental topics of general interest having special application to students in both marine sciences program. No separate laboratory.

***BIO 547 Introduction to Oceanography.** (3 Hours) Prerequisites: Bio 407, Biol 407. CHEM 254 and CHML 254, or consent of instructor; open to advanced undergraduates. Broad view of the marine world, geological, geographical, chemical, physical and biological; field trips aboard research vessels and laboratories introducing applied uses of oceanographic gear, instruments and sampling techniques. Lecture and laboratory to be taken during same semester.

***BIOL 547 Introduction to Oceanography Laboratory.** (1 Hour) Prerequisite: Must be taken with lectures in Bio 547. Introduction to oceanographic gear, its application methodology and

sampling techniques; field work in practical applications.

BIO 550 Immunology and Serology. (3 Hours) The study of antibodies that are elicited in response to antigens and the difference between the protoplasm of one organism and another as reflected in the blood.

BIOL 550 Immunology and Serology Laboratory. (1 hour) Prerequisite: Bio 313 Experimental application of immunology and serology in diagnosis of microbial diseases In vitro and in vivo techniques in immune response will be investigated.

BIO 553 Tropical Marine Ecology (3 hours) Opportunity for practical field exercises in selected tropical environments.

BIO 570 Human Physiology. (3 Hours) Prerequisites: Bio 115, CHEM 242. The study of physiological processes related to the human. The physiological systems to be examined are: gastro-intestinal, renal, endocrine, neural, and reproductive.

BIOL 570 Human Physiology Laboratory. (1 Hour) Selected studies of the physiological processes of mammals with emphasis on man. Must be taken concurrently with Bio 570.

BIO 575 Endocrinology. (3 Hours) Prerequisites: Bio 115, 218; CHEM 142, 242. The basic fundamentals of endocrinology. The role of the endocrine glands and their products (hormones) in the maintenance of a constant internal environment in living organisms.

BIOL 575 Endocrinology Laboratory. (1 Hour) Prerequisites: Bio 115, 218; CHEM 142, 242. Must be taken concurrently with Bio 575, or with the consent of instructor. Experimental analysis of normal and abnormal endocrine functions. Emphasis is placed on basic laboratory techniques employed in the study of endocrine function.

BIO 576 Histopathology. (3 Hours) Prerequisites: Bio 115, 218, and 441. Provides general consideration of the principal concepts of tissues and cellular pathology, with emphasis on human tissues and pathology. The course prepares students for further studies in medicine, dentistry, and allied health fields.

BIOL 576 Histopathology Laboratory. (1 Hour) Exercises studying gross and microscopic diseased tissues and clinical cases.

BIO 580 Limnology (3 hours) Physical and chemical factors affecting the biology of ponds, reservoirs, and streams is presented. A research project in limnology will be required.

BIOL 580 Limnology Lab. (1 hour) Both chemical and biological monitoring of aquatic systems will be explored. Hack kits, conductivity meters, oxygen probes, BOD's, COD's and map surveys will be utilized.

BIO 587 Independent Study. (2 for M.S. students) Prerequisite: Graduate standing in biology. Students will elect a specific topic that is not covered in other biology courses. The student, working independently, will be required to submit a research paper that includes an exhaustive review of literature.

BIO 589 Graduate Seminar. (1 for M.S. students) A course designed for survey of biological literature.

The student will be required to prepare and present reports and assigned projects. Required of all students.

BIO 590 Reproductive Physiology. (3 Hours) Prerequisites: Bio 115, CHEM 142, 242. Some prerequisites may be waived with approval of instructor. An advanced assessment of the physiology metabolism and histology of the reproductive system. The etiology of abnormal functions will be presented.

BIOL 590 Reproductive Physiology Laboratory. (1 Hour) Prerequisites: Bio 112, 218, CHEM 142, 242. Must be taken concurrently with Bio 590 or with consent of instructor. Experimental analyses of the mammalian reproductive system. Emphasis is placed on basic methodologies employed in anatomical and physiological studies of the reproductive system.

BIO 591 Advanced Developmental Biology. (3 Hours) Prerequisites: Bio 112, CHEM 242. Current experimental findings in the field of developmental biology will be presented. Theories on the mechanisms regulating differentiation and abnormal growth pattern will be discussed.

BIOL 591 Advanced Developmental Biology Laboratory. (1 Hour) Advanced laboratory techniques in the field of developmental biology will be presented and analyzed.

BIO 599 Thesis Research, (required for M.S. students) (6 Hours) Thesis representing original research.

BIO 600 Graduate Seminar Advanced topics investigated are presented by students. The student will be required to prepare and present reports and assigned projects. Required of all students.

BIO 601 Environmental Science Seminar Advanced topics of special interest, current research, field trips, demonstrations, and guest lectures in the areas of environmental science, limnology, ecology, water and air pollution, populations, solar energy, earth resources, and others.

BIO 602 Environmental Science Special Problems (4 hours) Each student will select an aspect of the environment beyond the limits of the campus. The student will define the problem, analyze it, and report on his findings and possible solutions. This problem will sometimes include on the job training with an environmental agency.

BIO 609 Advanced Genetics. (4 Hours) Prerequisite: Bio 509. Provides detailed considerations of genetic analysis, quantitative inheritance, chromosomal engineering and some concepts in genetics.

BIO 610 Environmental Microbiology (3 hours) The study of the roles of microorganisms in natural systems with attention given to the examination of nutrient cycles, methods of analysis of microbial biomass and activities as well as the functional roles of microorganisms.

BIOL 610 Environmental Microbiology Lab. (1 hour) Laboratory is designed to acquaint students with modern techniques for measuring microbial biomass and microbial degradative activities of natural and xenobiotic chemicals in natural environments. Specific projects of microbial analysis will be assigned to students.

BIO 615 Principles of Bioremediation (3 Hours)

This course uses modern knowledge in life sciences, as well as new developments in biotechnology to address important issues related to environmental clean-up of hazardous wastes. The nature of environmental pollution is reviewed, and basic concepts in molecular biology, biochemistry, and microbiology and plant physiology are applied to demonstrate the significance of bioremediation and phytoremediation in pollution control. Therefore, an emphasis is put on the use of biological methods and processes for the remediation of contaminated soils and water resources.

BIOL 615 Principles of Bioremediation (1 Hour)

Laboratory and field experiments conducted to familiarize students and methodologies. Identification and classification of microorganisms, use of bacteria in toxicity assessment, biodegradation of organic contaminants, and phytoremediation of toxic metals are discussed.

BIO 617 / BIOL 617 Introduction to Remote Sensing for Environmental Science. (4 hours)

Prerequisites: Phy 201, 202, Math 111, 115, 231. This course introduces the theory and techniques of remote sensing and their application to environmental analysis. Topics include the concepts of remote sensing; characteristics of spectromagnetic waves; types of remotely sensed data; sensor types; the theory of photogrammetric techniques; digital image analysis for acquisition of geographical information. Several lab activities involve: learning of basics of ERDAS Imagine; data acquisition through internet search for satellite images; importing datasets, band characteristics & visual presentation.

BIO 618 Application of Remote Sensing in Environmental Science. (3 hours)

Prerequisite: Bio 617) This course covers the quantitative and applied aspects and analysis of remotely sensed digital data. This course is designed to provide an understanding of digital image processing, analysis, and interpretation techniques. Topics include digital data visualization; geometric, radiometric, and atmospheric correction; image enhancement and manipulation; information extraction; digital change detection; integration of GIS and remotely sensed data, and spatial modeling. Laboratory exercises are in-depth applications of the exercise topics that were covered in Bio 617 as well as thematic information extraction and change detection.

BIO 620 Independent Study Students will elect a specific topic that is not covered in other biology courses. The student, working independently, will be required to submit a research paper that includes an exhaustive review of literature.

BIO 621 Advanced Plant Morphology. (4 Hours)

Prerequisite: Bio 521. Analysis and morphology of vascular plants ranging from pteridophyta through angiosperms with phylogenetic considerations.

BIO 650 Analysis of Hormone Action. (3 Hours)

Prerequisite: Graduate status and consent of the instructor. An analysis of the cellular mechanisms of hormone action. The role of target tissues, receptors,

hormone analogs and, metabolic inhibitors in studies of hormone action will be discussed.

**These courses (or close equivalents) also may be taken during summers at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi; Dauphin Island Sea Laboratory, Alabama, or other coastal teaching/research laboratory for credit at JSU subject to approval on individual basis by JSU administration and coastal laboratory administrators.*

Program Mission

To produce highly skilled environmental scholars who in turn will provide for policy makers and the general public, scientific and factual information derived from laboratory and field applied research encompassing basic sciences, engineering and technology. As such, it is related to the assessment of water contamination, food contamination, air pollution, global warming, toxic and hazardous substances releases and associated environmental issues; and the development of cost-effective methodologies and strategies to protect the environment and human health.

Program Objectives

1. To provide graduate students with essential knowledge, skills and aptitudes needed for successful careers in environmental science related jobs at various institutions including government agencies, academia and the environmental industry.
2. To protect the environment and human health by educating and training students on the interactions between the various components/ systems of the environment, the complex and fragile nature of the environment, and how to sustain ecosystem integrity and protect human health.
3. To establish applied environmental science research initiatives that will lead to an authoritative base of knowledge concerning the State of Mississippi's environment and natural resources; by assessing and understanding the mechanisms by which physical, chemical, and biological agents generated by nature may cause alterations of ecosystem integrity, disability and diseases in man and other life forms.
4. To develop and understand cost-effective methodologies and means whereby the impact of various environmental pollutants may be prevented and/or controlled, and to integrate

important knowledge and technologies in the physical, chemical, biological and social sciences needed to set policies and guidelines for appropriate utilization and management of vital resources.

5. To render services to the community through outreach programs, technology transfer for the protection of natural resources and the development of the economy, and communication to convey environmental science education to the public.

Admission Requirements

Admission to the doctoral program in Environmental Science is open to persons holding the master's degree in science, technology, engineering, or agriculture; demonstrated satisfactory performance on the Graduate Record Examination (GRE), and the Test of English as Foreign Language (TOEFL) for international students; and acceptable academic records.

All students seeking admission to this Ph.D. Program must meet the following criteria:

1. A Master's degree in natural sciences or related sciences from an accredited university. *An applicant with a Bachelor's degree only may be admitted when that student shows exceptional potential as determined by a GPA of 3.5 or better, a satisfactory GRE, and extraordinary work experience,*
2. A completed program application submitted to the Graduate School,
3. An official score on the Graduate Record Examination (GRE),
4. An overall GPA of 3.25 or above (on a 4.0 scale) on the highest earned degree,
5. Transcripts for all post secondary and graduate work attempted prior to a program application,
6. Recommendations from three major graduate professors knowledgeable of the applicant's professional academic ability, job experiences, and leadership and research potential,
7. Acceptable evidence of a student's writing ability as determined by a writing sample,
8. A satisfactory TOEFL score for international students,
9. A successful interview with the program screening committee, and,
10. Recommendation for admission by the program screening committee.

All applications received are reviewed by a standing Environmental Science Doctoral Advisory Committee which recommends acceptance or denial of admission to the Graduate School. The Graduate School officially informs the prospective student of its decision for the University.

Transfer Credits

A maximum number of nine credit hours can be transferred into the Program. Courses for which transfer credits are sought must be at least 700-Level; must have been completed with a grade of B or better; and must be approved by the student's Advisory Committee, the Environmental Science Advisory Committee, the Dean of the School of Science and Technology, and the Dean of the Division of Graduate Studies. Credit for thesis or dissertation research as well as "internship" course work in any form is not transferable.

Time Limit

No student will be granted a doctoral degree unless all requirements are completed within a period of ten (10) consecutive calendar years from the time of admission to the program.

Financial Aid

Graduate research and teaching assistantships are available on a competitive basis to highly qualified students.

Residence

Students are required to spend one academic year in resident study on the campus. One academic year may include two adjacent regular semesters or one regular semester and one adjacent summer session. To satisfy the continuous residence requirement, the student must complete a minimum of eighteen (18) hours for the required period.

Candidacy Requirements

To be admitted to candidacy for the doctoral degree, a student must have:

1. Completed the formal coursework with a GPA of 3.0 or better.
2. Passed the Comprehensive Examination.
3. Filed with the Dean of the Graduate School, the dissertation proposal approved by the student's Advisory Committee, the Program Director and the Academic College Dean.

Degree Requirements

The program requires approximately two years of course work (40 semester hours) and a minimum of twenty (20) semester hours of dissertation research credit beyond the MS degree. The exact program of study will be determined by the student's graduate committee. Additional requirements include:

1. Satisfactory performance on the Comprehensive Examination administered after the student has completed all course work; and,
2. Successful defense of the dissertation research. The final basis for granting the degree shall be the candidate's grasp of the subject matter in a specialized area of environmental science, and a demonstrated ability to express thoughts clearly and forcefully in both oral and written languages.

Required Courses

Course	Title	Semester Hours
ENV 700	Environmental Systems	3
ENV 701	Environmental Chemistry	4
ENV 702	Environmental Health	3
ENV 711	Applied Environmental Biostatistics	3
ENV 751	Water Quality Management	3
ENV 755	Air Quality Management	3
ENV 800	Environmental Toxicology	4
ENV 801	Risk Assessment and Management	3
ENV 900	Environmental Science Seminar	2
ENV 999	Dissertation Research	20
<i>Total Hours</i>		48

In addition to the required courses shown above, the student must complete a minimum of 12 semester hours selected from the elective courses listed below. Other electives in biological sciences, physical sciences, engineering, technology, and public policy will be added as developed.

Elective Courses

Course	Title	Semester Hours
CSC 700	Computer modeling	3
CSC 800	Image Interpretation	3
MATH 700	Statistics and Experimental Design	3
MET 800	Environmental Meteorology	3
ENV 715	Principles of Bioremediation	4
ENV 717	Introduction to Remote Sensing	
	For Environmental Science	3
ENV 718	Application of Remote Sensing	
	In Environmental Science	3
ENV 721	Solid Waste Management	3
ENV 780	Environmental Epidemiology	3
ENV 802	Environmental Physiology	4
ENV 803	Wetland Ecology	4
ENV 830	Environmental Microbiology	4

The minimum total semester hours required for the doctoral degree is 60.

DESCRIPTION OF COURSES

ENV 700 Environmental Systems. (3 hours). A groundwork of environmental science, environmental awareness and ecological literacy for the incoming Ph.D. students is presented. The environment and its living and non living components, and the interactions of these component areas studied. The course is set in a thermodynamic perspective and is based on a nested hierarchy of systems. Key concepts and principles that govern how we think the environment works are presented while learning how to apply these concepts to possible solutions of various environmental degradation, pollution and resource problems.

ENV 701 Environmental Chemistry. (3 hours). Prerequisites: One year of general Chemistry and one year of organic chemistry. Studies of the basic concepts of environmental chemistry; the nature of chemical compounds; organic and inorganic; chemical reactions; their effects, and fate of chemical species, in

aquatic systems. This include: Studies of equilibrium phenomena of acids, bases, salts, complex compounds, and oxidation/reduction reactions. Studies of water pollution, environmental chemistry of water and its properties.

ENVL 701 Environmental Chemistry (1 hour). Experiments done for the purpose of water quality control and assessment, such as the determination of alkalinity, acidity, water hardness, biochemical oxygen demand (BOD), and other important parameters. The laboratory is coordinated to go with the lecture material.

ENV 702 Environmental Health. (3 hours). This course focuses on the impact of environmental problems on human health. Health issues related to water pollution/contamination by physical, chemical and biological agents; wastewater discharges; radiations; air pollution; municipal, and industrial wastes; food contamination; pesticides; occupational hazards; and vector-borne diseases are discussed.

ENV 711 Applied Environmental Biostatistics. (3 hours) Prerequisite: Biostatistics (Bio 511) or equivalent. This course is designed as an applied, advanced biostatistics course for students in the Environmental Science Ph.D. Program. Students will learn how to apply important concepts and principles of environmental biostatistics in the conduct of their research, from the initial designing of experiments to proper data collection and analysis, inferences, interpretation of results in applied terms, reporting and presentation of the results. The statistical computer software (SAS) will be used to analyze and interpret results.

ENV 751 Water Quality Management. (3 hours). This course provides students with basic concepts and principles in Water Quality Management. The effects of organic, inorganic, biological and thermal pollutants/contaminants in various systems of the hydrologic cycle including streams, reservoirs, and estuaries; eutrophication; water quality criteria and standards; monitoring concepts; methods in water quality management; regulatory considerations; and non point source pollution control, are discussed.

ENV 755 Air Quality Management. (3 hours). This course provides students with basic concepts and principles of air quality management. Contaminant classification, pollutant sources, criteria pollutants, health effects, exposure and risk assessment are discussed. Pollutant measurements and air quality assessment techniques are considered with regard to atmospheric effects on dispersion and transport. Identification of, and control strategies for, stationary and mobile sources, and environmental regulations are studied, and indoor air quality considered.

ENV 800 Environmental Toxicology. (3 hours). Prerequisites: ENV 701, ENV 702. This course is designed to provide an overview of the basic principles and concepts of toxicology including : exposure characterization, dose-response relationship, kinetics and distribution of toxicants in a biological system; to understand the fate, behavior and toxicities of xenobiotic chemicals, and the mechanisms by

which they affect cells and organs; and to identify the sources and discuss the effects of various groups of environmental toxicants including heavy metals, pesticides and other industrial byproducts.

ENVL 800 Environmental Toxicology Lab. (1 hour). This course is designed to familiarize the students with important laboratory and field procedures and methods used in toxicological testing of environmental toxicants; and to discuss the strengths and weaknesses of major methodologies including acute, subacute, subchronic and chronic bioassays.

ENV 801 Risk Assessment and Management. (3 hours). Prerequisites: ENV 800, MATH 700. This course is designed to provide students with qualitative and quantitative skills necessary to evaluate the probability of injury, disease and death in humans and other life forms, from exposure to various environmental contaminants. Hazard identification, exposure assessment, dose-response evaluation and risk characterization are emphasized. Regulatory and technical aspects of risk assessment in the promulgation of public and environmental safety standards are discussed.

ENV 900 Seminar. (0.5 hr x 4 semesters =2) (Lecture). This course focuses on contemporary issues in environmental health science. The student is expected to review, discuss, and present orally a report on a topic related to contemporary environmental issues. Topic areas for selection include (but not limited to): environmental biology, environmental chemistry, environmental microbiology, environmental toxicology, atmospheric science, water quality management, solid and hazardous waste management, computer modeling and remote sensing. Students are required to attend all scheduled seminars.

ENV 999 Dissertation Research. (20 hours). Original research in one of several subdisciplines in Environmental Science. Credit per academic session allowable is 1-6 hours. Student must produce, present and defend a document of publication quality.

Elective Courses

CSC 700 Computer Modeling. (3 hours). The purpose of this course is to provide the student with the fundamental knowledge of simulation models, writing programs to generate random numbers from various probability distributions using differential methods, and testing the statistical properties of random number generators. The student will also be trained to write simple programs to simulate real life situation models using GPSS language.

CSC 800 Image Interpretation. (3 hours). This course presents a broad overview of various image processing concepts and techniques. Topics include the history of remote sensing, image digitation, data formats, hardware and software functions, commercial and public available digital processing systems, image preprocessing (radiometric and geometric correction), image enhancement, image classification, change detection, interfaces of remote sensing and

geographical information system (GIS), and the future of digital image processing.

MATH 700 Statistics and Experimental Design. (3 hours) Prerequisite: MATH 272, or 2 semesters of Introductory Statistics. Probability; random variables; expectation of a function of random variables; sampling distribution; estimation; hypothesis testing; designed experiments; completely randomized design; randomized complete block design; Latin square design; factorial experiments; statistical software application to statistical analysis, are discussed.

MET 801 Environmental Meteorology. (3 hours). Principles of atmospheric science as applied to gaussian modeling of pollutants. Includes source review and receptor identification and modeling, National Ambient Air Quality Standards and human health and welfare impacts, plume behavior, and access of EPA models, running of EPASCREEN, and web site information. Special topics covered include: scavenging; acid precipitation; weather modification, green house enhancement; stratospheric ozone; scrubbers; and indoor air quality.

ENV 715 Principles of Bioremediation. (3 hours). This course uses modern knowledges in life sciences, as well as new developments in biotechnology to address important issues related to environmental clean-up of hazardous wastes. The nature of environmental pollution is reviewed, and basic concepts in molecular biology, biochemistry, microbiology, and plant physiology are applied to demonstrate the significance of bioremediation and phytoremediation in pollution control. Therefore, an emphasis is put on the use of biological methods and processes for the remediation of contaminated soils and water resources.

ENVL 715 Principles of Bioremediation. (1 hour). Laboratory and field experiments conducted to familiarize students with relevant bioremediation techniques and methodologies. Identification and classification of microorganisms, use of bacteria in toxicity assessment, biodegradation of organic contaminants, and phytoremediation of toxic metals are discussed.

ENV 717 Introduction to Remote Sensing for Environmental Science (3 hours). This course introduces the theory and techniques of remote sensing and their application to environmental analysis. Topics include the concepts of remote sensing; characteristics of spectro-magnetic waves; types of remotely sensed data; sensor types; the theory of photogrammetric techniques; digital image analysis for acquisition of geographical information. Several lab activities involve: learning of basics of ERDAS Imagine; data acquisition through internet search for satellite images; importing datasets, band characteristics and visual presentation.

ENV 718 Application of Remote Sensing in Environmental Science (3 hours). Prerequisite: ENV 717. This course covers the quantitative and applied aspects and analysis of remotely sensed digital data. It is designed to provide an understanding of digital image processing, analysis, and interpretation

techniques. Topics include digital data visualization; geometric, radiometric, and atmospheric correction; image enhancement and manipulation; information extraction; digital change detection; integration of GIS and remotely sensed data, and spatial modeling. Laboratory exercises are in-depth applications of the exercise topics that have been covered in ENV 717, as well as thematic information extraction and change detection.

ENV 721 Solid Waste Management. (3 hours). This course emphasizes on waste control methodologies for both municipal and industrial wastes including hazardous and nonhazardous waste under the Resource Conservation and Recovery Act (RCRA). The students are familiarized with environmental legislation regulating these wastes at state and federal levels. A thorough review is done on waste handling, transport, treatment technologies including chemical, physical, biological and thermal treatments, and disposal options such as land disposal of wastes. Waste minimization techniques such as source reduction and recycling are also discussed.

ENV 780 Environmental Epidemiology. (3 hours) This course is designed to provide students with the basic knowledge and skills required to develop and apply epidemiologic principles and concepts to the study of adverse effects of various environmental factors on both human and ecological health. Emphasis is put on the study of the health effects of physical, chemical and biologic factors in the external environment, broadly conceived from the epidemiologic point of view. As such, it enables students to interpret epidemiological data and understand the approaches used in the epidemiologic investigations of acute and chronic diseases. The course also covers the basic methods and issues involved in epidemiologic investigation of disease conditions in human populations.

ENV 802 Environmental Physiology. (3 hours). This course provides students the basic concepts of homeostasis and adaptation to the environment. Discussions are designed to provide an understanding of the physiological responses to various types of pollutants in the different environmental systems including aerospace, hyperbaric, marine and terrestrial environments. Emphasis is placed on homeostatic responses at cellular, organ and organ system levels to various environmental stresses.

ENVL 802 Environmental Physiology Lab. (1 hour). Laboratory exercises are performed to introduce students to instrumental techniques necessary in the understanding of homeostatic regulatory mechanisms that permit adaptation of organisms to varied and peculiar habitats.

ENV 803 Wetland Ecology. (3 hours). This course is designed to provide scientific knowledge for a better understanding of interactions between biological, physical and chemical components of wetlands. The structure and function of various types of wetlands; their biodiversity, biogeochemistry, and the impact of pollution on their ecological characteristics are discussed. Discussions are also done on how

constructed wetlands can be used as water quality enhancers.

ENVL 803 Wetland Ecology Lab. (1 hour). Emphasis is placed on field works designed to evaluate the physical, chemical and biological characteristics of wetlands.

ENV 830 Environmental Microbiology. (3 hours). The general objective of this course is to study the roles of microorganisms in natural ecosystems. Attention is given to the examination of nutrient cycles, methods of analysis of microbial biomass and activities, and the functional roles of microorganisms. In addition, this course offers in-depth examination of the role of microbial processes related to environmental deterioration, its control and remediation, and ultimately its prevention.

ENVL 830 Environmental Microbiology Lab. (1 hour). Laboratory designed to acquaint students with modern techniques for measuring microbial biomass and microbial degradative activities of natural and xenobiotic chemicals in natural environments. Specific projects of microbial analysis will be assigned to students.

Program Description

The Department of Chemistry and Biochemistry offers both a Doctor of Philosophy (Ph.D.) and a Master of Science (M.S.) degree in Chemistry. The Ph.D. degree in chemistry requires evidences of high quality scientific research leading to peer-reviewed publications with classroom teaching, laboratory supervising, and proposal and manuscript writing experiences. The program covers all modern areas of chemistry including analytical, biochemistry, computational, environmental, inorganic, organic, and physical chemistry and interdisciplinary areas in material, energy, environmental, and biomedical research. The intensive graduate training includes formal lecture courses, hands-on laboratory and theoretical research experiences, teaching experiences, independent proposal development, preparation of manuscripts and preparation of research thesis/dissertation for publication.

Program Mission

The Department of Chemistry and Biochemistry will provide a comprehensive graduate education in all areas of modern chemistry and related fields for a diverse student body aiming for national and international distinction and produce high quality chemists for education institutions, governmental agencies, and industrial and business entities.

Program Objectives

- To provide the best education and career opportunity for students from the underrepresented minority groups with the best cultural and nurturing environment that is conducive to learning and scholarly activities.
- To provide opportunities in which students can develop methods of independent and systematic investigations leading to scientific discoveries.
- To prepare students for a successful career at academic institutions, industrial and business entities, and governmental agencies.
- To promote professional development and growth of the faculty.

Time Limits

For full-time students working toward an **M.S. degree**, the degree requirements should be completed by the end of the second year following the first semester of study. Students beyond their second year of full-time study will be reviewed by their thesis committee for satisfactory progress every semester. A report of unsatisfactory will result in dismissal from the program. Under special circumstances, MS students must graduate in three years in fulltime status. Part time students are considered separately.

For full-time students working toward a **Ph.D. degree**, we recommend that the final defense be completed within five years. Under special circumstances, Ph.D. students must graduate in eight years in fulltime status. Part time students are considered separately. Students beyond their fifth year of full-time study will be reviewed by their dissertation committee for satisfactory progress every semester. A report of unsatisfactory will result in dismissal from the program. The student will be allowed to apply for a Masters degree in this case.

Doctoral Program in Chemistry

Admission Requirements

In addition to the requirements of the Division of Graduate Studies, applicants must have the following:

- ❖ A B.S. degree in chemistry or a closely related field with passing grades 'C' or better for the following courses with labs:
 - 2 semesters of General Chemistry
 - 2 semesters of Organic Chemistry
 - 1 semester of Analytical Chemistry
 - 1 semester of Physical Chemistry
 - 1 semester of Inorganic Chemistry
- ❖ GRE Score*
- ❖ Three Letters of Recommendation
- ❖ A Statement of Purpose for Graduate Study

(* Students who have difficulty taking the GRE can take the Department's entrance exam instead)

Retention Requirements

In addition to satisfying the basic requirements of the Division of Graduate Studies, students are required to maintain a chemistry GPA of 3.00 or higher every semester. Seminar courses, dissertation courses, and other non-chemistry elective courses are excluded from the calculation of the chemistry GPA. Students whose chemistry GPA is below 3.00 will be placed on probation for one semester to fix the deficiencies.

Repeating a Course

If a student receives a grade of "C" or lower in a chemistry core course or a course in the student's major field of study, that course must be retaken and the student must earn a grade of "B" or better.

Degree Candidacy Requirements

After completing the lecture and seminar course requirements, students need to take and pass the comprehensive examination and defend an independent research proposal in order to become an official Ph.D. candidate. The comprehensive examination of 3 subjects must be taken and passed during the second year of study and the written independent research proposal must be prepared and defended during the third year of study and at least one year before graduation.

Graduation Requirements

The minimum number of credit hours for the Ph.D. degree in Chemistry is 60 credit hours.

- ◆ 18 credit hours from graduate Chemistry lecture courses
- ◆ 2 credit hours for Seminars
- ◆ 40 credit hours for Dissertation Research
- ◆ Teach 1-2 semesters of undergraduate courses as a teaching assistant.
- ◆ Pass Area Comprehensive Examination in three subject areas.
- ◆ Write and defend an Independent Research Proposal.
- ◆ Defend the dissertation before the Dissertation Committee and public audience.
- ◆ Submit an approved dissertation to the Division of Graduate Studies with one copy to the Department and one to the University Library

The 18 credit hours of lecture courses must include at least three out of the following five core courses for a total of at least 9 credit hours:

CHEM 723	Advanced Analytical Chemistry
CHEM 731	Advanced Biochemistry
CHEM 736	Physical Organic Chemistry
CHEM 741	Advanced Inorganic Chemistry
CHEM 758	Quantum Chemistry

Students entering the Ph.D Program with a M.S. Degree in Chemistry

Students who earned a M.S. degree from another institution, are allowed to transfer up to three (3) lecture courses or 9 credit hours if these courses are equivalent to the JSU chemistry doctoral courses.

Students who earned a M.S. degree from JSU will be required to take at least two more approved lecture courses instead of the required six lecture courses. Other requirements are the same as for those entering the Ph.D. program with a B.S. degree.

Master's Program in Chemistry

Admission Requirements

In addition to the requirements of the Division of Graduate Studies, applicants must have the following:

1. A B.S. degree in chemistry or a closely related field with passing grade ("C" or better) in the following courses with labs:
 - 2 semesters of General Chemistry
 - 2 semesters of Organic Chemistry
 - 1 semester of Analytical Chemistry
 - 1 semester of Physical Chemistry
 - 1 semester of Inorganic Chemistry
2. Three Letters of Recommendation
3. A Statement of Purpose for Graduate Study

Retention Requirements

In addition to satisfying the basic requirements of the Division of Graduate Studies, students are required to maintain a chemistry GPA of 3.00 or higher every semester. Seminar courses, dissertation courses, and other non-chemistry elective courses are excluded from the calculation of the chemistry GPA. Students whose chemistry GPA is below 3.00 will be placed on probation for one semester to fix the deficiencies.

Degree Requirements

A student pursuing a M.S. degree in Chemistry is required to complete a minimum of 30 hours with a thesis in Chemistry.

1. Within the 18 credit hours of lecture courses, students must complete at least three (3) of five (5) core courses for a total of nine (9) hour and two semesters of seminar for one (1) credit hour. The core courses are:
 - CHEM 523 Advanced Analytical Chemistry
 - CHEM 541 Advanced Inorganic Chemistry
 - CHEM 531 Biochemistry
 - CHEM 558 Quantum Chemistry
 - CHEM 536 Physical Organic Chemistry
2. Students will fulfill the remaining 20 hours from Chemistry electives with no more than 11 hours in CHEM 580-Thesis Research. It is possible to take some courses in related fields upon recommendation of the advisor.
3. Pass the Graduate Area Comprehensive Examination in three chemistry areas.
4. The student must participate as a teaching assistant in the chemistry department for at least one semester.
5. Defend a thesis before the Thesis Committee and public audience.
6. Submit an approved thesis to the Division of Graduate Studies with one copy to the Department and one to the University Library

Non-Thesis Master's Degree

Ph.D. students who fulfill the following requirements will be awarded a Non-Thesis Master's degree in Chemistry if the students apply.

1. A minimum of 36 credit hours, including at least 18 hours of approved graduate level lecture courses and two hours of seminar with a GPA of 3.00 or better. The graduate lecture courses should include at least three of the five core courses: Advanced Analytical Chemistry, Advanced Inorganic Chemistry, Biochemistry, Quantum Chemistry, and Physical Organic Chemistry.
2. Pass the Graduate Area Comprehensive Examination in three areas.
3. Pass an oral defense covering the student's research before a committee of four faculty members.

DESCRIPTION OF COURSES

Master-level Courses

CHEM 511 Chemistry Seminar. (1 Hour) Presentation and discussion of current chemical topics and research by students, faculty and visiting speakers. Prerequisite: Permission of instructor.

CHEM 523 Advanced Analytical Chemistry. (3 Hours) Prerequisites: Courses in Analytical Chemistry and Physical Chemistry. Principles and application of selected analytical methods including electrochemistry, spectroscopy and selected topics of unusual current interest.

CHEM 526 Electroanalytical Chemistry. (3 Hours) Prerequisite: Advanced Analytical Chemistry. Discussion of potentiometric, conductometric, polarographic, amperometric, coulometric, controlled potential and stepping analysis and related techniques. Emphasis is also placed on theoretical considerations and applications to studies of chemical and charge transfer equilibria and kinetics.

CHEM 531, 532 Biochemistry. (3 Hours) Prerequisite: One year of Organic Chemistry. The chemical composition of living matter and the chemical mechanics of life processes.

CHML 531, 532 Biochemistry Laboratory. (1 Hour) Prerequisite: Chemistry 531 and 532. Basic purification and characterization techniques in Biochemistry.

CHEM 536 Physical Organic Chemistry. (3 Hours) Prerequisites: Physical Chemistry and Organic Chemistry. A study of organic molecular structure, Woodward Hoffmann Rules, substituents effects, intra- and intermolecular forces, kinetics and stereochemistry.

CHEM 541 Advanced Inorganic Chemistry. (3 Hours) Prerequisite: An undergraduate course in Physical Chemistry. A study of inorganic compounds with the application of Physical Chemistry principles to thermodynamic, kinetic and structural problems.

CHEM 553 Thermodynamics. (3 Hours) Prerequisite: Physical Chemistry. Principles of thermodynamics and their application to chemical and phase equilibria.

CHEM 558 Quantum Chemistry. (3 Hours)

Prerequisite: Physical Chemistry. Principles and applications of quantum theory.

CHEM 580 Thesis Research. (Variable 1-6 Hours)

Prerequisite: Permission of adviser. Selected topics arranged in consultation with the staff; includes literature, research, and laboratory investigation of a problem.

Doctoral-level Courses

CHEM 711 Seminar (0.5 Hour) Presentation and discussion of current chemical topics and research by visiting speakers, faculty and students.

CHEM 721 Advanced Instrumental Analysis (3 Hours). Prerequisite: Analytical Chemistry and Physical Chemistry (two semesters). Theoretical principles and laboratory techniques involved in characterization of chemical systems using instrumental methods. This one semester course will present the following topics of interest: absorption and emission spectrometry, mass spectrometry, liquid and gas chromatography, and electrophoresis. A laboratory series on spectro-photometry, fluorometry, atomic absorption spectrometry, inductively coupled plasma atomic emission spectrometry, FT-IR, gas chromatography-mass spectroscopy, and high performance liquid chromatography are included in this course.

CHEM 723 Advanced Analytical Chemistry (3 hours) Prerequisite: Analytical Chemistry and Physical Chemistry (two semesters). Principles and application of analytical methods including acid-base titrations, redox titrations, titrations which involve metal-ligand complexes, gravimetric analysis, separation methods (chromatography), and electroanalytical chemistry.

CHEM 726 Electroanalytical Chemistry (4 hours) Prerequisite: Advanced Analytical Chemistry. Principles and application of all modern electrochemical methods such as voltammetrics, chronoamperometry, spectroelectrochemistry, and thin layer electrochemistry etc. Electrode kinetics and mass transfer are discussed in detail.

CHEM 729 Spectroscopic Methods (3 hours) Prerequisite: Analytical Chemistry. Study of the theoretical principles of advanced spectroscopic topics used in analytical chemistry. Some examples of the topics to be covered are: X-ray methods (absorption, fluorescence, diffraction), surface spectroscopy and chemical analysis of surfaces, (Ion Scattering Spectroscopy, ISS), Auger Emission Spectroscopy (AES), electron Spectroscopy for chemical analysis (ESCA), Secondary Ion Mass Spectrometry (SIMS), Electron Spin Spectroscopy (ESR), Nuclear Magnetic Resonance Spectroscopy (NMR).

CHEM 731 Advanced Biochemistry I (3 hours) Prerequisite: Organic Chemistry (two semesters). Comprehensive coverage of major areas of biochemistry. Topics covered include proteins, enzymology, bioenergetics, the chemistry and intermediary metabolism of carbohydrates, lipids, proteins and nucleic acids.

CHEM 732 Advanced Biochemistry II (3 hours)

Prerequisite: Advanced Biochemistry I. Comprehensive coverage of major areas of biochemistry. Topics covered include storage, transmission, and expression of genetic information, molecular immunology, membrane transport and hormone action.

CHML 731 Advanced Biochemistry Laboratory

(1 hour) Corequisite: Advanced Biochemistry I. Selected techniques in areas covered in CHEM 731.

CHML 732 Advanced Biochemistry Laboratory (1 hour)

Corequisite: Advanced Biochemistry II. Selected techniques in areas covered in CHEM 732.

CHEM 733 Advanced Molecular Biology (3 hours)

Molecular mechanisms involved in replication, expression and regulation of prokaryotic genes. Topics include: DNA replication, repair, recombination, restriction-modification, recombinant DNA technology, plasmids and transposons, RNA transcription, processing and message splicing.

CHEM 734 Physical Biochemistry (3 hours)

Characterization of macromolecules, hydrodynamic methods, multiple equilibria, macromolecule-ligand interactions.

CHEM 736 Physical Organic Chemistry (3 hours)

Prerequisite: Organic Chemistry (two semesters). A study of organic molecular structure, Woodward Hoffmann Rules, substituents effects, intra- and intermolecular forces, kinetics and stereochemistry.

CHEM 738 Organic Synthesis (3 hours)

Prerequisite: Organic Chemistry (two semesters). The course covers the formation of carbon-carbon and carbon-heteroatom bonds, functionalization and interconversion of functional groups, reactions of organic reagents, protective groups, total synthesis and asymmetric synthesis in organic synthesis.

CHEM 741 Advanced Inorganic Chemistry (3 hours)

Prerequisite: Inorganic Chemistry II (CHEM 441) or its equivalent. A study of symmetry and group theory, bonding and structures of inorganic compounds, coordination chemistry and acid-base chemistry.

CHEM 743 Structural Inorganic Chemistry (3 hours)

Prerequisite: Any 700 level course. A study included concepts of the solid state as explored by crystallography. It covers symmetry, polyhedra, sphere packing, tetrahedral and octahedral structures of inorganic compounds.

CHEM 747 Inorganic Reaction Mechanisms (3 hours)

Prerequisite: Any 700 level course. The topics include mechanism of reactions of certain inorganic compounds, stereochemical changes in complexes, redox reactions, homogeneous and heterogeneous catalysts.

CHEM 749 Organometallic Chemistry (3 hours)

Prerequisite: Physical Organic Chemistry (CHEM 736) or equivalent. A study of formation, stability, and reactivity of metal-carbon bond of main group and transition metal. It will covers the usage of organometallics in organic synthesis and catalysis.

CHEM 752 Atomic and Molecular Spectroscopy (3 hours)

Prerequisite: Physical Chemistry (two

semesters). A comprehensive course covering concepts and methods of modern atomic and molecular spectroscopy. Subjects covered include electric phenomena, absorption and emission of radiation, atomic spectroscopy, rotational spectroscopy, vibrational spectroscopy, electronic spectroscopy, and magnetic resonance spectroscopy.

CHEM 753 Thermodynamics (3 hours) Prerequisite: Physical Chemistry (two semesters). Laws of thermodynamics and their chemical applications. Introduction to chemical kinetics and statistical mechanics.

CHEM 754 Kinetics (3 hours) Prerequisite: Physical Chemistry (two semesters). Mechanics of chemical reactions, cross sections, and rate constants. Elastic, inelastic, and rearrangement channels are discussed, using quantum and semiclassical techniques.

CHEM 755 Mechanisms of Organic Chemistry (3 hours) Prerequisite: Organic Chemistry (two semesters). A study of mechanistic aspects of organic reactions included the rate theory, and reaction mechanism, experimental methods and treatment of data.

CHEM 758 Quantum Chemistry (3 hours) Prerequisite: Physical Chemistry (two semesters). (Computational Chemistry) Important concepts of quantum chemistry at the intermediate level, including angular momentum, perturbation theory, electronic structure of molecules, and radiation matter interaction. Applications will vary from year to year.

CHEM 763 Statistical Mechanics (3 hours) Prerequisite: Physical Chemistry (two semesters) A study of statistical mechanical ensembles, partition functions and their relationship to thermodynamics, lattice statistics, molecular distribution and correlation functions, the theories of liquids and solutions, phase transitions, and cluster theory.

CHEM 780 Dissertation - (1 - 9 hours)

CHEM 782 Special Topics in Analytical Chemistry - (3 hours) Selected topics not covered in regularly scheduled courses, and current research topics in analytical chemistry.

CHEM 783 Special Topics in Biochemistry. (3 hours) Selected topics not covered in regularly scheduled courses, and current research topics in biochemistry.

CHEM 784 Special Topics in Organic Chemistry. (3 hours) A course in a specific area of organic chemistry such as structure determination in organic chemistry, or current research subject not covered in regularly scheduled courses presented to fit the interests of advanced students.

CHEM 785 Special Topics in Inorganic Chemistry. (3 hours) Topics include subjects of current research in inorganic chemistry, but not covered in regularly scheduled courses.

CHEM 786 Special Topics in Physical Chemistry. (3 hours) Topics vary from year to year will include subjects such as photochemistry, solid state, surface chemistry, and radiation chemistry.

The Department of Mathematics in the School of Science and Technology in cooperation with the School of Education offers a program leading to the Master of Science in Teaching (MST) degrees in Mathematics. This department also offers a Master of Science (MS) degree in pure mathematics for Students who seek careers in college or university teaching, government, industry, business, etc.

Program Objectives

1. To provide quality mathematics training at the master's degree level.
2. To help increase the number of mathematicians qualified to undertake further studies leading to the doctoral degree in the mathematical sciences.
3. To increase the pool of mathematicians seeking to obtain employment in industry, government and academic institutions.

Degree Programs

The M.S. degree is research oriented and a Thesis is required for graduation. The M.S.T. degree, in general, can be completed with only course work, a Thesis or Project is optional. However, all of the programs are designed to meet academic requirements for students who are interested in seeking degrees beyond the master's or specialist's level. The M.S.T. degree would lead to a Class "AA" Teaching Certificate for students who hold the Class "A" Teaching Certificate. Students who do not hold the Class "A" Teaching Certificate but wish to receive the M.S.T. degree with a Class "AA" Teaching Certificate must first complete the requirements for a Class "A" Teaching Certificate. A student can also receive the M.S.T. degree without seeking the Class "AA" Teaching Certificate. The coursework requirement for

this option is the same with those holding the Class "A" Teaching Certificate.

Admissions Requirements

Admission to a graduate program in mathematics requires at least 15 semester hours of undergraduate mathematics above the regular calculus sequence and the fulfillment of the admission requirement into graduate studies at Jackson State University, which is an earned Bachelor's degree with a cumulative GPA of at least 3.0 on the 4.0 scale in all undergraduate courses taken at a regional accredited degree granting institution. GRE is not required for admission into any of the Master's degree programs. However, students who are seeking to pursue the doctoral degree are encouraged to take the GRE exams, general and subject area, to increase their chances for competitive admission and financial assistance. These exams can be taken while students are taking courses or after they have completed all coursework.

Transfer of Credits

A course for which transfer credit is sought must have been completed with a grade of "B" or better. Departmental approval is required.

Time Limit

Students with adequate mathematics preparation at the undergraduate level will normally take two years to complete any of the Master's degree programs. However, all students must complete their programs within eight years of starting coursework at Jackson State University or elsewhere.

Master of Science in Mathematics

The department offers programs leading to the M.S. degree in Pure or Applied Mathematics for students who plan on pursuing the doctoral degree or wish to seek careers in college or university teaching, government, industry and the business sector. The programs are designed for persons with adequate background in undergraduate mathematics beyond the calculus sequence.

To receive the M.S. degree a student must be in residence at Jackson State University for at least one semester, complete all degree requirements and must take and pass the Graduate English Competency Exam. If a student's GPA upon completion of all coursework is below 3.33, then such a student is required to take and score at least 70% on a comprehensive exit exam given by the Department.

The requirements for the M.S. degree are:

1. Thirty six (36) hours are required with a thesis, i.e. ten (10) courses plus six (6) hours for a thesis.
2. A "B" average with no more than one "C" grade is required for graduation.

Required Courses		Semester
Course	Title	Hours
Math 513	Modern Linear Algebra I	3
Math 511	Modern Algebra I	3
Math 531	Real Analysis I	3
Math 541	Complex Analysis I	3
Math 551	Introduction to General Topology I	3
Math 561	Probability and Statistics I	3
Math 599	Thesis	6
<i>Total Hours</i>		24

The student will fulfill the remaining 12 hours from mathematics electives drawn from a list of pure or applied mathematics courses to match his/her area of concentration. Courses are offered each semester to match each enrolled student's interest. In consultation with an advisor and the Chairperson of the Department, a student must develop a study plan and select sufficient electives from departmental courses to complete degree requirements with a concentration in either pure or applied mathematics. See the list of departmental courses below. A typical study plan for a student with a concentration in applied mathematics who is seeking to pursue a doctoral degree would look like this:

Coursework for Year One

Fall Semester

Math 511 - Modern Algebra I
Math 513 - Modern Linear Algebra I
Math 531 - Real Analysis I

Spring Semester

Math 577- Ordinary Differential Equations with Applications
Math 579- Partial Differential Equations with Applications Math
Math 541 - Complex Analysis I

Summer Sessions

Math 599-Thesis

Coursework for Year Two

Fall Semester

Math 551 - Introduction to General Topology I
Math 542 - Complex Analysis II
Math 532 - Real Analysis II
Math 580 - Partial Differential Equations II or
Math 599 -Thesis

Extra Coursework and Thesis Defense

Spring Semester

Math 537 - Introduction to Functional Analysis
Math 547- Integral Equations
Take the GRE both General and Subject area tests
Math 599-Thesis

Master of Science in the Teaching Mathematics and Science Education

The Mathematics and Science Education degree is a master-level degree offered within the College of Science, Engineering, and Technology under the direction of the Department of Mathematics and in

cooperation with the College of Education and Human Development. There are three areas of concentration under the MST. A student can take coursework with concentrations in biology, mathematics or earth sciences. The concentration in mathematics is designed for persons with an adequate background in mathematics and who wish additional preparation for mathematics teaching or mathematics supervision. Degree requirements facilitate obtaining certification via an alternate route and is described in greater detail below, based on certification requirements of the State of Mississippi as stated in Bulletin 130, and upon the state principles and guidelines of the National Council of Teachers of Mathematics, the Mathematics Association of America, and the Mississippi Council of Teachers of Mathematics.

The requirements for the M.S.T. degree with a concentration in mathematics are:

The Mathematics and Science and Education degree offers concentrations in one of three areas: biology, mathematics or earth science. Coursework specific to biology and earth science are found within their respective department degree program requirements.

1. Thirty six (36) hours are required with a thesis, i.e. ten (10) courses plus six (6) hours for a thesis.
2. Thirty six (36) hours are required with a project, i.e. eleven (11) courses plus three (3) hours for a project.
3. Thirty six (36) hours are required if neither a thesis nor a project is done.
4. A "B" average with no more than one "C" grade is required for graduation, if a student has two "C" grades, then the student must earn an "A" grade in an additional course.
5. A maximum of eighteen (18) hours can be counted from education classes.

Core Educational Courses	Title	Semester Hours
EDFL 511	History and Philosophy of Education (R)	3
EDFL 515	Methods of Educational Research (R)	3
EDFL 514	Elementary Statistics (R*)	3
EDFL 568	Curriculum Methods (R*)	3
	<i>Total Hours</i>	12

(R) - Required

(R*) - Required for students without an undergraduate Statistics course and it is a prerequisite for EDFL 515.

Required Mathematics Courses	Title	Semester Hours
Math 501	Topics in Geometry	3
Math 506	Basic Concepts for Teachers I	3
Math 510	Topics and Issues in Mathematics	3
Math 513	Linear Algebra I	3
Math 511	Abstract Algebra I	3
Math 531	Real Analysis I	3
	<i>Total Hours</i>	18

Any substitute for the above courses must seek the Department of Mathematics approval.

Students who do not hold the Class "A" Teaching Certificate must also complete the following requirements for certification: Take the PRAXIS I Pre-professional Skills Test (PPST) and make the required cut scores on each of the subtests- reading, writing, and mathematics and successfully complete the PRAXIS 11, mathematics Area Examination. Then complete the following pre-teaching required coursework:

EDFL 581	Principles of Measurement	3
EDFL 556	Special Topics: Classroom Management	3
EDFL 500	Secondary Internship(R*)	6
	<i>Total Hours</i>	12

(R*) - Required and a student must be employed and have a GPA of at least 2.5 for all undergraduate course work.

After successful completion of the pre-teaching required coursework, the PRAXIS I and PRAXIS 11, the Mississippi Department of Education Office of Teacher Licensure will issue the applicant upon receipt of PRAXIS test scores, a transcript, a completed application, and institutional recommendation a license that is valid for 5 years.

Requirements for Option Choices

- Option 1: Math 590 Thesis 6
 Option 2: Math 584 Independent Study (Project) 3
 plus 3 hour course selected from List I,
 or
 Option 3: Six hours selected from List I
 and three hours selected from List II or List III.

Total number of hours for students with Class "A" Teaching Certificate: 36

Total number of hours for students without the Class "A" Teaching Certificate: 48

A student may concentrate in Applied Mathematics by taking the four (4) elective courses from: Math 514, 537, 541, 542, 561, 562, 565, 566, 577, 579, 580, 581, 582, CSC 511, 512, 515, 518, 531 and 561 or Foundation of Mathematics by taking from: Math 503, 512, 535, 541, 542, CSC 511, 512, 515, 518, 531 and 561.

List I

1. Math 503 Foundations of Mathematics I
2. Math 504 Foundations of Mathematics II
3. Math 512 Modern Algebra II
4. Math 514 Modern Linear Algebra II
5. Math 532 Real Analysis II
6. Math 541 Complex Analysis I
7. Math 542 Complex Analysis II
8. Math 561 Probability and Statistics I
9. Math 562 Probability and Statistics II

10. Math 551 Introduction to General Topology I
11. Math 552 Introduction to General Topology II
12. Math 581 Number Theory I
13. Math 582 Number Theory II

List II

14. Math 505 Mathematics for Secondary Teachers
15. Math 506 Mathematics Concepts for Teachers I
16. Math 507 Mathematics Concepts for Teachers II
17. Math 509 Mathematical Structures
18. Math 519 Topics in Mathematics Education I
19. Math 520 Topics in Mathematics Education II

List III

20. CSC 511 Computers and Programming
21. CSC 512 Introduction to Computer Systems and Organization
22. CSC 515 Data Structures and File Management
23. CSC 518 Principles of Operating Systems
24. CSC 531 Computer Simulation Methods and Models
25. CSC 561 Probability and Statistical Inference I

Master's Degree in any of the Education Areas with a Concentration in Mathematics Requirements

Students in any of the Master's Degree Programs in the College of Education and Human Development who wish to seek a concentration in Mathematics must meet the following requirements:

1. Satisfaction of the admission requirement in the mathematics graduate programs of three advanced mathematics courses beyond the calculus sequence, or completion of an undergraduate degree program at a regionally accredited institution in Elementary or Secondary Education with a concentration in mathematics.
2. Meet the 18 credit hours requirement in Mathematics as follows:
3. 9 credit hours must be taken from the following courses with a cumulative average of at least a "B":
Math 513 -Linear Algebra I, Math 511 - Abstract Algebra I, Math 531 - Real Analysis I or Math 541 -Complex Analysis I.
4. The remaining 9 hours can be taken in any combination of the graduate level mathematics education courses and the general mathematics courses.

DESCRIPTION OF COURSES

Mathematics Courses for Education Majors

MATH 501 Topics in Geometry. (3 Hours)
Prerequisite: Approval of department. A survey of geometries and their structures. Emphasis is on both synthetic and analytic methods.

MATH 502 Topics in Algebra. (3 Hours)
Prerequisite: Approval of department. An amalgamation of classical and modern theory, stressing the synthesis of ideas in areas from equation solvability, special algebraic forms (permutations, combinations, arrangements, binomial and multinomial theorems, partial fractions, progressions, groups, rings, domains of integrity, and ideas of interest).

MATH 503-504 Foundations of Mathematics I-II (3-3 Hours): The fundamental elements of set theory and finite mathematical structures; cardinals and ordinals; logical deduction, elements of probability; vectors and matrices, linear programming, theory of games and applications.

MATH 505 Mathematics for Secondary Teachers (3 Hours): Prerequisite: Approval of department. The basis of the content, philosophy and methodology employed in the teaching of secondary school mathematics is of prime interest here.

MATH 506-507 Mathematics Concepts for Teachers I-II (3-3 Hours): Prerequisite: Approval of department. Higher mathematics for teachers, reviewing the fundamental areas of algebra, geometry and analysis, with stress on rigor and validity of ideas.

MATH 510 Topics and Issues in Mathematics (3 Hours): This course is designed for in-service teachers who are interested in the renewal of teaching licenses and the pursuit of graduate studies in the teaching of mathematics. Emphasis is on individualized research dealing with the stages of development of mathematics, new trends in the teaching of mathematics, and the exploration of teaching theories resulting from the work of experimental psychologists such as Piaget, Aushel and Bruner. Because of the individualized nature of the course, students with diverse backgrounds in mathematics can be accommodated.

Courses for all Graduate Mathematics Majors

MATH 511-512 Modern Algebra I-II (3-3 Hours)
Groups, (homomorphisms), rings, integral domains, modules and fields, elementary linear algebra, number theory.

MATH 513-514 Modern Linear Algebra I-II (3-3 Hours)
Vector spaces, matrices, linear transformations, determinants and linear equations. Selected topics on eigenvalues, canonical forms, inner products, inner product spaces, bilinear and quadratic forms.

MATH 515-516 Advanced Modern Algebra III-IV (3-3 Hours)
Prerequisite: Mathematics 512. Special topics in groups, rings and fields, factorization theory, extensions of rings and fields, modules, elementary theory of fields.

MATH 521-522 Modern Geometry I-II (3-3 Hours): Prerequisite: Mathematics 511, concurrent enrollment or approval of department. Historical development; sets and projective planes and geometries; vectors, transformations, axiomatic affine, projective and plane geometry.

MATH 523-524 Modern Geometry III-IV (3-3 Hours) Prerequisite: Mathematics 523 or approval of department. Motions and transformations, projective and topological transformations, projective plane, analytic projective geometry; absolute, ordered, affine and hyperbolic geometries; elementary differential geometry, topology of surfaces.

MATH 525-526 Introduction to Differential Geometry I-II (3-3 Hours): Prerequisite: Mathematics 523 or approval of department. Curves and surfaces in three dimensions by classical methods, introduction to corresponding problems in n -dimensions involving tensor methods.

MATH 527-528 Projective Geometry I-II. (3-3 Hours) Prerequisite: Mathematics 512 or approval of department. The projective plane, polarities and conic sections, affine geometry, projective metrics, non-Euclidean Geometry, spatial geometry.

MATH 529-530 Systems Analysis I-II. (3-3 Hours) Prerequisite: Approval of department. An analysis of the numerical and abstract systems of mensuration. Stress is placed on the metric and English systems, conversion analysis and other systems of interest.

MATH 531-532 Real Analysis I-II. (3-3 Hours) Prerequisite: Math 511 or approval of department. Metric spaces, regulated functions and integrals; integrals of Riemann and Lebesgue; trigonometrical and Fourier series; differentiation and Stieltjes Integrals.

MATH 533-534 Advanced Analysis I-II. (3-3 Hours) Prerequisite: Mathematics 532 or approval of department. Further treatment of limits, continuity, differentiability and integrability of functions of one and more variables. Infinite series and products, power and trigonometric series; selected topics.

MATH 535-536 Introduction to Measure and Integration I-II. (3-3 Hours) Prerequisite: Mathematics 531 or approval of department. Lebesgue measure of linear sets, measurable functions, definite integral, convergence, integration and differentiation, spaces of functions, orthogonal expansions, multiple integrals and the Stieltjes Integral.

MATH 537-538 Introduction to Functional Analysis I-II. (3-3 Hours) Prerequisites: Mathematics 512, 531, or approval of department. Fundamentals of the theory of vector spaces; Banach spaces; Hilbert spaces. Linear functionals and operators in such spaces; spectral resolution of operators, applications.

MATH 539-540 Introduction to Infinite Series I-II. (3-3 Hours) Prerequisites: Mathematics 511 and approval of department. Complex numbers, sets and functions; limits and continuity; analytic functions of a complex variable, elementary functions; integration; power and Laurent series, calculus of residues, conformal representation, special topics.

MATH 541-542 Complex Analysis I-II. (3-3 Hours) Complex numbers, sets and functions; limits and continuity; analytic functions of a complex variable, elementary functions; integration; power and Laurent series, calculus of residues, conformal representation, special topics.

MATH 544 Introduction to Entire Functions. (3 Hours) Prerequisite: Mathematics 541. Entire functions, maximum absolute value and order, zeroes of entire functions, fundamental theorem of algebra, Picard's Little Theorem, algebraic relationships and addition theorem; special theorems and functions.

MATH 545 Laplace Transforms. (3 Hours) Prerequisites: Math 534 and approval of department. The Stieltjes Integral; fundamental formulae; moment problem, Tauberian theorems, bilateral Laplace Transform, inversion and representation problems, the Stieltjes Transform.

MATH 546 Special Functions. (3 Hours) Prerequisites: Math 535 and approval of department. Infinite products, Gamma and Beta functions, series, polynomials, functions, relations and sets of analysis and differential equations.

MATH 547-548 Integral Equations I-II. (3-3 Hours) Prerequisites: Math 534, 542, and approval of department. Theory of Fredholm and Volterra equations; Hilbert-Schmidt theory; singular integral equations and some applications.

MATH 549-550 Methods In Applied Mathematics I-II. (3-3 Hours) Prerequisite: Approval of department. Elements of linear algebra; applications to systems of linear variables; function spaces; tensor analysis, applications to geometry, electromagnetic theory, Lagrangian and Hamiltonian formulations of mechanics; other topics of interest.

MATH 551-552 Introduction to General Topology I-II. (3-3 Hours) Prerequisites: Mathematics 223 and approval of department. Elementary set theory, ordinals and cardinals; topological spaces; cartesian products; connectedness; special topologies; separation axioms; covering axioms, metric spaces; convergence; compactness; function spaces; spaces of continuous functions and complete spaces; homotopy; maps into spheres; topology of E_n ; homotopy type; introduction to algebraic topological ideas.

MATH 553-554 Introductory Algebraic Topology I-II. (3-3 Hours) Prerequisites: Mathematics 552 and approval of department. Complexes, simplicial, singular and Čech Homology Theory. Homotopy groups and basic theorems of algebraic topology.

MATH 555-556 Introduction to Combinatorial Topology I-II. (3-3 Hours) Prerequisites: Mathematics 553 and approval of department. Properties of topological spaces; Jordan's theorem, surfaces, complexes, coverings, dimension; the Betti Groups, homology theory, manifolds, the duality theorems, cohomology groups of compacta, introduction to theory of continuous mappings of polyhedra.

MATH 557-558 Introduction to Algebraic Geometry I-II. (3-3 Hours) Prerequisites: Mathematics 512, 521, or approval of the department. Algebraic preliminaries, local rings valuation theory, power series, rings, geometry of algebraic varieties with emphasis on curves and surfaces.

MATH 559-560 Linear Programming I-II. (3-3 Hours) Basic Concepts, graph theory, theory of games, Markov Chains, Leontief Economic Models,

Optimizing linear functions of variables subject to constraints, a geometric approach, simplex method, convex sets duality, applications.

MATH 561-562 Probability and Statistics I-II. (3-3 Hours) Prerequisite: Mathematics 532 or approval of department. Basic concepts of measure theory and integration axiomatic foundations of probability theory, distribution functions and characteristics functions, central limit problem, modern statistical inference, analysis, variance, decision functions.

MATH 563-573 Design I-II. (3-3 Hours) Prerequisite: Mathematics 272. Experimental Design: Completely randomize design; randomize block designs, factorial experiments split plot design. confounding.

MATH 564 Linear Models. (3 Hours) Prerequisite: Mathematics 562 or departmental approval. Linear statistical models, some noise-reducing experimental designs, an example-of a volume-increasing design, fitting the general linear model, inference making, multi parameter hypothesis: the analysis of variance, the effect of coding on the analysis, seeking a maximum or minimum response, fractional factorial experiments and incomplete block designs, an example of a completely random model, mixed models.

MATH 565 Multivariate Analysis. (3 Hours) Prerequisites: Mathematics 562 and approval of department. General linear hypothesis; least square estimation; confidence regions, multiple comparison; analysis of complete layouts; effects of departures from underlying assumptions. Analysis of covariance.

MATH 566-566W Operations Research. (3-3 Hours) Prerequisite: Math 232, 355. Linear programming, network analysis, PERT-CPM, dynamic programming, queuing theory and decision analysis.

MATH 567-568 Nonparametric Statistics I-II. (3-3 Hours) Prerequisites: Mathematics 562 and approval of department. Problems of estimating testing hypotheses when the functional form of the underlying distribution is unknown. Robust methods; sign test, rank test and confidence procedures based on these tests; tests based on permutations of observations. Non-parametric tolerance limits; large sample properties of the tests, multi sample problems; ranking methods in analysis of variance; Bivariate and multivariate procedures, efficiency comparisons.

MATH 569-570 Functions of Several Real Variables I-II. (3-3 Hours) Prerequisites: Mathematics 533 and approval of department. Euclidean spaces, Mapping and differentials, manifolds, differential forms, vector analysis.

MATH 571-572 Numerical Analysis I-II. (3-3 Hours) Prerequisite: Approval of department. Introduction to Matlab, approximate differentiation, local truncation error and order, Euler's method, Runge-Kutta methods, embedded Runge-Kutta methods, stiff equations and implicit methods, explicit multi-step methods, implicit multi-step methods, shooting method, finite element method, finite difference methods for partial differential equations.

MATH 573 Fractal Geometry. (3 Hours) Prerequisite: Math 511 or departmental approval. Metric spaces, equivalent spaces, classification of subsets, and the Space of Fractals. Transformations on metric spaces, contraction mappings, and the Construction of Fractals. Chaotic Dynamics of Fractals, Fractal Dimension. Fractal Interpolation. Julia Sets. Parameter Spaces and Mandelbort Sets. Measures on Fractals.

MATH 574 Numerical Linear Algebra. (3 Hours) Prerequisite: Approval of department. Elementary numerical analysis; matrix algebra; elimination and compact elimination methods; orthogonalization methods; condition, accuracy, and precision; comparison of methods; iterative and gradient methods; iterative and transformation methods for latent roots and vectors; error analysis for latent roots and vectors.

MATH 575-576 Approximation and Interpolation I-II. (3-3 Hours) Prerequisite: Approval of department. Interpolation, remainder theory; convergence theorems; infinite interpolation; uniform approximation; best approximation; least squares approximation; Hilbert space; orthogonal polynomials; closure and completeness.

MATH 577-578 Ordinary Differential Equation I-II. (3-3 Hours) Ordinary differential equations: basic theorems of existence, uniqueness, and continuous dependence of the solutions; linear differential equations and systems; stability theory; topology of integral curves; differential equations in the complex domain, asymptotic integration; boundary value problems. Partial differential equations; equations of first order method of characteristics, Hamilton-Jacobi theory; equations of second order-classification according to type; elliptic equations-potential equation, maximum principle, characteristics, and other topics of interest.

MATH 579-580 Partial Differential Equations I-II. (3-3 Hours) Prerequisite: Mathematics 577 or departmental approval. Linear equations with constant coefficients in two independent variables, applications, eigenfunction expansions, homogeneous and nonhomogeneous equations. Fourier series, existence, solution uniqueness and representation, Initial boundary value problems, Laplace's equation, and special topics.

MATH 581-582 Number Theory I-II. (3-3 Hours) Prerequisites: Approval of department. Diophantine analysis, primes, residue classes, theorems of Euler, Fermat, and Wilson, Continued Fractions, Chinese Remainder Theorem, quadratic reciprocity, valuations, extensions of valuations, local and global fields, discriminant.

MATH 583 Advanced Number Theory. (3 Hours) Prerequisite: Mathematics 581 or departmental approval. Quadratic and Cyclotomic extensions, elementary class field theory, and selected topics.

MATH 584 Independent Study. (3 Hours) Prerequisite: Departmental consent. Intensive study and research of a subject selected in accordance with student needs and arranged in consultation with the

staff. Topics will vary. Student will make periodic reports on his/her reading and will-prepare a scholarly paper on a problem.

MATH 588-589 Sampling Methods I-II. (3-3 Hours)
Prerequisite: Mathematics 272. Sampling methods: Simple random sampling, sampling for proportions and percentages, estimation of sample size, stratified random sampling ratio estimates.

MATH 590 Thesis. (3 Hours) The candidate for the Master of Science in Teaching degree must present a Thesis embodying the results of the research. The candidate chooses the problem, but approval by the adviser is required.

MATH 599 Thesis. (3 Hours) The candidate for the Master's degree must present a Thesis embodying the results of the research. The candidate chooses the problem, but approval by the adviser is required.

DEPARTMENT OF PHYSICS, ATMOSPHERIC SCIENCES AND GEOSCIENCE

Dr. Wilbur Walters, Jr.,

Associate Professor and Interim Chair

P. O. Box 17660

Telephone: (601) 979-7012

Fax: (601) 979-3630

E-mail: wilbur.walters@jsums.edu

Faculty

Dr. M. Fadavi, Professor

Dr. E. Heydari, Associate Professor

Dr. Q. Williams, Professor

The Department of Physics, Atmospheric Sciences and Geoscience has the major teacher training responsibility in the School of Science and Technology. This program leads to the (MST) degree in Science Education with a concentration in one of the following areas: (Biology, Chemistry, General Science, Physics and Physical Science). The Department also offers for credit graduate science education and science content courses for graduate students of other programs. Several courses are offered for in-service teachers and other educators for professional development. These courses are often used toward certification and further degrees.

Accreditation

This program was accredited by the National Council for Accreditation of Teacher Education (NCATE). Currently the Department is in the process of renewing the accreditation of the program.

Program Objectives

1. To provide additional preparation for science teachers and science supervisors in scientific content and supervision techniques.
2. To enable teachers of science to gain insight into the kinds of science experiences that are relevant to the needs of today's youth.
3. To develop in-science teachers an awareness of the modern trends and problems in science teaching.
4. To enrich current and potential science teachers and educators with content and pedagogy in science and science education areas.
5. To offer courses of use to different non-departmental graduate degree programs.

Admission Requirements

Hold a baccalaureate degree with a major or minor in one of the natural sciences from an accredited college or university. Student maybe admitted conditionally if the Graduate Record Examination (GRE) is not taken.

Degree Requirements

A total of 30 semester hours plus a thesis (6 hours), 33 semester hours plus a project (3 hours), or 36 semester hours with neither a thesis nor project.

By the end of the first year, the student should complete the Graduate English Competency Examination (GECE). Students should take the Graduate Area Comprehensive Examination in all core science courses.

DESCRIPTION OF COURSES

SCI 502 General Science for Teachers. (3 Hours) A study of topics in astronomy, chemistry, geology, meteorology and physics.

SCI 507 Earth Science. (3 Hours) An exploratory course dealing with basic concepts in geology, meteorology, and astronomy.

SCI 507 Earth Science for Teachers Lab. (1 Hour) Laboratory experiments designed to expand subject matter taught in SCI 507.

SCI 508 Cosmology for Non-Scientists. (3 Hours) A study of the structure, makeup origin, and evolution of the universe and objects in it.

SCI 509 Earth History (3 Hours) The course studies history of the continents and oceans and the changes to the atmosphere through time.

SCI 513 Computer Applications in the Teaching of Science. (3 Hours) This course includes computer concepts; programming in the Basic language; building modules for computer assisted instruction and

computer aided instruction; problem solving on a microcomputer system.

SCI 515 Earth and Space Science (3 Hours) This course is the study of Earth Science, Geology, and Meteorology.

SCI 516 Physical Science I for Middle School Teachers (3 Hours) This course is the study of properties and reactions of matter.

SCI 517 Physical Science II for Middle School Teachers (3 Hours) This course is the study of Physics, Astronomy and Technology that includes: (in Physics) measurement, force, motion, energy, simple and compound machines, electricity and magnetism, sound, light and heat; (in Astronomy) stars in the night sky, solar system, lunar phases, eclipses, earth seasons, galaxies and universe.

SCI 518 Life Science for Teachers (3 Hours) This course is the study of biochemistry, the cell, genetics, organ systems, natural selection, diversity, ecology and the property and reaction of matter.

SCI 519 Environmental Science and Chemistry for Teachers. (3 Hours)

SCI 520 Methodology for Science Teaching (3 Hours) This course includes exemplary teaching strategies and research-based methods, i.e. Inquiry-based learning, cooperative learning, and the use of technology.

SCI 522 Environmental Science. (3 Hours) A general study of environmental problems created by various kinds of pollution and the effects of man's biophysical environment.

SCI 523 Seminar in Science (3 Hours) Provides the opportunity to discuss the most pertinent trends in science and to become familiar with current research.

SCI 524 Elements of Astronomy (3 Hours) Survey of solar and stellar systems, with emphasis on the historical and scientific development of astronomy.

SCI 525 Hands-on Activity in Astronomy (3 Hours) This course is support for instructional competency in astronomy in Mississippi.

SCI 551 Hands-on Universe in Mississippi I. (3 Hours) This course integrates mathematics, science and technology in the context of exciting astronomical explorations. This course addresses many of the goals set by the National Council of Teachers of Mathematics and the National Research Council for Math and Science Education.

SCI 563 Problems and Issues in Science. (3 Hours) Content in elementary science; aims and methods of instruction, new curricular developments.

SCI 552 Hands-on Universe in Mississippi II. (3 Hours) Prerequisite: SCI 551. This course integrates mathematics, science and technology in the context of exciting astronomical explorations. This course addresses many of the goals set by the National Council of Teachers of Mathematics and the National Research Council for Math and Science Education.

SCI 580 Science Technology and Environment (3 Hours) An overview of contemporary topics in science and technology. The scientific and technical materials will be covered in detail, then the social consequences

of applying or misapplying that knowledge will be examined.

SCI 581 Operation Physics I. (3 Hours) This course is the study of mechanics that includes: measurement, force and motion, simple machines and forces, and fluids.

SCI 582 Operation Physics II. (3 Hours) This course is the study of sound and light that include: measurement, sound, behavior of light, color and vision.

SCI 583 Operation Science for Teachers I. (3 Hours) This course addresses the conceptual understanding and teaching of topics related to physics, space science and meteorology. The curriculum reflects the broader effort to be more inclusive of all the topics that teachers cover in the K12 area. Objectives for the course are correlated to the Mississippi Science Curriculum Structure.

SCI 584 Operation Science for Teachers II. (3 Hours) This course addresses the conceptual understanding and teaching of topics related to physics, space science and meteorology. The curriculum reflects the broader effort to be more inclusive of all the topics that teachers cover in the K12 area. Objectives for the course are correlated to the Mississippi Science Curriculum Structure

SCI 587 Independent Study. (1-3 Hours) For students who are actively working on special projects and consulting with their major professor.

SCI 592-592W Seminar in Meteorology. (3 Hours) Presentation and discussion of special topics and research in meteorology by staff members, students and guest lecturers.

SCI 599 Thesis. (6 Hours) A minimum of 40 hours of research for the thesis must be scheduled. The thesis must show (a) mastery of the techniques of research, and (b) a very distinct contribution to the field under investigation and study.

SCI 601W Seminar in Environmental Science. (3 Hours) Advanced topics of special interest, current research, field trips, demonstrations and guest lecturers.

SCI 602 Construction of Teaching Materials for Secondary Science Instruction. (3 Hours) Special work in models, charts, graphs, photography, electrical apparatus, mechanical equipment, etc.

SCI 603 Special Topics in Science. (3 Hours) Topics of current interest, both theoretical and experimental.

SCI 604 Advanced Methods—Secondary School Science. (3 Hours) Experience with science teaching. Major trends in the new science courses and methodology programs.

SCI 605 Analysis of Science Curriculum. (3 Hours) A critical examination of contemporary and potential science curricular projects.

DEPARTMENT OF TECHNOLOGY

Dr. John Colonias, Professor and Acting Chair
P. O. Box 18480
Telephone: (601) 979-2466
Fax: (601) 979-4110
E-mail: john.a.colonias@jsums.edu

Faculty

Dr. J. Buck, Assistant Professor
Dr. J. Ejiwale, Associate Professor
Dr. I. M. Omoregie, Professor
Dr. P. C. Yuan, Professor

The Department of Technology offers the Master of Science in Education and the Master of Science in Hazardous Materials Management. The Master of Science in Education degree with a concentration in technology education is designed to improve the competencies of technology educators and administrators in secondary and post-secondary schools.

Admission Requirements

Admission to the graduate degree program in Hazardous Materials Management and Technology Education is governed by the regulations of the Graduate School.

Hazardous Materials Management

Degree Requirements

The degree options are 30 semester hours plus a thesis; 33 semester hours plus a project; or 36 semester hours of course credit.

Course	Title	Semester Hours
ITHM 520	Introduction of Hazardous Materials Management	3
ITHM 523	Statistics/Data Analysis	3
ITHM 524	Public Issues in Hazardous Materials	3
ITHM 525	Natural Resources and Conservation	3
ITHM 529	Env Toxicology and Risk Assessment	3
	<i>Hours</i>	15
Elective Courses		
ITHM 521	System Modeling	3
ITHM 522	Chemistry of Hazardous Materials	3
ITHM 526	Environmental Regulations	3
ITHM 527	Water and Wastewater Treatment	3
ITHM 528	Waste Minimization	3
ITHM 530	Industrial Waste Treatment and Tech.	3
	<i>Total Hours</i>	30, 33 or 36

Technology Education

Degree Requirements

The degree options are 30 semester hours plus a thesis; 33 semester hours plus a project; or 36 semester hours of course credit.

Course	Title	Semester Hours
TE 501	Current Literature, Issues and Research	3
TE 504	Laboratory Planning and Management	3
TE 505	History and Philosophy of Technology Education	3
TE 512	Administration and Funding	3
TE 513	Instructional Aids	3
	<i>Hours</i>	15
Courses in Education		
EDFL 514	Elementary Statistics	3
EDFL 515	Methods of Educational Research	3
EDFL 568	Curriculum Methods	3
	<i>Hours</i>	9
Elective Courses		
TE 511	Technical Education	3
TE 515	Career Education	3
TE 516	Curriculum Development	3
TE 521	Problems in Electronics	3
TE 522	Problems in Drafting/Design	3
TE 523	Problems in Metals	3
TE 524	Problems in Woods	3
	<i>Total Hours</i>	30, 33 or 36

DESCRIPTION OF COURSES

Hazardous Materials Management

ITHM 500 Graduate Research/Thesis. (1-4 hours) The student is required to select an appropriate topic with approval from advisor and do a presentation.

ITHM 520 Introduction of Hazardous Materials Management. (3 Hours) (For Non-hazardous Materials Management Majors). An introduction to contemporary national problems of air and water pollution, environmental monitoring, toxicology, hazardous waste; general problems of environmental contamination; legal and political aspects of current regulations; general scientific principles applied to the evaluation and control of specific problems.

ITHM 521 System Modeling. (3 Hours) Practical application of simulation to diverse environmental systems including air, land, surface, sub-surface, water systems and also, the hazardous materials management models.

ITHM 522 Chemistry of Hazardous Materials. (3 Hours) This course shows how chemistry can be applied to hazardous materials. The course is designed to introduce and train students' awareness of the unique requirements involved in handling hazardous materials when they are encountered in different situations, thus reducing the loss of lives and property. Prerequisite: Chemistry 135 & 235.

ITHM 523 Statistics/Data Analysis. (3 Hours) This course is designed for the development and maintenance of proficiency in statistical interface. It

contains a comprehensive overview of how statistics work in actual cases and how it can be applied in hazardous materials management. Prerequisite: Math 111, CSC 115, & 203.

ITHM 524 Public Issues In Hazardous Materials/Waste. (3 Hours) This course is an overview of the strategies, tactics and techniques regarding environmental affairs, both public and private.

ITHM 525 Natural Resources and Conservation. (3 Hours) This course is designed to give students pertinent information of our natural resources with emphasis on their origin, properties, use, misuse, and conservation practices.

ITHM 526 Environmental Regulations. (3 Hours) A study of Federal Laws and Regulations concerning hazardous materials and wastes. This course will introduce students to laws and regulations in Mississippi and the nation. The course emphasizes how to implement and comply with laws.

ITHM 527 Water and Wastewater Treatment. (3 Hours) Students will be given an overview on waste/wastewater treatment through discussions of various selected topics. The primary focus of these topics will be to introduce students to treatment methods. Prerequisite: BIO 115 and CHEM 142.

ITHM 527 Water and Wastewater Laboratory. (1 hour) This course is the supplementary course of ITHM 527; laboratory activities which develop techniques for testing water and wastewater. This will involve tests for COD, BOD, Alkalinity, Nitrogen, Colonial Count, TCLP and several other tests. Prerequisite: Bio 101, CHEM 135 & 235, and ITHM 401.

ITHM 528 Waste Minimization. (3 Hours) This course is designed to make students aware of the vast number of problems encountered as a result of disposing waste. Also, students will be given lectures on methods of recycling, reuse and reducing our waste.

ITHM 529 Environmental Toxicology and Risk Assessment. (3 Hours) This course will involve studying chemicals and harmful actions of chemicals on biological issues. This will include understanding chemical reactions and interactions of biological organisms. Students will also be introduced to scientific data and methods currently used to access human risk to environmental chemicals.

ITHM 530 Industrial Waste Treatment and Technology. (3 Hours) This course is an advanced course for hazardous waste treatment technology. It includes training in pretreatment of hazardous materials, chemical/physical process, stabilization, recovery processes, final disposal of, and secured landfill stabilization. EPA requirements for each process will be addressed in this class. Prerequisite: ITHM 302.

Technology

TE 500 Seminar/Workshop. (3 Hours) Designed for offering courses on subjects which are current and important to industrial education.

TE 501 Current Literature, Issues and Research. (3 Hours) Identification, analysis, and discussion of the periodicals, topical books, major issues, and research in the field of industrial education.

TE 504 Laboratory Planning and Management. (3 Hours) Designing various industrial education laboratories and facilities. Includes attention to purpose, recommended sizes and other specifications.

TE 505 History and Philosophy of Technology Education. (3 Hours) Factors involved in developing the trends and leaders in industrial and vocational education. Analysis of objectives, current concepts, practices and anticipated policies in industrial education.

TE 511 Technical Education. (3 Hours) Emphasis on trends, community surveys, curricula, definitions, and needs of post-secondary technical education programs.

TE 512 Administration and Funding. (3 Hours) Identifying current legislation and funding practices concerning industrial education. Function and relationship of directors, supervisors and instructors in all fields of industrial education.

TE 513 Instructional Aids. (3 Hours) Studying the many instructional aids available for teaching industrial subjects. The course includes instruction in the common audio-visual aids but also making models, cutaways and other industrial teaching aids.

TE 515 Career Education. (3 Hours) Current career education programs and their relationship to industrial education. Emphasis on integrating career education goals in industrial education with attention to the goals of each field.

TE 516 Curriculum Development. (3 Hours) Principles and techniques of designing and writing industrial education curricula. Attention will be given to goals, behavioral objectives, designing programs to meet objectives and evaluating results.

TE 521 Problems in Electricity/Electronics (3 Hours) Opportunity to study problems related to the area of electricity/electronics. Problems based on needs of students with approval of the advisor and the Dean of the School.

TE 522 Problems in Drafting. (3 Hours) Opportunity to study problems related to the area of drafting. Problems based on needs of students with approval of the Dean of the School and his advisor.

TE 523 Problems in Metals. (3 Hours) Opportunity to study problems related to the area of metals. Problems based on needs of students with approval of the Dean of the School and his advisor.

TE 524 Problems in Woodworking. (3 Hours) Opportunity to study problems related to the area of woodworking. Problems based on needs of students with approval of the Dean of the School and his advisor.

TE 581W Residential Plumbing. (3 Hours) Residential Plumbing is designed to acquaint the

student with the fundamentals of basic residential and commercial plumbing. Much of the class time will be given to hands-on activities. Graduate students in residual plumbing are required to do a research project in air-conditioning and refrigeration.

TE 590 Thesis. (3 Hours) The candidate selects an appropriate topic with approval of adviser and his committee.

TE 599 Independent Research. (1-3 Hours) Opportunities for studying special problems and doing research in the major area. Developed and defined in consultation with the professor.

TE 600 Seminar in Industrial Education. (3 Hours) Seminar in the various fields of industrial and technical education.

TE 601 Selection and Organization of Subject Matter. (3 Hours) Analysis and selection of materials for junior and senior high school, and also, adult industrial technical education.

TE 602 Evaluation of Programs of Industrial and Technical Education. (3 Hours) Evaluation principles and practices in the specialized areas of industrial arts, technical and industrial education.

TE 603 Research in Industrial Education. (3 Hours) Rationale for and methods of research in education. Emphasis is given to the identification of researchable problems and interpretation of research studies in industrial education.

TE 621 Coordination in Occupational Training and Placement Program. (3 Hours) Analysis of objectives and scope of trade and industrial cooperative education program, apprenticeship, and general education work experiences.

TE 622 Developing Occupational Curricula in Two-Year Colleges. (3 Hours) Approaches to occupational curriculum development and course construction in junior colleges. For prospective teachers and administrative personnel.

TE 688 Internship. (variable credit) Supervised graduate internship and externship in various areas of industrial education.

TE 699 Reading and Independent Study. (variable credit) Study on an individual or group basis in industrial education.

THE GRADUATE FACULTY

College of Business

- Anyamele, Okechukwu** (1996) Associate Professor of Economics, B.S., Alabama A & M University; M.B.A., Morgan State University; Ph.D., Howard University.
- Assad, Jean Claude** (1991) Associate Professor of Economics, Director of Doctoral Program. M. A., Ph.D., Howard University.
- Booker, Quinton** (1981) Professor and Chair of Accounting, B.S., M.P.A., D.B.A., Mississippi State University.
- Bsat, Mohammed Z.** (1999) Associate Professor of Management; B.S., American University of Beirut; M.B.A., Western Illinois University; Ph.D., University of Mississippi.
- Chong, Hyongsong** (2001) Assistant Professor of Management Information Systems; B.S. Yeungnam University; M.A., Ph.D., North Texas State University.
- Daniels, Bobbie** (2011) Assistant Professor of Accounting, B.S., Mississippi State University; M.P.A., Ph.D., Jackson State University.
- Didia, Dal O.** (1997) Associate Professor of Economics, B.B.A., M.B.A., East Tennessee State University, M.S., Alabama A & M University, Ph.D., State University of New York.
- Ezeala-Harris, Fidel** (2002) Professor of Business, Ph.D. University of Manitoba.
- Freeman, Patricia** (1999) Associate Professor of Economics, B.S., Spellman College; M.A., University of Kansas; Ph.D., Louisiana State University.
- Fuller, Phillip** (1986) Associate Professor of Finance and General Business, B.B.A., M.B.A., West Georgia College, D.B.A., Mississippi State University.
- Gao, Hongman** (2008) Assistant Professor of Marketing and Management, B.A., Renmin University; M.A., Graduate School of People's Bank of China; M.A., M.S., Ph.D., University of Mississippi.
- Glover, Glenda** (1994) Associate Professor of Accounting and Dean of the College of Business, B.S., Tennessee State University; M.B.A., Atlanta University; Ph.D., George Washington University.
- Granger, Maury** (2002) Interim Chair and Associate Professor of Economics, Ph.D., University of Kentucky.
- Grass-Fulgham, Gail** (1989) Professor of Economics, B.A., Alcorn University; M.A., Ph.D. Howard University.
- Grayson, Michael** (2001) Assistant Professor of Accounting, B.S.B.A., Drexel University; M.B.A., Boston University; M.Acc., Florida State University; D.B.A., Louisiana Tech University.
- Gupta, Rameshwar** (1967) Associate Professor of Accounting, B.A., Jain College, India; LL.B. Punjab University Law College, India; M.B.A., University of Mississippi; Ph.D., University of Arkansas.
- Hairston, Robert P., Jr.** (1999) Assistant Professor of General Business, B.S., St. Francis College; J.D., Antioch School of Law.
- Hill, Cecil** (2011) Associate Professor of Accounting, B.S., M.P.A., Ph.D. Jackson State University.
- Jackson, Jane** (2003) Instructor of Business, B.A., Shaw University; J.D., Vanderbilt University.
- Mosley, Alisa** (1998) Assistant Professor of Management, B.S., M.B.A., Florida A & M University; Ph.D., University of Nebraska.
- Nix, Wayne** (2011) Assistant Professor of Accounting, B.S. University of Southern, Mississippi; J.D., Mississippi College; M. Tax., Georgia State University; D.B.A., Mississippi State University.
- Perkins, Samuel** (2006) Assistant Professor of Marketing and Management. B.S., M.B.A., Ed.S., and Ed.D. Jackson State University.
- Posey, Della** (2007) Associate Professor of Entrepreneurship and Associate Vice President for Academic Affairs, B.S., M.S., Mississippi University for Women, Ph.D., Mississippi State University.
- Price, Gregory** (2006) Professor of Economics, B.A., Morehouse College; M.A., Ph.D., University of Wisconsin.
- Rana, Dharam** (1980) Professor of Management, B.S., Punjab University; M.S., Delhi University; Ph.D., University of Georgia.
- Russell, Richard** (1997) Assistant Professor of Accounting, B.S., M.B.A., Jackson State University; J.D., University of Iowa.
- Smith, James R.** (1970) Professor of Marketing and Chair of the Department of Marketing and Management, B.S., Savannah State College; M.B.A., Atlanta University D.B.A., University of Tennessee.
- Stammerjohan, Elizabeth** (2004) Assistant Professor, Management and Marketing. B.S.A, Ph.D., Mississippi State University.
- Swaidan, Ziad** (2000) Assistant Professor of Marketing, B.S., Middle East Technical University; M.A., West Texas A&M University; Ph.D., University of Mississippi.
- White, Mary** (1971) Associate Professor and Chair, Department of Entrepreneurship; B.S., Alcorn State University; M.B.E., Jackson State University; Ed.D., Northern Illinois University.
- Yu, Geungu** (1992) Associate Professor of Finance, B.A., Chungang University; B.S., Findlay College; M.A., University of Cincinnati; D.B.A., Mississippi State University.

College of Education and Human Development

- Arnold, Ronica** (2006) Assistant Professor of Counseling, B.A., Tougaloo College; M. S., Jackson State University; Ph.D., Mississippi State University.
- Bishop, Carrine** (1977) Chair and Associate Professor of Educational Leadership, B.S., Ed.S., Jackson State University; M.S., Loyala University; Ph.D., University of Mississippi.
- Brown, Loria C.** (2006) Assistant Professor of Education, B.S., M.S., Ph.D., Jackson State University.
- Brown, Walter** (2006) Associate Professor of Educational Leadership, B.S., Morgan State University; M.B.A., Atlanta University; Ed.D., George Washington University.
- Buchanan, Debra** (1995) Assistant Professor of Education, B.A., Mississippi Valley State University; M.A., University of Northern Iowa; Ph.D., Oklahoma State University.
- Channel, Linda** (2000) Associate Professor, Department of Elementary and Early Childhood Education, B.S., Jackson State University; M.S., Mississippi College; Ed.D., Jackson State University.

- Crockett, Walter** (1971) Associate Professor, Department of Counseling and Human Resources, B.S., Tuskegee University; M.A.E., Ball State University; Ph.D., The Ohio State University.
- Davidson, Stephanie** (2008) Assistant Professor of Elementary Education, B.S., M.S., Mississippi Valley State University; Ed.S., Ph.D., Mississippi State University.
- Farish, Jean** (1987) Professor and Chair, Department of School, Community and Rehabilitation Counseling, B.A., Tougaloo College; M.S.Ed., Jackson State University; Ph.D., Southern Illinois University.
- Fish, Buddy** (2004) Assistant Professor of Elementary and Early Childhood Education, B.S.Ed., M.S.Ed., University of Florida; Ed.D., Jackson State University.
- Franklin, Jacquelyn** (1976) Professor of Social Science Education, B.S., Xavier University; M.A., North Eastern Illinois University; Ph.D., Purdue University.
- Fults-McMurtery, Regina** (2005) Associate Professor of Counseling; Ph.D., Mississippi State University.
- Gaye, Zachariah** (2001) Associate Professor of Educational Foundations and Leadership, B.S., Lipscomb University; M.S., Ed.S., Middle Tennessee State; Ed.D., Tennessee State University.
- Gentry, LaVerne** (1994) Assistant Professor of Educational Administration, B.S., M.S., Ph.D., Jackson State University.
- Gentry, Rueben** (1972) Professor of Special Education, B.S., Jackson State University; M.A., Atlanta University; Ed.D., University of Florida.
- Giles, Frank** (1991) Professor of Rehabilitation and Coordinator of Rehabilitation Training Program, B.S., Troy State University; M.S., Auburn University; Ph.D., University of Wisconsin/Madison.
- Giles, Gloria** (1991) Professor of Counseling, B.A.; Southwest Texas State; M.A., University of Texas; Ed.D., Texas Tech University.
- Graves, Bettye** (2005) Assistant Professor of Educational Administration and Assistant Vice President for Enrollment Management, B.A., Millsaps College; M.B.A., Ph.D., Jackson State University.
- Harris, Tracy** (2008) Associate Professor of Elementary and Early Childhood Education, B.B.A., Ed.D. Jackson State University; M.P.A., University of Alabama at Birmingham.
- Jianjun, Yin** (1999) Associate Professor of Elementary and Early Childhood Education, B.A., Yangzhou University; M.Ed., University of Alaska-Fairbanks; Ph.D., Mississippi State University.
- Johnson, Gladys** (1988) Associate Professor of Special Education, B.S., M.S., Ed.D., Jackson State University.
- Johnson, Lakitta** (2008) Assistant Professor of Counseling, B.A., Tougaloo College; M.S., Jackson State University; Ph.D., Loyola University.
- Kincaid, Evornia** (2010) Assistant Professor of Elementary Education, B.S.B.E., University of Arkansas; M.S., University of Wisconsin-Whitewater; M.S., Ed.D., Cardinal Stritch University.
- Lackey, Tracy** (2010) Assistant Professor of Special Education, B.S., Tennessee State University; M.S.Ed., Jackson State University; Ph.D., University of Wisconsin.
- Latkier, Tony** (2007) Assistant Professor of Early Childhood Education, B.A., Tougaloo College; M.S., Ph.D., Oklahoma State University.
- Leggette, Evelyn** (1973) Professor of Reading and Dean of Undergraduate Studies, B.A., Rust College; M.S., University of Southern Mississippi; Ph.D., Southern Illinois University.
- Lewis, Rannie** (1992) Associate Professor of Guidance and Counseling, B.A. Texas Southern University; M.A., Ball State University; Ph.D., University of Georgia.
- Maddirala, James** (2000) Associate Professor of Educational Leadership, Associate Provost and Associate Vice President of Academic Affairs, B.A., Andhra University; M.A., University of Madras; M.S., Ph.D., University of Oregon.
- McLaurin, Sidney** (1995) Associate Professor of Educational Leadership, B.S., Wilberforce University; M.A., Ohio State; Ph.D., University of Southern Mississippi.
- McClinton, Jeton** (2008) Assistant Professor of Educational Leadership, B.Sc., Washington State University; M.Ed., George Washington University; Ph.D., Mississippi State University.
- Mills-Jones, Johnnie** (1987) Professor of Curriculum and Instruction and Dean of Continuing Education, B.S.; Florida A & M; M.Ed., University of Miami; Ph.D., Florida State University.
- Ngwudike, Benjamin** (2003) Associate Professor of Education Administration, B.S., Alvan Ikoku College; M.S.Ed, Ph.D., Jackson State University.
- Okojie, Felix** (1990) Professor of Education and Health Sciences and Vice President for Research and Federal Relations, B. S., Auchi Polytechnic, Nigeria; M.P.H., Jackson State University; M.A., Ed.D., Atlanta University.
- Otieno, Tabitha** (1995) Professor of Social Science, B.S., Nairobi University; M.A., Ph.D., Ohio University.
- Porter, Dion** (2002) Associate Professor, Department of School, Community and Rehabilitation Counseling, B.A., M.S., Jackson State University; Ph.D., Southern Illinois University at Carbondale.
- Renick, James** (2002) Senior Executive Assistant to the President, B.A., Central State University; M.S.W., University of Kansas; Ph.D., Florida State University.
- Robinson-Gardner, Dorris R.** (1997). Professor of Higher Education and Dean of the Division of Graduate Studies, B. S. Arkansas Baptist College, M.S.E., Ouachita Baptist University, Ph. D. University of Arkansas, Fayetteville.
- Sanders, Lou Helen** (1974) Professor of Education, Department of Educational Leadership, B.A., Ed.S., Jackson State University; A.M.L.S., The University of Michigan; Ph.D., University of Pittsburgh.
- Smith, Ingrad** (2010) Associate Professor of Education, B.A., M.S., Florida International University; Ph.D., Jackson State University.
- Taylor, Vivian** (1984) Professor of Education; B.A., M.A., Jackson State University; Ed.D., University of Cincinnati.
- Turner, M. Yvette** (2008) Assistant Professor of Educational Leadership, B.S., Mississippi College; M.S.Ed., Ph.D., Jackson State University.
- Walker, Ronald** (2002) Associate Professor of Educational Administration, B.A., Millsaps College; M.A., Mississippi State University; Ph.D., University of Southern Mississippi.
- Warner, Neri** (2007) Visiting Professor of Higher Education, B.S., Grambling State University; M.A., Atlanta University; Ph.D., Louisiana State University.
- Washington, Rodney** (2002) Chair and Assistant Professor of Elementary and Early Childhood Education, B.S., Mississippi Valley State University; M.A., Ph.D. Jackson State University.
- Watkins, Daniel** (2003) Associate Professor of Educational Leadership and Dean, College of Education, B.S., M.S., Ed.S., Ph.D., Jackson State University.
- Wiggins, Ruby** (1978) Chair and Associate Professor of Special Education, B.S., M.S., Jackson State University; Ph.D., Southern Illinois University.

- Wilson, Locord** (1998) Associate Professor of Educational Technology, B.S. Jackson State University; M.L.S., Atlanta University; Ph.D., Walden University of Minnesota.
- Windfield, Glenda** (1990) Assistant Professor of Special Education; B.M.Ed., M.M.Ed, Ed. S., Jackson State University; Ed.D., University of Southern Mississippi.
- Wright-Phillips, JoAnn** (2006) Assistant Professor of Elementary Education, B.S, M.S.Ed, Ph.D. Jackson State University.
- Yazdani, Nanolla** (2005) Assistant Professor of Counseling, B.S. National University of Tehran; M.S.Ed, Ph.D., Mississippi State University
- Yeboah, Alberta** (1997) Professor of Social Science; B.A., University of Science and Technology, Kumasi, Ghana; M.A., Ph.D., Ohio University.
- Yin, Jianjun** (1999) Associate Professor of Elementary and Early Childhood Education, B.A., Yangzhou University; M.Ed., University of Alaska-Fairbanks; Ph.D., Mississippi State University.
- College of Liberal Arts**
- Al-Fadhli, Hussain** (2005) Associate Professor of Sociology, B.A., Kuwait University, M.P.H., Jackson State University; M.S., Ph.D., Mississippi State University.
- Aworuwa, Olorundare** (1991) Associate Professor and Interim Chair of Mass Communication, B.Sc., M.B.A., Roosevelt University; M.A., Ph.D., Michigan State University.
- Banks, Pamela** (1988) Associate Professor of Psychology, B.S., Antioch College; M.S.W. MA, Ph.D., University of Southern Mississippi.
- Berhardt, Mark** (2009) Assistant Professor of History, B. A., University of California, Berkeley; M.A., California State University, Sacramento; Ph.D., University of California, Riverside.
- Blaine, Robert** (2009) Associate Professor of Music, B.M., Indiana University; M.M., Catholic University; and D.M.A., Eastman.
- Bishop, Darcie** (1988) Interim Chair and Associate Professor of Music, B.M., M.M., Julliard School; Ph.D., University of Mississippi.
- Brockley, Janice** (2009) Associate Professor of History, B.A., University of Oregon; Ph.D., Rutgers.
- Calhoun, Thomas** (2007) Interim Associate Dean and Professor of Criminal Justice and Sociology, B.A., Texas Wesleyan College; M.A., Texas Tech University; Ph.D., University of Kentucky.
- Chamberlain, Jean** (1999) Associate Professor and Chair of English, B.A., Tougaloo College; M.A. University of Dayton; Ed.D., Mississippi State University.
- Chiles, Richard** (1991) Associate Professor and Interim Chair, Clinical Psychology, B.S., Owosso College; M.S., University of North Dakota; Ph.D., Northwestern University.
- Chukwuma, Helen** (2004) Professor of English, B.A., University of Nigeria; M.A., University of California-Los Angeles; Ph.D., University of Birmingham.
- Daniels, Patsy** (2004) Professor of English, B.A., M.A., University of Nebraska; Ph.D., Indiana University of Pennsylvania.
- Davis, Dernal** (1978) Associate Professor and Chair of History and Philosophy, B.A., Jackson State University; MA, Ph.D., State University of New York-Binghamton.
- Davis, Melvin** (2002) Professor of Psychology, B. A., Oakwood College; M.A., Ph.D., University of South Carolina.
- Deardorff, Michelle D.**, (2003) Professor of Political Science, B.A., Taylor University; M.A., Ph.D., Miami University of Ohio.
- Ginn, Doris O.** (1969) Associate Professor of English, B.S., Jackson State University; M.A.T., Georgetown University; Ph.D., State University of New York at Buffalo.
- Griffin, Johnnie** (2009) Assistant Professor of Sociology, B.A., University of Wisconsin-Eau Claire, M.S., University of Wisconsin-Menomnie, M.A., American University; Ph.D., Howard University.
- Harvey, Maria Louisa A.** (1970) Professor of Modern Languages and Dean of Honors College, B.A., M.A., University of Texas at El Paso; Ph.D., University of Arizona.
- Kersen, Thomas** (2008) Assistant Professor of Sociology, B.A., Arkansas Technical University; M.S., University of Central Arkansas; Ph.D., Mississippi State University.
- Lott, William** (2005) Assistant Professor of Psychology, B.A., Millsaps College; M.S., Ph.D., University of Southern Mississippi.
- Luckett, Robert** (2009) Assistant Professor of History and Director, Margaret Walker Alexander Research Center, B.A., Yale University; Ph.D., University of Georgia.
- McDaniels, Preselfannie** (2000) Assistant Professor of English, B.A., Jackson State University; M.A., Mississippi College; Ph.D., Louisiana State University.
- McLemore, Leslie B.** (1970) Interim President and Professor of Political Science, B.A., Rust College; M.A., Atlanta University; Ph.D., University of Massachusetts.
- McLeod, Stephen** (2003) Assistant Professor of English, B.A., University of West Florida, M.A., Vanderbilt University; Ed.D., Nova Southeastern University
- McNeal, CoSandra** (1997) Professor of Sociology, B.A., Lane College; M.A., Jackson State University; Ph.D., University of Nebraska
- Moreland, Cheryl** (2008) Assistant Professor of Psychology, B. A., Tougaloo College; M.S., Ph.D., University of Southern Mississippi.
- Morgan, Etta F.** (2004) Associate Professor of Sociology and Interim Chair, B.A., M.A., M.S., Ph.D., University of Alabama.
- Morgan, Wanda** (1993) Assistant Professor of English, B.A., M.A., Jackson State University; Ph.D., Ohio State University.
- Neasman, Everett** (2010) Assistant Professor of English, B.A., University of South Florida; M.A., University of Northern Iowa; Ph.D., University of Southern Illinois.
- Nwagboso, Emmanuel** (1993) Associate Professor of Political Science, B.A., M.P.P.A, Jackson State University; Ph.D., Clark-Atlanta University.
- O'Banner-Jackson, Marie** (1977) Assistant Professor of English and Associate Dean, University College, B.S., M.A.T., Jackson State University; Ph.D., Southern Illinois University.
- Orey, Bryon** (2008) Professor and Chair, Department of Political Science; B.S., Mississippi Valley State University; M.P.A., University of Mississippi; M.A., SUNY-Stoney Brook; Ph.D., University of New Orleans.
- Owens-Sabir, Mahasin C.** (2000) Associate Professor of Sociology, B.S., M.A., Jackson State University; Ph.D., Mississippi State University.
- Park, Hyung** (2009) Assistant Professor of Political Science, B.A., Korea University, M.S., M.A., Iowa State University; Ph.D., Purdue University.
- Pate, Debra Sue** (2006) Associate Professor of Psychology, B. A., Yale University; Ph.D., University of California at San Diego.

Pizzetta, Candis W. (2003) Assistant Professor of English, B.A., University of Arkansas; M.A., Mississippi College; Ph.D., Baylor University.

Robinson, Dollye M. E. (1952) Professor of Music and Dean, College of Liberal Arts, B.S., Jackson State University; M.Mus., Ph.D., Northwestern University.

Sly, Kaye (1999) Associate Professor of Psychology, B. A., Tougaloo College; M.A., Ph.D., Southern Illinois University.

Smith-Spears, RaShell (2008) Associate Professor of English, B.A., Spelman College; M.A., M.F.A., University of Memphis; Ph.D., University of Missouri-Columbus.

Thomas, Russell (1984) Professor of Music and Director of Jazz Ensembles, B.M.E., Jackson State University; M.M.E., Michigan State University; Ph.D., University of Utah.

Ware, David (2009) Associate Professor of Music, B.M., University of Wyoming; M.M., Eastman College Business; D.M., Florida State University.

Williams, Bryam (2005) Assistant Professor Psychology, B.A., Southern University, M.A., Mississippi College; Ph.D., Jackson State University.

Williams-Anderson, Shawanda (2009) Assistant Professor of Psychology, B.A., Dillard University; M.S., Northwestern State University; Ph.D., Jackson State University.

College of Public Service

Arthur, Chris (2006) Professor of Environmental Health Education and Promotion, B.A., Dillard University; M.P.H., Jackson State University; M.A., Ph.D., Ohio State University.

Azevedo, Mario (2006) Interim Dean, College of Public Services, Chair and Professor of Epidemiology and Biostatistics, B.A., Catholic University; M.A., American University; M.P.H., University of North Carolina-Chapel Hill; Ph.D., Duke University.

Bennett, Russell (2006) Associate Professor of Health Policy and Management, B.S., M.S., University of Southern Mississippi; M.P.H., Ph.D., Jackson State University.

Bhuiyan, Azad (2008) Assistant Professor, Department of Epidemiology and Biostatistics, M.D. Sir Salimullah Medical College, Dhaka University, M.P.H., Ph.D. Tulane University.

Brown, David (2008) Assistant Professor of Behavioral and Environmental Health, B.A., University of Redlands, M.A., Ed.D., Columbia University.

Burton, Otha (1991) Associate Dean, School of Policy and Planning; Chair and Associate Professor, Department of Urban and Regional Planning, B.A., M.A.T., Jackson State University; Ph.D., Mississippi State University.

Cannon-Smith, Gerri (2004) Associate Professor of Behavioral and Environmental Health, B.S., Howard University; M.P.H., University of California-Berkeley; M.D., University of Mississippi Medical Center.

Choudhury, Khashruzzaman (2009) Associate Professor of Public Policy and Administration, B.A., University of Dhaka, M.P.A., Harvard University; Ph.D., Syracuse University.

Chestang, Leon W. (2011) Professor and Interim Associate Dean, School of Social Work, A.B., Blackburn College; M.S.W., Washington University; Ph.D., University of Chicago.

Curtis, Christopher (2009) Assistant Professor of Social Work, B.S. Jackson State University, M.S.W, Ph.D., Tulane University.

Johnson, Barbara (2006) Assistant Professor of Health Policy, B.S.N., M.S.N., University of Mississippi Medical Center; Ph.D. Georgia State University.

Kumar, Mukesh (2005) Associate Professor of Urban and Regional Planning, B.A., M.A., Delhi University; M.P.H., University of Northern Iowa; Ph.D., Cleveland State University.

Lawrence, Shonda (2003) Assistant Professor of Social Work, B.S., Western Illinois University; M.S., Chicago State University; M.S.W., Ph.D., University of Illinois-Chicago.

Lawson, Laurie (2011) Assistant Professor of Social Work, B.S.W., Mississippi College; M.S.W., University of Southern Mississippi; Ph.D., Tulane University.

Leggett, Sophia S. (2000) Associate Professor of Public Health, B.S., Ph.D., Jackson State University; M.P.H., University of Alabama.

Merem, Edmund (2003) Professor of Urban and Regional Planning, B.A., M.E.S., York University; M.A., Pontifical Latin University; Ph.D. Jackson State University.

Newkirk, Brandi (2010) Assistant Professor of Communicative Disorders, B.A., Michigan State University; M.A., Western Michigan University; Ph.D., Louisiana State University.

Nwagwu, Emeka (1987) Interim Associate Dean, School of Health Sciences, Professor, Chair of the Department of Health Policy and Management and Interim Chair, Department of Communicative Disorders, B.A, McGill University; M.P.A., Pennsylvania State University; Ph.D., Virginia Tech.

Odunsi, Bennett (1989) Associate Professor of Political Science, B.A., University of Illinois; M.P.A., Illinois Institute of Technology; Ph.D. Southern Illinois University.

Osby, Olga (2003) Associate Professor of Social Work, B.S., M.S.W, D.S.W., Howard University.

Omari, Safiya (1999) Associate Professor of Social Work, B.A., Louisiana State University; M.S., California State University-Los Angeles; Ph.D., Northeastern University.

Perkins, Issac (1999) Professor of Public Health, B.S., Tougaloo College; M.S., M.P.H., M.D., Harvard University.

Radford, Nola (2005) Professor of Communicative Disorders, B.A., University of Arkansas, M.S., University of Arkansas for Medical Sciences; Ph.D., Memphis State University.

Santos, Evandro (2008) Assistant Professor of Urban and Regional Planning, B.S., Pontific Catholic University; M.S., University of Brasilia; Ph.D., University of San Paolo.

Shahbazi, Mohammed (1999) Professor and Chair of Behavioral and Environmental Health M.S., National University; M.P.H., University of California-Los Angeles; M.A., Ph.D., Washington University.

Spence, Susie A. (1998) Professor and Ph.D. Program Director, School of Social Work, B.A., Florida A&M University; M.S.W, M.P.H, University of Pittsburgh, Ph.D., Florida State University

Wesley, Joan (2007) Assistant Professor of Urban and Regional Planning, B.A., Benedict College; M.A., Ph.D., Jackson State University.

Whaley, Arthur (2010) Professor, Department of Epidemiology and Biostatistics, A.B. Princeton University; M.S., Ph.D, Rutgers University; M.P.H., Dr.P.H. Columbia University.

College of Science, Engineering, and Technology

Abed, Khalid (2006) Associate Professor of Computer Engineering, B.S. M.S., Ph.D., Wright State University.

Ali, Kamal (2006) Professor of Computer Engineering, B.S., M.S., University of Khartoum; M.S. West Virginia University; Ph.D., Reading University.

Aliabadi, Shahrouz (2005) - Northrop Grumman Professor of Engineering, Ph.D. University of Minnesota.

Amini, Farshad (2000) Professor and Chair of Civil and Environmental Engineering, B.S., M.S., University of Kansas; Ph.D., University of Maryland.

Ahmad, Hafiz (2007) Assistant Professor of Biology, B.Sc., M.S., University of Agriculture, M.B.A., Auburn University; M.A., Troy State University; Ph.D., Michigan State University.

- Arslan, Zikri** (2003) Assistant Professor of Chemistry, B.S., M.S., Bogazici University; Ph.D., University of Massachusetts-Amherst.
- Aouina, Mokhtar** (2006) Assistant Professor of Mathematics, B.A., University of Tunis; M.S., Laval University; Ph.D., Wayne State University.
- Arslan, Zikri** (2003) Assistant Professor of Chemistry, B.S., M.S., Bogazici University; Ph.D., University of Massachusetts-Amherst.
- Ayensu, Wellington** (2002) Assistant Professor of Biology, B.S. East London University; M.S. Brunel University; M.D., Universidad Central de Este.
- Begonia, Gregorio** (1992) Acting Chair and Professor of Biology, B.S., M.S., University of the Philippines at Los Banos; Ph.D., Mississippi State University.
- Begonia, Maria** (2000) Professor of Biology, B.S., M.S., University of the Philippines at Los Banos; M.S., Mississippi State University; Ph.D., University of Missouri.
- Brown, Willie G.** (1993) Vice President for Information and Process Management and Associate Professor of Computer Science, B.A., M.S., Ph.D., Wayne State University.
- Buck, Jessica** (2006) Assistant Professor of Technology, B.S., Alcorn State University; M.S.T., Ph.D. Mississippi State University.
- Buckley, Cedric O.** (2003) Assistant Professor of Biology, B.S., Jackson State University, Ph.D., Michigan State University.
- Cameron, Joseph** (1974) Professor of Biology, B.S., Tennessee State University M.S., Texas Southern University Ph.D., Michigan State University.
- Campbell, Naomi** (2004) Associate Professor of Chemistry, B.S., Tougaloo College; Ph.D. University of Southern Mississippi.
- Chen, Daning** (2004) Assistant Professor of Mathematics, B.S., Nanjing Normal University; M.S., University of South Alabama; Ph.D., University of Wisconsin-Milwaukee.
- Chighu, Paulinus** (1998) Associate Professor of Biology, B.S., M.S., University of Benin, Nigeria; Ph.D., University of Washington.
- Cho, Hyun Jung** (2005) Assistant Professor of Biology, B.S., Sung-Shin Women's University; M.S., Ph.D., University of New Orleans.
- Cohly, Hari** (2006) Assistant Professor of Biology, B.A., University of Toronto; M.S., Ph.D. State University of New York-Buffalo.
- Colonias, John** (2006) Interim Chair and Associate Professor of Engineering, B.S.E.E., Oregon State University; Ph.D., Institute of Physics, University of Uppsala.
- Course, Dan** (1970) Assistant Professor of Mathematics, B.S., Jackson State University; M.A., University of Virginia.
- Cruz-Riveria, Edwin** (2006) Assistant Professor of Biology, B.S., University of Puerto Rico- Mayaguez; Ph.D., University of North Carolina-Chapel Hill.
- Diatta, Bassirou** (2004) Associate Professor of Mathematics, B.S., M.S., Dakar University; Ph.D., Howard University.
- Ejiwale, James** (2004) Associate Professor of Technology, B.S., M.S., Central Connecticut State University; Ph.D., Ohio State University.
- Ekunwe, Stephan** (1999) Associate Professor of Biology, B.S., M.S., Jackson State University; Ph.D., Michigan State University.
- El-Bawab, Tarek** (2006) Assistant Professor of Computer Engineering, B.A., Ain Shann University; M.S., American University of Cairo; M.S., University of Essex; Ph.D., Colorado State University.
- Eldek, Abdelnassar** (2006) Associate Professor of Computer Engineering, B.S., Zagazig University; M.S., Technical University of Eindhoven; Ph.D., University of Mississippi.
- Evans, Barbara** (2006) Assistant Professor of Environmental Science, B.S., M.S., Ph.D. Jackson State University.
- Farah, Ibrahim** (1998) Associate Professor of Biology, B.V.S., M.V.S., University of Khartoum, Sudan; M.S., The Royal Agricultural University, Denmark; M.P.H., Ph.D., University of Minnesota.
- Gao, Roumei** (2005) Assistant Professor of Chemistry, B.S., M.S., Hebei University; Ph.D., University of Science and Technology of China.
- Gentry, Roosevelt** (1974) Professor of Mathematics, B.S., Jackson State University; MS., Ph.D., Rutgers University.
- Ghirmai, Tadesse** (2006) Assistant Professor of Computer Engineering, B.S., Addis Abba University; M.S., University of Southern Florida; Ph.D., State University of New York-Stoney Brook.
- Gompa, Raghu** (2004) Professor of Mathematics, B.S., M.S., Andhra University; Ph.D., University of Toledo.
- Gompa, Vijaya** (2004) Associate Professor of Mathematics, B.S., M.S., Andhra University; Ph.D., University of Toledo.
- Hamadian, Elgenaid** (1999) Associate Professor of Biology, B.S., University of Alexandria, Egypt, M.S., Ph.D., Mississippi State University.
- Hamme, Ashton** (2000) Assistant Professor of Chemistry, B.S., Jackson State University; Ph.D., Ohio State University.
- Harbour, Mercer** (1985) Assistant Professor of Mathematics, B.S. Rust College; M.S., Howard University.
- Hardy, Mark G.** (1987) Professor of Biology and Provost and Vice President for Academic Affairs, B.S, M.S., Jackson State University; Ph.D. University of Alabama.
- Hill, Glake** (2004) Assistant Professor of Chemistry, B.S., Tougaloo College; Ph.D., Jackson State University.
- Holbrook, Edna** (1988) Assistant Professor of Mathematics, B.S., Millsaps; M.S. University of Southern Mississippi; Ed.S., Mississippi State University.
- Hong, Sungbum** (2003) Assistant Professor of Computer Science, B.E., KookMin University; M.S., University of Tennessee; Ph.D., University of North Texas.
- Hossain, Md. Alamgir** (2005) Associate Professor of Chemistry, M.Sc., Dhaka University; Ph.D., Hokkaido University.
- Howard, Carolyn** (1996) Associate Professor of Biology, B.S., Jackson State University; Ph.D., University of Mississippi Medical Center.
- Huang, Ming-ju** (2000) Associate Professor of Chemistry, B.S., National Taiwan University; Ph.D., University of California.
- Humos, Ali Abu-El** (2006) Assistant of Computer Science, B.S., University of Jordan; M.S. Ph.D., Florida Atlantic University.
- Hwang, Huey-Min** (1990) Professor of Biology, B.S., National Taiwan University; Ph.D., University of Georgia.
- Isokpehi, Raphael** (2004) Assistant Professor of Biology, B.Sc., Edo State University; M.Sc., Ph.D., University of Lagos.
- Izevbogie, Ernest** (1999) Associate Professor of Biology, B.S., Tennessee State University; M.S., University of Tennessee; Ph.D., Michigan State University.
- Kafoury, Ramzi** (1999) Assistant Professor of Biology, B.S., M.P.H., American University of Beirut; Sc. D., Tulane University.
- Khadivi, Mohammed R.** (1988) Professor of Mathematics, B.S., Tehran Teacher Training University, M.S., Jondi-sharpour University; M.S., Ph.D., Georgia Institute of Technology.

- Kim, Hyunju** (2003) Associate Professor of Computer Science, B.A., M.S., Sookmyung Women's University; M.S., State University of New York, Institute of Technology; Ph.D., George Washington University.
- Kim, Yungkul** (2011) Assistant Professor of Biology, B.S., Pukyong National University; M.S., Texas A&M University; Ph.D., Rutgers University.
- Kwembe, Tor A.** (2004) Professor and Chair of Mathematics, B.Sc., University of Calabar; M.S., University of Illinois-Urbana; Ph.D., University of Illinois-Chicago.
- Lee, Ken S.** (1988) Professor of Chemistry, B.S., M.S., Yonsei University; Ph.D., Brown University.
- Leszczynska, Danuta** (2006) Professor of Civil Engineering and Biology, B.S., M.S., Ph.D., Technical University of Wroclaw.
- Leszczynski, Jerzy** (1990) Distinguished Presidential Professor of Chemistry, B.S., M.S., Ph.D., Technical University of Wroclaw.
- Li, Lin** (2005) Associate Professor of Civil Engineering, B.S., M.S., Sun Yat Sen University; M.S., University of Hong Kong; Ph.D., University of Wisconsin.
- Li, Yadong** (2002) Associate Professor of Civil Engineering, B.S., M.S., Ph.D., Tsinghua University.
- Liang, Xuejun** (2002) Associate Professor of Computer Science, B.S., Beijing University of Science and Technology; M.S., Beijing Normal University; Ph.D., Wright State University.
- Liu, Robin** (2006) Assistant Professor of Computer Engineering, B.S., National Chiao Tung University; M.S., National Cheng Kung University; M.S., Ph.D., University of Texas at Austin.
- Liu, Yiming** (1996) Associate Professor of Chemistry, B.S., Ph.D., University of Hunan.
- Malluhi, Qutiabih** (1994) Associate Professor of Computer Science, B.S., M.S., KFUPU of Petroleum and Minerals, Saudi Arabia; M.S., Ph.D., University of Southwestern Louisiana.
- Manzoul, Mahmoud** (2006) Professor of Computer Engineering, B.S.E.E., University of Khartoum; M.S.E.E., Ph.D., West Virginia University.
- Meghanathan, Natarajan** (2006) Associate Professor of Computer Science, B. Tech., Anna University; M.S., Auburn University; Ph.D., University of Texas at Dallas.
- Meyers, Carolyn W.** (2011) President and Professor of Engineering, B.S., Howard University; M.S., Ph.D., Georgia Institute of Technology.
- Miller, Gloria** (2010) Assistant Professor of Biology, B.S., M.S., Ph.D., Jackson State University; M.P.H., University of Alabama at Birmingham.
- Mohamed, Abdul K.** (1977) Professor of Biology and Dean Emeritus, College of Science, Engineering and Technology, B.S.C., Punjab Agricultural University; M.S.C., Rutgers University; Ph.D., Mississippi State University.
- Moore, Loretta** (1998) Associate Professor and Interim Associate Dean, School of Science and Technology, B.S., Jackson State University; M.S., Ph.D., Illinois Institute of Technology.
- Ndebele, Kenneth** (2006) Assistant Professor of Biology, B.S., Boston University; M.S., Ph.D., Jackson State University.
- Noe, Eric** (1977) Professor of Chemistry, B.S. University of Cincinnati; Ph.D., California Institute of Technology.
- Omorie, Idehen** (1993) Professor of Technology, B.S., M.S.Ed., Ed.S., Jackson State University; Ed.D., University of Akron.
- Pan, Yi-Chuan** (1973) Professor of Mathematics, B.S., National Taiwan University; M.S., Kansas University; Ph.D., University of Notre Dame.
- Patlolla, Anita** (2004) Assistant Professor of Biology, B.S., M.S., Osmania University; Ph.D., Jackson State University.
- Pei, Tzusheng** (2001) Associate Professor of Chemistry, B.S., M.S., National Tsing Hua University; M.S., University of Lowell; Ph.D., University of Tennessee.
- Rahman, Shikha** (2002) Assistant Professor of Civil Engineering, B.S., M.S., Bangladesh University of Engineering and Technology; Ph.D., Georgia Institute of Technology.
- Ray, Paresh** (2002) Assistant Professor of Chemistry, B.S., Vidyasagar University; M.S., Kalyani University; Ph.D., Indian Institute of Technology.
- Reddy, Remata** (2009) Associate Professor of Physics, B.Sc., Omania University; M.Sc., Andhra University; Ph.D., University of Poona.
- Shahbazy, Tigran** (2007) Associate Professor of Physics, M.S., ITEP-Moscow; Ph.D., University of Utah.
- Shih, Hui-Ru** (1988) Professor of Technology, M.S., Ph.D., University of Missouri.
- Shin, Hak-Chul** (2001) Assistant Professor of Civil Engineering, B.S. Asian Institute of Technology; M.S., Yousei University; Ph.D., University of Illinois.
- Skelton, Gordon** (2006) Professor of Computer Engineering, B.A., McMurtry College; M.S. University of Southern Mississippi; Ph.D., University of South Africa.
- Sobolev, Dimitri** (2006) Assistant Professor of Biology, B.Sc., Yaroslavl State University; Ph.D., University of Alabama.
- Soh, Celestin Wafo** (2006) Associate Professor of Mathematics, B.S., University of Yaounde; M.S., Ph.D., University of Witwatersrand.
- Stevens, Jacqueline** (1999) Associate Professor of Biology, B.S., Jackson State University; M.S., Ph.D., University of California-Santa Barbara.
- Sullivan, Richard** (1974) Professor Emeritus of Chemistry, B.S., South Carolina State College; M.S., Ph.D., Howard University.
- Sutton, Dwayne** (2004) Assistant Professor of Biology, B.S., Kentucky State University; M.S. Mississippi Valley State University; Ph.D., Jackson State University.
- Tachikawa, Hiroyasu** (1977) Professor of Chemistry, B.S., Rikkyo University; Ph.D., University of Texas.
- Tchounwou, Paul** (1996) Distinguished Presidential Professor of Biology, Interim Dean, College of Science, Engineering and Technology and Director of the Environmental Science Doctoral Program, B.Sc., M.Sc., University of Yaounde; M.S.P.H., Sc.D., Tulane University.
- Tuluri, Francis** (2001) Associate Professor of Technology; B.S., Andhra Christian College; M.S., Andhra University; Ph.D., Nagarjuna University.
- Venkatraman, Ramaiyer** (1990) Associate Professor of Chemistry, B.S., M.S., Ph.D., Venkateswara University College.
- Wang, Feng** (2007) - Assistant Professor of Civil and Environmental Engineering, Department of Civil and Environmental Engineering, B.S., University of Aeronautics and Astronautics, M.S., Tianjin University; Ph.D., University of Texas at Austin.
- Watson, Angela** (2000) Assistant Professor of Biology, B.S., Tougaloo College, M.S., Ph.D., Mississippi State University.
- Watts, John** (1999) Associate Professor of Chemistry; B.S., Ph.D., University of Sussex.

- Wicks, John A., Jr.** (1998) Assistant Professor of Computer Science, B.S., Alcorn State University; M.S., North Carolina A & T University; Ph.D., Virginia Polytechnical Institute and State University.
- Williams, Quinton** (2010) Professor, Department of Physics, Atmospheric Sciences, and General Sciences, B.S., Jackson State University, M.S., Ph.D., Georgia Institute of Technology.
- Wilson, Barbara** (1997) Associate Professor of Biology, B.S., Jackson State University; M.S., Tennessee State University; Ph.D., University of Missouri-Columbia.
- Yedjou, Clement** (2009) Assistant Professor of Biology, B.S., University of Yaounde; M.S., Ph.D., Jackson State University.
- Yu, Hongtao** (1996) Professor and Chair of Chemistry and Biochemistry, B.Sc., University of Science and Technology of China; M.Sc., Institute of Chemistry, Chinese Academy of Science; Ph.D., Technical University of Munich.
- Yuan, Pao-Chiang** (1988) Professor of Technology. B.S., Chinese Culture University; M.S., South Dakota School of Mines; Ph.D., Oklahoma State University.
- Zhang, Zhenbu** (2004) Associate Professor of Mathematics, B.S., Shangdong University; M.S., Academie Sinica; M.S., Ph.D., Tulane University.
- Zheng, Wei** (2009) Associate Professor of Civil Engineering, B.S., M.S., Tongji University, M.S., Ph.D., University of Wisconsin.
- Zubkowski, Jeffrey D.** (1985) Professor of Chemistry, and Associate Dean, Division of Graduate Studies, B.S., University of Pittsburgh; Ph.D., Indiana University.

Application Guidelines and Information

Admission is granted jointly by the Division of Graduate Studies and the program in which the student plans to study. Each program has its own procedures for evaluating applications. The program recommends admission to the Division of Graduate Studies and the Division of Graduate Studies, in turn, monitors procedures and minimum requirements and makes the final decision on your admission. It is the applicant's responsibility to ensure that all admission documents are received in the Graduate School on or before the application deadline. All credentials submitted on behalf of an applicant become the property of the University and may be maintained for up to one year. Materials from applicants who do not submit all requested material may be shredded and discarded after one year.

Instructions: Complete and submit the enclosed application to the Office of Graduate Admissions, The Division of Graduate Studies, Jackson State University, P. O. Box 17095, Jackson, MS 39217-0195. Out-of-state and international applicants must submit a non-refundable \$25.00 application fee to the Division of Graduate Studies with the application. Only Money orders and certified checks are accepted. All required information **MUST** be received by the deadlines:

- ☐ By the Division of Graduate Studies - Graduate School Application for Admission, two official transcripts from all universities attended, Immunization Record showing proof of immunization compliance for measles and rubella, if born after Dec. 1957 and if required, official TOEFL score and application fee of \$25.00.
- ☐ By the department/program - official test scores, three letters of recommendation and other required materials.

Application Deadlines

<i>General</i>	
<i>Semester</i>	<i>Deadline</i>
Fall	March 1
Summer	March 15
Spring	October 15

Deadlines for Specific Programs

January 15 - SUMMER enrollment only

M.S. in Educational Administration & Supervision

January 15 - SUMMER/FALL enrollment only

Specialist in Education (Ed.S.)

<i>FALL enrollment only</i>	
Jan. 15	Ph. D. in Educational Administration Ph.D. in Urban Higher Education Ph. D. in Clinical Psychology
March 1	M.P.H. and Dr.PH. In Public Health M.S., & M.S.Ed. in Guidance M.S. in Rehabilitation Counseling M.S.W. & Ph.D. in Social Work M.S. in Communicative Disorders Ph. D. in Public Administration Ph. D. in Environmental Science M.A. in Sociology M.A. in Criminal Justice Ph.D. In Urban and Regional Planning
March 15	Ph.D. in Business Administration Ed. D. in Early Childhood Education

Once all required information is received by the Graduate Admissions Office a transmittal packet is sent to the appropriate department for its decision. Once the Division of Graduate Studies receives a recommendation from the graduate faculty of the department and the College Dean or designee, applicants are notified by the Graduate Dean of the decision to admit, conditionally admit, or deny. Once an admission decision is made, the decision is valid for 12 months for purposes of initial enrollment.

Admission Requirements for the Masters' Level

1. The Graduate Application for Admission.
2. Two official copies of transcripts from all colleges/universities attended.

Students admitted to the Graduate School at the Masters' level are classified as:

- ☐ **Regular status is awarded to students who have a minimum GPA of 3.00 (on a 4.00 Scale) at the undergraduate level and are admitted to a degree program.**
- ☐ **Conditional status may be assigned to students who possess a cumulative GPA of at least 2.50 - 2.99 at the undergraduate level (on 4.0 scale) and are admitted to a degree program.**

Admission Requirements for Specialist Degrees

1. The Graduate Application for Admission,
2. A masters' degree with the department required minimum GPA.
3. Two official copies of transcripts from all colleges/universities attended.

Admission Requirements for Doctoral Degrees

1. The Graduate Application for Admission.
2. Two official copies of transcripts from all colleges and or universities attended, a Master's degree or a baccalaureate degree from an accredited college or university depending on specific program requirements, and minimum GPA of 3.00 and the program required minimum GPA on the highest degree earned.

Information for International Applicants

1. A Certified Financial Support document must be forwarded to the Office of International Programs prior to an I-20 form being released for the student visa. The International Student Advisor will issue an I-20 form to new international students who are accepted to attend a full course of study at Jackson State University.
2. Official copy of the TOEFL or IELTS score (TOEFL scores are valid for five years after the test date. Older scores will not be accepted) and a application fee of \$25.00 must be submitted to the Graduate School.
3. Two official copies of translated college/university transcripts must be submitted to the Graduate School.
